Linen Yarn	243,938

Machinery	£1,072,831
Metals	1,515,812
Oil	343,919
Oil Cloth	165,389
Ships and Boats	161,795
Skins and Furs	419,990
Wool	125,155
&c. Yarn	258,069
Manufacts.	735,758

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1912) of 105 vessels (81,637 tons), in addition to which there were 453 fishing boats. In 1912, 9,268 foreign vessels entered at Belgian ports (tonnage 14,497,101). In 1912 there were 4,719 kilometres of railway (including branch lines and 350 kilometres of private lines rented by the State); the telegraphs had a length of 7,975 kilometres (1911), and the post-office carried 218,000,000 letters, 123,000,000 post-cards, while 22,000,000 telegrams were sent in 1911. The navigable rivers and canals have a length of 2,179 kilometres (1911), and there are 9,757 kilometres of roads.

THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of 18 Oct., 1908.

The total area amounts to 802,000 sq. miles, with a native population estimated at not more

than 15,000,000. The total European population (Jan., 1912) was 5,465, of whom 379 were British, 48 Americans, 278 Italians, 303 Portuguese, 177 Swedes, 150 Germans, and 3,307 Belgians. The river is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 240 miles in length. There is also a second line, 60-centimetre gauge, from Boma to the Mayumbe country. The Great Lakes Railway has a line from Stanleyville to Ponthierville, 125 kilometers, and another line from Kinder to Kongolo, 355 kilometers. A line of telegraph is open to Coquilhatville. There is telegraphic communication with Europe. A terrible disease, called "Sleeping Sickness," for which no remedy has yet been discovered, has of late years made increasing ravages upon the native population. However, the disease seems to have attained its highest point of severity, and in several districts is decreasing. There are undoubtedly many fertile tracts, more especially along the rivers; but barren mountain-land shuts out the coast from the more productive interior. The exports consist mainly of rubber (three-fifths of whole), palm-kernels, palm-oil, ivory, and a few minor articles. The coffee plant and cotton grow wild, and coffee, cocoa, and tobacco have been planted with success. Iron, copper, and other minerals have been found. Revenue (1912), £1,714,705; expenditure, £2,758,294; imports (1912), £2,154,713; exports (1912), £2,365,015. Capital, Boma (pop. 3,300). Matadi has about 4,000 inhabitants.

Boma (Congo)—Consul, W. J. Lamont ... £1,050
Kasai District—Vice-Consul, H. H. Castens

Elisabethville—V.-Con., F. W. Manners 700

Leopoldville—V.-Con., J. E. Bell £530 to 730

Stanleyville—V.-Con., R. I. Purdon ... 500 to 700

Interior, Dr. Claudio Pinilla.

Finance, Dr. Casto Rojas.

Education & Agriculture, Dr. Carlos Calvo.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Col. Don Pedro Suarez.

Offices of Legation, 74 Compayne Gardens, N.W.
Consulate-General, 81 Cannon Street, E.C.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is about 567,498 square miles, with a population in 1911 estimated at 2,200,000. The peace army amounts to about 3,000 men, the war effective being about 90,000. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible; while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; tin, copper, lead, antimony, wolfram, bismuth, salt and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao,

potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver and copper are its principal exports; its chief imports being iron, cotton and woollen goods, hardware, and silks. There are about 450 miles of trunk lines of railway and 2,896 miles of telegraph wire. There is direct railway communication with La Paz from Antofagasta (Chile), and from Rio Mulato (near Uyuni) to Potosí; branch lines are under construction from Oruro to Cochabamba; from La Paz to Arica and to Puerto Pando; and from Guaquí to Puno, in Peru. Communication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railway at Puno. A line is under construction from San Antonio (Brazil) to Villa Bella in Bolivia; 65 miles are in operation and 150 left to complete, when it will connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Buenos Aires to Bolivia is complete to La Quiaca.

Consul-Gen. in Liverpool, Lully José de Souza.

Brazil, the most extensive State of South America, extends between lat. 4° 22' N. and 33° 45' S. and long. 34° 40' and 73° 15' W., and comprises an area of 3,298,870 square miles, with a population estimated at 21,580,000, of whom

about 1,000,000 are "wild" Indians. For Army see p. 781; the Navy (1913) consisted of 3 Dreadnoughts, 2 old battleships, 5 protected cruisers and other smaller craft, including 11 torpedo boat destroyers, and 3 submarines. There are 42 ports along the coast, of which the principal is Rio, with a shore line of 123 miles. Brazil is unequalled for the number and extent of its rivers: the Amazon, with its immediate tributaries, and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods adapted for dyeing, cabinet work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cattle raising is an important industry, the number being computed at 18,000,000. Cotton is being largely cultivated for export, and is being used for home manufactures. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos; and coffee, though also grown in the north, comes chiefly from Rio de Janeiro, Minas, São Paulo, and Espírito Santo. Tobacco and cocoa are grown largely, especially in Bahia. The exports consist solely of the raw produce of the soil. The imports consist principally of every description of manufactured articles, but there were in 1908 no fewer than 1,541 industrial establishments including 161 cotton-mills, giving employment to 45,942 hands, and representing an invested capital of £14,000,000. The enormous protective duties were again increased in 1887, 1893, 1896 and 1906. In December, 1910, there were 13,611 miles of railway open and 1,683 miles under construction. Length of telegraph wires in 1910 74,327 miles.

For Education, see p. 784.

Estimated Revenue (1911 and 1912):—

The kingdom of Bulgaria is bounded on the north by Rumania, on the west by Servia and Greece, on the east by the Black Sea, and on the south by the Turkish province of Adrianople and the Aegean Sea. The kingdom is governed by a King and a Council of Ministers, with a single chamber, popular legislature (Sobranjé, or National Assembly) and constitutional government.

Bulgaria was created by the Treaty of Berlin, 13 July, 1878, and in 1885 Eastern Roumelia was added to the newly created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in August 1913 a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. The present area of Bulgaria is about 42,000 square miles, with a population of about 5,500,000. The prevailing religion of the Bulgarians is the Orthodox Greek Church.

Defence (for Army, see p. 779).—The Navy consists of a torpedo gunboat and a few small steamers.

Education (see p. 784).

Trade, etc.—The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum, and other oils, paper, salt fish, rice and coal. The principal towns, with their populations at the census of 1910, are Sofia (102,812), Philippopolis (47,981), Varna (41,491), Rustchuk (36,255), Sliven (25,142), Plevna (23,019), and Shumla (22,225). The principal ports are Varna and Bourgas. In 1910, 6,820 vessels (1,988,492 tons) entered and cleared at ports on the Black Sea. There were 1,250 miles of railway open in 1912 and about 160 miles under construction; 3,688 miles of telegraph and 1,170 of telephone wires.

 church Street, E.C.

A State of South America, of Spanish origin,
 lying between the Andes and the shores of the
 South Pacific, extending coastwise from the Rio
 Sama to Cape Horn south, between lat. 18° 28' and
 56° 35' S., and long. 66° 30' and 75° 40' W. Extreme
 length of coast-line about 2,485 miles. Its ex-
 treme length is about 2,800 miles, with an average
 breadth, north of 41°, of 100 miles. The great
 chain of the Andes runs along its eastern limit,
 with a general elevation of 5,000 to 10,000 feet
 above the level of the sea; but numerous summits
 attain the height of 18,000 feet—the highest,
 Aconcagua, an extinct volcano, being 22,422 feet.
 The chain, however, lowers considerably towards
 its southern extremity. There are no rivers of
 great size, and none of them are of much
 service as navigable highways. In the north the
 country is arid. Chile is divided into 21 provinces
 and 3 territories, the aggregate area of which is
 estimated at 294,665 square miles, with a popula-
 tion (1912) of about 3,500,000, exclusive of Arau-
 canians, Bolivian and American Indians,
 numbering about 50,000. The principal towns,
 with their estimated populations (1910), are:—
 Santiago (355,000), Valparaiso (200,000), Con-
 cepcion (62,000), Talca (45,000), Iquique (45,000),
 Chillan (35,000), and Antofagasta (32,000).
 Agriculture and mining are the principal occupa-
 tions. Wheat, maize, barley, oats, beans, peas,
 lentils, wines, tobacco, flax, hemp, Chile pepper,
 and potatoes are grown extensively; the vine and
 all European fruit-trees flourish. The live stock
 includes about 1,000,000 cattle, 1,500,000 sheep,
 200,000 horses, 170,000 goats and 150,000 pigs.
 The mineral wealth is considerable, the country
 being extremely rich in copper-ore, and some rich
 gold mines have been discovered. The rainless
 north yields more especially nitrate of soda, iodine,

borate of soda, gold and silver, a large number of
 mines yielding both being in actual work in
 Tarapacá, Guanaco, and Cachinal in Atacama, and
 Caracoles in Antofagasta; the centre, copper and
 silver; and the south, iron and coal. Of the
 total amount of nearly £28,000,000 invested in
 the nitrate industry of Chile, about £11,000,000
 is British capital. The nitrate exports in 1911-12
 were valued at £20,350,000. There are smelt-
 ing-works for copper and silver, tanneries, corn
 and saw mills, starch, soap, biscuit, rope, cloth,
 cheese, furniture, candle, and paper factories,
 breweries and distilleries, and the domestic
 industry furnishes cloth, embroideries, baskets,
 and pottery. The many ports favour commerce,
 and six lines of steamers connect the country
 with Panama and the Magellan Strait direct
 with Europe, a passage to Liverpool occupying
 from 40 days. There are (1910) about 3,634 miles
 of railway open and 1,552 miles under construc-
 tion, nearly 15,000 miles of telegraph, over 850
 post-offices, and 8,000 miles of telephone, the last
 worked by an English company. The commer-
 cial marine numbers (1911) 98 steamers (114,887
 tons) and 41 sailing vessels (36,331 tons). In
 1907, 2,900 foreign vessels of a total tonnage of
 6,500,000 entered at Chilean ports. The staple
 articles of export are nitrate of soda, iodine,
 &c., copper bars, ores, silver ores, corn,
 flour, hides, and guano. The imports include
 silks, woollens and other textiles, food, and
 machinery.

Defence (for Army, see p. 779).—The navy con-
 sists of 1 battleship, 2 armoured cruisers, and
 4 protected cruisers; two Dreadnoughts and
 4 ocean t.b.d.'s are projected (see also p. 736).

Education (see p. 784).

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper	1,501,000	402,000,000
Manchuria	360,000	11,000,000
Mongolia	1,076,000	3,000,000
Tibet	750,000	3,000,000
Eastern Turkestan ...	600,000	2,000,000
Total	4,287,000	421,000,000

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000. The civil government of the 18 provinces is entrusted to viceroys and governors,

and under them each province is subdivided into circuits superintended by *taotais* or intendants, and again into prefectures and districts. All the territorial officials are appointed by the Imperial Government, and the provincial viceroys and governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The administration of Mongolia and Turkestan is entrusted to Military Lieutenant Governors, who, with the Chinese officials in Tibet, are under the direction of the *Mongolian Superintendent*, or Colonial Office, in Peking.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question, and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important, and for many years Great Britain's share of it was greatly predominant. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Korea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of £65,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties:—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatungkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsin-mintun, Tung-chiang-tzu (on the Liao River), and Fa-ku-men in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunch'un, and Sausing in the Kirin Province; and Tsitsihar, Hailar, Aihun, and Manchuli in the Heilungchiang Province.

Latest estimates of the foreign residents at the open ports of China are as follows:—British, 10,140; Japanese, 65,434; Americans, 3,176; Russians, 49,395; Germans, 4,106; French, 1,925; Portuguese, 3,377; Spaniards, 400; Italian, 274; Danes, 260; other nationalities, 3,381; the total being 141,868. Out of a total of 3,239 foreign firms in China 601 are British, 1,601 Japanese, 238 German, 100 American, 110 French, 57 Portuguese, and 84 Spanish.

DEFENCE (for Army, see p. 781).—The navy has not recovered from the effects of the Sino-Japanese war, when more than ten important war vessels were sunk or captured. China now possesses 2 second-class cruisers (4,300 tons), and 11 third-class cruisers (875–2,500 tons); 3 torpedo gunboats (349–1,000 tons), 4 gunboats (215–411 tons), 32 first-class torpedo boats, and 12 second-class torpedo boats. Most of these were launched between 1885 and 1902. Of the torpedo boats about half only are fit for action. Four destroyers, built in 1898–9, were captured by the Allied Forces in 1900, and were appropriated by Great Britain, France, Germany and Russia respectively. Full complement of the navy is about 2,500. (See also p. 778.)

EDUCATION.—During the year 1910 many changes in administration and development were under discussion, and the contemplated establishment of a university at Peking was carried out (see p. 784).

COMMERCE.—The foreign trade of China was shared by the nations of the world as under in 1912:—

British.	%	Foreign.	%
Great Britain	13	Japan	17
Hong Kong	30	U.S.A.	8
India	6	Europe (exc. Russia) ..	14
Other British Dominions	2	Russia	8
% British	51	Other countries	2
		Foreign	49

TRADE WITH UNITED KINGDOM.

Imports of British produce and manufacture, 1912, £10,780,042:—

Boats and Ships ..	£205,372	Machinery	£265,963
Cottons	6,737,161	Tobacco	885,930
Iron Manufactures ..	426,095	Woolens	664,385

Exports to U.K., 1912, £4,933,015:—

Bristles	£230,974	Skins and Furs ..	£239,157
Hair	210,316	Soya Beans	545,289
Oil	169,392	Straw Platings ..	199,137
Peas and Beans	315,577	Tallow	146,162
Raw Silk	774,697	Tea	792,205
Silk Manufactures ..	187,460	Wool	249,536

COMMUNICATIONS. — Railways. — About 5,900 miles were open in Jan. 1912, inclusive of the Manchurian lines.

Shipping.—The mercantile marine (1912) consisted of 68 vessels over 100 tons register (58 steam), with a total net tonnage of 90,420 tons. In 1912 the total tonnage of vessels entered and cleared at the treaty ports was 88,206,497. Of these 44 per cent. were British, 20 per cent. Chinese, 7 per cent. German, 22 per cent. Japanese, 2 per cent. French.

Telegraphs are being rapidly constructed by the Imperial Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. The total length of line in operation at end of 1910 was 49,000 miles.

CUSTOMS AND POSTS.—The Imperial Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Imperial Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a *Postmaster-General* was appointed. Already letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices is 5,352; 421,000,000 postal packets and 4,237,000 parcels were handled in 1911.

Revenue 1912.....	£38,200,000
Expenditure 1912.....	£38,200,000
Debt 1912.....	£170,000,000

	1911.	1912.
Imports	£63,118,000	£64,760,000
Exports	50,121,000	51,090,000

CAPITAL OF THE CHINESE REPUBLIC, Peking. Population, 1,000,000.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railway and connected with the Russian system. Indigo, opium, cotton, tobacco and various cereals are grown and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000. The province is administered from Peking with two resident lieutenant-governors. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area, 750,000 square miles; pop. 3,000,000) borders on British India, q.v.

CHINESE TURKESTAN has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Urumchi and Kulja.

COLOMBIA, Republic of.

President (1910-1914), Carlos E. Restrepo.
 Interior, P. M. Carreño.
 Foreign Affairs, Francisco José Urrutia.

Envoy Extraordinary and Minister Plenipotentiary in England, (vacant)
 45 Avenue Road, Regent's Park, N.W.
 Secretary & Chargé d'Affaires, S. Restrepo.
 Consul-General, Jorge Roa, Sicilian House, Sicilian Avenue, Southampton Row, W.C.
 Consul in Liverpool, Luis E. Bonilla.
 Consul at Southampton, Eduardo Ortiz Borda.

The Republic of Colombia lies in the extreme north-west of South America, having a coastline on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat.

and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population estimated at 5,475,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, and india-rubber. All religions are tolerated. The standing army consists of about 6,000 men; the navy has been abolished. Railroads are in their infancy, about 600 miles being open in 1911, with 8,680 (1907) miles of telegraph. The rate of exchange is about \$5 gold or \$500 paper = £1 (approximately).

COSTA RICA, Republic of.

President (1910-1914) Ricardo Jiménez, born 1859.
 Minister of Foreign Affairs, Manuel Castro Quesada.
 Commerce & Finance, Felipe J. Alvarado.
 Interior, Carlos M. Jiménez.
 War and Marine, Luis Demetrio Tinoco.

Envoy Extraordinary and Minister Plenipotentiary, Wenceslao de la Guardia,
 10 Strathmore Gardens, W.
 Consul-General, W. J. Le Lacheur, 58 Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 18,687 English square miles, and a popula-

tion (1910) of 379,533. The chief exports (1912) are coffee, £729,527, bananas, £1,018,918, cacao, cedarwood, fustic, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1912, 50·8 per cent. from United States, 16·59 from United Kingdom, 17·11 from Germany, 4·82 from France, and 11·40 from other countries).

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. About 420 miles of railway were open in 1911. A considerable amount of English capital is embarked in the Republic.

San José is 5,687 miles from London; transit direct, 15 to 18 days; via New York, 16 days.

CRETE (or CANDIA).

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles; the population is 303,543, of whom 269,319 are Christians, 33,496 Mussulmans, and 728 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks, who retained it until 1898, when Great Britain, Russia, France and Italy set up a semi-independent government in the island under a High Commissioner, subject to the suzerainty of the Sultan of Turkey. At the outbreak of war between Greece and Turkey in Oct. 1912 Crete was declared to be part of the Hellenic kingdom. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, carobs, vullonea, and cheese are the principal exports. The chief towns are Candia (pop. 23,000), Canea, the capital (pop. 24,500), and Retimo (pop. 10,000).

BRITISH CONSULAR OFFICES.

Canea—Consul-General,

Vice-Consul, E. C. D. Rawlins £1,100
E. Cassimatis. £350 to 450

Candia—Vice-Consul, A. Calocherino.

Retimo—Vice-Consul, Teodoro A. Trifilli.

CUBA.

President of the Republic (1913-1917), Mario G. Menocal.

Vice-President, Enrique José Varona.

Foreign Affairs, Cosmé de la Torriente.

Justice, Cristóbal de la Guardia.

Finance, Leopoldo Cancio.

Public Works, José R. Villalon.

Interior, Aurelio Hevia.

Sanitation, Enrique Nuñez.

Public Instruction, Ezekiel García Enseñat.

Agriculture, Emilio Nuñez.

Envoy Extraordinary and Min. Plenipotentiary, General Carlos García Velez, 3 Grosvenor Mansions, Victoria Street, S.W.

Chargé d'Affaires, Gabriel Zendegui.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 2,150,112 (1910). Cuba suffered many years of internal discord, from its discovery by Columbus until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A Cuban constituent convention met at the end of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of a provisional administration, which ceased when President Gomez took over the administration in 1909.

The chief products of the island are tobacco and sugar; 2,516 miles of railway were open in November, 1911, and 5,065 miles of telegraph line (1908).

CAPITAL, Havana (pop. about 297,000); other towns are Santiago (45,000), Matanzas (37,000), Cienfuegos (30,000), Cardenas (24,000), and Camaguey (29,000).

 fast, Falmouth, Guernsey and Newcastle-on-
 Tyne.*

A Kingdom of Northern Europe, and the
 smallest of the Northern States, consisting of the
 islands of Zealand, Finen, Lolland, &c., the penin-
 sula of Jutland, and the outlying island of Born-
 holm in the Baltic. Denmark is situated between
 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long.,
 with an area of 15,042 square miles, and a
 population in 1911 of 2,757,076, nearly one-half
 of whom live exclusively by agriculture, and
 one-fourth by manufactures and trade. The
 common products are wheat, rye, oats, barley,
 potatoes, cattle, horses, pigs, sheep, and butter.
 Its manufactures are, for the most part, for home
 consumption. Its principal imports are coals,
 manufactured goods (woollens, silks, cottons),
 iron, hardware, wine, fruit, tea, maize, and
 colonial produce. In 1908, 2,871,590 acres were
 under corn crops and 3,103,519 permanent pasture.
 In 1909 the livestock numbered 535,018 horses,
 1,281,974 cows, 726,879 sheep, and 1,467,822 swine.
 The crops in 1910 included 4,884,356 qrs. of
 oats, 2,622,120 of barley, 2,353,974 rye, 2,065,763
 mixed corn and 547,106 qrs. of wheat. Its
 chief exports are agricultural produce, in-
 cluding wheat and barley, bacon, hams, flour,
 butter, eggs, hides, skins, corn-meal and oil-cake,
 horses, and cattle. There is a sea-going mercan-
 tile marine of 553 steamers, with a tonnage of
 671,828. There are (1901) 2,135 miles of railway
 and 24,294 miles of telegraph wire (1911).

Defence (for Army, see p. 779). The navy con-
 sists of 37 steam vessels (including 4 ironclads),
 mounting 227 guns, with 1,270 officers and men.

Education (see p. 741).

The outlying possessions and colonies of Den-
 mark have an area of about 90,500 square miles,
 with close on 150,000 inhabitants. They include
 the FARØES or Sheep Islands (515 sq. m., pop.
 12,955); ICELAND (see p. 744); GREENLAND (ice-
 free portion about 50,000 sq. m., total area about
 830,000 sq. m., population 12,968), the trade of
 which is a Government monopoly, and 3 islands
 in the West Indies—ST. CROIX, ST. THOMAS, and
 ST. JOHN (142 sq. m., pop. 32,786). These latter
 export sugar and ram.

Exports Danish Possessions to U.K., 1912 £225,307

Imports from United Kingdom, 1912 ... 302,297

Mark Lane, E.C.

Consul, Octavio Ventura.

Vice-Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the
 Spanish portion of the island of that name, is the
 oldest settlement of European origin in America,
 having been founded in 1496 by Bartolomeo
 Columbus, who named it Hispaniola. It comprises
 an area of about 18,748 square miles, with an
 estimated population of nearly 700,000. Cocoa,
 is the most important crop, and sugar, coffee,
 and tobacco are grown in great quantities, the
 other products being mahogany, furniture woods,
 wax, honey, logwood, fustic, turtle-shell, hides,
 bananas, and divi-divi. Gold is found. There
 are about 120 miles of railway, and telegraphic
 and telephonic communication has been estab-
 lished throughout the Republic, which is con-

connected by cable with North and South America. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since April, 1905, 55 per cent. of the Revenues are being deposited in a New York Bank to the credit of the Foreign and Interior Debt.

British trade is hampered by the absence of direct maritime communication.

CAPITAL, Santo Domingo. Population, 25,000.

Vice-Consul, Juan de Eizalde.

Consuls at Liverpool, Southampton, Glasgow, and Cardiff.

A State of South America, extending from lat. 1° 38' N. to 6° 26' S. (according to the Ecuadorian geography, but there are boundary disputes with Peru and Colombia), and between 70° and 81° W. long., comprising an area of 116,530 English sq. miles. It has a population of about 1,300,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 15 provinces and one territory. A railway connecting Guayaquil and Quito was opened in 1908. Guayaquil

is the chief port (population, 1908, about 60,000), other chief towns being Quito, 55,000; Cuenca, 25,000; and Riobamba, 12,000. The currency is a gold condor (of 10 sucres) value £1. The Galapagos Islands (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

	1910.	1911.
Revenue (Budget)	£1,520,700	£2,398,480

Area and Population. — Egypt is a semi-independent tributary state of the Ottoman Empire, occupied by British troops, and lies in the north-eastern corner of the African continent, between 22°-31° 35' N. lat. and 16°-37° E. long. The total area is 363,181 square miles,

with a population at the census of 1907 of 11,287,359, of whom 10,366,046 are Egyptians, 735,012 Bedouins, 65,162 Nubians, and 221,139 foreigners (69,725 Turks, 61,973 Greeks, 34,926 Italians, 20,653 British, 14,591 French and Tunisians, 7,704 Austro-Hungarians, 2,410 Russians, 1,847 Germans, 2,116 other Europeans, and 1,385 Persians). At the same date, Muhammadans numbered 10,466,286, Christians 881,692, Jews 36,635, and other religions 206.

Government.—By *firman* of 13 Feb., 1841, the office of *Vali*, or governor, was made hereditary in the person of Mohammed Ali (1805–1848) under the title of Khedive, subsequent rulers being Ibrahim (1848), Abbas I. (1848–1854), Said (1854–1863), Ismail (1863–1879), Tewfik (1879–1892), and the present Khedive, Abbas II. (1892). There is a Council of Ministers appointed by the Khedive, with a President who acts as Prime Minister. The various Ministers prepare drafts of administrative decrees, which are submitted to the Council. When approved and signed by the Khedive these decrees become law. The British Financial Adviser attends the meetings of the Council, but has no vote. There is a Legislative Council of 39 members, and a General Assembly consisting of the Legislative Council, the Council of Ministers, and 46 members elected by the people. These bodies are mainly consultative, the legislative power resting with the Khedive and his ministers.

Local Government.—For the purposes of Local Government, the chief towns (Alexandria, Cairo, Ismailia and Port Said, and Suez) constitute governorates (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), subdivided into districts (*markaz*). There are provincial councils, with restricted powers of local government.

Justice.—Justice is administered under four distinct systems, all except the Consular Courts being supervised by the Ministry of Justice, to which a British Judicial Adviser is attached. The systems are (1) *Mekemehs*, or Courts of the *Cadis*, administering Muhammadan Law following the Hanafite Rite; (2) *Native Tribunals*, containing native and foreign judges, and dealing with criminal charges against natives and with civil charges in which both plaintiff and defendant are local subjects; (3) *Mixed Tribunals*, founded in 1876, and dealing principally with civil actions between foreigners of different nationalities and between foreigners and natives; and (4) *Consular Courts* (of the 15 Powers) possessing rights to them by treaty, with criminal jurisdiction over foreigners, and judging civil actions between foreigners of the same nationality.

Defence.—The Egyptian Army is limited by law to 18,000 combatants in time of peace, and is recruited by compulsory service, from which exemption is granted to professors, students, &c., and may be purchased for £200. The Commander-in-Chief is appointed by the Khedive, with the consent of the British Government. The British Army of Occupation consisted in 1912 of 6,107 of all ranks, under the command of Maj.-Gen. Hon. Julian H. B. Byng, C.B., M.V.O.

Education.—Primary education is conducted in *kuttabs*, or elementary vernacular schools, some of which are under native management and some under the control of the Ministry of Education. Native education is completed at

the Azhar University at Cairo, the principal university of the Muhammadan world. There are also Government Secondary, Special and Technical Schools, and Professional Colleges of Law, Medicine, Education and Engineering. A National University, under entirely Egyptian management, has been founded at Cairo.

Production and Industry.—The total area of Egypt is estimated at 232,440,000 statute acres, of which about 7,000,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Such portions of the alluvial tracts as can be irrigated by the Nile (about 5½ million acres in 1912) is cultivable, irrigation being employed for this purpose on (a) the basin system, the land being divided into rectangular areas of varying size and surrounded by banks, between which the waters of the Nile are admitted during the flood season (August), and there retained for about 40 days, when it is run off and seed is sown broadcast on the land; and (b) the *perennial* system, consisting of deep canals containing water all the year round and enabling two or more crops to be grown. For irrigation purposes barrages have been built at Esna and Assiut, and others in the Nile delta have been restored and improved; while a storage dam has been constructed at Aswan, and a barrage built at Zifta. The increase in the value of the land owing to these labours is enormous, and some 2,000,000 acres have been added to the cultivable area.

The corn crops include wheat, barley, maize (autumn and summer), rice (autumn and summer), and beans; while cotton of excellent quality is grown, the crop in 1912–13 being 7,610,000 *kantars* (99 lb.). Clover, sugar cane, and onions are also largely grown, and there are some 30,000 acres of orchards and market gardens. The live stock (1911) included 656,166 cattle, 657,406 buffaloes, 50,675 horses, and 25,077 mules.

Minerals.—Building stone, clays, gypsum, gold, lead and zinc ores, manganese ores, natron, nitrate of soda, petroleum, phosphate of lime, peridots, salt and turquoise are produced on a commercial scale; and alum, copper ores, emeralds, granite, iron ores, nickel, ochres, ornamental stones and sulphur are known to exist in more or less important quantities.

Manufactures.—There are some cotton mills in the Delta for the manufacture of rough calico; and in Upper Egypt are sugar, rice, and flour mills, and a certain amount of pottery is made. Cigarette factories centre at Cairo and Alexandria, from imported tobacco.

Communications.—The total length of the Egyptian State Railways on 1 Jan., 1913, was 1,512 miles. 28,782,736 passengers and 4,759,213 tons of merchandise were carried during 1912, the net receipts being £1,625,370. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. In addition to the Government lines, there are 788 miles of light railways exploited by public companies. The principal port is Alexandria, where 1,927 vessels (3,479,146 tons) entered and 1,933 vessels (3,492,081 tons) cleared in 1912. The traffic through Port Said amounted in 1912 to roughly half the above, the remainder being dealt with *via* Suez. There were, in 1912, 1,715 post offices and stations, dealing with over 48,000,000 letters and post cards, &c.; and on December 31, 1912, 4,233 miles

of telegraphs, with 13,620 miles of wire, over which 2,836,630 messages were transmitted during 1912.

II. Egyptian Department represented.

Inspector-General of Irrigation, P. M. Tottenham.

Area and Population.—The Sudan extends from the southern boundary of Egypt at 22° N. lat. to the northern shore of the Albert Nyanza at 2° 10' N. lat. and reaches from the French Sahara (about 18° 15' E. long.) to the north-west boundary of Eritrea (38° 30' N. long.), being about 1,400 miles from north to south and 1,200 miles from east to west at its extreme limits, with a total area of 984,520 square miles. The estimated population is close on 3,000,000, composed of Arabs, Negroes and Nubians (of mixed Arab-Negro blood), with a small foreign element, including some 3,000 Europeans.

Government.—The Anglo-Egyptian Sudan is administered by a Governor-General, aided (since 1910) by a Council, nominated from amongst the

officials of the Government. All ordinances and laws are made by the Governor-General in Council. The Sudan does not fall under the jurisdiction of the Mixed Tribunals of Egypt, and has its own civil and criminal codes based on those of India and Egypt.

Local Government.—The Condominium is divided into 13 Provinces (*mudiriya*) under governors, and is sub-divided into districts (*mamuriyas*). The governors are all British, and are principally British officers of the Egyptian Army. **Dar Fur.**—West of the province of Kordofan and north of Bahr-el-Ghazal is the tributary state of Dar Fur (capital, El Fasher), with an area of about 150,000 square miles, administered by Sultan Ali Dinar.

Defence.—Several regiments of the Egyptian Army are stationed in the Sudan, which forms an excellent recruiting ground, and the Sirdar of the Egyptian Army is Governor-General of the Sudan. A detached body of the British Army of Occupation in Egypt is quartered at Khartoum, under the command of the Sirdar. The police and the locally recruited irregulars (*jehadja*) are under provincial administration.

Education.—In addition to *kuttabs* (native vernacular schools attached to mosques), there are primary schools at Khartoum, Omdurman, Berber, Wad Medani, Halfa, and Suakin, where instruction is given in English and Arabic; a secondary school at Khartoum (Gordon College); a training college (also at Gordon College); and technical and trade schools at Khartoum, Omdurman and Kassala.

Production and Industry.—About 2,000,000 acres were under cultivation in 1912 and this area is being extended by irrigation canals, from which the Nile water is distributed over the land by means of water canals, and by the basin system (see Egypt) in the Dongola *mudiriya*. The chief crop is *dura* (African millet), which forms the staple food of the Sudanese. Wheat, barley, dates, lentils, beans, onions and melons are also grown, and ground nuts and sesame are produced for oil, while an excellent quality of cotton is also grown. The forests of the south-west and south contain valuable timber, and gum and rubber are derived from the forests of Kordofan and the valley of the Blue Nile. The live stock includes camels, horses, cattle, sheep, goats and asses, while ostrich farms are established in the central region. Gold was once worked in large quantities and the mines of Um Nabardi have been reopened. Lignite, iron, and copper are known to exist, and the last two are worked by natives in the Bahr-el-Ghazal *mudiriya*.

Communications.—In 1912 about 1,500 miles of railway were open for traffic. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal; and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telephone lines being 4,965 miles in 1912. There are 63 post and telegraph offices.

CAPITAL, Khartoum, at the junction of the White and Blue Niles. Population about 18,000. Opposite Khartoum, on the Blue Nile, is Khartoum North (35,000), and on the White Nile is Omdurman (43,000), the former Mahdist capital.

(C)—THE SUEZ CANAL

The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares, the purchase price being £4,000,000, and their value on 31 March, 1913, £39,015,000.

The Suez Canal was opened in 1869. The total length of the canal is 99 miles, with a width of 37 metres (121 ft. 5 in.), having cost £24,000,000 to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 8·84 metres (29 feet). By a convention, signed on 29 Oct., 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

The transit receipts in 1869 were £2,178; in 1910, £5,217,462; in 1911, £5,241,409; and in 1912, £5,317,173.

The present rate of transit dues is 6fr. 25c. per ton, and 3fr. 75c. for vessels in ballast.

The net dividends for the year 1912 amounted to 165 fr. on the ordinary 500 fr. shares, and 141 fr. on the Actions de Jouissance.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1908, with the percentage of British vessels.

Year.	No. of Vessels.	Net Tons.	British Tonnage.
1908	3,795	13,633,283	%
1909	4,239	15,407,527	60·9
1910	4,533	16,581,898	62·3
1911	4,969	18,324,800	62·9
1912	5,373	20,275,120	63·0

FRANCE.

President of the Republic (1913-1920), Raymond Poincaré £24,000
Premier and Minister of Public Instruction, (March 21, 1913), M. Louis Barthou.
Minister of Foreign Affairs, M. Stephen Pichon.
Minister of the Interior, M. L. Klotz.
Minister of Finance, M. Charles Dumont.

Military Attaché, Lieut.-Col. Vicomte de la Panouse.

Naval Attaché, Cap. de frégate Comte de Saint Seine.

Commercial Attaché, M. Jean Périer.

Consul and Secretary Archiviste, M. Joseph Knecht.

Consulate General, 51, Bedford Square, W.C.

Consul-General, M. de Coppet.

Consul (suppléant) (vacant).

Chancelier, M. Mattei.

The most westerly State of Central Europe, extending from $42^{\circ} 20'$ to $51^{\circ} 5' N.$ lat., and from $7^{\circ} 45' E.$ to $4^{\circ} 45' W.$ long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its area at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory lost in 1871 amounted to 5,602 square miles. The population at the census of 1911 was 39,601,509, and in 1912 there were 750,651 births, 311,929 marriages, and 692,740 deaths. France has always been attractive to foreigners, of whom (1906) 1,046,905 were resident there, or 2.51 per cent. of the legal population; this number included 377,638 Italians, 310,433 Belgians, 87,836 Germans, 35,990 English, 14,863 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. About 26,000 Frenchmen are stated to be resident in England. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (1,306,451,762 gallons of wine were produced in 1912), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1912 amounted to 388,551,156 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root, for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1911, 39,229,591 metric tons), pig iron (4,470,141 metric tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature, and in the year 1906 845,871,300 oysters were produced, representing a value of £537,700.

Defence (for Army, see pp. 105 and 779; for Navy, see pp. 105 and 777).

Education (see pp. 784-85).

Communications.—The system of railways in France is very extensive; they are almost

entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1912, was 25,579 miles, the total receipts from passenger and goods traffic, &c., being £75,513,464. The length of telegraph wires is 151,700 miles, and of telephone lines 107,150 miles. At the 1st of January, 1911, the mercantile marine, comprising boats of 2 tons and upwards, amounted to 17,621, vessels of 1,451,648 net tons (of which 15,895 were sailing ships, representing 636,081 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping and to Deep Sea Fisheries in 1912 amounted to £1,530,000, and £1,106,732 for Postal and Cable Service Subventions.

Commerce.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

Machinery.....	2,180,250	Woollen & Worst.	2,225,935
Manures.....	305,205		

Shipping.—During the year 1912 the total number of French and foreign vessels entering French ports amounted to 27,409, representing a tonnage of 30,586,106 tons, of which 7,401,797 tons were French, while the total clearings amounted to 20,440 ships of a tonnage of 23,153,011 tons, of which 6,707,571 tons were French.

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General,

assisted by a Consultative Council. These departments lie between $4^{\circ} 36'$ W. to $6^{\circ} 16'$ E. longitude, $37^{\circ} 6'$ N. to an undetermined S. limit, about 30° N., covering an area estimated in 1906 at about 1,119,416 square miles, with a population (1911) of 5,563,828, of whom 752,043 were Europeans and 4,740,526 natives. The revenue in 1912 was estimated at £6,806,600, and the expenditure at £6,806,200; the imports from foreign countries in 1910 were valued at £3,928,600, and the exports at £4,069,000. The bulk of the trade is with France, the exports to France amounting to £18,292,000, and the imports from France to £19,385,000; the exports to the U.K. in 1912 were valued at £1,403,205, and the imports from the U.K. at £991,137. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1912 there were about 2,154 miles of railway open for traffic; and in 1910 the number of ships engaged in foreign trade entering and clearing Algerian ports was 5,199, of a net tonnage of 5,593,639 tons, of which the percentage of British vessels was fully 21 per cent. The principal town is Algiers, the capital (population, 1911, 172,397), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen. *Governor-Gen.*, M. Lutaud.

CAPITAL, Paris. Population (1911), 2,846,986.

FRENCH COLONIES.

The Colonial possessions of the French Republic have a total area of 4,084,410 square miles, including Algeria and Morocco. The population of this vast area is estimated (1911) at 54,730,039.

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hoogly; Karikal, in the Cauvery delta; Yanaon, in the Godavery delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of 277,700. *French Indo-China* comprises the possession of Cochín-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898-9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1912) estimated at 16,600,000.

In AFRICA.—*Algeria* (see above) is an integral part of France. *Morocco* (see pp. 750, 772) is now predominantly French. *Tunis* has been a French protectorate since 1881. *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (74,000 sq. ms., pop. 1,250,500), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. ms.), and the *Niger Military Territory* (533,000 sq. ms.), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. ms., pop. 1,737,350); *Ivory Coast* (126,100 sq. ms., pop. 1,216,300); and *Dahomey* (38,000 sq. ms., pop. 878,500); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 square miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. ms., pop. 9,000,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. ms., pop. 208,000) and of the large island of *Madagascar* (226,000 sq. ms., pop. 3,153,500) with its dependencies (Réunion, and the Mayotte-Comoro Islands). Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen, and Amsterdam. The total area of French Africa is thus 3,812,200 square miles, with an estimated population of 39,948,300.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadalupe (with Basse Terre, Marie Galante, Îles des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French

Guiana. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In AUSTRALASIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with many dependencies, and the Society Islands (Tahiti, &c.) and other islands have a total area in the Pacific Ocean of 8,378 square miles, with a population estimated at 81,100. The New Hebrides are under joint Franco-British administration.

THE GERMAN EMPIRE.

*Emperor, William II. (King of Prussia), son of the Emperor Frederick III. and the Empress Victoria, Princess Royal of Great Britain. Born 27 Jan., 1859; succeeded his father 15 June, 1888; married, 27 Feb., 1881, Princess Augusta Victoria of Schleswig-Holstein, born 22 Oct., 1858 (for issue, see p. 118).

Heir Apparent, H.I. and R.H. Crown Prince William, born 6 May, 1882; married (1905) H.R.H. Cecile of Mecklenburg-Schwerin, and has issue (see p. 118).

Imperial Chancellor and Prussian Premier, Dr. von Bethmann-Hollweg.

Interior, Dr. Delbrück.

Foreign Affairs, Herr von Jagow.

Colonies, Dr. Solf.

Navy, Admiral von Tirpitz.

Justice, Dr. Lisso.

Imperial Treasury, Herr Kühn.

Posts and Telegraphs, Herr Kraetke.

President, Imperial Railways Dept., Dr. Schulz.

Foreign Ambassadors.

German Ambassador to Austria, Herr von Tschirschky and Beğendorff; Italy, Herr von Flatow; France, Baron von Schoen; Turkey, Herr von Wangenheim; U.S.A., Count von Bernstorff; Russia, Count Pourtalés; Japan, Count Rex.

Ambassador in London, H.S.H. Carl, Prince of Lichnowsky, 9 Carlton House Terrace, S.W.

Councillor of Embassy, Herr Richd. von Kühlmann, C.V.O.

2nd Secretary, Councillor of Legation, Herr von Schubert.

3rd Sec., Herr von Hoesch.

Attachés, Baron von Goldschmidt-Rothschild;

Baron von Friesen; Graf von Bentinck; H.S.H.

Prince Bentheim-Tecklenburg.

Military Attaché, Major Renner.

Naval Attaché, Commander von Müller.

Director of the Chancery of the Embassy, Geh.

Hofrat C. Lentze.

Chanceliars, Herr Ferdinand Carow, M.V.O., Herr

Rudolf Heerling, and Herr Paul Hirschfeld.

Consul-Gen., Dr. Johannes, 21A Bedford Place, Russell Square, W.C.

Consul, Herr von Ranke.

Vice-Consuls, Dr. Weidemann, Baron von Ungelter, Dr. Dahn-Schmidt.

The Empire, according to the Constitution of April 16, 1871, is a Confederate League, bearing

* See also p. 118.

the name German Empire, under the hereditary presidency of the King of Prussia, who holds the title of German Emperor, and represents the Empire in all matters affecting international law; in the name of the Empire he declares war and makes peace, concludes alliances and treaties with foreign States, and accredits and receives Ambassadors. Except to repel an attack on the territory or the coasts of the League, the Emperor cannot declare war in the name of the Empire without the consent of the Federal Council, *Bundesrat*, which represents the sovereignty of the Federated States of the Empire. The consent of the Federal Council and Reichstag is necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor has the right to summon, open, adjourn, and close the Reichstag. The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the *Bundesfeldherr*, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command; in time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army, and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of Bavaria; but their armies remain distinct and form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (*kaiserlich*), and the Emperor as such is the supreme Admiral-in-Command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies; the original idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy; the common, civil and penal law of the Empire; posts and telegraphs (excluding Bavaria); inland navigation; the Customs of the Empire; weights and measures; coinage; banking; patents; copyright; foreign trade; the German mercantile marine; the Press; everything relating to the right of forming corporations; police; sanitation; colonisation. The railways, as a result of the defeat of Bismarck's plan to imperialise them, remain subject to State legislation; but the Constitu-

tion (Art. 42) requires that they shall be administered as a homogeneous network, and this aim, as regards, rates, regulations, rolling-stock, etc., has to a large extent been achieved. The movement to imperialise the railways still exists, but makes little progress. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Federated States within the scope of the Constitution of the Empire; they are compulsory on all Governments of the Empire.

The German Empire has a total area of 208,780 square miles, and consists of the following 26 States:—Prussia (including Lauenburg and—since 1890—Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sondershausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe-Detmold; Reichsland (Alsace-Lorraine); Lübeck; Bremen; Hamburg.

The census of 1910 shows a total population of 64,925,993, of whom 32,031,967 are males and 32,871,456 females.

The religious confessions were divided in 1910 as follows:—39,991,421 Protestants, 23,821,453 Roman Catholics, 283,946 Christians of other categories, 615,021 Jews, and 214,152 adherents of other religions, or unknown.

There were in 1900 4,231,129 persons residing within the limits of the Empire who spoke a non-German language, viz. :—80,361 Dutch, 20,677 Frisians, 141,061 Danish (and Norwegians), 8,958 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,961 Italians, 2,059 Spanish, 479 Portuguese, 3,086,489 Poles, 142,049 Massurians, 100,213 Kassubians, 93,032 Wends, 64,382 Moravians, 43,016 Czechs, 9,617 Russians, 106,305 Lithuanians, 8,158 Hungarians, 14,535 not above specified.

There are 48 large towns with over 100,000 inhabitants, and of these 33 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 in Baden, and 1 each in Württemberg, Hesse, Reichsland, and Brunswick, while two of the three Hanse Towns also exceed 100,000.

Education (see p. 785).

EMIGRATION.—At the commencement of the nineteenth century few Germans emigrated, but about fifty years afterwards there was a strong desire to leave the mother country. Out of thirty millions of emigrants from Europe in the nineteenth century Germany contributed about five millions, or one-sixth of the whole number. The highest figure attained in one year was that of 1881 (220,902), but the numbers of oversea emigrants are now seldom above 30,000, the figure for 1911 being 22,690.

PRODUCTION AND INDUSTRY.—Germany is becoming more and more a manufacturing country. In 1907, 32.6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11.5 per cent. by trade and traffic. Of the total area in 1907, 78,632,140 acres were under cultivation, and 34,272,141 acres were woods and forests. Germany supports about nine-tenths of her population by her own produce. The mineral produce was valued in 1911 at £104,278,300, and included 160,747,100 tons of coal, 73,774,100 of lignite, and 29,879,400 of iron ore; rock-salt, lead-ore,

gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Eiberfeld-Barmen, Mühlhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

MERCANTILE MARINE.—On January 1st, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17'65 register tons and upwards (4,380,348 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register). The number of seamen in the German Mercantile Marine on January 1st, 1913, was 77,746 (January 1st, 1912, 75,130). Germany now ranks second in the list of maritime countries. There were completed in 1912 at German yards for German firms, 659 sea-going ships of 383,090 tons gross, and at German yards for foreign firms, 124 sea-going ships of 31,238 tons gross.

COMMUNICATIONS.—The total length of the Railways in the Empire in 1912 was 37,660 miles, of which about 92 per cent. belong to the different States. There are 1,500 miles of inland canals and 1,600 miles of ship canals. The number of registered automobiles and motor cycles (1 Jan., 1913) was 77,789.

IMPERIAL POST (including Bavaria and Württemberg), 1911:—Length of telegraph lines, 228,600 kilometres (length of wires, 1,907,200 kilometres); telegrams handed in, 49,533,000; post offices, 40,987; telegraph offices, 46,444; wireless stations, 14; telephone call-stations, 37,970; letters delivered, 5,994,300,000; cash on delivery orders, £640,100,000; money orders, £4,626,500,000; telegrams despatched, 49,533,000; telegrams received, 49,643,000. The number of employes in the service of posts, telegraphs, and telephones was 310,363.

DEFENCE (for Army, see pp. 105 and 779-780; for Navy, see pp. 105 and 776-7).

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force 1 January, 1900. (For details of the Insurance scheme, see **INTERNATIONAL WHITAKER, 1914**, pp. 250-1.) The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codifies previous legislation, establishes new Insurance Authorities, reduces working-class influence in the Accident Insurance organizations, provides pensions for widows and orphans, and makes

other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employes and others above the class of manual workers, became law in 1911.

GERMAN COLONIES.

The German Colonies have a total area of 1,134,239 sq. miles, and have a population of about 14,890,000, of whom 24,170 (including garrison and police) are whites. Of these whites about 18,500 are settled Germans.

AFRICA.—Togoland: Area, 33,659 sq. miles; population about 1,000,000. Capital, Lome. Budget, 1912: Receipts, £152,000; expenditure, £176,000; trade (1910), imports, £573,300; exports, £361,100.—Cameroon: Area, 295,000 sq. miles; population, 3,500,000. Capital, Buea. Budget for 1912: Receipts, £316,500; expenditure, £882,500; trade (1912), imports, £1,712,100; exports, £1,165,000.—German South-West Africa: Area, 322,348 sq. miles; population, 120,000. Capital, Windhoek. Budget, 1912: Receipts, £860,500; expenditure, £2,250,000; trade (1912), imports, £2,265,000; exports, £1,425,000.—German East Africa: Area, 384,079 sq. miles; population, 7,645,000. Capital, Dar-es-Salaam. Budget, 1912: Receipts, £624,000, of which State aid, £151,135; expenditure, £1,828,500; trade (1912), imports, £2,295,000; exports, £1,570,900.

PACIFIC.—German New Guinea: Total area, 90,000 sq. miles; population, 463,300. Capital, Rabaul. Trade (1910), imports, £194,500; exports, £181,250.—Solomon, Caroline, Pellew, Marianne, and Marshall Islands: Area, 5,160 sq. miles, population, 122,000. Capitals, Ponape and Yap. Budget, 1912, Receipts (with New Guinea), £78,000; expenditure (with New Guinea), £138,000; trade (1910), imports, £117,750; exports, £502,100.—Samoa: Area,

1,050 sq. miles; population, 35,000. Capital, Apia. Budget, 1912: Receipts, £43,500; expenditure, £47,500; trade (1910), imports, £173,100; exports, £176,700.

ASIA.—Kiao-Chao: Leased for a period of 99 years from China in 1898. Area, 193 sq. miles; leased territory and sphere of interest, 2,750 sq. miles; population 84,000. Chief seat of government, Tsingtau. Budget, 1912: Receipts, £312,000; expenditure, £732,000; trade (1910), imports, £2,500,000; exports, £2,500,000. The German garrison in Kiao-Chao consists of 92 officers, 2,374 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison brigade. It was further agreed that within a 50-kil. zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan-Tung, which is called "the sphere of influence," area about 2,750 English sq. miles, population 84,000. The leased territory, as it is called, comprises the bay up to high-water mark, its islands, and the north and south tongues of land at the mouth of the harbour.

Germany's share in the trade with her colonies in 1912 was about 36 per cent.

States of the German Empire.

KINGDOM OF PRUSSIA.

King, William II., German Emperor (*q.v.*).
President of the Ministry and Minister for Foreign Affairs, Dr. von Bethmann-Hollweg.
Interior, Herr von Dallwitz.
Finance, Dr. von Lentze.
War, General von Falkenhayn.
Public Works, Herr von Breitenbach.
Agriculture, Woods and Forests, Herr von Schorlemer-Liesser.
Trade and Commerce, Herr Sydow.
Instruction and Worship, Herr von Trott zu Solz.
Minister of Justice, Dr. Beseler.

Prussia comprises the larger portion of Germany, and consists of 13 provinces, with a total area of 134,558 English square miles and a population in 1910 of 40,165,219.

Of the total population 19,847,725 are males and 20,317,494 females. There are 33 towns with over 100,000 inhabitants.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Niemen, Pregel, Vistula, Oder, Elbe, Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of nearly 20,435,491 acres, chiefly consisting of fir. Minerals consist of iron, copper, lead, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant, also coal. Metallic ores, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats,

barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets, &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	1911.	1912.
Revenue (Budget) ...	£187,248,000	£201,133,000
Expenditure do.	187,248,000	201,133,000
Total debt, 31 March	476,583,000	471,443,000
CAPITAL, Berlin. Population (1910),	2,070,695.	

Berlin to London, transit, 22 hours.

KINGDOM OF BAVARIA.

King, Ludwig III., born 7 Jan., 1845; proclaimed King, 5 Nov., 1913; married, 1868, the Archduchess Maria Theresa, of Austria-Este.

Heir Apparent, Crown Prince Rupprecht, born 18 May, 1869.

Ministers of State—President and Minister of Foreign Affairs, Dr. Freiherr von Hertling; Justice, Dr. von Thelemann; Interior, Dr. Freiherr von Soden-Fraunhofen; Instruction, Dr. von Kuilling; Finance, Dr. von Breunig; Communications, von Seidlein; War, Gen. Freiherr Kress von Kressenstein.

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'–50° 34' N. lat. and 9° 01'–13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,286 square miles, and a population (in 1910) of 6,887,291. The capital (596,467) and Nuremberg (333,142) are the largest towns. Bavaria contributes three *corps d'armée* to the forces of the German Empire; their strength is fixed at 69,143 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

Budget, 1912–1913	£33,810,590
Public debt, 31 Dec. 1912 (including railway debt, £97,033,264)	123,931,982
CAPITAL, Munich. Population (1910),	596,467.

KINGDOM OF SAXONY.

King, Frederic Augustus III., born 25 May, 1865; *succ.* 15 Oct., 1904.

Heir Apparent, his son, Crown Prince George. *b.* 15 Jan., 1893.

Ministers of State, Freiherr von Hausen, Dr. Beck, Graf Vitzthum von Eckstädt, R. von Seydewitz, Dr. Nagel.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population (1910) of 4,806,661. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 551,697), Leipzig (pop. 587,635), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912–13); Freiberg (pop. 36,237), in the mining district; Plauen (pop. 121,272); Zwickau (pop. 73,542), and Chemnitz (pop. 287,807), the Manchester of Saxony. Revenue and expenditure, 1912–13 ... £22,661,133
 Debt (railways), 1912 £3,055,495

CAPITAL, Dresden. Pop. (1910), 551,697.

Dresden—Consul, Ch. W. Palmié.

Vice-Consul—F. J. Bassenge.

Leipzig—Vice-Consul, R. M. Turner £300 to £500
Chemnitz—Vice-Consul, E. Zeissler.

KINGDOM OF WÜRTTEMBERG.

King, William II., born 25 Feb., 1848; succeeded 6 Oct., 1891; mar. (1) Princess Marie of Waldeck (died 30 April, 1882); (2) Princess Charlotte of Schaumburg-Lippe.

President of Ministry, Dr. von Weizsäcker.

A Kingdom of South Germany, with an area of 7,534 English square miles, and a population (in 1910) of 2,437,574, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,523 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone,

ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, staves, beer, wine, &c.

Grand Duchies.

BADEN, Grand Duchy of.

Grand Duke, Frederick II., born 9 July, 1857; m. 20 Sept., 1885, Princess Hilda of Nassau, born 5 Nov., 1864; *Grand Duke*, 28 Sept., 1907.
Heir Presumptive, Max, b. 10 July, 1867.
President of Ministry, Dr. Freiherr von Dusch.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It comprises an area of 5,888 square miles (3,238 cultivated—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce—and 2,283 forests). The population in 1910 was 2,143,000, nearly two-thirds of whom were Catholics, more than one-third Protestants, and 25,896 Jews. Mannheim 193,902, Karlsruhe 134,313, Freiburg 83,324, Pforzheim 69,082, and Heidelberg 56,016, have over 50,000 inhabitants. Principal industries are agriculture and manufactures (cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery). There are 1,262 miles of railway, of which 1,002 miles belong to the State, constructed at a total cost of £40,466,000.

Budget, 1913 (including railways).....£12,707,000
 Debt, Jan. 1, 1913 (only railways)..... 27,600,000

CAPITAL, Karlsruhe. Population (1911), 134,313.
British Chargé d'Affaires, Lord Acton, M.V.O. (Darmstadt).

Mannheim—Consul, Dr. Paul Ladenburg.

HESSIE, Grand Duchy of.

Grand Duke, Ernest Louis, born 25 Nov., 1868; suc. 13 Mar., 1892; m. 2 Feb., 1905, Princess Eleonore zu Solms-Hohensolms-Lich, b. 17 Sept., 1871.

Heir Apparent, George, b. 8 Nov., 1906.

President of Ministry, Dr. K. Ewald.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 2,966 square miles, and a population (1910) of 1,282,051, of whom two-thirds were Protestants. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a

flourishing condition. Fruit is abundant, and the vine highly cultivated. Darmstadt, Mainz, and Offenbach have over 50,000 inhabitants.

Budget, 1913.....£4,321,774
 Public debt, 1913 (mostly for railways) 21,976,705

CAPITAL, Darmstadt. Population (1910), 87,089.

British Chargé d'Affaires, Lord Acton,

M.V.O. (Darmstadt).....£500

Hon. Attaché, Master of Belhaven.

Frankfort—Consul-Gen., E. B. von Speyer.

MECKLENBURG-SCHWERIN, Grand Duchy of.

Grand Duke, Frederick Francis IV., b. 9 April, 1882; suc. 10 April, 1897; mar. 7 June, 1904, Princess Alexandra of Brunswick and Luneburg, born 29 Sept., 1882.

Heir Apparent, Friedrich Franz, born 22 April, 1910.

Minister of State, K. H. L. Graf von Bassewitz-Levetzow.

Comprises an area of 5,135 square miles on the Baltic, with a population of 639,958. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue (1912-13), £2,429,430; exp., £2,402,135; debt (1912), £6,776,950. Capital, Schwerin; pop. 42,519.

MECKLENBURG-STRELITZ, Grand Duchy of.

Grand Duke, Adolphus Friedrich, b. 22 July, 1848; mar. 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept., 1857.

Heir Apparent, Adolphus Friedrich, born 17 June, 1882.

Consists of two detached parts, separated by Mecklenburg-Schwerin. Area, 1,131 square miles; population, 106,442. No proper budget. Finances in good condition. Capital, Neustrelitz; pop. 11,993.

OLDENBURG, Grand Duchy of.

Grand Duke, Frederic Augustus, b. 16 Nov., 1852; suc. 13 June, 1900; married (1), Feb. 18, 1878, to the late Princess Elizabeth (second daughter of the late Prince Frederick Charles of Prussia), who died 28 August, 1895; and (2) to Princess Elizabeth of Mecklenburg-Schwerin, born 10 August, 1869.

Heir Apparent, Nicholas, b. 10 August, 1897.

Situate on the North Sea and the Weser. Area, 2,482 square miles; pop. 438,856; rev. (1910), £697,670; exp., £654,792; debt, £3,692,361. Capital, Oldenburg; pop. 28,565.

SAXE-WEIMAR EISENACH, Grand Duchy of.

Grand Duke, William Ernest, b. 10 June, 1876; suc. 5 January, 1901; married, Jan. 4, 1910, Theodora, Duchess of Saxe-Meiningen.

Minister of State, Dr. Rothe.

Area, 1,397 sq. miles; pop. (1910), 417,149; rev. and exp. (1911-13), £612,769. There is a British and American church at the capital. Capital, Weimar; pop. (1910), 34,582.

Duchies.

ANHALT, Duchy of.

Duke, Friedrich II., born 19 August, 1856; succeeded 24 Jan., 1904; married, 2 July, 1889, Princess Marie of Baden; born 26 July, 1865.

Heir Presumptive, Prince Edward, born 18 April, 1861; married, 6 Feb., 1885, Princess Louise of Saxe-Altenburg.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, con-

taining 906 square miles and a population of 331,128. Budget, 1913-14, £862,745.

Capital, Dessau. Population 56,605.

BRUNSWICK, Duchy of.

Duke, Ernest Augustus, born 17 Nov., 1887; married 25 May, 1913, H.R.H. Princess Victoria Louise, daughter of the German Emperor; proclaimed 3 Nov., 1913.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,418 English square miles, and a population (1910) of 494,339, of whom 464,175 were Protestants, 25,888 Roman Catholics, and 1,757 Jews. Budget, 1913-1914: Income, £768,440; expenditure, £744,980; debt, £2,019,735; reserve fund, £2,081,224.

Capital, Brunswick; population (1910), 143,552.

SAXE-ALTENBURG, Duchy of.

Duke, Ernest, b. 31 Aug., 1871; suc. 7 Feb., 1908; mar. 17 Feb., 1898, Princess Adelheid of Schaumburg-Lippe, b. 22 Sept., 1875.

Heir Presumptive, Geo. Moritz, b. 13 May, 1900.

Area, 512 square miles; population (1910), 216,128, of whom over 210,500 are Protestants; revenue and expenditure (1911-13), £259,945; debt (1912), £44,372; reserve fund, £286,647. Capital, Altenburg; pop. (1910), 39,976.

SAXE-COBURG-GOTHA, Duchies of.

Duke, Charles Edward (H.R.H. Duke of Albany), born 19 July, 1884; (mar. 11 Oct., 1905, Prss. Victoria Adelaide of Schleswig-Holstein-Sonderburg-Glücksburg, and has issue 2 sons and a daughter); suc. 30 July, 1900; assumed government 19 July, 1905.

Heir Apparent, H.R.H. Prince Johann Leopold, born 2 Aug., 1906.

Minister of State, Herr Dr. von Richter.

A State consisting of two principal and several smaller detached portions, with an area of 763 English sq. miles, and a population (1910) of 257,177, of whom 250,454 were Protestants. Capital, Gotha (pop. 39,553). Coburg (the other capital) has 23,789 inhabitants. The common state revenue is set down at £55,216; the state and domain revenues at £240,145 for Gotha and £92,172 for Coburg. At Gotha there is an English church.

British Minister Resident (see Saxony).

SAXE-MEININGEN, Duchy of.

Duke, George II., b. 2 April, 1826; suc. 20 Sept., 1866; mar. (1) Princess Charlotte of Prussia (d. 30 March, 1855), (2) Princess Feodora of Hohenlohe-Langenburg (d. 10 Feb., 1872), (3),morganatically, Helene, Baroness of Heldburg. *Heir Apparent*, Bernhard, b. 1 April, 1851.

Area, 945 sq. miles; pop. (1910), 278,792; rev. and exp. (1912-14), £527,316; debt (1910), £310,950. Capital, Meiningen; pop. (1910), 17,131.

Principalities.

LIPPE, Principality of.

Prince, Leopold, b. 30 May, 1871.

Area, 470 sq. miles; population (1910), 150,937; rev. (1913-14), £142,649; exp., £130,814; debt, £67,799. Capital, Detmold; pop. (1910), 14,295.

REUSS, Elder Line.

Prince, Henry XXIV., born 20 March, 1878; suc. 19 April, 1902.

Prince Regent, Henry XXVII., b. 10 Nov. 1858.

Area, 120 square miles; population (1910), 72,769; revenue and expenditure (1913), £94,000. No debt. Capital, Greiz; pop. (1910), 13,245.

REUSS, Younger Line.

Reigning Prince, Henry XXVII., b. 10 Nov., 1858; suc. 29 March, 1913; mar. Princess Elise of Hohenlohe-Langenburg.

Heir Apparent and Regent, Henry XLV.

Area, 320 sq. miles; pop. (1910), 152,752; rev. (1911-13), £138,965; exp., £138,965; debt (1911), £52,027. Capital, Gera; pop. (1910), 49,276.

SCHAUMBURG-LIPPE, Principality of.

Reigning Prince, Adolphus, b. 23 Feb. 1883; suc. 30 April, 1911.

Area, 130 sq. miles; pop. (1910), 46,626; rev. and exp. (1910-11), £42,692; debt (1910), £16,516. Capital, Bückeburg; pop. (1910), 5,745.

SCHWARZBURG-RUDOLSTADT, Principality of.

Prince, Gunther, b. 21 August, 1852; suc. 19 Jan., 1890; mar. Princess Anna Louise of Schönburg-Waldenburg.

Area, 363 sq. miles; pop. (1910), 100,702; rev. and exp. (1912-14), £168,885; debt (1912), £230,150. Capital, Rudolstadt; pop. (1910), 21,937.

SCHWARZBURG-SONDERSHAUSEN, Principality of. *Prince*, Gunther (see Schwarzburg-Rudolstadt above).

Area, 333 sq. miles; pop. (1910), 89,917; rev. and exp. (1912), £170,887; debt (1913), £306,220 (£115,000 for railways). Capital, Sondershausen; pop. (1910), 7,759.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont. Count of Rappolstein, Seigneur of Hohenack and Geroldseck, Wasziegen, &c., born 20 Jan., 1865; suc. 12 May, 1893; mar., 9 Aug., 1895, Princess Bathildis of Schaumburg-Lippe, and has issue 4 children.

Heir Apparent, Josias George William, b. 13 May, 1896.

Area, 438 sq. miles; pop. (1910) 61,707; income and exp. (1913), £75,175; debt, £70,920. Capital, Arolsen; pop. 2,793.

British Chargé d'Affaires, A. C. Grant Duff (Dresden).

Hanse Towns.

The Free Hanse Towns comprise the three cities of Lübeck, Bremen, and Hamburg, each with a small rural territory, retaining their sovereignty and local self-government, like the other States of the Empire, and are situated in the North of Germany, on the Trave, Weser, and Elbe respectively. Lübeck is situate near the Baltic, and is connected with the Elbe by the Elbe-Trave Canal; its commerce is principally with Denmark, Norway, Sweden, and Russia. Bremen is small, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway.

Reichsland.

ALSACE-LORRAINE.

Statthalter, Count Carl von Wedel (1907).

Minister of State, Baron Zorn von Bulach.

The "Reichsland" of Alsace-Lorraine (Elsass-Lothringen), which was annexed by France from the old German Empire between 1648 and 1697, and restored to Germany in 1871, embraces the fertile plain between the Rhine and the Vosges, and stretches beyond these mountains as far as Luxemburg. Wine, tobacco, and hops, iron and coal are among its leading productions, and the cotton industry is most flourishing. There is a Landtag of two chambers, of which the first consists of representatives of the churches, university towns and professional classes, and the second of 60 members elected by secret ballot. The area is 5,605 square miles, divided for administrative purposes into three districts, Ober- and Unter-Elsass and Lothringen. The population in Dec., 1910, was 1,874,014, of whom 965,625 were males and 908,389 females; while 1,428,343 were Catholics, 408,274 Protestants, and 30,483 Jews. French was spoken by about 200,000 persons. Principal towns, Strassburg (pop. 178,891), Mülhausen, and Metz. Revenue and Expenditure (1912-13)... £3,508,600 Debt (1912).....(Rentes £65,588) ... 2,186,300

GREECE.

King of the Hellenes, Constantine, born 21 July (3 Aug.), 1868; succeeded to the throne 5 (18) March, 1913; married, 15 (28) Oct., 1889, to the Princess Sophia, sister of the German Emperor.

Heir Apparent, George, born 7 (20) July, 1890.

Prime Minister and Minister of War and Marine

(31 August, 1912), E. Venizelos.

Foreign Affairs, D. Panas.

Finance, A. Diomedes.

Interior, E. Repoulis.

Justice, C. Ractivan.

Commerce and Agriculture, E. Michalacopoulos.

Marine, C. Demerzis.

Envoy Extraordinary and Minister Plenipotentiary in London, J. Genadiou, 14 De Vere Gardens, Kensington Palace, W.

Secretary, A. Ranagabes.

Cons.-Gen., T. Stavridis, 40 Old Broad St., E.C.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 50'–41° N. and long. 19° 20'–26° 15' E., comprising an area (in 1912) of 24,822 square miles, with a population (in 1907) of 2,631,952, and enlarged by the addition of portions of Macedonia, Albania, and Thrace, and by the capture of many of the Turkish islands (in the war of 1912-13), to an estimated area of 43,522 square miles, with a population of close on 5,000,000. The country is composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Aegean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, iron ore, magnesium, emery, marble, and sponges.

Defence (for Army, see p. 780). The Government have invited a British Naval Mission to assist in the reorganisation of the Greek Navy, which consisted (July, 1913) of 4 ironclads, 1 modern cruiser, 14 destroyers, 4 corvettes, 13 torpedo boats, and 2 submarines. In 1912-13 Greece, with the other members of the Balkan League (Bulgaria, Montenegro and Servia), waged a successful war against Turkey, and during the progress of hostilities the island of Crete (q.v.) was annexed. Certain islands in the Aegean were occupied by Greek troops, and Salonica and other centres were captured. In 1913 a second war of Bulgaria against the remaining members of the League (and the threat of an invasion by Rumania) ended in a division of the conquered territories that proved to be very favourable to Greece, whose boundaries now extend northwards to those of Albania and Servia.

Education (see p. 785).

Communications.—There are 993 miles of railway open for traffic. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. The post offices number 1,156, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 110 sailing vessels above 100 tons capacity, and 298 steamers (449,184 tons).

GUATEMALA, Republic of.

President (1910-1917), Manuel Estrada Cabrera, born 1857.

Min. of Foreign Affairs, Dr. Luis Toledo Herrate.
Consul-General, José Maria Lardizábal, 11, Queen Victoria Street, E.C.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 40' to 17° 40', and in W. Long. from 88° 15' to 92° 30', and comprises an area of 47,424 square miles, and a population in 1910 of 2,000,000. The Republic is divided into 23 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. About 430 miles of railway were open for traffic in 1911. There were 5,954 kilometres of telegraph and 619 of telephones working in 1908. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being sugar, rubber, hides, bananas, and timber.

	1911-12.	1912-13.

British Minister, C. Alban Young, M.V.O. £2,000
Guatemala—Vice-Consul, Godfrey Haggard £500 to 700

do., Edward Bellingham

Livingston and Puerto Barrios—Vice-Consul, William Agar.

Quezaltenango—Consul, Hugo Fleischmann.
San José—Vice-Consul, David Savage.

Transit to New York via Puerto Barrios and New Orleans, 7 days, thence to London, 8 days.

HAITI, Republic of.

President (1913-1919), Michel Oreste.....£4,800
Foreign Affairs, E. Mathon.

Minister in London, M. Antoine Sansarico,
76 Victoria Street, S.W.

Sec. of Legation, M. Louis Augustin-Guillaume.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. The area of the republic is 10,200 square miles, with a population estimated at 2,029,700. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany.

HONDURAS, Republic of.

President (1913-1918), Dr. Francisco Bertrand.
Foreign Affairs, Dr. Mariano Vasquez.

Con.-Gen. in London, M.J. Kelly, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N. lat. between $13^{\circ} 10'$ and 16° , and W. long. between $83^{\circ} 10'$ and $88^{\circ} 40'$; containing 42,658 English square miles, with a population estimated at 553,500 (1910). It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose, and Lima wool. Its mineral wealth is great. In 1912 there were 90 miles of railway open.

Distance 5,930 miles; transit, 18 to 20 days.

HUNGARY. (See pp. 676-677.)

ICELAND (Danish Dependency).

Minister for Iceland (Resident), Hannes Hafstein.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from $63^{\circ} 23'$ to $66^{\circ} 33'$ N. lat., and from $13^{\circ} 22'$ to $24^{\circ} 35'$ W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated in 1901 at 78,479.

The present constitution was granted in 1904, and the assembly (Al-thing) is more or less controlled by the Government at Copenhagen. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1911): £815,000; exports, £735,150. Iceland is now in direct telegraphic communication with the United Kingdom.

CAPITAL, Reykjavik. Population, about 12,000. Other towns are Isafjörður, Akureyri, and Seydisfjörð.

Reykjavik—Consul, A. G. Coates, M.V.O. £600

" Vice-Consul, Asgr. Sigurdsson.

Seydisfjörð—Vice-Consul, E. T. Hallgrímsson.

Westmann Islands—V.-Cons., Gisli J. Johnsen.

Renzo Brusati; Lieut. Marchese V. Doria-Lamba.

Military Attaché, Major Conte E. Greppi.

Naval Attaché, Count Rey di Villarey.

Archivist, Cavaliere Catani.

Consul, Marchese Faa di Bruno.

Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands.* It is situate between lat. $36^{\circ} 38' 30''$ — $46^{\circ} 40' 30''$ N. and long. $6^{\circ} 30'$ — $18^{\circ} 30'$ E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population (1911 census) of 34,686,683. The peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Rome (579,285), Naples (723,208), Milan (599,200), Turin (427,733), Palermo (341,056), Genoa (272,077), Florence (232,860), Bologna (172,639), Venice (160,727), Catania (211,699), Leghorn (105,322), and Bari (103,522). Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1912 there were 10,798 miles of railway open for traffic, and 33,451 miles of telegraph line. The sea-going commercial marine (1911) consisted

* Italy is also in temporary occupation of a group of Turkish islands lying between Crete and Asia Minor (Rhodes, Carpathos, Cos, Astropalia, etc.) until such time as the Ottoman troops have been removed from Tripoli and Benghazi.

of 450 steamers (987,559 tons) and 630 sailing vessels (333,094 tons). The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c.

The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. *Defence* (for Army, see pp. 105 and 780, for Navy, see pp. 105 and 777-8). Spezia, the chief naval and military port of the kingdom, is securely fortified. *Education* (see p. 785).

In 1911, 159,647 Italian and 13,790 foreign vessels (total tonnage 56,056,306) entered and 159,552 Italian and 13,801 foreign vessels (55,082,448 tons) cleared at Italian ports.

COLONIES.—The total area of Italian Colonies and possessions is 1,113,020 square miles, with an estimated population of 1,600,000, made up as follows: *Eritrea*, 60,000 square miles (pop. 280,000); *Somaland*, 131,000 square miles (pop. 300,000); *Tientsin Concession*, 20 square miles (pop. 17,000); *Tripoli and Cyrenaica*, 922,000

square miles (pop. 1,000,000). In Africa Italy obtained in 1912 the territories of Tripoli and Cyrenaica by conquest and cession from the Ottoman Empire, and possesses the colony of Eritrea, and a protectorate over part of the Somali coast, extending from Cape Guardafui to the Juba river, on which they have a station; an annual rent is paid to the Sultan of Zanzibar for the Benadir ports leased by him to Italy. The Colony of Eritrea includes also the Dahlar Archipelago. The protectorate includes Aussa and the Danakil country, the Somali countries of the Sultans of Migurtini and of Obbia, as well as the Benadir, which is now a colony. By new conventions signed with the Emperor Menelik in May, 1908, Italy obtains a slight extension of frontiers, and obtains the country between Dolo and Bardera. The commencement of Italian influence was made in 1880, when the district of Assab was transferred from a trading company to the Government. The tract of land now known as Eritrea ("Red Sea") consists of a triangular portion of barren and sandy lowland between 12° and 18° N., containing in all a coastline along the Red Sea of about 700 miles, with a total area of 60,000 square miles, and a population of about 280,000, of whom about 3,000 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour, and the principal product, salt, of great value as being the monetary currency of Southern Abyssinia.

For TRIPOLI, see p. 746.

In China Italy obtained in 1902 a concession of land fronting the Peiho river, with a total area of 20 square miles and a population of about 17,000 natives.

JAPAN.

Emperor, Yoshihito, born 31 Aug., 1879; succeeded 29 July, 1912; crowned 30 July, 1912; mar. Princess Sadako, 10 May, 1900, and has issue 3 sons.

Heir Apparent, Prince Hirohito, born 29 April, 1901.

Prime Minister (20 Feb., 1913), Admiral Count Yamamoto.

Interior, K. Hara.

Foreign Affairs, Baron Makino.

Agriculture and Commerce, T. Yamamoto.

Finance, Baron K. Takahashi.

Communications, H. Motoda.

Education, Dr. Y. Okuda.

Ambassador in London, Katsonusuke Inouye, 20 Grosvenor Square, S.W.

Councillor, Kijura Shidehara.

2nd Secretaries, I. Yoshida, K. Yamasaki.

Attachés, S. Sawada, Nagakage Okabe.

Chancery, S. Mashiko, K. Kishi.

Military Attaché, Col. S. Inagaki.

Naval Attaché, Capt. Baron Kizokazu Abo.

Financial Attaché, Kengo Mori.

Consul-General, Takashi Nakamura, 1 Broad Street Place, E.C.

Consul at Glasgow, A. S. Younger.

" at Liverpool, P. E. J. Hemelryk.

" at Manchester, D. Ford Smith.

" at Middlesbrough, Waynman Dixon.

This ancient and extensive Empire, now in alliance with the United Kingdom, consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshū (the name of the Empire being Nihon), Shikoku, Kii-shū, Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 235,886 square miles, with a population (1908) of 67,142,798. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, antimony, and zinc abound, whilst agate, cornelian, and rock crystal are also found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in large quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the *Paulownia imperialis* is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant; English fruits, such as apples, strawberries, pears, grapes, figs, and peaches are being produced.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from the Dutch East Indies and Formosa; indigo from Germany and British India; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, lacquer ware, and marine products.

Communications.—There were 5,606 miles of railway open in 1913, in addition to 767 miles open in Korea, while the South Manchurian Railway (China) is under Japanese control. The mercantile marine consisted in 1912 of 1,981 steamers above 20 tons (388 of them over 1,000 tons), and 1,317 sailing vessels over 100 tons. In 1912 there were 7,166 post offices dealing with 1,677,000,000 postal packets and 29,500 miles of telegraph line.

Defence (for Army, see pp. 105 and 780. For Navy, see pp. 105 and 777).

Education (see p. 785).

Estimated Expenditure:—

	1912-13.	1913-14.
Ordinary	\$412,073,863	\$422,018,356
Extraordinary	163,903,132	164,789,232
Total Debt	(£250,000,000)	
(31 March, 1913) {	\$2,493,970,000	

	1911.	1912.
Imports	£44,718,256†	£53,994,057†
Exports	52,643,283†	63,421,311†

The imports of British produce and manufacture in 1912 were valued at £12,229,115:—

		Machinery.....	£1,755,030
Arms & Ammunition	£410,267	Manures	1,222,002
Chemicals	424,485	Electrical Apparatus.....	375,041
Cotton	1,485,341	Wool Tops	724,613
Cycles, Motor, etc.	306,558	Woollens	885,221
Iron and Steel	2,493,222		

The exports to the United Kingdom in 1912 were valued at £3,933,443:—

		Rice, Corn & Grain.....	£121,009
Copper, unwrought.....	£486,691	Silk & Manuf.	1,081,437
Oil, Fish and Seed	160,490	Straw plait	673,854
Soya Beans.....	128,748		

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with about 3,400,000 inhabitants (1908).

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the war. The ceded territory has a total area of 9,824 sq. miles with a population (1910) of 25,000. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry.

The **Kwantung Peninsula** (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,286 sq. miles; population, 470,000. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile.

The **Pescadores** (Hokoto) consists of about 14 islands, with a total area of 85 square miles, and a population of 55,000.

Korea (Cho-sen).—By a treaty of 23 Aug., 1910, Korea was annexed to Japan and became part of the Japanese Empire, and General Count Terauchi was appointed Governor-General.

Korea is situated between 124° and 128° E.

* The local exchange value of the yen is about 2s. 0½d. or \$9·76 = £1 sterling.
† Exclusive of Korea.

long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of some 71,000 square miles. Population estimated at about 13,125,000; there are about 147,000 Japanese in the country. The soil is fertile, but mountainous except in the river valleys. About 4,500,000 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. About 80 per cent. of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage is 639 miles.

Revenue, 1913-14	*\$45,649,000
Expenditure, 1913-14	57,989,000
Imports, 1912	£6,720,000
Exports, 1912	3,000,000

CAPITAL OF THE JAPANESE EMPIRE, Tōkiō, formerly called Yedo, the residence of the Emperor; population (1910), 2,186,079. Other cities are—Osaka, 1,226,590; Kiōto, the ancient capital, 442,462; Nagoya, 378,231; Kobé, 378,197; Yokohama, 394,303; Hiroshima, 142,763; Nagasaki, 176,480; Kanazawa, 110,994; Kure, 100,679.

LIBERIA.

President (1912-1916), Daniel Edward Howard.
Vice-President, S. G. Harmon.
Secretary of State, C. D. B. King.
Treasury, J. L. Morris.
Attorney-General, S. A. Ross.
Postmaster-General, T. Moort.
Interior, J. J. Morris.
Education, B. W. Payne.

Envoy Extraordinary and Minister Plenipotentiary in London, J. P. Crommelin, 13 Eaton Place, S.W.

Consul-General in London, (vacant).

Consul, J. T. Grein, 27 Mincing Lane, E.C.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 41,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European powers since 1847 as an independent State. The population is estimated at 2,050,000, including about 10,000 Americo-Liberians. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, prassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for four years, and the House of Representatives with fourteen members elected for two years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The organisation of the customs is being carried out by officers lent by the British Government with successful results. There are 15 ports of entry along the 350 miles of coast, viz.: Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greensville, Nanna Kroo, Harper Half Cavalla, Jenne, Webo, Grand Cess, Garway, Niffoo and Batoo. In 1911, 443 vessels (972,737 net tons) entered and cleared at Monrovia.

	1911-2.
Revenue	*\$471,335
Expenditure	470,000
External Debt.....	500,000

Exports.....	975,000
Imports from U.K. (1912)	£110,837
Exports to U.K. (1912)	45,000

CHIEF TOWN, Monrovia. Population, 6,000.

British Cons.-Gen. R. C. F. Mungham £950 to 1,050

Vice-Consul,

Monrovia, 3,650 miles distant; transit, German steamer *via* Southampton, 12 days; and fortnightly English steamer from Liverpool, 12 days.

LIECHTENSTEIN.

Prince, Johann II., b. 5 Oct., 1840; *suc.* 12 Nov., 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59.6 square miles, pop. (1909) 9,854. The main industries are agriculture (chief pro-

ducts being corn, wine and turf), textiles and embroidery. Revenue (1912), 860,526 *kronen*; expenditure 796,036 *kronen* (24 *kronen* = £1); no debt. CAPITAL, Vaduz. Pop. 1,376.

LUXEMBURG.

Grand Duchess, H.R.H. Marie Adelaide, b. 14

June, 1894; *suc.* 26 Feb., 1912.

Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1910) 259,889, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1912 was estimated at 18,696,137 francs, expenditure 20,629,710 francs; debt (Jan. 1, 1912) 12,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 20,848), is a dismantled fortress.

British Envoy, Hon. Sir A. Johnstone, G.C.V.O., K.C.M.G., C.B. (The Hague).

Consul, N. le Gailais.

MEXICO, Federal Republic of.

Provisional President of the Republic, General Victoriano Huerta.

Vice-President,

Minister of Foreign Affairs, Querido Moheno.

Minister in England, Bartolomé Carbajal y Rosas.
1st Secretary, Don Cayetano Romero.

2nd Secretary, Don Julio W. Baz.

Financial Agency, Finsbury Pavement House, E.C.
Consul in London, Adolfo Bülle, Broad Street House, E.C.

Consul-Gen.—Liverpool, Louis G. Pardo.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a population of (1910) 15,063,207. The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,804 miles of railway open on Sept. 16, 1912, and 40,687 miles of telegraph. The railways have in a large measure been built by American and English companies. The principal crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguery, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver

* \$4.82 = £1.

and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dyestuffs, sugar, and drugs ranking next in importance.

Defence.—For Army, see p. 781; the Navy is limited to 7 small vessels.

Education (see p. 785).

Finance, &c.—The following figures have been officially supplied (the value of the Mexican dollar is 24d.) :—

MONACO

Sovereign Prince, Albert, born 13 Nov., 1848; suc. 10 Sept., 1889; mar. 1869, (1) Lady Mary Douglas-Hamilton, daughter of 11th Duke of Hamilton; (2) Oct., 1889, the Duchesse de Richelieu, born 10 February, 1858.
Heir, Prince Louis, born 12 July, 1870.
Minister of State, Emile Flach.

Consul-General in London, Theodore Lumley, 37 Conduit Street, Bond Street, W.

Vice-Consul, Paul Crémieu-Javal, J.P., 35 New Bridge Street, E.C.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1908) 19,121 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. There is a local police force of 150 men.

British Consul, J. W. Keogh (Nice).

British Vice-Consul, C. J. Sim.

English Chaplain, Ven. Archdeacon Spens.

MONTENEGRO.

King Nicholas, born 25 Sept. (8 Oct.), 1841; suc. his uncle, Prince Danilo, 14 Aug., 1860; proclaimed King 14 Aug., 1910; m. 1860, Milena, daughter of Vojvod Peter Vukotich, b. 4 May, 1847; issue 3 sons, 6 daughters.

Heir Apparent, Danilo Alexander, born 29 June, 1871; m. 1899, Princess Jutta of Mecklenburg-Strelitz.

President of State Council, General Vukotich.

Consul-General, Col. Sir J. Roper Parkington, J.P., D.L., 24, Crutched Friars, E.C.

A Principality until 1910, in which year it was proclaimed a Kingdom by virtue of a resolution of the National Skupstina, on the 50th anniversary of the accession of Prince Nicholas. It was formerly a province of the old Servian Empire which came to an end after the battle of Kosovo in 1389, since which date it has always claimed to be independent, and recognised to be so by the Treaty of Berlin (1878). It has an area of 5,800 square miles (including the territory acquired from Turkey in 1913) and a population estimated at 500,000. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, castradina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The ports are Antivari and Dulcigno. There is a railway from Antivari to Lake Scutari. A representative parliament was granted in 1905. In 1912 Montenegro joined with Bulgaria, Servia and Greece in a war against Turkey, the successful outcome of which resulted in

an extension of Montenegrin territory at the expense of Turkey.

	1911.	1912.
Revenue (estimated)	£167,300	£150,390
Expenditure „	„	174,460
Public Debt „	250,000	400,000
	1907.	1910.
Total Imports (estimated) ...	£261,000	£340,277
Total Exports „	56,000	99,650

CAPITAL, Cetinje. Population (1907), 5,000 (exclusive of permanent garrison of 600 men).

British Minister, Count de Salis, K.C.M.G.,

C.V.O. £1,500

Military Attaché, Maj. E. A. Plunkett.
Distant about 1,100 miles; transit, average 4 days.

MOROCCO (French Protectorate).

Sultan, Moulay Yusef, acceded 1912.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°–36° N. lat. and 1°–11° 40' W. long., with a total area of about 314,000 square miles, and an estimated population of 4 to 5 millions. In 1912 a Franco-Spanish agreement fixed the boundaries between the French and Spanish zones, and the principal part of Morocco now forms a French protectorate, while Tangier is to be internationalised. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. There are no railways, and telegraphic communication from Tangier is by submarine cable. The trade is principally with France (and Algeria), U.K. (and Malta), Germany, and Spain.

CAPITAL, Fez. Population, 120,000.

BRITISH LEGATION.

Consul-Gen., H. S. J. Maas, 12 Blomfield St., E.C.

Agricultural Commissioner, Dr. J. J. L. van

Rijn, 50 Mount Park Road, Ealing, W.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population, on Dec. 31, 1912, of 6,102,399. The majority, about three-fifths, belong to the several Reformed Churches; and the remainder are Roman Catholics, with about 107,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, chemical and pharmaceutical products, matches, perfumery, sugar, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, works of art in gold and silver, incandescent lamps, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—There are 3,190 kilometres of railway open (31 Dec., 1911), and 7,609 kilometres of telegraph line. The mercantile marine, on the 31st Dec., 1911, consisted of 347 steamers, tonnage 1,480,943 cubic metres, and 428 sailing vessels (119,744 cubic metres), employing 10,476 men on 31 Dec., 1909.

Defence (for Army, see p. 787).—The royal Navy consisted, on July 1, 1911, of 106 vessels (9 of them ironclads, 6 protected cruisers, 13 coast and harbour defence vessels, 3 river gunboats, 2 torpedo-boat destroyers (for the colonies), 39

torpedo-boats (9 for the colonies), 3 mine-layers (1 for the colonies), 1 submarine, 20 special service vessels and 10 for special service in the colonies.

Education (see p. 785).

Trade and Commerce.—The Netherlands figure largely in the trade returns of the United Kingdom. The following are the *Board of Trade* figures for imports of British produce and manufacture in the year 1912:—

Apparel.....	£187,756	Leather.....	£154,733
Carriages, Motors	333,432	Machinery.....	732,428
Chemical products	386,839	Metals (Iron, &c.)	2,007,545
Oal, coke, & fuel	1,169,925	Oil.....	606,290
Corn and grain...	387,838	Oilcloth.....	155,991

NETHERLANDS' COLONIES.

TOTAL AREA, 832,473 square miles.

POPULATION, 37,861,513.

The possessions of the Kingdom of the Netherlands in the EAST INDIES (Administrative Capital *Batavia*, pop. about 130,000) are very considerable, comprising the whole of the SUNDA ISLANDS and *MOLUCCAS*: *Sumatra* (area, 162,000 sq. miles), *Java* and *Madura* (51,000 sq. miles), *Netherlands Borneo* (115,000 sq. miles), *Celebes Island* (50,000 sq. miles), *Moluccas* (44,000 sq. miles), *Timor Islands* (18,000 sq. miles); with the exception of a portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with a total area of 738,000 square miles, and a population (1905) of 37,717,377, of whom as many as 30,098,000 live in the islands of Java and Madura. JAVA and MADURA (customs receipts, 1910, £1,675,960) produce a sufficient supply of food for a dense population, besides furnishing sugar, tobacco, tea, coffee, and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. There is a colonial army of 1,396 officers and 35,183 men. The colonial revenue for 1912 was estimated at £19,500,000, and was largely derived from the sale of coffee, salt, bark, and tin; whilst the estimated expenditure was £22,000,000. The exports, for private account, amounted in 1910, for Java, Madura, and the other outlying islands, to £35,261,385, while the imports for the same year amounted to £27,720,028.

In South America the colony of SURINAM, or Dutch Guiana (imports, 1910, £618,725; exports, £695,454), embraces 49,845 square miles and contains 86,233 inhabitants; and in the West Indies, CURAÇAO (imports, £263,525; exports, £77,115; population 32,585) and five other small islands belong to the Netherlands, having an area of 436 square miles, with a population of 21,884 (imports, £32,788; exports, £65,958).

Secretary of Legation, Johann Wilhelm Michelet.

Consul-General, H. A. W. Eckell, 22 Great St.

Helen's, E.C.

Vice-Consul, H. L. Brakstad.

* In May, 1909, the Nicaraguan Government obtained a foreign loan of £1,250,000, issuing Gold Bonds with interest at 6 per cent. Of the product of the sale of these Gold Bonds, they were to pay off the English Loan of 1886 of about £245,000 and the American Loan of 1904 of £200,000. The sum of £430,000 was to be set aside for the construction of the new railroad from the Lake of Granada to Monkey Point on the Atlantic seaboard, about 120 miles. The Government of 1911 entered into negotiations for a \$20,000,000 gold loan in the U.S. In June, 1912, the Government defaulted in the payment of the interest on the 6 per cent. Bonds.

Norway, an independent kingdom, founded in 872 (fundamental law of 17 May, 1814), was united with Sweden under the same King from 4 Nov., 1814, to 7 June, 1905, when the union was dissolved. The Parliament of 123 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,130 sq. miles with a population (1910) of 2,391,782. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains. Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at 103,788,000 kroner* in 1912. The mineral products are of late increasing. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of Norwegian industry. The exports of produce of the forests were valued at 85,000,000 kroner in 1912. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, matches, fish, oil, and other products of the fisheries, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, &c.

Defence (for Army, see p. 780).—The Navy consists of 4 ironclads, 2 coast defence monitors, 37 torpedo boats, 3 gunboats, 3 destroyers, 1 submarine, and a few smaller vessels, with 1 destroyer, 1 torpedo boat and 3 submarines building.

Education (see p. 785-6).

Communications.—The total length of railways open in 1913 was 1,946 miles, of which 282 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1913, was 13,535 miles. The mercantile marine, 1 Jan., 1913, consisted of 3,232 vessels, of 2,488,582 tons.

OMĀN.

Sultan, or Sovereign, Seyyid Taimar bin Turki, born 1886, suc. 1913.

Omān (area 81,000 sq. miles, estimated pop. 500,000) is a Mohammedan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omān, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his court. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1912-13 to £690,000. Dates, the staple

food product, are the chief export, and rice, arms, wheat, coffee, cotton and silk goods the chief imports.

CAPITAL, Muscat. Population, 25,000.

PAPACY, The.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the sovereign pontiff of the western church, and claims temporal power over the Papal States which were incorporated with Italy from 1860 to 1870, the territory of the papacy now being confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo, which are guaranteed to the Pope (with a yearly indemnity of 3,250,000 lire) by the Italian Government.

Sovereign Pontiff, His Holiness Pius X. (Giuseppe Sarto), born 2 June, 1835, elected Pope August, 1903, crowned August 9, 1903.

PARAGUAY, Republic of.

President (1912-1916), Eduardo Schaerer,

Consul-General in London, Alfred James, 13

Eldon Street, E.C.

Consul in London (vacant).

An inland State of South America, situate between 18°-30° S. lat. and 54°-62° W. long. Its area is computed at 97,700 square miles, and contains a population of about 800,000. The chief products are tobacco, yerba maté,

oranges, timber, quebracho extract, hides and cassava (manioc). Maize, rice, sugar-cane, and most tropical and sub-tropical plants are also grown. Among its principal trees are several varieties of hard woods and cedar, palms producing palm kernels, castor oil and other oil-yielding and medicinal plants. Stock-raising is the chief industry. The chief articles of export are oranges, hides, tobacco, yerba maté, timber, dried meat and meat extract, and quebracho extract. The army numbers about 3,000 men. A railway, 232 miles in length, which belongs to an English company, was inaugurated in July, 1911.

Envoy Extra. and Minister Plen. in London, Mirza Mehdi Khan, Mushir-ul-Mulk, 22 Queen's Gate Gardens, S.W.

Consul-General, Harry Seymour Foster.

Do. for Scotland, A. C. C. Schultz.

Persia—called by the natives Irán—comprises an area of 630,000 sq. ms., with a population estimated at 10,000,000. By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are only 8 miles of railway open, and travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive

forests in the north and west. Sheep and goats are numerous, and good wool is produced. The principal towns are Tehran (pop. 210,000), Tabriz (180,000), Ispahan (60,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000). The Persians are mostly Shiah Muhammadans; but there are many adherents of Babiism and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, admitting the need for reforms, granted a Constitution, but after much vacillation he was deposed by the National Council, and his son, aged eleven years, appointed to succeed him. In 1911 the ex-Shah invaded Persia from Russian territory, but was defeated and driven out. His followers have continued the struggle.

The revenue (£2,700,000 in 1910-11) is derived from land tax, Crown lands, customs, opium, salt, and lease of monopolies. The foreign debt of Persia amounted (31 Dec., 1911) to £6,720,000. The total imports of merchandise into Persia in 1910-11 amounted to £9,700,000, and the exports to £7,520,000. Russia had about half of the imports and nearly three-fourths of the exports; the British Empire 35 per cent. of the imports and 84 per cent. of the exports. Turkey and France were the other chief participants. The sea-borne trade of Persia passes chiefly through the ports of Bushire, Bunder Abbas, and Mohammerah, and via Baghdad. The shipping of the Persian Gulf is principally British. Persia's chief imports are cotton piece-goods (mainly from England, India, and Russia) and sugar (from Russia and France), with tea, cotton yarn, metal wares, gold and silver, petroleum, and indigo. The principal exports are dried fruits, raw cotton, pearls, opium, rice, wool, fish, hides and skins, carpets, and silk cocoons. The customs (as also the post-office) have, since 1900, been managed by European officials.

Consul at Liverpool, Don Bernardino Codesido.
Do., Southampton, Carlos G. Estenos.
Do., Glasgow, Don M. D. Derteano.
Do., Cardiff, Enrique Zegarra.

Peru is a maritime Republic of South America, situated between 1° 31' 29" and 16° 13' S. latitude and between 62° 6' and 81° 20' 45" W. The territory between 17° 47' S. and 19° 13' S. is still occupied by Chile. The area of the Republic is estimated at 680,026 square miles, and the population at 3,530,000. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by the Brazils and Bolivia, and on the south by Chile and Bolivia. The country is traversed throughout its length by the Andes, running parallel to the Pacific coast. The coast region is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the

highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper, and coal (of inferior quality) are conspicuous; while in the department of Tumbes, along the coast, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. The eastern provinces are of vast extent and fertility, with a tropical climate. The medicinal productions of that region are of great value, comprising cinchona, or Peruvian bark (of which little is now exported), sarsaparilla, copaiba, &c. India-rubber is an important product of the country. Attention has been drawn to the atrocities of collectors and officials of a company with British capital in the Putumayo district. The results of an investigation were published in 1912 by the British Foreign Office, in the hope of inducing the Peruvian Government to exert a controlling influence over the area in question. Coca, cocoa, and coffee are grown on a small scale. Sugar is the staple agricultural article of the country. The Lobos and other islands on the Pacific coast provide guano. The principal imports are coal, cotton, woollen, linen, and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, rubber, and cocaine. A small quantity of coffee is also exported.

The total length of the railways open (1908) was 1,471 miles. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places, and several are contemplated in the near future.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 5,000 of all ranks; the Navy includes two swift cruisers built at Barrow, an armoured cruiser bought from the French Government, 2 submarines, and certain auxiliary cruisers.

Portugal lies in 3°—42° 8' N. lat. and 6° 15'—9° 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 35,500 square miles, with a population in 1911 of 5,960,056, and the Portuguese Colonies a total area of 804,841 square miles, with a population estimated at 9,675,000. The Azores and Madeira form an integral part of the kingdom. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1906) numbered 630 steam and sailing vessels, of which only 17 steam and 5 sailing vessels exceeded 900 gross tonnage. Railways 1,760 miles in extent were open for traffic in 1909, and there were 6,267 miles of telegraph line in 1907. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt.

Education (see p. 786).

Lisbon, distance = 1200 miles.

PORTUGUESE COLONIES.

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 605,000, and includes Goa, Damaun, and Diu. Revenue, 1909-10, £233,000; imports, £1,316,000; exports, £220,000.

MACAO, in China, on the Canton River, has an area of 3 square miles and a population of 80,000. Revenue, 1909-10, £127,300; imports, £1,520,000; exports, £1,700,000.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 300,000. Revenue, 1910-11, £40,000; imports, £80,000; exports, £64,000.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,475 square miles and a population of 150,000. Revenue, 1909-10, £90,000; exports, £70,000; imports, £320,000.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 400,000. Revenue, 1909-10, £62,000; exports, £90,000; imports, £180,000.

SÃO THOMÉ AND PRÍNCIPE ISLANDS, in the Gulf of Guinea (area 442 square miles, population 45,000). Revenue, 1909-10, £186,500; imports, £520,000; exports, £650,000.

PORTUGUESE WEST AFRICA (Angola and Kabinda) has a total area of 480,000 square miles, with a population of 5,000,000. Revenue, 1909-10, £460,000; exports, £700,000; imports, £1,150,000.

PORTUGUESE EAST AFRICA (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyasa, Quilimane and Tete) has a total area of 300,000 square miles, with a population of 3,200,000. Revenue, 1909-10, £1,100,000; total trade (imports and exports), £6,000,000.

Chancellor, M. Beza.

Commercial Agent, M. G. Boucesco.

Consul-General, Lt.-Col. Sir A. K. Rollit, LL.D., 3 Mincing Lane, E.C.

Vice-Consul, N. Gologan, Moscow Court, Moscow Road, W.

The Kingdom of Rumania contains a total area of about 53,000 square miles, with a population (1899) of 5,956,690 (1913, 7,200,000). The dominating religion is that of the Greek Church. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle and sheep. Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, petroleum (1,500,000 metric tons in 1910), rock-salt, spirits, hides, wood, and cattle. The total length of railways is 2,230 miles (1910), and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, exercising sovereign powers over the navigation of the Danube, has its seat at Galatz.

Defence (for Army, see p. 780).—There is a small navy on the Black Sea (30 vessels) and on the Danube, and 4 destroyers are building in Italy.

Education (see p. 786).

Rumania is not a Balkan State, and took no part in the operations of the *Balkan League* (Bulgaria, Servia, Montenegro, and Greece) against the Ottoman Empire in 1912-13; but during the second war (1913), when Bulgaria was in opposition to the remaining members of the League, Rumania was able to exact terms from Bulgaria at the Treaty of Bucharest, by which a "quadrilateral" of Bulgarian territory, amounting to some 2,000 square miles, was surrendered to Rumania.

	1911-12.	1912-13.

Agent of Ministry of Commerce, M. Routkowsky.

Consul-General, Baron A. de Heyking, 30 Bedford Square, London, W.C.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominions under British rule.

<i>European Russia:</i>	English Sq. Miles.	Population 1/14 Jan. 1912.
Russia Proper.....	1,862,524	122,550,700
Poland	49,018	12,776,100
Finland.....	144,178	3,140,100
<i>Asiatic Russia:</i>		
Caucasia	180,703	12,288,100
Central Asia	1,325,530	10,277,000
Siberia	4,780,730	9,577,900

Dependencies:

Khiva	26,028	800,000
Bokhara	78,524	1,500,000
Inland Lakes	317,468	...
	8,770,703	173,359,900

The largest towns in European Russia are St. Petersburg (2,018,596), Moscow (1,173,427), Warsaw (756,426), Odessa (449,673), Lodz (351,570), Kieff (329,000), Riga (256,197), Kharkoff (197,405), Vilna (162,633), Saratov (143,431), Kazan (143,707), Ekaterinoslavl (135,552), Rostoff (119,889), Astrakhan (121,580), Tula (109,279), and Kishineff

(125,787); whilst Nijni Novgorod, Nikolaieff, Samara, and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Baku (179,133) and Tiflis (160,645); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarkand, and Andijan; in Siberia Tomsk, Irkutsk, and Ekaterinburg have each about 50,000 inhabitants. Nijni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world.

Nationalities (1905).—The various nationalities were represented about as follows:—Russ, two-thirds of the whole population, or 65.5%; Poles, 6.2%; Lithuanians, 2.4%; Germans, 1.6%; Armenians, 0.9%; Jews, 3.9%; Caucasians, 0.9%; Finns, 4.5%; Turco-Tartars, 10.6%; Mongols, 0.4%; various, 2.0%.

Religions (1905).—The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there were:—Orthodox, 69.9%; Mussulman, 10.83%; Roman Catholics, 8.91%; Protestants, 4.85%; Jews, 4.05%; other Christian beliefs, 0.96%; other non-Christian beliefs, 0.50%.

European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft. On the right bank of Lake Imandra, in the Kola peninsula, is an elevation of 3,300 ft. The Thianansi range, in the province of Archangel, rises to about 3,000 ft., and Mount Lufaur-Ort in Finland to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural Mountains, which form the borderland between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoi, and Verkhoiansk mountains, with a volcanic chain in Kamtchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Duna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-Baikal province, by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

Agriculture.—A great portion of Russia is unfit for cultivation; in the north the tundras are almost constantly frozen, but in a short summer provide good pasture and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces (to the extent of about 450,000,000 acres) and nearly the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple, and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. The total area under cereals, potatoes, &c., in 1912 was 361,045,636 acres, of which 78,137,333 acres were under wheat, 72,245,482 under rye, 46,903,878 under oats, and 29,899,754 acres under barley. The harvest of cereals for 1912 is officially

stated to be as follows:—wheat (spring and winter sown), 21,478,312 tons; rye (spring and winter) 25,842,956 tons; barley, 10,321,593 tons; oats, 15,569,348 tons; millet, 2,354,006 tons; maize, 2,861,106 tons. Hemp and flax are extensively cultivated, and of late years potatoes (37,399,474 tons in 1912) and tobacco (7,716,926 pounds of 62 lb. in 1911.)

The *Live Stock* in 1912 included 48,896,000 cattle, 74,066,000 sheep, lambs and goats, 13,508,000 pigs, and 33,169,000 horses.

Minerals.—The Obdorsk and Ural Mountains contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities from the mines in the Altai Mountains. Russia is now the largest producer of petroleum in the world, the output amounting to 515,620,000 poods (of 36 lb.) in 1911. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). The coal output for the whole of Russia in 1910 was 1,521,984,358 poods (of 36 lb.); other mineral products in 1910 were gold-ore (schlich), producing 3,606 poods of pure gold; platinum, 335 poods; pig iron (171,000,000 poods in 1908); steel and rails (1906, 2,000,000 tons), copper (14,401,000 poods in 1907), and quicksilver (325 tons in 1904).

Ports.—The principal ports are Petersburg, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Pernaú and Vindau (Baltic), Hango (Gulf of Bothnia), Revel, Helsingfors and Wiborg (Gulf of Finland), Archangel and Ekaterinsk (Arctic and White Seas), Odessa, Nicolaieff, Sevastopol, Nova-Rossiisk, Berdiansk, and Batoum, Taganrog, Mariupol, Rostoff and Kerch (Black Sea and Sea of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Nicolaieffsk, Vladivostok, and Petropaulovsk in Kamtchatka (Pacific).

Defence (for Army, see pp. 105 and 780).—The Navy (see also pp. 105 and 777) consisted of the Baltic Fleet, the Caspian flotilla, and the Black Sea Fleet, the number of vessels being shown on p. 105.

Education (see p. 786).

Communications.—The total length of lines open for regular traffic on January 1, 1913, was 46,839 miles, inclusive of 2,347 miles in Finland, and 1,079 miles of the Eastern China Railway. New lines under construction in 1913 extended to 4,991 miles, of which 2,823 were Government lines; projected lines authorised (1-14 Jan. 1914) totalled 4,205 miles. In 1912 the gross revenue amounted to £13,419,600. The number of passengers carried was 235,179,382, and goods traffic amounted to 229,283,479 tons.

There were (1910), excluding Finland, 16,675 post-offices, carrying 2,056,084,700 letters, &c. Of telegraphs there were (1910) 8,423 offices, with 440,415 miles of wire.

The sea-going commercial marine consisted in 1913 of 716 steamers, with a total tonnage of 790,075, and 500 sailing vessels of 184,103 net tons. In 1911 the total estimated value of the steam fleet was £15,300,000 and of the sailing vessels £1,700,000. The steam fleet was manned by 17,157 persons and the sailing ships by 12,333 persons; the ocean shipping of the Russian Empire is comparatively insignificant, but the

internal (lake and river) shipping is considerable. Budget Revenue:—

	1913. *Roubles.	1914. *Roubles.
Ordinary	£3,240,599,006	£3,521,697,282
Extraordinary	20,000,000	13,400,000
Budget Expenditure:—		

Ordinary	£3,012,264,284	£3,302,675,714
Extraordinary	288,294,722	255,585,785
National Debt.—The National Debt amounted on 1 (14) January, 1914, to £931,600,000 (8,811,380,000 roubles). The total of gold in the State Bank at 1 (14) November, 1913, was 1,673,580,000 roubles (£175,900,000).		

Trade and Commerce.—The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables; the principal exports are wheat and other cereals, raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow, and bristles.

	1911.	1912.
Total Imports	£125,975,262	£123,881,481
Total Exports	169,886,694	160,558,518

Exports to U.K., 1912, £40,538,532:—

CAPITAL OF THE RUSSIAN EMPIRE, St. Petersburg. Population (1913), 2,018,596.

THE GRAND DUCHY OF FINLAND.

Grand Duke, The Emperor of Russia.

Governor-General, General Seyn.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. The area is 144,254 square miles, with a population of about 3,000,000 in 1907, of whom about 2,600,000 are Finns, 400,000 Swedes, 19,000 Russians, 3,000 Germans, and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,512 students, of whom 518 are women. The leading crops are rye, barley, oats, potatoes. Saw mills and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are 2,582 miles of railway; and a merchant fleet of 3,120 vessels (mostly small), of which 399 are steamers.

The country was formerly governed by the Imperial Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people. This form of government gave way on Jan. 1, 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland is thus the first country to concede woman suffrage and representation, and it is noteworthy that it has been gained without agitation. The Finnish troops only exist in name, the Diet having voted £400,000

* Roubles 948 = £1.

per annum to the Russian Treasury in lieu of furnishing Finnish recruits to the army or navy, and Finland has been made part of the Petersburg Military District. The estimated revenue in 1909 is £3,109,000, and the estimated expenditure £3,318,000; the debt amounts to £5,556,410. The imports in 1912 were £18,638,288 (of which 60 per cent. was timber), and the exports £13,392,857. The capital is Helsingfors; population, 160,000 (including Russian garrison).

BOKHARA.

Emir of Bokhara, H. H. Said Mir Alim Khan, b. 1880, succeeded 1911.

Bokhara is a vassal State of the Russian Empire in Central Asia, and has an estimated area of 85,000 square miles, with a population of 1,250,000, the majority being Muhammadan Uzbeks. The capital (Bokhara) is a station on the Trans-Caspian Railway, and has a population of about 60,000. The principal products are rice, wheat, fruit, hemp, cotton, and silk. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar.

KHIVA.

Khan, H. H. Said Asfendiar, b. 1871, succeeded 1910.

Khiva lies between Bokhara and Russian Trans-Caspia, and has a total area of about 26,000 square miles, with a population of 800,000, of whom about half are nomads. The country occupies the fertile delta of the Oxus, and is highly productive. The capital (Khiva) has about 10,000 inhabitants.

SALVADOR, Republic of.

President, 1913-15, Carlos Melendez.

Foreign Affairs, Dr. Francisco Martinez.

Minister in London (vacant).

Chargé d'Affaires and Consul-General in London, Dr. Arturo R. Avila, 7, Union Court, Old Broad Street, E.C.

Salvador extends along the Pacific coast for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 7,225 square miles, with a population estimated at 1,200,000. It is divided into 14 departments, and has four ports, Acajutla, La Libertad, La Union, and El Triunfo. The principal exports are coffee, indigo, tobacco, sugar, silver, balsam (known as balsam of Peru), rice, hides, cedar, and fustic. A railway nearly 100 miles in length connects Acajutla with the capital and Santa Ana, the coffee centre, and another line (40 miles) runs from the port of La Union to San Miguel. Earthquakes are frequent, and the capital (now rebuilt) was entirely destroyed by one in 1873; but the country has of late years suffered comparative immunity. There are 120 post-offices and 203 telegraph offices, with 2,841 miles of wire.

	1911-12.	1912-13.
Revenue	£1,042,040	£1,284,900

Salvador is 5,700 miles from London; transit,
21 days *via* Salina Cruz (Mexico).

SAN MARINO.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 32 square miles, the population 10,655. There is an army of about 1,000. The city of San Marino (pop. 1,500) occupies the slope of Mount Titan, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. Agriculture and viticulture flourish.

British Consul-General for San Marino, M. Carmichael (Florence).

Consul-General for San Marino in Great Britain,
Commandatore Arthur Serena, J.P., F.R.G.S.,
34 Leadenhall Street, E.C.

SERVIA.

King Peter I. (Kara Georgevitch), b. 1844, elected
15 June, 1903, married, 1883, the late Princess
Zorka of Montenegro.

Heir Apparent, Prince Alexander, b. 1888.

Premier and Foreign Affairs (12 Sept., 1912),
M. Nikolas Pashitch.

Interior, M. Stoyan M. Protitch.

War, Gen. Bojanovitch.

Justice, M. Djouritevitch.

Public Instruction, Ljubomir Yovanovitch.

Commerce and Agriculture, Dr. Jankovitch.

Finance, M. Laza Patchou.

Public Works, M. Yovan P. Yovanovitch.

Minister in London, M. Boschkovitch.

Legation, 40 Port Street, S.W.

Chargé d'Affaires, Slavko Y. Grouitch.

Secretary, Alexandre V. Georgevitch.

A Kingdom of Eastern Europe, separated from Hungary by the Danube and Save, and bounded on the east by Bulgaria, on the west by Albania and Montenegro and on the south by Greece. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people; this constitution was re-established by the present king. By the Berlin Treaty, 1878, it received a large accession of territory, and in 1912 it had an area estimated at 18,757 square miles, with a population in 1910 of 2,911,701. In 1913 Servia, as a member of the Balkan League (Bulgaria, Greece, Servia, and Montenegro) waged a successful war against Turkey. In August, 1913, Servia and Greece were attacked by Bulgaria, their former ally, owing to disputes concerning the division of the spoils. The second war collapsed in a few weeks through the threatened intervention of Rumania, and ended in the Treaty of Bucharest. Servia also became involved with the Austro-Hungarian Monarchy on a question of the Albanian frontier, where desultory fighting had taken place for some months, but eventually the smaller Power with-

drew from the disputed area. The outcome of the military operations was the inclusion of the whole of "Old Servia" (the greater parts of the vilayets of Macedonia) within the Servian boundaries, which thus embrace an area (1914) of close on 34,000 square miles, with a population estimated at 5,000,000. The cost of the wars to Servia exceeded £18,000,000. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The imports consist mainly of cottons, sugar, and colonial goods, hardware, woollens, &c.; the export, of dried prunes (11·5 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. There were (1911) 580 miles of railway, and (1908) 2,200 miles of telegraph, with 1,460 post-offices and 1,100 miles of telephone.

(For Defence, see pp. 105 and 780.)

SIAM.

King, Somdet Phra Paramend Maha Vajira;
vudh Mongkut Kiao, born 1 January, 1880 -
succeeded 23 October, 1910.

Foreign Minister, H.R.H. Prince Dewawongse.

Envoy Extr. and Min. Plen. in London, Phya
Sudham Maitri, 23 Ashburn Place, S.W.

Consul-General, Sir John Anderson, 5 Whittington
Avenue, E.C.

The Kingdom of Siam, or Muong Tai (area about 220,000 square miles; population (1909) 6,230,000, is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The upper part of Siam is mountainous, the lower flat. Siam contains many Chinese (largely engaged in trade and industry), besides Sians, Laos, Malays, Burmese, and Cambodians, and over 1,600 Europeans. The principal religion is Buddhism, and education is mostly conducted by the Buddhist monks. Bangkok is the only much-frequented port. Over two-thirds of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping now largely exceeds British through the purchase of certain British steam-

ship lines. Norwegian shipping also exceeds British. The chief products of Siam are rice and teak. The area under rice has been much enlarged by irrigation. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1909-10 rice constituted 83 per cent. and teak 7 per cent. of the exports; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, rubies and sapphires, there are no important mineral products. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers and a European general adviser, and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. A number of English, French, Germans, Italians, Danes, and Japanese are employed in the various State departments. Siam has an army of about 20,000 men, and a few small gunboats; compulsory military service has been introduced. About 700 miles of railways (mostly State-owned) are now open for traffic. Bangkok is connected by rail with Petchaburi (95 miles to the west), and with Korat (165 miles to the north-east). The former line is being extended southwards down the Malay Peninsula. The northern State line, in the direction of Chiangmai (pop. 50,000), the second town in size and near the Burma-Siam frontier, has reached Sala Meh Puak, its terminus for the present. The eastern State line runs to Petri. Good roads are few. There are 3,000 miles of telegraph lines.

The currency is the silver tical, worth about 1s. 6d. The Mint was closed to the free coinage of silver in Nov., 1902. In N.W. Siam the Indian rupee is more or less current. The Government issues notes.

Consul-Gen., Excmo. Señor Don J. M. Torroja, 40 Trinity Square, E.C.
Vice-Consul, Don José Prieto del Rio.

A Kingdom situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E.—9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and a population (1910) of 19,588,688. The interior of the peninsula consists of an elevated tableland, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. The Constitution upon which the present Government is formed is dated 30 June, 1876. The principal towns are Madrid (pop., 597,573), Barcelona (587,219), Valencia (233,348), Seville (155,366), Malaga (136,192), Murcia (125,380), Saragossa (111,701), Carthage (96,983), Bilbao (93,536), and San Sebastian (92,514); and there are also twelve towns with over 50,000 inhabitants. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins,

silver, grapes, cork, spars, glass, wool, salt, quick-silver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany has now become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is rigidly protected by high customs duties.

In 1912 there were 9,161 miles of railway open, and 23,102 miles of telegraph line. The sea-going mercantile marine on Jan. 1, 1910, consisted of 550 steamers and 305 sailing vessels over 50 tons, of a total tonnage of 745,521. In 1910, 21,645 vessels of 21,488,654 tons entered and 18,341 vessels of 20,122,319 tons cleared at Spanish ports.

Defence (for Army, see p. 780).

The Navy is being rebuilt and reorganised, and consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers; there are also 7 torpedo-boat destroyers, 24 torpedo-boats and 10 gunboats.

Education (see p. 786).

Madrid, 1,150 miles; transit, about 36 hours.	

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1910) of 325,703. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of about 13,000.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 419,809. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Tenerife.

SPANISH COLONIES.

The Spanish Colonies (exclusive of Ceuta and the Canary Islands, which form an integral part of the kingdom) consist of certain settlements and islands of Western Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

Fernando Po.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in 3° 12' N. lat. and 8° 48' E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies of the island of Fernando Po are:—

Annohon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24' S. lat. and 50° 35' E. long. The roadstead at the capital (San Antonio de Baia) is much frequented by passing vessels, which also obtain water and vegetables from the islanders.

Corisco Islands, consisting of Corisco, Bana, Elobey Grando and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce.

Rio de Oro and Rio Muni.

RIO DE ORO is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20'–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs. There are valuable fisheries off the coast, and cattle, sheep, and camels are bred where vegetation permits.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between German Cameroon and French Congo (1° N.—2° 10' N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast. Cocoa, coffee, and bananas are cultivated, and rubber, palm oil, palm kernels, and other forest produce are exported.

*** Spanish Morocco.**

On the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Melilla is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. The population is about 9,000, and the settlement exports goatskins, eggs, and beeswax, and imports cotton goods and provisions.

Alhucemas is a settlement on the bay of that name, and includes six islands.

Peñon de la Gomeria (or *Peñon de Velez*) is a fortified, rocky islet about 40 miles west of Alhucemas Bay.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population about 1,000.

Imi, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

SWEDEN, Kingdom of.

King of Sweden of the Goths and the Vandals, Gustaf V., born 16 June, 1858; suc. 8 December, 1907; mar. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862 (and has issue 3 sons).

Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, born 11 Nov., 1882; married 15 June, 1905, Margaret, daughter of H. R. H. the Duke of Connaught (see p. 119).

Consul-General, D. Danielsson, 63 Finsbury Pavement, E.C.

Vice-Consul, C. W. Espersson.

Swedish Church, Harcourt Street, Marylebone Road, W.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 172,876 square miles, and a population, 31 Dec., 1910, of 5,521,943, nearly all Protestant. This area includes the great lakes of Hjälmaren, Mälaren, Vänern, and Vättern. Nearly 49 per cent. of the population are devoted to agriculture, about 298,000 being owners and 50,000 tenants of the land they cultivate. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kölen Mountains, which separate Sweden from Norway; and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Seania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, cloth, yarn, wool, cotton, hides, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c.

* See map, p. 770.

Commercial travellers in Sweden are compelled to take out a licence, costing 100 crowns a month, or they incur the risk of being fined.

Railways 8,594 miles in length (of which 2,746 are the property of the State) were open at the end of 1910; and 20,009 miles of telegraph wires (exclusive of 17,199 railway telegraph wires), 177 stations, and 1,729 railway and 940 other telegraph stations (1910). There were at the same date 245,750 miles of telephone wires.

Defence (for Army, see p. 779). The Navy consists of 92 fighting vessels (438 guns), 23 being ironclads, with submarines, submersibles and some training ships, &c.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 48' N. lat. and 5° 58'—10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 3,753,293 in 1910, who are divided between Roman Catholics, 40 per cent., and Protestants, 59 per cent., Jews numbering 7,400 and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansh (in the Grisons), 1½ per cent. The most important cities are Zürich, pop. (1910) 190,733, Bale 132,280, Geneva 123,680, Berne 85,650, and Lausanne 64,450. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cotton linen, lace, thread, woollens, &c.; clock watches have long been the staple prodⁿ. Geneva and Neuchâtel, while leather.

* The President is elected in December, in office from 1 Jan.—31 Dec.; he is *genero* by the Vice-President.

pottery, tobacco and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1909 there were 3,200 miles of railway in working order, 5,500 miles of telegraph line, 11,000 miles of telephone line, and 1,850 post offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 189 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 20,000 francs; the Vice-President and other members of the Federal Council 18,000 francs each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council. (For *Defence*, see p. 780; for *Education*, see p. 786.)

TRIPOLI (Italian Colony).

This Vilayet of the Ottoman Empire, on the northern coast of Africa, was occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct., 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being

retained by the Sultan. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutesarrifliks of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 410,000 square miles, with a population of over 1,000,000. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Borno, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle, and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; agricultural colonies of Cretan Moslem refugees are being formed in the neighbourhood of Cyrene and Apollonia (Marsa Susa). The town of Benghazi has a population of about 21,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

CAPITAL, Tripoli. Population, about 40,000.

Consul-Gen. (vacant) £800
Vice-Consul, Alfred Dickson £350 to 450
Hon. Physician, Dr. Angelo Mizzi
Khoms—Vice-Consul, Joseph Tate
Benghazi—Consul, F. G. Freeman ... £600 to 700

Turkey in Africa :—		
Egypt	363,181	11,400,000
Total	1,058,041	31,580,000

Of the above totals only 700,000 square miles (with a population of 21,000,000) are directly under Turkish government, *Egypt* being semi-independent.

Until the disastrous war of 1912-3 with the States of the *Balkan League* (Bulgaria, Greece, Servia, and Montenegro) the European dominions of Turkey extended westwards to the Adriatic and northwards to Bosnia-Herzegovina (Austria). Under the Treaty of London (30 May, 1913) the north-west portion of Turkey was a line drawn from Enos, in the *Ægean*, to Midia, in the Black Sea, thus excluding *Adrianople*, which had capitulated to the Bulgarians after a prolonged siege. During the second Balkan War (Bulgaria against the other members of the Balkan States) Turkey took advantage of the military difficulties of Bulgaria and re-occupied *Adrianople*, thus recovering a considerable portion of the vilayet of that name. In 1911-12 Turkey lost the remaining portion of her African possessions through the occupation by Italy of Tripoli and Cyrenaica, which were ceded under the Treaty of Ouchy (1912).

EUROPEAN TURKEY consists of the Vilayets, or Provinces, of *Adrianople* and *Constantinople* with the *Mutessarifat* of *Chatalaya*, and is separated from Asia by the *Bosporus* at *Constantinople* and by the *Dardanelles* (*Hellespont*), the only political neighbour being Bulgaria, on the north-west. The principal towns of European Turkey are *Constantinople*, the capital, with a population of about 1,200,000, and *Adrianople* (100,000).

TURKEY IN ASIA comprises *Anatolia*, *Armenia* and *Kurdistan*, *Mesopotamia* and *Syria*, and *Turkish Arabia* :—

Anatolia, which is practically identical with *Asia Minor*, consists of the Vilayets of *Adana*, *Angora*, *Archipelago*, *Broussa*, *Castamuni*, *Konia*, *Sivas*, *Smyrna*, and *Trebizond*, with the *Mutessarifats* of *Bigha* (*Dardanelles*) and *Ismid*. Of the total population (9,175,000) about 5,000,000 belong to the Orthodox Greek Church, over 4,000,000 are Muhammadans, and the remainder principally Jews. The *Archipelago Vilayet* of *Anatolia* formerly comprised a number of islands with a total area of close on 3,000 square miles, and other islands were under Turkish suzerainty. In 1911-12 Italy occupied *Rhodes*, with the neighbouring islands, and is to remain in possession until the Ottoman forces are removed from *Tripoli*; while in 1912-13 almost all the remaining islands of the vilayet, and *Crete* and *Samos*, were obtained by Greece. *Cyprus* (see pp. 658-9) has been administered by Great Britain since 1878.

Armenia comprises the vilayets of *Bitlis*, *Erzeroum*, and *Mamuret el Aziz*, and *Kurdistan* those of *Diarbekir* and *Van*. Of the population (2,500,000) about 650,000 are Armenian Christians, 250,000 other Christians, and 1,600,000 Muhammadans. *Mesopotamia* (the land of the *Tigris* and *Euphrates*) includes the vilayets of *Bagdad*, *Basra*, and *Mosul*, and part of the vilayet of *Zor*. South of the city of *Bagdad* is *Kerbela*, the sacred centre of the Shiite Muhammadans. *Mesopotamia* is the subject of two great schemes, the *Euphrates Valley Railway*, being an extension of the German lines in *Anatolia* to the Persian Gulf, *via* *Bagdad*, and the *Mesopotamia Irrigation Scheme*, under the superintendence of Sir W. Willcocks, K.C.M.G., which has already brought some thousands of acres within the reach of the cultivator and promises to revive the prosperity of bygone days.

Syria includes the vilayets of *Aleppo*, *Beyrout*, and *Syria*, and part of the vilayet of *Zor*, with the *Mutessarifiks* of *Jerusalem* and *Lebanon*. The Biblical district of *Palestine* now forms the *Mutessarifiks* of *Jerusalem* (*El Kuds*), *Lebanon*, *Acre*, and *Nablus*. The total area of this cradle of Christianity is about 11,000 square miles, its present population being about 700,000, of whom 150,000 are Jews, and the remaining principally Muhammadans. The Church of the Holy Sepulchre at *Jerusalem* is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic Churches. The site of *Solomon's Temple* is occupied by the Mosque of *Omar*, which contains a relic of *Mahomet* and the sacrificial stone of *Abraham*. *Damascus* contains the Mosque of the *Ommayyedes*, where is the tomb of *Saladin*.

The principal towns of Asiatic Turkey are *Smyrna* (260,000), *Bagdad* (150,000), *Damascus* (150,000), *Aleppo* (125,000), *Beyrout* (120,000), *Scutari* in *Anatolia* (80,000), and *Broussa* (80,000).

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the *Anatolian railway* by German enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce established at *Stanboul*, *Constantinople*, in 1887, has branches at *Smyrna* and *Salonica*, and in the North of *England* (*Manchester*).

Defence (for Army, see p. 780).—In 1910 the Navy consisted of 3 battleships (2 bought from Germany), 2 protected cruisers, 3 torpedo gunboats, 8 t.b.d. (4 bought from Germany), and about 14 torpedo boats, manned by a total peace force of about 15,000 men. A 23,000-ton battleship is being built in *England* for the Turkish Fleet. Besides this, there is the *Makhsusa Fleet* of about 75 steamers of various sorts, worked by the Government and available as transports, storeships, and coastguard cruisers. In 1909 a British flag officer was engaged, with six junior officers, to reorganise the Navy.

Education (see p. 786).

Communications.—In 1912 there were 4,230 miles of railway open, 1,230 miles in European and 3,000 miles in Asiatic Turkey. Of this total 1,000 miles (*Hejaz line*) are owned and

worked by the Ottoman Government and 3,230 by foreign concessionaires (French 1,080, German 1,030, Austro-German 800, British 320). In 1910 there were 912 post offices, and 29,500 miles of telegraph line. Telephones have been installed in certain towns since the revolution of 1908-9. The sea-going mercantile marine of Turkey consisted in 1913 of 135 steam vessels (62,215 tons) and 137 sailing vessels (45,450 tons). In 1909 vessels of 43,060,515 tons entered Turkish ports. A Republic in South America, on the east coast of the Río de la Plata, situate in lat. 30° — 35° S. and long. 53° $25'$ — 57° $42'$ W., containing an area of 72,210 square miles, and a population of 1,094,688, of whom about 2,000 are British born. The Republic consists mainly of undulating grassy plains, there being no heights above 2,000 ft. The principal river is the Uruguay and its affluents, of which the Río Negro is the chief. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (9,000,000 in 1908) and sheep (26,000,000 in 1908), the wool of which is of excellent quality. Gold mines exist at Cuiapirú. The exports are almost entirely animal and agricultural products, and include wool, hides, horn, hair, tallow and jerked beef, and wheat and maize; the imports are principally machinery, textiles and clothing, food substances and beverages, coal and bloodstock. The imports from the U.K. are numerous, the principal being woollen and cotton goods, hardware, and coals. There are 1,570 miles of railway open (1911), all in British hands, and 6,059 miles of telegraph in 1910, with 19,039 miles of telephones. There are about 150 miles of electric tram lines in Monte Video. In 1912, 5,562 vessels (10,593,958 tons) entered the port of Montevideo, and 5,543 vessels (10,535,603 tons) cleared.

The most northerly Confederation of South America, situated approximately between 140° S. lat. and 12° $26'$ N. lat. and 59° $52'$ — 73° $15'$ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1891 gave the population as 2,323,527; it was estimated to be 2,661,569 at 31 Dec., 1908. The principal imports are cotton prints and cotton drill, mainly from the U.K. The principal articles of export are, coffee (£1,469,613 in 1909-10); cocoa (£661,638 in 1909-10); balata gum, cattle, and hides. The U.S. is the principal customer.

The prevailing religion of the country is Roman Catholic, there being but few of the Protestant faith. Education, which is in a very backward condition, is nominally free. The State provides schools for primary instruction; there are also some secondary schools and two universities. The Army has a nominal strength of nearly 9,000 men, and service in the national militia is compulsory. The Navy is composed of 8 vessels (3 gun-boats, 1 tug, 2 transports, 1 torpedo boat destroyer, and 1 torpedo boat). The length of railways opened and under construction is 526 miles.

Geographical Progress and Territorial Changes, 1912-13.

Europe.—The greatest transformation of the map of Europe since the Berlin Treaty has resulted from the Balkan wars of 1912-13. The readjustment of frontiers is still incomplete, but the accompanying map shows broadly the new distribution of territory. By the peace signed in London on May 30, 1913, as the result of protracted discussions between the representatives of the Powers there assembled, Turkey finally bowed to the inevitable and yielded up all claim to the territory occupied by the allies, retaining only, of her former European possessions, Constantinople and the corner of Thrace lying south-east of a line from Enos on the

southern frontier of Albania, which is to follow a line to be drawn by an International Commission from a point south of Cape Stylos to the Lake of Ochrida.

Asia.—The borderlands of India, Tibet, and China continue to offer a field for the energy of travellers, and here the most important undertakings are again concerned with the unknown stretch of the Brahmaputra during its passage through the mountain barrier of the Himalayas. A party having been sent to survey the valley of the Dihong, Capt. F. C. Bailey obtained leave to push across into the parallel valley of the Dihong, the connecting link between the

THE ENLARGED BALKAN STATES.

Aegean to Midia on the Black Sea. Albania was set up as an independent State, the delimitation of its frontiers being left to the Powers, as was also the ultimate fate of the Aegean islands, while Crete was ceded by Turkey to the allies. But this treaty was not to effect a final settlement. Already dissensions had sprung up between the allies as to the partition of the spoils of victory, and war soon broke out between them, Bulgaria standing alone against the other three. Her complete defeat, and the vigorous intervention of Rumania, led to the signature, on August 10, of a new treaty at Bukarest, by which both Greece and Serbia gained largely at the expense of Bulgaria, while Montenegro received an accession of territory to the east and south from Serbia. Rumania, who had already secured a small rectification of her southern frontier, now received a further extension in this direction. A few days later the Powers came to an agreement regarding the

Sanpo of Tibet and the Brahmaputra. This he did in company with Capt. Morshead, crossing three difficult snowy passes, and reaching the Dihong near the junction of an important tributary. The gorge on the main stream, which began some four days' march higher up, was said to be impassable, but according to latest accounts was successfully explored. The travellers were back in India in November. Two other officers, Capts. Trenchard and Pemberton, are said to have struck the river above its still unknown section, but to have then been forced to retrace their steps. Further south, the northern borderlands of Burma were the scene of disaster to an expedition under Capts. Pritchard and Waterfield, the former (who had previously made some adventurous journeys in the same region) being drowned in an attempt to cross the Taron, one of the headstreams of the Irawadi, which the travellers had explored. The same headstreams

were the objective of an official expedition organised in two sections, under Messrs. Barnard and Clerk respectively. On the north-western borders of India, an important scientific expedition under the well-known Italian mountaineer, Dr. F. de Filippi, which has received the support of the Indian Government, will begin work early in 1914. The programme includes research in the most varied scientific departments—geology, meteorology, atmospheric physics, magnetism, &c., as well as geodesy and topography; and the European personnel, eleven in all, includes well-known experts in these subjects. The services of a native surveyor will be given by the Indian Government.

Prospective results of great importance may be expected from the new expedition into the central regions of the continent organised by Sir Aurel Stein, under the auspices of the Indian Government, for geographical and archaeological research. The traveller started during the autumn from Kashmir, and, crossing the mountains by new and difficult routes, reached Kashgar in time to undertake a winter campaign in the desert of Eastern Turkestan. He intends afterwards to carry his investigations further east into the little-known portion of the Gobi Desert east of Hami, and will probably be away some three years. Northern Arabia has once more been the scene of some exploring activity, though the great interior of the southern half of the peninsula still presents obstacles too great to be surmounted. Capt. Leachman, who, in 1911, made an enterprising journey in the north-eastern borderlands, carried out a more extensive trip in the last months of 1912. Starting from Damascus by the desert track towards Baghdad, he turned south-east and made his way, by little-known routes, to Boreidah, and eventually to Riadh, in Eastern Nejd. Thence he returned to the coast by an easterly route to El Hasa. He is said to have gathered much information on the unvisited country to the south. The journey through Northern Arabia and Mesopotamia, carried out in 1912 by the Austrian traveller, Prof. A. Musil, has been described by him in some detail. On the onward journey he went, in part by untraversed routes, through the country south of the Middle Euphrates to the neighbourhood of Babylon, whence, turning north to Baghdad and Tekrit on the Tigris, he struck west and north-west through some of the least-known parts of Northern Mesopotamia, keeping generally some distance to the north of the Euphrates, and eventually reaching Aleppo. Topographical, archaeological, and other researches were carried out during the whole journey. Somewhat further north, the German traveller, Count von Oppenheim, has continued his investigations near the source of the Khabur River, bringing to light antiquarian remains dating in part from the time of the old Hittite Kingdom. The precise survey of the Turco-Persian frontier, begun many years ago in virtue of an Anglo-Russian understanding, but interrupted by the Crimean War, has at last been taken in hand once more by the same two Powers. The British Commission is under the well-known Tibetan surveyor, Major Ryder, R.E. In the north-east of the continent, the Russians continue to prosecute scientific exploration in little-known parts of Eastern Siberia.

Africa.—The few areas of any size, apart from

the Sahara, that may still be considered in any way unknown, become yearly more and more circumscribed. One of the largest has hitherto been the stretch of arid country in the north-east of British East Africa contained within the Jubaland province. This has lately been traversed by two expeditions—one under Mr. C. W. Haywood, who went north-west from Kismayu on the coast through a country covered by thick thorn bush and intersected by dry river-beds, afterwards turning south to the Lorian swamp, from which, contrary to expectation, he found a small stream running eastward to a second swamp in the direction of the Lower Juba. A somewhat similar journey, but by different routes, has been made by Mr. I. N. Dracopoli, whose careful surveys have much improved the map of this part of Africa. Further north, the little-known country east of Lake Rudolf has been surveyed—for the first time with any precision—by Mr. G. F. Archer, who has been able to link together the official survey of British East Africa with those carried out by various travellers in the south of Abyssinia. An Italian expedition, under Capt. Citeri, for the survey of the Italian frontier with Abyssinia, has also yielded good results.

In the interior of Mozambique, exploration has also been resumed with some energy. The expeditions sent inland by a British syndicate, for the study of the mineral resources, have resulted in a much-improved map of the country between $13\frac{1}{2}^{\circ}$ and $15\frac{1}{2}^{\circ}$ S. lat. as far as the Namuli Hills. The surveys on which it is based were the work of parties under the direction of Mr. E. W. E. Barton, astronomical observations being taken by Mr. R. L. Reid, while the physical geography and geology were investigated by Messrs. Holmes and Wray.

In West Africa, the survey of the new line of frontier between the Kamerun and French Equatorial Africa has been completed by a number of detachments, French and German, and has resulted in valuable additions to knowledge. Wireless telegraphy was used with some success, in spite of considerable difficulties, for the determination of longitudes. In the Kamerun itself an expedition under Prof. Thorbecke has explored the little-known districts of Tikar and Wute, east of the Mbam River, and has brought to light the scanty remnant of a tribe of dwarfs. A survey of the Nyong River, with a view to testing its navigability, has been carried out for the *Kolonial-Wirtschaftliche Komitee* by F. Michell. In Portuguese West Africa, valuable results have accrued from an expedition under Prof. J. W. Gregory, carried out in 1912, for the study of the suitability of the Benguela highlands for a Jewish colony. Further south, in the Mossamedes district, the Comte de Rohan-Chabot has continued his explorations, and useful survey work has been done by his companion, Capt. Grimaud.

Railway construction has made some advance in Africa during the year. The German railway from the east coast to Lake Tanganyika has almost reached its destination, the Katanga Railway in the south of the Belgian Congo (the northward continuation of the British line through Rhodesia) has been opened to a little beyond Kambove, and the line to the same region from Lobito Bay on the west coast is advancing steadily. The Nigerian authorities

have decided on the construction of a new trunk line from the coast into the interior, starting from Port Harcourt, near the mouth of the Bonny River, passing through the Udi coalfields and crossing the Benue so as to join the existing Kano Railway at the Kaduna River. It may eventually be continued north-east towards Bornu.

The most important territorial arrangement during the year was that between France and Spain for the delimitation of the latter's spheres of influence in Morocco and the western Sahara. They are shown on the sketch-map below.

America.—Prof. Parker, the American mountaineer, who, after previous unsuccessful attempts, virtually reached the summit of Mt. McKinley in 1912, in company with Mr. Belmore Brown, has given an account of his experiences. The ascent was made by the great McKinley glacier and the north-eastern ridge, a final camp being established at 15,000 feet. The attainment of the actual culmination was only prevented by a violent blizzard which entirely obscured the view, and by the impaired vitality of the climbers, due to insufficient nourishment.

Using the same route, Archdeacon Stuck and Mr. H. P. Karstens reached the actual summit for the first time in 1913, though the difficulties were increased by the effects of a recent earthquake.

In Northern Canada disaster is reported to have overtaken the American naturalist, Mr. H. V. Radford, who had for some time been exploring the Barren grounds between the Great Slave Lake, Chesterfield Inlet, and the Arctic Ocean. He and his companion, Mr. Street, are said to have been murdered by their Eskimo companions after reaching Bathurst Inlet on the northern coast.

In South America, two important expeditions in the inmost recesses of the Amazonian forests have lately been brought to a close. Dr. Hamilton Rice, who started in 1912 on a second expedition to this region, pushed south from Colombia to the head-waters of various tributaries of the Amazon and Orinoco, previously almost unknown, and was able to throw light on the geography of the whole tract between the Guaviare, Cagüeta, and Rio Negro. The German traveller, Dr. Koch, has also completed

a second journey somewhat further east, through the little-known borderlands of British Guiana, Venezuela, and Brazil. The geographical results include an exploration of the main western branch of the Rio Branco and of the Ventuari, an almost unknown tributary of the Upper Orinoco. In the Andean region the survey of the boundary between Peru and Bolivia has been continued, and the difference of longitude between Puerto Velho and Manaos on the Amazon has been determined by wireless telegraphy. A new expedition for geographical research in the borderlands of Southern Peru, Chile, Bolivia, and the Argentine, has been undertaken by the American traveller, Prof. I. Bowman, accompanied by Mr. H. S. Palmer as geologist and surveyor.

Australasia.—As usual, the chief exploring activity in this part of the world has been concentrated on New Guinea. Mr. A. F. R. Wollaston, who set out in 1912 on a second expedition to the snowy range, succeeded, early in 1913, in reaching the snow-line on Mt. Carstensz (the highest known summit) in company with Mr. Boden Kloss and a Dutch officer, Lieut. Van de Water, having reached its foot by ascending the valley of the Utakwa. The mountain falls to the south in a great escarpment of limestone rock. The summit of Mt. Wilhelmina—another snow-peak of the same range—was reached for the first time by the Dutch expedition under Capt. Herderschee. This mountain is also the objective of a German expedition from the north under Dr. Moszkowski, while a Dutch expedition under Capt. Weyerman has pushed towards Mt. Juliana, a third snowy peak. The well-equipped German expedition for the investigation of the basin of the Kaiserin Augusta River in the northern half of the island, led by Herr Stollé, has prosecuted its task with much energy. The geographical part of the programme was chiefly in the hands of Dr. Behrmann, who, among other exploring journeys, made his way south to the main divide of the island.

The annexation by France of the Crozet group of islands in the southern Indian Ocean, discovered in 1772 by the French navigator Marion-Dufresne, and named after his second-in-command, was announced in the summer of 1913. The largest island, which retains the name Possession Island given by its discoverer, measures some 15 miles by 8, and has a fairly good anchorage at Navire Bay at its eastern end.

Arctic.—Arctic exploration, which had suffered somewhat of late years through the increased attention given to the Antarctic, has once more some important results to show. The most striking is the discovery of a hitherto unknown coast-line, 200 miles in length, extending from the neighbourhood of Cape Chelyuskin, the northernmost point of Asia, to at least 81° N. lat. This was the work of Capt. Vilkitzky, in command of the Russian ice-breakers *Taimyr* and *Vaigatz*, which for the past three years had been engaged in hydrographical work on the Arctic coast of Eastern Siberia. Hindered by ice from rounding Cape Chelyuskin, when endeavouring to make the voyage to Europe by this northern route, the ships searched for a passage to the north, only to find the way blocked by land up to the latitude named, and were thus forced to return by the way they had come. A second discovery, in the shape of a new island, was made near Bennett Island, of

the New Siberia group, whence the collections left by the ill-fated Baron von Toll were successfully secured.

This unexpected discovery of land in the lesser unknown area north of Western Siberia will no doubt lend support to the belief that land, possibly of large extent, may exist in the much greater unexplored region stretching north of Bering Strait to the neighbourhood of the Pole itself. The search for such land is the object of two well-equipped expeditions which sailed north during the summer of 1913. The one, under Canadian Government auspices, took the Bering Strait route for the Beaufort Sea, where the leader, Mr. V. Stefansson, already known for his prolonged researches in the more eastern parts of Arctic Canada, will make a determined effort to test the correctness of the above idea by pushing north in search of the supposed Arctic continent. He is accompanied by competent experts, and is provisioned for several years' work. A *contretemps* occurred at the outset by the stranding of one of the three vessels of the expedition, but it may be hoped that important results will still be secured. The second expedition is that of Prof. D. B. Macmillan, who, also well supported by scientific associates, sailed north for Smith Sound in July, 1913. Unable to reach the western shores of the sound, he has established winter quarters at Etah, in Greenland, and hopes, in 1914, to proceed across Ellesmere Land in search of Crocker Land, supposed to have been sighted by Peary in 1906. An extensive programme of scientific research has been laid down.

Another important Arctic expedition has set out during 1913, under French auspices, though the first season's work will be of a preliminary nature only. Its leader is M. Jules de Payer, son of the Austrian Arctic explorer, the discoverer of the Frauz Josef Land archipelago. Its object is the further examination of this group, especially of its north-eastern part.

The vast island of Greenland has been crossed by three separate expeditions in 1912-1913, the journeys being among the most daring and successful ever made in that quarter. The Dane, Capt. Koch, who had been landed on the north-east coast in July, 1912, established winter quarters near the eastern edge of the inland ice, and though laid up for three months by a fractured leg, started in April, 1913, to cross the interior ice-sheet to the west coast at its widest part. For three months the party struggled on, delayed by constant bad weather, and eventually reached the coast in a state of exhaustion, completely at an end of their resources, near the settlement at Proeven. A crossing much further south, and in the opposite direction, had been completed in 1912 by the Swiss scientist Dr. A. de Quervain. The third traverse was in the extreme north, where the experienced Greenland traveller Knud Rasmussen effected the first complete crossing of the ice-sheet from Markham glacier on the west to Danmark fiord on the east, returning by a different route and establishing the non-existence of the supposed Peary Channel from sea to sea—a fact which the lamented Mylius Erichsen had also ascertained before his death. The journey was one of remarkable daring and hardihood.

In Spitsbergen the German expedition of 1912, under Lieut. Schröder-Stranz, has had a disastrous issue, only a small remnant of the original party escaping with their lives. Various

search expeditions sent out in consequence of the non-return of the expedition failed to obtain definite information as to the fate of the leader and two companions, but show that they must have perished on the sea-ice after leaving the ship. Others were either lost or succumbed to their hardships while endeavouring to retreat southward during the winter. Another fatality has been reported from the American side, where, so far back as 1911, the young German explorer Dr. B. Hantzsch succumbed to hardships and privations, after effecting the first crossing of Baffin Land from sea to sea.

Antarctic.—The nation was stirred to its depths, in the early part of February, 1913, by the tidings of grievous disaster to the British Antarctic Expedition under Capt. Scott, the leader and four companions having perished from want on their return from the South Pole. The universal grief was, however, mingled with admiration for the inspiring example of fortitude set by the lost heroes. A year before, on the return of Capt. Scott's ship with the news that his last supporting party had left him well on the way to the Pole, confidence was felt that the leader's proved qualities would have carried him through (like his rival, Amundsen, only a month sooner) to the desired goal. That confidence was not misplaced, though the measure of anxiety which could not but be felt also was likewise, unhappily, only too justified. The Pole was reached on January 18, 1912, and the records left there by Amundsen were found at his camp. During the return over the high plateau the health of Petty Officer Evans caused anxiety, and progress was thereby delayed. His condition was rendered worse by a fall and injury to his head during the descent of the Beardmore glacier, and he succumbed on February 17. On the ice-barrier below, the lateness of the season and persistent bad weather, with the breakdown of another of the party, Capt. Oates, more and more reduced the rate of progress, and the supplies became rapidly exhausted. On March 17, Capt. Oates, feeling himself but a drag on his companions, walked out into the blizzard and was not seen again. Capt. Scott, with Dr. Wilson and Lieut. Bowers, struggled on to within 11 miles of safety, but, their strength being then exhausted, and the blizzard raging with unabated fury, they awaited their end in their tent with calm fortitude, their bodies being eventually found and buried with due honours by a search party. Capt. Scott spent his last hours in writing a touching appeal to the nation in behalf of the dependents of those who perished—an appeal which found a ready response at home. Meanwhile, much good work had been done by other sections of the expedition, and a remarkable feat was performed by the northern party under Lieut. Campbell, who, unexpectedly forced to winter in the northern part of South Victoria Land, had been brought safely through by their leader's courage and resourcefulness. Altogether, the harvest of scientific results is of unusual importance, and an especial value attaches to the geological collection secured by Capt. Scott and his companions, and brought through, amid all their harrowing experiences, to their final camp.

Mr. J. Foster Stackhouse has lately come forward with plans for a new British expedition, to start in 1914, for the exploration of King Edward VII. Land.

Great achievement, coupled unhappily with disaster, has likewise marked the Australian Antarctic Expedition under Dr. Mawson, left in 1912 for scientific research at two different bases in the Antarctic Continent west of South Victoria Land. A wireless message received towards the end of February announced that two of the leader's companions—Lieut. Ninnis and Dr. Merz—had died of accident or hardship during a sledge expedition, and that he himself had only come through as by a miracle. Not having returned when the ship came to take him off, he had been forced to remain another winter in that inhospitable region, with six companions. Those at the second base, under Mr. Wild, had been happily rescued by Capt. Davis after one of the most dangerous voyages ever carried out among the Antarctic storms and ice. The outcome of the whole expedition is to define for the first time with some precision about 1,000 miles of the coast-line of Antarctica; to shed important light on the glacial features, geological structure, and occurrence of economic minerals; and to supply new data on the subject

of terrestrial magnetism through a successful journey to the South Magnetic Polar area. Important sounding work was done during the voyages of the *Aurora* to and from the Antarctic.

The German expedition under Dr. Filchner returned early in 1913, having likewise secured valuable results. Pushing south through the Weddell Sea, south of the South Atlantic, the explorers came upon a new coast-line—apparently the continuation of the Coats Land of Dr. Bruce—which was traced almost to 79° S., considerably south of the farthest previously reached on this side of the Antarctic. No suitable site for winter quarters could be found, and the return voyage was therefore begun. The ship was, however, caught by the ice, and drifted throughout the winter, during which the naval commander, Capt. Vahsel, died. Valuable data respecting the configuration of this part of the ocean were obtained. The work of this expedition is to be continued by an Austrian expedition now being organised by Dr. Felix König.

EDWARD HEAWOOD.

Naval Progress in 1913.

Naval Expenditure.—On various occasions during the last fifteen years the British Government has endeavoured to lead the way in a general movement for the limitation of armaments. For reasons into which it is not necessary to enter here its efforts have been consistently unsuccessful, though recent events seem to indicate that the possibility of such an agreement is less remote than it was. This is probably due to a growing realisation of the fact that if navies are maintained for defence the best defence is the absence of navies—i.e., of the means of attack. It follows naturally from this hypothesis that the least aggressive nations will be those most favourably disposed towards the disarmament idea, and *vice versa*; which, after all, is but another way of saying that the nations most inclined towards peace are those which have most to lose and least to gain through war. Reduced to its elements, the naval rivalry between Britain and Germany is a struggle between contentment on the one side and ambition on the other, and it can only come to an end through the ambition being abandoned, willingly or by force of circumstances, or satisfied. The following figures convey some idea of the growth of expenditure on naval armaments during the last quarter of a century:—

	1888.	1913.
Britain.....	£13,172,838	£46,309,300
France	8,054,000	18,626,755
Russia	3,629,489	24,477,487
Germany	2,381,060	22,887,870
Italy	4,728,450	10,269,460
Austria.....	1,133,113	5,985,715
United States	4,600,724	28,932,630
Japan	1,010,000	9,860,912
	£38,709,634	£167,350,129

In 1913, therefore, these eight Powers voted 128½ millions more for naval purposes than in 1888, the average annual rate of increase being £5,145,620. In the majority of cases further increases are certain in 1914. The particular causes of the advance are principally two: first,

the greater cost of ships and the acceleration of the rate of construction; and second, the augmentation in the proportion of fleets kept in a constant state of readiness for war. The entire cost of the 27 ships of the line which Nelson commanded at Trafalgar was about 1½ millions, while it is officially estimated that the vessels of the new *Royal Sovereign* class will cost 2½ millions apiece. This is three times the cost of the old *Royal Sovereigns*, completed 1893-6, and very nearly twice that of the *King Edward* class, completed 1904-6. Partly compensating for the increase in individual cost, there has been a considerable reduction in the number of armoured ships built; but this, again, has been offset by the increased rapidity of construction. The five ships of the *Duncan* class (completed 1903-4) were built at an average cost of £24,076 per month's work. In the case of our newest battle-ships the figure will be £114,583 per month, the time allowed for construction being two years, as compared with an actual average of 45½ months for the *Duncan* class.

Naval Ordnance.—Reference was made last year to the increasing size of naval ordnance. The main armament of 15-inch guns, first adopted in the British *Queen Elizabeth* class, has been adopted by Germany for her two battleships of the 1913 programme, and by Italy for her four new vessels. The German (Krupp) gun differs from the British (Vickers). There are two types of the latter, one firing a 1,720-lb. shell with an initial velocity of 2,655 foot-seconds, and the other a 1,950-lb. shell at 2,500 foot-seconds, both guns weighing 96 tons. The Krupp gun weighs only 82½ tons and the shell 1,675½ lb.; but the initial velocity of 2,922 foot-seconds gives it a greater energy during the early part of the flight of the projectile than the Vickers weapons. There have been reports as to a British 16½-inch 120-ton being under way, but no confirmation is obtainable, and the next change in the calibre of main batteries is quite as likely to be a backward as a forward one. Other things being equal, the heavier the shell the more destructive the hit; but the "other

things" cannot be equal, since numbers have to be sacrificed to individual power in guns as in ships. An armament of eight 15-inch guns gives a considerably greater broadside fire than one of twelve 12-in. (15,600 lb. as against 10,200 lb.); but in the course of five minutes' continuous firing the former would discharge 48 and the latter 120 projectiles, and there is not much doubt as to the side on which the advantage would lie.

On the conventional basis of reckoning strength British ships remain a long way ahead of their contemporaries in Europe. The latest completed battleships of the principal Powers, with their broadsides, are as follows: Britain, *Ajax* (ten 13·5-in., 13,750 lb.); Germany, *König Albert* (ten 12-in., 9,810 lb.); France, *Courbet* (ten 12-in., 9,700 lb.); Italy, *Leonardo da Vinci* (thirteen 12-in., 11,050 lb.); Austria, *Tegetthoff* (twelve 12-in., 11,804 lb.); United States, *Wyoming* (twelve 12-in., 10,440 lb.); Japan, *Settsu* (eight 12-in., 6,800 lb.). The *Queen Elizabeth* class will ensure the maintenance of the relative position for some time, for while their broadside will amount to 15,600 lb., neither Germany, Italy, nor Austria has launched a more powerful ship than those they respectively have in commission. The latest ships launched for other Powers are: France, *Lorraine* (ten 13·4-in., 11,000 lb.); United States, *New York* (ten 14-in., 14,000 lb.); Japan, *Fuso* (? twelve 14-in., 16,800 lb.). It is believed that the British *Royal Sovereigns* (1913-14 programme) will carry ten 15-in. guns, with a broadside of 19,500 lb.

The following tables illustrate some aspects of the relative material strength of the principal naval Powers:—

DREADNOUGHTS.

(Main battery of 8 or more big guns.)

	Completed.*	Under Construction.	Total.
British Empire...	27	15	42
Germany	17†	9	26
United States ...	8	6	14
Japan	3	7	10
Italy.....	3	3	6‡
Austria	2	2	4‡
Russia	—	11	11

The relative strength of Great Britain and Germany in completed ships is as follows, the total being divided into (1) ships launched over ten years, and (2) ships launched ten years or less:—

	Over 10 Years.		10 Years or less.	
	Britain.	Ger-many.	Britain.	Ger-many.
Dreadnoughts ...	—	—	27	17
Other battleships	34	16	6	6
Other armoured	—	—	45	27
cruisers.....	22	5	12	4
Small cruisers.....	30	20	29	18
Destroyers	91	32	105	101
Torpedo-boats ...	20	32	36	—
Submarines	—	—	63	23 (?)

"F" Rays.—In the article on naval progress in last year's ALMANACK it was suggested that the next great development in naval warfare would take the form of equipping fleets with means for carrying on an engagement at a distance where neither side could see the other.

An important step in this direction seems to have been accomplished by an Italian inventor, Signor Ulivi, whose "F" rays are claimed to be capable of exploding gunpowder or gun-cotton, even if they are submerged, at distances of eighty miles, and even more. At the moment of writing very little is known of the apparatus or its performances under trial beyond the statements of the inventor. It is not known, for instance, whether the rays have a power of selection whereby "friendly" explosives could be rendered immune from their attack, or whether the ordinary methods of insulation would be an efficient protective against them. Nikola Tesla claimed to have produced an electrical machine of similar powers some twenty years ago; and in view of the fact that airships and torpedoes—fitted, however, with suitable receivers—have both been controlled by wireless electric waves, there seems no reason why the electrical exploder should not materialise. The possibility of the use of explosives in warfare being thus rendered impracticable opens up a fine field for the imagination.

GREAT BRITAIN.

Since the last issue of this publication the British Navy in commission has been reinforced by the following nine ships of the Dreadnought or super-Dreadnought type, viz.: the battleships *Conqueror*, *King George V.*, *Centurion*, *Ajax*, and *Audacious*; and the battle-cruisers *Princess Royal*, *Queen Mary*, *New Zealand*, and *Australia*. The battleships are all armed with ten 13·5-in. and sixteen 4-in. guns, the *Conqueror* (1909 programme) displacing 22,500 tons, and the remainder (1910 programme) 23,000. With the exception of the *King George V.* all were very late in delivery, the period varying from two to eight months. The *Princess Royal* (26,350 tons, 70,000 h.p.) and *Queen Mary* (27,000 tons, 75,000 h.p.) carry eight 13·5-in. and sixteen 4-in. guns, and belong respectively to the 1909 and 1910 programmes. The *Australia* (19,200 tons) and *New Zealand* (18,800 tons) were built at the charge of the Dominions after which they are named, but the latter has been placed unreservedly at the disposal of the Admiralty. Both are armed with eight 12-in. and sixteen 4-in. guns. On trial the *Princess Royal* reached a maximum speed of 32·7 knots (nearly a full knot faster than the *Lion*), while the *Queen Mary* is stated to have reached the phenomenal rate of 35·7 knots. The designed speed in each case was 28. Of the five armoured ships of the 1911 programme only two (*Iron Duke* and *Marlborough*, 25,000 tons, ten 13·5-in. and twelve 6-in. guns) had been launched by the end of October, 1913, but the remainder (*Emperor of India* and *Benbow*, sisters to the foregoing, and *Tiger*, battle-cruiser) are expected to be launched before the end of the year. The *Queen Elizabeth* was launched at Portsmouth October 16, 1913, while November 26, 1913, has been fixed for the launch of the *Warspite* at Devonport. Two sister vessels to these, *Valiant* and *Barham*, are under construction on the Clyde. They form the 1912 programme of armoured ships, and are described as "fast battleships." Displacement, 27,500 tons; armament, eight 15-in. and sixteen 6-in.; designed speed, 25 knots. The *Queen Elizabeth* was the first battleship to take the water designed for burning oil fuel exclusively. A fifth vessel of the same type, the *Malaya*, is

* Includes ships under trial, Nov. 1, 1913.

† Includes 2 Dominion ships.

‡ Excludes 4 ships provided for in new programmes.

building on the Tyne at the charge of the Federated Malay States. The five battleships of the 1913 programme (21-knot coal-burners, probably armed with ten 15-in.) were ordered in August, as follows: *Royal Sovereign*, Portsmouth; *Royal Oak*, Devonport; *Resolution*, Palmer, Jarrow; *Ramillies*, Beardmore, Dalmuir; *Revenge* (ex *Renown*), Vickers, Barrow.

Among minor craft, the protected cruisers *Chatham*, *Dublin*, and *Southampton* (5,400 tons, 25 knots, eight 6-in. guns) have been completed, as well as the unarmoured cruisers *Amphion* and *Fearless* (3,440 tons, 25 knots, ten 4-in. guns). The last two complete the batch of seven of same or similar type whose construction was begun in 1907. The protected cruisers *Birmingham*, *Nottingham*, and *Lovestoft* (5,440 tons, 25 knots, nine 6-in. guns) are almost ready for commissioning, and with these the line of protected cruisers also comes to an end. Substitutes for both types, and also in some respects for destroyers, are the "light armoured cruisers," of which eight (*Arethusa* class) were provided for in 1912, and eight ("C" class) in 1913. They are of less than 4,000 tons, and will burn oil exclusively, their nominal speed being 29 or 30 knots. They are building, or on order, as follows: *Arethusa*, *Calliope*, and *Conquest*, Chatham; *Aurora* and *Cleopatra*, Devonport; *Carysfort* and *Cordelia*, Pembroke; *Phaeton* and *Penelope*, Vickers; *Royalist*, *Inconstant*, and *Galatea*, Beardmore; *Undaunted*, Fairfield Co.; *Champion*, Hawthorn, Leslie & Co.; *Caroline*, Cammell Laird; *Comus*, Swan and Hunter. The majority of the 1911-12 destroyers (*Acasta* class) have been passed into service, and the first of the 1912 vessels (*Laertes*) has also been completed. By the end of March next there should be in commission 112 ocean-going destroyers of over 700 tons, all driven by turbines, and all except sixteen (*Beagle* class) burning oil only. The eight D-class submarines have been completed and four of the sixteen E class, the latter carrying two 12-pounders in addition to their torpedo-tubes. Our latest submarines will displace 1,200 tons, steam 20 knots on the surface, and carry four 12-pounder guns and six torpedo-tubes.

Organisation.—The First Battle Squadron of the Home Fleet now consists of eight Dreadnoughts armed with ten 12-in. guns apiece, and the Second Squadron of eight with ten 13.5-in. There are twenty-five battleships in full commission in home waters, as compared with a German total of twenty-one, in addition to which we have four battle-cruisers to Germany's four, one of the latter being temporarily in the Mediterranean. In addition, a squadron of four battleships has been based upon Gibraltar, while the battle-cruisers *Invincible*, *Inflexible*, and *Indomitable* (with the *Indefatigable* to follow) have been sent to Malta. When the whole of the 1912 destroyers are in service we shall have ninety-six of these craft in full commission in home waters to Germany's seventy-seven, sixteen of our largest vessels having been detached for Mediterranean service.

Imperial Dominions.

The battle-cruiser *Australia* has assumed the position of flagship of the Commonwealth Fleet, and the British Navy no longer has a commander-in-chief on that station. The protected cruisers *Sydney* and *Melbourne* are in commission, and the destroyers *Yarra*, *Parramatta*, and *Warrego*; while under construction are the cruiser *Brisbane*

and the destroyers *Swan*, *Derwent*, and *Torrens* in Australia, and the submarines Nos. 1 and 2 at Barrow. On Dec. 5, 1912, Mr. Borden introduced a Bill in the Canadian Parliament providing for the construction (in England) of three ships of the *Queen Elizabeth* type as an "emergency contribution" to the British Navy, pending the definite settlement of the Canadian navy question. The Bill was rejected by the Senate, and the ships are now in abeyance. They, or substitutes for them, will be "absolutely required" for the adequate naval defence of the Empire in the first quarter of 1916, according to the First Lord. There is evidence of strong feeling in Australia at the failure of the home Government to carry out the decisions arrived at at the Imperial Conference of 1909, and the new Government in New Zealand disapproves of the battle-cruiser offered in 1909 being transferred to European waters from the position she was to have held as flagship on the China Station. There is some possibility of co-operation between Australia and New Zealand for the naval defence of their interests in the Pacific.

GERMANY.

The principal additions to the German Navy during the last twelve months are the battleships *Kaiser*, *Friedrich der Grosse*, *Kaiserin*, *König Albert*, and *Prinzregent Luitpold*, and the battle-cruiser *Seydlitz*. The battleships are all of the same type, displacing 24,310 tons and carrying ten 12-in. and fourteen 5.9-in. guns, with a designed speed of 21 knots. Though carrying fewer heavy guns than their predecessors of the *Helgoland* class, which have twelve, they are able to bring ten guns to bear on the broadside, as compared with eight of the *Helgolands*, the disposition of the guns in the later ships being similar to that of the British *Neptune* class, with three turrets on the centreline, and two en echelon amidships. The battle-cruiser *Seydlitz* is of the same general design, but has 11-in. guns in place of 12-in., giving her a broadside of 7,600 lb., as compared with the 11,000 lb. of the latest completed British battle-cruiser, the *Queen Mary*. The only small cruiser launch to be recorded is that of the *Graudenz* (ex *Ersatz Prinzess Wilhelm*) on October 25, 1913; no details of the ship are available. At the end of 1912 the *Strassburg* and *Stralsund* (4,480 tons, 27 knots, twelve 4.1-in. guns) were passed into service, while the twelve destroyers of the 1912 programme were in commission by the beginning of October, 1913. The battleships under construction are the *Grosser Kurfürst*, *Markgraf*, *König*, and *Ersatz Brandenburg* (all similar in general details to the *Kaiser*), and the *Ersatz Worth* and "T" of the 1913 programme, which are to be armed with eight 15-in. and sixteen 5.9-in. guns. The battle-cruisers under way are the *Derfflinger* (launched July 1, 1913), the *Ersatz Kaiserin Augusta*, and the *Ersatz Hertha*, which, according to semi-official statements, will all carry eight 12-in. and twelve 5.9-in. guns. Under the 1913 programme two protected cruisers and twelve destroyers have been laid down. As regards submarines, German policy is so secretive that little reliable information is available. It is believed, however, that twenty-three of these boats are now in commission, and that another fifteen are under construction. The 1912 amendment to the Navy

Law provided for the laying down of six each year, with an age limit of twelve years; and those begun in 1913 are understood to displace 800 tons and to carry two 15-pounder guns in addition to their torpedo-tubes.

Organisation.—On October 1, 1913, a new battle squadron was brought into existence, consisting of the *Kaiser*, *Kaiserin*, *König Albert*, and *Prinzregent Luitpold*. This increased the number of fully commissioned battleships to 21, the 1912 Amendment to the Navy Law providing for 25 as soon as the ships are available. The number of British battleships now in full commission is 30, of which four are at Gibraltar and one in the East Indies. On the same date a 7th flotilla of 11 destroyers was placed in commission, the number authorised under the Amendment being 99. Great Britain will have 96 fully commissioned destroyers in home waters (including the *Swift*) when the 20 vessels of the 1912 programme are completed.

FRANCE.

France has completed her first Dreadnought battleships, the *Courbet* and *Jean Bart* (23,095 tons, 20 knots, 12 12-in. and 22 5.5-in. guns). Two ships of the same type (*France* and *Paris*) were launched in the autumn of 1912, and during 1913 there have been launched the *Provence* (April 20, 1913), *Bretagne* (April 21, 1913), and *Lorraine* (September 30, 1913), sister ships of 23,177 tons, armed with ten 13.4-in. and twenty-two 5.5-in. guns. Four battleships, the *Normandie*, *Languedoc*, *Flandre*, and *Gascoigne*, have been laid down, and are designed to carry twelve 13.4-in. guns in three quadruple turrets on a displacement of 24,830 tons. In these ships the four-gun turret makes its first appearance, and there is much doubt in Gallic naval circles as to its success. It is proposed to follow the lead of the British Admiralty by laying down fast "destroyer-destroyers"—which are in one sense developments of the small cruiser—in 1914. There have been no notable additions to the destroyer flotillas, and although the latest French submarines, the *Gustave Zédé* and the *Néréide*, approach British and German vessels in size and speed (displacing 785 tons with 4,800 h.p. when steaming on the surface), there have not as yet been designed any French submarines to carry guns in their armament. In the matter of organisation France has made an advance by substituting the fleet unit of four ships for that of three ships previously favoured. The result is to be seen in the increase of the fully commissioned battle fleet from two squadrons of six ships each to two of eight ships, and in the decision to lay down on January 1, 1914, a new battleship (*Vendée*) of the *Bretagne* type, so that there may be four of these ships in service at the end of 1916 instead of three.

UNITED STATES.

No large ships have been completed for the U.S. fleet since the *Wyoming* and *Arkansas* (September, 1912). Of the two battleships authorised in 1910 the *Texas* was launched in May and the *New York* in October, 1912; both will carry ten 14-in. and twenty-one 5-in. guns on a displacement of 27,000 tons, and they should be in service by the end of May, 1914. The *Nevada* and *Oklahoma*, authorised in 1911, had not been launched on 1 November, 1913, but are

due to be completed by the end of January, 1915. Their armament is the same as that of their predecessors, from which they differ in burning oil fuel exclusively. The *Pennsylvania*, the one battleship authorised in 1912, was laid down at Newport News in the summer of 1913; she will carry twelve 14-inch guns on a displacement of 31,400 tons, and the single armoured ship authorised in 1913 will be of the same type.

JAPAN.

The British-built battle-cruiser *Kongo* is the only armoured vessel completed for this Power during the past twelve months. Designed and built by Messrs. Vickers, the *Kongo* carries eight 14-in. and sixteen 6-in. guns on a displacement of 27,500 tons, and is therefore the largest and most powerfully armed battle-cruiser yet completed. Three sister ships, the *Haruna*, *Hiyet*, and *Kirishima*, are under construction in Japan, as well as the battleship *Fuso*, and three other vessels of the same type whose names have not yet transpired. These ships were originally credited with an armament of ten 15-in. guns, but it is now understood that they will carry twelve 14-in. and sixteen 6-in. Financial exigencies have necessitated a reduction in the number of senior naval officers (whose pay has been appreciably reduced in the last few years for the same reason), and to the same cause may be attributed the slowness of the increase of the Japanese fleet in comparison with the original schemes. The construction of torpedo-craft has almost come to a standstill, only eight destroyers having been launched since 1906. Thirteen submarines (from 86 to 322 tons) are in service and two in hand.

RUSSIA.

Several of the ships authorised by the programme of last year have been put in hand, the principal being the battle cruisers *Kimburn*, *Ismaïl*, *Navarin*, and *Borodino*, which were laid down in the Baltic yards at the end of 1912. There is some doubt as to the equipment of these ships, but it is known that they will have a speed of 27 knots and an armament of 14-in. guns. The doubt is whether they will carry nine of these on 28,000 tons or twelve on 32,000. The battleships *Sevastopol*, *Gangut*, *Poltava*, and *Petropavlovsk* (23,000 tons, 23 knots, twelve 12-in. and sixteen 4.7-in. guns) will be completed during 1914, and during this year also the three Dreadnoughts building for the Black Sea fleet will probably be launched. Four protected cruisers have been laid down in Russian yards—the *Svetlana*, *Grieg*, *Spiridoff*, and *Boatokof* (6,750 tons, 26 knots, twelve 6-in. guns); and two at Danzig—*Muriaeif Amursky* and *Nevelskoy* (4,500 tons, 27½ knots, eight 5.1-in. guns). Orders have also been placed for thirty-six fast destroyers and twelve submarines, raising the totals of these craft (built and building) to 141 and 48 respectively. By 1918, Russia proposes to have in the Baltic a fleet of eight battleships (four being Dreadnoughts), four battle-cruisers, eight small cruisers, thirty-six destroyers, and twelve submarines. All of these ships except two of the small cruisers are now under way or already in service.

ITALY.

The first Italian Dreadnought, the *Dante Alighieri* (19,400 tons, 24 knots, twelve 12-in. and twenty 4.7-in. guns), was put into commission for fleet service in January, 1913. At the

moment of writing (November) the *Leonardo da Vinci* and *Giulio Cesare* (22,340 tons, 21 knots, thirteen 12-in. and eighteen 4.7-in. guns) are running their trials, and will shortly be followed by the *Conte di Cavour*, of the same type. Two similar ships, the *Andrea Doria* and *Duilio*, were launched in March and April, 1913, respectively, being due for completion in the spring of 1915, when Italy will have six completed Dreadnoughts bearing seventy-seven 12-in. guns on the beam. A new programme of four ships has been decided upon, and work will begin with as little delay as possible. Resembling the *Queen Elizabeth*, they will displace 29,510 tons, steam 25 knots, and carry eight 15-in. and twenty 6-in. guns. It is hoped to complete them by the end of 1916. The 29-knot scouts *Quarto*, *Nino Bixio*, and *Marsala* (circa 3,500 tons, six 4.7-in. guns) are all in service, and a 3,800-ton cruiser which was building in Italy for Turkey has been purchased into the Italian Navy under the name of *Libia* (22 knots, two 6-in., six 4.7-in. guns).

AUSTRIA-HUNGARY.

Good progress is being made with the four Dreadnoughts authorised in 1909 (20,020 tons, 20½ knots, 12 12-in. and 12 5.9-in. guns). The *Viribus Unitis* was commissioned in October, 1912, and the *Tegetthoff* in July, 1913, while the *Prinz Eugen* was launched 30 November, 1912. The fourth ship, laid down in January, 1912, has not yet been launched. As in the case of Italy, a new 4-ship programme is about to be adopted, though work will not commence until July, 1914. The four ships will displace 25,000 tons and carry ten 14-in. guns, the original suggestion for an armament of eight 15-in. and sixteen 5.9-in. having been abandoned. These vessels will nominally replace the three of *Monarch* class (1895-1896) and the *Habsburg* (1901), whose combined displacement is less than that of one of the new ships. The vessels are estimated to cost £2,900,000 apiece, and the programme provides also for the construction of fast cruisers and destroyers, to cost £4,100,000 in all.

MINOR NAVIES.

EUROPEAN.—*Norway* has ordered two coast-defence ships from Armstrong, Whitworth & Co. They will be of 3,400 tons and 16½ knots, with an armament of two 9.4-in. and four 6-in. guns. A new programme under consideration provides for the construction of six armoured cruisers, six destroyers, forty torpedo-boats, and twelve submarines.—A national subscription in *Sweden* resulted in the raising of £900,000, the bulk of which is being devoted to the construction of a coast-defence vessel which had been struck out of the Government's programme. The *Sverige*, as she has been named, is being built at Stockholm. Displacement, 7,100 tons; speed, 22½ knots; armament, four 11-in. and eight 6-in. guns.—The *Netherlands* Government has decided that coast-defence ships of the types as above are an anachronism, and will not proceed with the ship authorised in 1912. A Commission appointed to inquire into the defence of the *Netherlands* Indies has reported in favour of building a

fleet of nine Dreadnoughts of 22,000 tons and 21 knots, six torpedo-cruisers of 1,200 tons, eight destroyers, forty-four torpedo-boats, and twenty-two submarines, the force to be divided between home waters and the East Indies.—A strong movement for the construction of a national fleet is on foot in *Belgium*.—The *Spanish* battleship *Espana* (15,460 tons, 19½ knots, eight 12-in. and twenty 4-in. guns) has been completed, and the *Alfonso XIII.* was launched 8 May, 1913. The *Jaine I.*, completing the group of three, is expected to be launched in 1914. A new programme, providing for three ships of 21,000 tons, two 5,000-ton cruisers, nine destroyers, and three submarines, is under consideration, but its adoption is doubtful.—The original programme of the *Portuguese* Republican Government has been considerably reduced, and now includes only two cruisers, six destroyers, three submarines, and a submarine salvage ship. These will be built by the *Portuguese* Naval Construction Syndicate, in which six British and one Italian firm are partners.—The *Turkish* battleship *Reshadieh* (ex *Reshad V.*) (23,000 tons, 21 knots, ten 13.5-in. and sixteen 6-in. guns) was launched at Barrow on 3 September, 1913. A second ship, ordered from Armstrong's, is not being proceeded with.—The *Greek* battleship *Salamis* (19,500 tons, 23 knots, eight 14-in. and twelve 6-in. guns) was laid down at the Vulcan Yard, Stettin, early in 1913, the guns and armour being supplied by the Bethlehem Co., U.S.A. A second vessel of the type will probably be ordered shortly.

EXTRA-EUROPEAN.—The *Argentine* battleships *Moreno* and *Rivadavia* (27,940 tons, 22½ knots, twelve 12-in. and twelve 6-in. guns) are almost completed, having taken considerably longer than the time stipulated for. Both were built in the United States. Four destroyers have been ordered in Germany to replace the British-built boats which were sold to Greece towards the end of 1912.—*Brazil* has decided, with the assent of the builders, not to proceed with the battleship *Rio de Janeiro*, but to order a more powerful and up-to-date vessel in her place. As originally designed the *Janeiro* was to have carried twelve 14-in. guns on a displacement of 32,000 tons, but a change of Government after she had been laid down led to the recasting of the design, and, as launched at Elswick on 22 January, 1913, she is to carry fourteen 12-in. and twenty 6-in. The ship was still in the market on 1 November.—Two battleships are under construction at Elswick for the *Chilian* navy, the *Almirante Cochrane* and the *Abn. Latorre* (28,000 tons, 22 knots, ten 14-in. and sixteen 6-in. guns), while Messrs. White, of Cowes, are completing an order for six destroyers of 1,500 tons and 31 knots, armed with six 4-in. guns.—No other important developments under this head are to be noted, but the *Chinese* Government is said to be in communication with the British Admiralty with the object of obtaining the assistance of British officers in preparing a scheme of reorganisation and reconstruction of the *Chinese* fleet. Such assistance is already enjoyed by Turkey and Greece.

PERCIVAL A. HISLAM.

BUDGETS and Peace Establishments are in general those obtaining in 1913. War Strengths are the closest possible estimates, and for formations other than first-line troops may contain a proportion of partly-trained personnel.

For the States (Turkey, Bulgaria, Greece, Servia, and Montenegro) recently engaged in the Balkan Wars, no statistics are available for 1913. Their War Strengths, as given, represent the approximate ration strengths in the field in December, 1912.

"Universal (compulsory) service," where fully enforced, demands the personal service of all able-bodied males, on attainment of a specified age, providing only for exemption or postponement in cases of serious individual hardship.

"Conscription" involves the choosing by lot of a regulated annual recruit quota, from amongst the annual contingent of young men attaining the military age in each year, and usually provides for exemption on payment, or on providing a substitute. The latter system has been almost universally abandoned for the former.

In *Militia armies or forces* training is intermittent only. It is recognised that such troops lack the solidity and moral essential in great or prolonged operations, and especially in offensive warfare. This system, therefore, is relied upon only by States whose exterior policy is avowedly neutral, and who aspire only to safeguard that neutrality.

Explanations.—Where two periods of colour-service are mentioned, the shorter is that for the dismounted branches, the longer for mounted branches. A.A.=Active Army. A.R.=Reserve of Active Army. T.A.=Territorial Army. N.G.=National Guard. Trg.=Training. P.E.=Authorised Peace Establishment. W.S.=Maximum War Strength. Formations legally available for interior defensive action only are enclosed in square brackets.

(1) *Universal compulsory service in force in:*—**Argentina.**—*Militia.* A.A., 10 yrs.; Initial trg., 3-12 mos.; then 2 trgs., each 1 mo.; then N.G. 10 yrs.; 4 trgs., each 15 dys.; then [T.A., 5 yrs., no trg.]. P.E., abt. 1,650 offrs., 17,000 others. W.S. (*Field Army only*) 125,000 incl. Res. Divns. £2,606,661 (ord.); £899,563 (extrty. incl. some naval exp.).

Austria-Hungary.—Re-org. 1912-1913. Three distinct organizations, (a) *Common Army* (incl. forces raised in Bosnia-Herzegovina); (b) *Austrian Landwehr* and [*Landsturm*]; (c) *Hungarian Honved* and [*Landsturm*]. In each the periods of serv. are similar, and armaments, etc., are being assimilated. Each organization has its own Reserves. According to nationality and lot drawn, *Recruits join either* (1) *Common A.A.*, 2 or 3 yrs. colour service; then A.R., 10 or 7 yrs. (the shorter period of res. serv. being for those who have performed 3 yrs. col. serv.), with 4 trgs., in all not exceeding 14 weeks during the 10 yrs., or 3 trgs. not ex. 11 weeks in the 7 yrs.; then Res. of Landwehr (or Honved) to age 37, and [*Landsturm*] to age 42 (but liability ceases at age 40 in case of men performing 3 yrs. col. serv.). Or (2), Landwehr (or Honved), 2 or 3 yrs., and subsequently in its Res., and in [*Landsturm*], as above. Or (3), Ersatz Res., 12 yrs., initial trg. 10 wks., subsequently 3 trgs., each 1 mo.; then [*Landsturm*] to age 42. In Bosnia-Herzegovina there is no Landwehr or Landsturm, the A.R. is styled First

Res., and a Second and Third Res. is organized. P.E. (will be increased gradually under operation of new Law), (a) *Common A.A.*, 18,079 offrs., 6,444 officials, 314,843 others; *Bosnia-Herzegovina*, 406 offrs., 6,212 others; *Aust. Landwehr*, 3,559 offrs., 1,318 officials, 45,667 others; *Hung. Honved*, 3,477 offrs., 1,484 officials, 33,638 others. *Budgets* (1912), C.A., £16,547,292; *Landwehr*, £2,974,699; *Honved*, £2,671,213, plus large extrty. credits during 1912 and 1913.

Belgium.—*Militia.* Universal liability, but recruit quota fixed at 49 per cent. of annual contingent. A.A., 8 yrs.; initial trg., 15 mos.-2 yrs. Two subsequent trgs. each 1 mo.; then A.R., 5 yrs.—P.E. (*nominal*), 3,540 offrs. and officials; 43,626 others. W.S., *Field Army*, 100,000; *Garrisons*, 80,000 (will be increased under Law of 1913 to 150,000 for Field army, 60,000 for Auxiliary services, and 130,000 for Garrisons). £2,531,096 (ord.); £259,454 (extrty.).

Bulgaria.—Muhammadans exempted on payment of tax. A.A., 2 or 3 yrs.; A.R., 18 or 16 yrs., annl. trg., 3 wks.; then [T.A., 1st Ban, to age 44, annl. trg., 7 days; and 2nd Ban, to age 46, annl. trg., 3 dys.]. P.E., 3,900 offrs., 62,000 others. W.S., Dec. 1912 (incl. many fresh formations), 340,000. £1,619,821 (1912).

Chile.—*Militia.* A.A., 1 yr., 6-12 mos. trg.; then A.R., 9 yrs. and [T.A. to age 45]. P.E., 19,360. W.S. (*First and Second Line*), abt. 80,000 £1,823,793.

Denmark.—*Militia.* A.A., 8 yrs.; initial trg., 165-240 days; two subsequent trgs., each 25-30 days; then [T.R., 8 yrs., 1 trg., 6-14 dys. P.E., 834 offrs., 12,900 others (incl. permanent elements). W.S., 90,000. £1,088,000.

France.—Univ. serv. strictly enforced, exemption for physical unfitness only. Three distinct organizations: (a) *Home (Metropolitan Army)* incl. estab. of Algeria and Tunis; (b) *Colonial Army* (in France); (c) *Colonial Forces* in colonies. The first is recruited by compulsion; the second mainly by voluntary enlistment, or voluntary transfer from the first; the third mainly by voluntary enlistment, with reserve power of compulsion. Law of 1913 provides for incorporation in A.A. at age 20 (instead of 21, as formerly), and periods of service as follows—A.A., 3 yrs.; A.R., 11 yrs.; [T.A., 7 yrs.; T.A.R., 7 yrs.]. Periods of Res. tig. are as yet uncertain, as are the dispositions of the increased P.E. which will be available. P.E. (1913): (a) *Metropolitan Army*; (i.) In France, 517,663; (ii.) In Algeria, 56,700; in Tunis, 18,200 (of the forces in Algeria-Tunis about two-fifths are natives); (iii.) *Gendarmerie, &c.*, abt. 25,000. (b) *Colonial Army in France*, 28,000. (c) *Colonial Forces*, abt. 130,000 (half natives). *Budgets* (1913), for (a) £32,513,000; for (b) £4,042,000; for (c) £3,485,000. In addition, considerable extrty. exp. was undertaken, or is contemplated. W.E., *Field Army* (excl. forces in Africa), *First Line*, 750,000; *Second Line*, 500,000; total 1,250,000. *Reserves*, in depôts, 650,000; unorganised, 500,000; total, 1,150,000. [T.A., organised, abt. 550,000; unorganised, 750,000].

Germany.—The remarkable military activity of the German Empire in recent years culminated in the Law of 1913, of which the main principles were (1) to increase substantially the annual recruit quota; (2) to anticipate, complete, and

enhance the operations of the Laws of 1912 and 1911; and thereby to increase largely the P.E. of units, to diminish the reliance placed upon Reserve elements, to add some necessary formations, and to lower the average age of the mobilised Field Army. By these processes the period necessary for mobilisation will be curtailed very materially, and the readiness of the Field Army for action will be perfected—results of deeper significance than the mere numerical increase. The War Chest (cash immediately available for emergencies of mobilisation) is increased from £6,000,000 in gold to £12,000,000 in gold and £6,000,000 in silver. Recruits join either (i) A.A., 2 or 3 yrs.; then A.R., 5 or 4 yrs., 2 trgs., each 8 weeks; then Landwehr, 1st Ban, 5 or 3 yrs., 2 trgs., each 14 days (for dismt. branches only); then Landwehr, 2nd Ban, to age 40, no trg. Then (Landsturm, 2nd Ban, to age 45). Or (2), Ersatz Res., 1½ yrs., 3 trgs. of 10, 6, and 4 wks.; then (Landsturm, 1st Ban, to age 39, and, 2nd Ban, to age 45). New Law provides for progressive increase of P.E., which, by the end of 1915, will be (for A.A. only) 36,000 offrs., 10,000 officials, 18,000 (or more) one-year volunteers, 771,000 others. W.S. of Field Army, First Line, may be 1,500,000; organised Landwehr, 750,000. In all, some 5,400,000 fully-trained men will be available by 1915, and little or no reliance will be placed upon partly-trained personnel. Ersatz Reserve training will probably be discontinued. About £60,000,000 for 1914.

Greece.—A.A., 2 yrs.; 1st Res., 11 yrs.; 2nd Res., 9 yrs. Then [N.G., 7 yrs., and Res. of N.G., 7 yrs.]. P.E., all ranks (excl. Gendarmerie), abt. 29,000. W.S., Dec., 1912, abt. 120,000. £861,238 (ord.).

Italy.—Recruits join either (i) A.A., 2 yrs.; A.R., 6 yrs. (max. trg.; 1 month per ann.); then Mobile Militia, 4 yrs. (max. trg., 1 month per ann.), and [T.A. to age 39, 1 trg. of 1 month.]. Or (2), Complementary Res., 8 yrs., initial trg. 6 months; then to Militia and T.A. as above. Or (3), T.A. direct, max. trg. 1 month every 4 yrs. P.E., 1913 (considerably in excess of Budget Estab., owing to War in Libya), abt. 16,000 offrs., 290,300 others. W.S. Field Army, First Line, abt. 450,000; Mobile Militia, abt. 250,000. Budget, 1913-14, £14,222,436 (ord.); £2,603,105 (extr. incl. War exp.).

Japan.—Recruits join either (i) A.A., 2 or 3 yrs., A.R., 5½ or 4½ yrs., with 2 trgs., each 60 dys.; then Kobi (Landwehr), 10 yrs., with 2 trgs., each 60 dys.; then [Kokumin or T.A., 1st Ban, 2½ yrs., no trg.]. Or (2), Hofu (Ersatz Res.), 7½ yrs., with 3 trgs. of 90, 60, and 60 dys.; then to Kobi, &c., as above. Or (3), [Kokumin, 2nd Ban, direct, no trg.]. P.E. (not published) abt. 230,000 for A.A. W.S., Field Army, First Line, abt. 450,000. Second Line (Kobi, fully-trained), abt. 300,000. £9,966,607.

Norway.—Militia. A.A., 12 yrs.; initial trg., 72-126 dys., subsequent trgs. in 2nd, 3rd, 4th, and 7th yrs., 24 dys.; then [Landvärn, 8 yrs., Landstörn is as yet unorganised]. P.E., abt. 18,000 (incl. annl. recruit quota of abt. 11,000). W.S., A.A., 80,000; [Landvärn, abt. 40,000. £867,344 (ord.).

Rumania.—Recruits join either (i) A.A., 2 or 3 yrs.; 1st Res., 5 or 4 yrs.; 2nd Res., 10 yrs.; then Territ. Militia, 4 yrs. Or (2), Calarashi (Militia) Cavalry, initial trg., 5 weeks. P.E., abt. 4,500 offrs., 94,000 others. W.S. (in field, July, 1913)

A.A., First Line, abt. 250,000; Second Line, abt. 170,000. £2,997,121 (ord. 1913).

Russia.—Radical re-org. of Recruiting Laws effected, and reductions accorded for educational attainments. Three distinct organisations, (1) the European Army; (2) the Asiatic Army; (3) the Caucasian Army, besides the Cossack services. (a) European Army, Recruits join either (i) A.A., 3 or 4 yrs.; A.R., 14 or 13 yrs., with 2 trgs., each 4 weeks; then [T.A., 1st Ban, 5 yrs.; or (ii) [T.A., 1st Ban] if exempted from col.-serv. or supernumerary, though physically fit; or (iii) [T.A., 2nd Ban] if fit to bear arms, though not up to standard, 2 trgs., each 6 weeks. (b) Asiatic Army, A.A., 4 yrs.; A.R., 13 yrs.; then [T.A., to age 44]. (c) Caucasian Army, A.A., 3 yrs.; A.R., 15 yrs.; then [T.A., to age 44]. (d) Cossack services, liability is for life, prelim. trg., 1 yr.; then 1st category (in permanently-embodied units) 4 yrs.; then 4 yrs. in each of 2nd and 3rd categories with annual trgs.; then Res., 5 yrs. Total P.E., probably abt. 1,500,000. W.S. Western European Frontiers, Field Army and Second Line, abt. 1,200,000; Caucasus, abt. 250,000; Turkestan and Trans-Caspia, 60,000; W. Siberia, 180,000; E. Siberia, 275,000. £57,672,490 (Ord.); £9,527,720 (extr.). £14,736,000 (precautions, Balkan Wars).

Servia.—A.A., 1½ or 2 yrs.; A.R., 9½ or 8 yrs.; 2nd Res., 6 yrs.; then [T.A., 8 yrs.]. P.E., 1912, 2,038 offrs., 237 officials, 28,000 others, (excl. Frontier Guards and Gendarmerie). W.S., (in field, Dec. 1912, Field Army, First and Second Lines) abt. 195,000. £1,127,641.

Spain.—Annual recruit contingent, less unfit, &c., divided into two categories (1) to perform "full" col.-serv. in A.A., normally 3 yrs., but may be reduced to 2; (2) to perform "modified" col.-serv. of 1 yr. or more according to aptitude. Recruits having undergone prelim. trg. may, on payment of £40, have serv. reduced to 10 mos., to be performed in 3 stages; or, on payment of £80, reduction may be to 5 mos., performed in 2 stages. Then 1st Res., to complete 8 years from entry; annl. trg., 1 mo.; 2nd Res., to complete 14 yrs.; annl. trg., 21 days; [T.A. to complete 18 yrs.; annl. trg., 15 days]. P.E., 1913 (incl. forces in N. Africa), 13,500 offrs., 122,000 others. W.S., Field Army, First Line, 230,000, Second Line, 120,000 (when new Law has fully operated). £7,575,238.

Sweden.—Militia. A.A., 8 yrs.; initial trg., 150-281 days; then 1 mo. in 2nd, 3rd and 4th yrs., or 42 days in 2nd and 3rd yrs.; then [A.R., 4 yrs. and [Landstörn, 8 yrs., no trg.]. P.E., 2,299 offrs., 446 officials, 81,714 others; W.S., A.A., First Line, abt. 110,000; Second Line, abt. 85,000. £2,780,467 (ord.), £281,833 (extr.).

Switzerland.—Militia. A.A., 12 yrs.; initial trg., 65-90 days. Subsequently 11 days per ann.; then Landwehr, 8 yrs.; 1 trg., 11 dys. for dismt. branches only; then [Landsturm to age 48]. W.S., A.A., 140,600; Landwehr, 65,000; Landsturm, 57,000. £1,771,849.

Turkey.—A.A. 3 or 4 yrs.; A.R., 6 or 5 yrs.; 1 trg. of 6 wks.; then, Redif (Landwehr), 9 yrs.; 2 trgs., each 1 mo.; then Mustafiz (Landsturm), 2 yrs.; no trg. P.E., A.A. (before war of 1912), abt. 220,000; W.S. (1913-14), European and Anatolian Ordus, abt. 180,000 First Line, 120,000 Second Line; Hedjaz and Yemen, 20,000. (In field in Thrace, Macedonia, and Albania, Dec., 1912, abt. 350,000 First and Second Line troops). Abt. £8,000,000 (1912).

(2) *Conscription in force in:—*

Brazil.—A.A., 2 yrs.; 1st Res., 7 yrs.; 1 trg., 1 mo.; then 2nd Res., 1st Ban, 7 yrs.; 1 trg., 3 or 4 wks.; 2nd Ban., 4 yrs. no trg.; then (N.G., 4 yrs., and N.G. Res., 4 yrs.; no wr.). P.E., abt. 750 offrs., 29,000 others. (Re-org. projected). W.S., *First and Second Lines*, abt. 100,000. £5,577,520 (ord.)

Mexico.—Vol. enlist., supplemented by conscription. Forces at present disorganised by revolutionary troubles. P.E. (nominal), abt. 6,000 offrs.; 50,000 others. W.S., abt. 80,000. £1,800,000.

Netherlands.—*Militia*, substitution not permitted. A.A., 6 yrs. Initial trg.; mounted arms, 2 yrs.; garrison artillery, 15 mos.; works corps, 14 mos.; infantry, 8½ mos. Subsequent trg., mounted arms, 1 period of 1 mo.; infantry, 1 mo. in 3rd yr., 3 weeks in 5th yr. A proportion, chosen by lot (substitution permitted) retained for 6 mos. in mtd. arms, 4½ mos. in dismt. arms; then Landwehr, 5 yrs.; 1 trg., 6 days; then [Landsturm, to age 40.] P.E., abt. 1,660 offrs.; 20,000 others. Annl. recruit quota, 23,000. W.S., *First and Second Lines*, abt. 125,000. £2,711,500.

Portugal.—*Militia*. A.A., 10 yrs.; initial trg., 15-30 weeks. Subsequently, 1 week per ann.;

then, A.R., 10 yrs.; 2 trgs., each 1 mo.; then [T.A. to age 45; 1 trg., 8 days for n.c.o.s and offrs.]. Recruits who provide own food and lodging may live out of barracks. P.E. (nominal), abt. 32,000. W.S., abt. 150,000 (all categories). £1,971,210.

(4) *Voluntary enlistment in force in:—*

China.—Power of conscription in reserve. Forces disorganised by revolutionary troubles. A.A., 3 yrs.; 1st Res., 3 yrs.; annl. trg., 1 mo.; 2nd Res., 4 yrs.; biennial trg., 1 mo. P.E., uncertain, abt. 150,000 of "New Army."

Great Britain.—See pp. 782-783.

U.S.A.—A.A., initial engagement 7 yrs., with option of passing to the (newly-constituted) Res. after 4 yrs. *Peace Strength*, abt. 4,650 offrs.; 83,315 others, of whom some 63,000 only are stationed in U.S.A. The remainder (incl. native troops) are in Alaska, China, Hawai, Panama, the Philippines, and Porto Rico. States Militias (National Guards) of varying efficiency number 9,150 offrs., 112,800 others, and constitute the Organised Militia, on to which would be grafted Volunteer organizations on an outbreak of war. *Federal Budget*, abt. £30,000,000 (excl. States exp. on their Militias). *Pensions, &c.*, abt. £30,800,000. P. R. COLES.

The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The official relation of the League to the Education Departments and Governments throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (b) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In April of that year the Representatives of the Overseas Education Departments, meeting the League in Conference, confirmed its work. In 1912 the first Imperial Conference of Teachers' Associations was held, and in 1913 the League inaugurated the Imperial Union of Teachers. In 1916 the second Imperial Conference of Teachers' Associations will be held in Toronto by invitation of the Government of Ontario. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr. Louis Spitzel, has published a graded series of text-books on the Empire, under the editorship

of Professor A. F. Pollard. (1) The British Empire—Its Past, Its Present, and Its Future" (a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League established a lace industry in St. Helena. Cordial acknowledgment of the services of the League have been made by the Colonial Office, by His Excellency the Governor, and by the workers. A number of teachers from all parts of the Empire have been accredited to the League for courses of lectures and study in the schools. The School Affiliation and Comrades' Correspondence Sections were established in 1901-2. The latter numbers now over 27,000 members. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day. In 1913, through the generosity of Sir Robert Lucas Tooth, the League established a Club for home and overseas members at 28 Buckingham Gate.

The President is the Right Hon. Sir Frederick Pollock. Amongst those who are Vice-Presidents and Councillors are many Overseas Governors and high officials, the Earl Grey, the Earl of Meath, the Earl of Plymouth, the Earl Curzon, the Earl of Selborne, Sir Felix Schuster, the High Commissioners of Australia, New Zealand, and South Africa, Sir Robert Lucas Tooth, and Sir Gilbert Parker.

Chairman of Council, Sir Philip Hitchens, K.C.S.I.

Hon. Treasurer, Sir Charles Lyall, K.C.S.I.

Hon. Secretary, Mrs. Ord Marshall.

Organ of the League, "The Federal Magazine."

Address, 28 Buckingham Gate, Westminster, London, S.W.

THE following Table shows the peace establishment and actual strength of the various forces directly administered by the Imperial War Department, as on January 1st, 1913; also the establishment and strength of the British forces maintained in India:—

FORCES ADMINISTERED BY THE
IMPERIAL WAR DEPARTMENT.

Category.	Numbers— All Ranks.	
	Authorised Estab.	Actual Strength.
(A). REGULAR ARMY IN UNITED KINGDOM AND CHANNEL ISLANDS—		
1. Staffs and Departments	1,151	
2. Instructional Staffs	1,480	
3. Regular Units and S.R. Cadres	130,869	133,500
4. Regular Army Reserve	145,000	141,898
(B). SPECIAL RESERVE (PARTLY TRAINED)	78,714	61,048
(C). TERRITORIAL ARMY (PARTLY TRAINED)—		
1. Regular Cadres and Staffs	2,785	
2. Units	312,653	315,438
(D). LOCAL AND OTHER MILITIAS—		
1. Unallotted Militia, United Kingdom	90	730
2. Channel Is., Isle of Man, etc.	3,197	
3. Malta and Bermuda	2,804	
4. Regular Cadres and Staffs	185	6,186
(E). FORCES IN EGYPT, THE COLONIES, ETC.—		
1. British Regular Troops	34,368	34,300
2. Native Regular Troops	8,765	8,694
3. Native Indian Troops in China		2,233
GRAND TOTALS	722,061	648,534
British Regular Army in India, administered by the Government of India	75,897	77,097

In comparing the figures of the above Table with statistics of the armed strength of other States, care must be taken to note certain important distinctions, e.g. :—

1. The serious overseas responsibilities of Great Britain necessitate the maintenance of considerable Colonial garrisons and forces of occupation, which cannot be regarded as *strategically mobile*, or available for employment outside the territories in which they are stationed during peace. On the other hand, it is admitted that such an eventuality as a war in Europe might well compel the reinforcement of these garrisons and forces of occupation, which, under existing conditions, could be accomplished only by a call upon the Regular forces normally stationed within the British Islands.

2. Whereas, in the case of the great military

Powers, public, governmental and expert attention is focussed upon the efficiency and the development of the Active First-Line Army, in Great Britain a larger measure of public interest and governmental activity is devoted to the creation of Second and Third-Line elements, which are restricted by their constitution to the eventuality of home defence, and are only partly trained.

So far as the forces stationed in the United Kingdom are concerned these auxiliary elements actually exceed the numerical total of the strategically-mobile Regular forces.

3. Whereas, under systems of universal compulsion and conscription such second- or third-line elements as are reckoned upon for war services are composed, wholly or mainly, of fully trained men passed through the ranks of the Active Army and its Reserves, in Great Britain each category (Regular Army, Special Reserve, and Territorial Army) is recruited *ad hoc*, and therefore in competition.

As a result, too, of adherence to a purely voluntary enlistment, each category serving at home necessarily contains a considerable proportion of youths who are immature and unfitted to undergo either a strenuous peace-training or the fatigues and hardships of active service in the field.

4. As a further consequence of the voluntary system it is impossible to arrange that British Reservists shall receive systematic or adequate training, since this would seriously prejudice them in their civil avocations.

5. It is only in the case of the Regular Forces serving in India and the Colonies that the advantages of voluntary enlistment and long colour-service are apparent. Here the matured and highly-trained *personnel* provide units whose efficiency probably exceeds that attained in any other army.

It follows that, of the apparently large aggregate of forces maintained in the United Kingdom, the following are alone available for external war, viz. :—

(1) The *mobile portion* (about three-fourths) of the Regular Forces, with a corresponding proportion of the Regular Army Reserve (practically untrained as Reservists), less—

- (a) Immature recruits.
- (b) A considerable nucleus of fully-trained units for home defence and the preservation of internal order.
- (c) Staffs of *Dépôts*, Home Defence organizations, and draft-training units.
- (d) Any reinforcements required by Oversea Garrisons and Forces of Occupation.

(2) A portion, probably not exceeding 60 per cent., of the Special Reserve.

(3) Such units or individuals of the Territorial Army and National Reserve (untrained as Reservists) as may accept the liability.

The principal points of interest during 1913 have been as follows :—

(A) *In the Regular Army*—

(1) A pronounced disparity between the Home Establishment and its actual strength, mainly attributable to the improved economic conditions of the classes which furnish the bulk of our recruits. The recruiting results of the year did not suffice to balance the considerable number of premature transfers to the Reserve encouraged during 1912 for administrative reasons. This disparity tended to increase

beyond that indicated in the foregoing Table during the course of the year.

(2) The adoption of measures to permit of more numerous appointments of non-commissioned officers to commissioned rank.

(3) Considerable reductions in both the peace and war establishments of the horse and field artillery, partly justified by the introduction of automotor transport for divisional ammunition parks, which has permitted a reduced brigade ammunition column and allowed of the disbandment of the special reserve (R.F.A.). It was not, however, anticipated that the six former training brigades R.F.A. would have been re-constituted as six *two-battery Reserve Brigades*, and this disbandment of six field batteries (together with the simultaneous disbandment of two horse artillery batteries), presumably for financial reasons, has been widely discussed.

At the same time the peace establishment of the individual battery has been considerably reduced, both as regards men and horses. These tendencies, directly opposed to recent developments in foreign armies, have been the cause of much uneasiness.

(4) The constantly diminishing supply of riding and light draught horseflesh, coupled with the reluctance both of British Governments and of private breeders to undertake breeding especially for Army needs, has compelled the adoption of special measures designed to meet the requirements of mobilisation by a more intense exploitation of the existing horse population.

The equine resources of Great Britain have been thoroughly examined, and a machinery installed to secure prompt purchase upon a declaration of emergency. The normal retaining fee of 10s. p.a. to owners of registered horses has been increased, in the case of animals suited for artillery draught, to £4, upon signature of a definite contract. It has been suggested that higher peace establishments, larger annual purchases of remounts, and Government stud farms, would be more efficacious.

(5) The withdrawal of cavalry units from South Africa offers hope of the constitution at home of a second Cavalry Division, and of the replacement by cavalry units of the mounted infantry hitherto forming part of the divisional organisation. Mounted infantry have played a conspicuous part in our former savage and Colonial campaigns, but it is recognised that they are less suited for the mounted duties of European warfare, whilst the constitution of mounted infantry units on mobilisation can be accomplished only by withdrawing valuable elements from the infantry battalions.

(6) Much progress has been made in the direction of developing mechanical transport within both peace and war establishments, and in providing for the utilisation of standardised commercial vehicles. This has permitted the simplification of the supply both of food and ammunition, and realised important reductions in *personnel* thus employed, in horseflesh, and in the length of marching columns.

(7) A special Army Order of September 16th introduces, as from October 1st, 1913, a four-company organisation for Foot Guards and Line Infantry battalions. This change, undertaken after trial and experiment, will influence profoundly tactical procedure, and also the professional and educational outlook of the infantry officer, and has been generally approved as facilitating peace training.

(8) In aeronautics steady progress continues. A special branch has been created at the War Office to supervise and direct the many establishments, technical, instructional and active. Excellent work is done in all departments, and at both the Army Exercise in England, and at the manœuvres in Ireland, the military aviators accomplished notable performances. An Aerial Navigation Act has been passed to control flight over the British Islands, and to prohibit passage over specified areas, whilst the right of military requisition has been extended by the Army Annual Act to include air-craft of all kinds. For April, 1914, a competition has been arranged by the War Office, in which a prize of £5,000 will be awarded to the manufacturer of the best British-made aeroplane motor, whilst important orders will be given to the makers of the most satisfactory machines of purely British construction. Considering the work accomplished, the year has mercifully been comparatively exempt from serious accidents.

(9) A new and light type of machine-gun has been introduced for cavalry, but it has been found necessary to withdraw the experimental infantry rifle for alteration.

(B) In the *Special Reserve* the actual deficit is considerably greater than would appear from the figures of the Table at the head of this article. The *Special Reserve* R.F.A. having been suppressed, the *personnel*, not yet time-expired, of this branch swells the "actual strength" by 5,588, to which must be added other temporary excesses amounting to 106, so that the real deficit upon the authorised establishment of 78,714 is no less than 23,360. The difficulties of recruiting this category under its present conditions of service, which would appear to be insurmountable, are being considered by a mixed Committee.

(C) In the *Territorial Army*, despite a good recruiting year, the strength (exclusive of Regular staffs and *cadres*) had fallen by June 1st to 9,326 officers and 241,871 others; it is becoming increasingly apparent that the conditions of service and the standards of military training, which alone can justify reliance upon the Force as a combatant machine, impose burdens upon its members which are more than ever incompatible with the demands of civil life.

Whilst the efficiency of the Staffs and both the command and administration of units have been bettered materially of late, it is doubtful whether the efficiency of the Force as a whole can be much increased under existing circumstances, despite the self-sacrificing zeal and devotion freely displayed.

The *National Reserve* has been re-organised in three classes, composed of officers and men who—

- (a) undertake liability to general service at home or abroad;
- (b) undertake liability to service in home defence only; and
- (c) who, being unfitted for active service, become members in view of their civil and social influence.

In the case of the two former classes, a written engagement is required, and funds are provided for provision of armament and equipment.

During the ensuing twelvemonth, it is to be hoped that the alarming shortage of recruits for all branches of the Service will be proved to be merely temporary and accidental.

P. R. COLES.

The following summaries present in as brief a form as possible the various educational systems of the countries of the world.

Argentina.—(i.) *Primary*: Age 6-14; *Secular, free and nominally comp.* (but only some 45 p.c. attend). Schools maintained by provincial taxation and controlled by provincial boards (in capital by National Council) with grants from Central Govt. (ii.) *Secondary*: Control by Central Govt.; lyceums, and normal schools. Average attendance, over 16,000. (iii.) *Special Govt. Schools*: 1 naval, 1 military, 1 mining, 1 agricultural. (iv.) *Universities*: *National*, Buenos Aires, Cordoba; *Provincial*, La Plata, Santa Fé, Paraná.

Austria.—(i.) *Primary*: Age 6-12, 13, or 14; *free and comp.* (91 p.c. attend). Schools maintained by local taxation, State grants exceptional. (ii.) *Secondary*: Controlled by Central Govt., including private schools; Gymnasias (8-yrs. course) and realschulen (7-yrs. course) prepare for the Universities and Govt. technical high schools. Attendance, over 150,000. Pupils attaining a prescribed standard qualify for military service as 1-yr. volunteers. (iii.) *Special*: 8 Govt. engineering, 1 Govt. agricultural, 2 higher, 7 lower mining, numerous technical institutes, commercial, art, music, and industrial schools. (iv.) *Universities*: *State-maintained*, Cracow, Czernowitz, Graz, Innsbruck, Lemberg, Prague (2), and Vienna.

Hungary.—*Primary*: *Free and comp.* Maintained by local taxation. *Infant Schools* (numerous), with nursing staffs; ages 3-6. *Lower Elementary*, 6-12; repetition courses, 12-15. *Higher do.* (sexes separate) with 3-yrs. course for boys, 2-yrs. for girls; *City High Schools*, 6-yrs. course for boys, 4-yrs. for girls; average attendance, over 77 p.c. (ii.) *Secondary Schools* not State-maintained are State-aided; their 8-yrs. course prepares for University and Budapest Polytechnic. (iii.) *Special Schools* are less numerous than in Austria, but well attended. (iv.) *State Universities*: Budapest, Debreczen, Pressburg, Kolozsvár, Zagrab. Both in Austria and Hungary there is an extraordinary diversity of language—in the former German, Czech, and Slav dialects predominate; in the latter Magyar.

Belgium.—(i.) *Primary*: *Law to render comp. about to be introduced*; schools maintained by communal taxation with provincial and State grants; in addition, many are under ecclesiastical control, Roman Catholic predominating. (ii.) *Secondary*: 134 State high schools (44 for girls), and numerous private institutions. (iii.) *Special Schools*, communal and private, abound; music and fine arts schools a special feature; 35 Royal Athenaeums. (iv.) *Universities*: *State*, Ghent and Liège; *free*, Brussels and Louvain.

Brazil.—(i.) *Primary*: *Secular and free*, but not comp. A Federal Board of Education formed recently. Maintained by State Govts. Public instruction has progressed of late, but a high proportion of the population is still illiterate. (ii.) *Secondary*: Controlled by Central Govt.; national gymnasium. (iii.) *Special Schools* increasing in numbers, especially agric. and eng. (iv.) No university, but several faculties of law, medicine, &c.

Bulgaria.—(i.) *Primary*: Age 8-12, *free, and nominally comp.*, fees in higher grades only. State bears two-thirds, local taxation one-third cost. Attendance good. (ii.) *Secondary*: State bears one-half cost. Foreign schools numerous.

(iii.) Very few special or technical schools. (iv.) *University*: Sofia.

Chile.—(i.) *Primary*: *Free*, but not comp. A large proportion of the population is yet illiterate. Nevertheless, existing schools have a good attendance. (ii.) *Secondary*: State lyceums (sexes separate) in provincial capitals. (iii.) Numerous special and technical schools. (iv.) *Universities*: *State*, Santiago; one private do.

China.—Persistent missionary zeal and imperative necessity of military re-organisation must share the credit of substituting occidental learning for the time-honoured study of Chinese classics, which, until the Imperial Edict of 1905, formed the only passport to State employment. Schools spring up daily, the study of Japanese and European languages naturally assuming a peculiar importance in view of the lack of scientific text-books in the vernacular. Japanese influence has hitherto been strong, particularly in the numerous military institutions, but is considered to be weakening. There are several medical schools. The *Imperial University* at Peking and the *Tientsin University* are staffed by Europeans and Japanese, as well as by Chinese professors. An Anglo-American Committee proposes to establish a new University at Hankau.

Denmark.—(i.) *Primary*: *Free and comp.* Age 7-14. Schools maintained by local taxation. (ii.) *Secondary*: Schools that are not State-maintained are State-aided. (iii.) *Special Schools* are numerous, horticulture and agriculture predominating. (iv.) *University*, Copenhagen.

Egypt.—Of the ancient village schools, those proving most progressive are State-aided, and primary education is being greatly developed. (i.) *Govt. Primary Schools* (34 in 1911) with 4-yrs. course, prepare for admission to minor Govt. posts, the secondary schools, the agricultural college, &c. English predominates, and is ousting French. Majority of pupils pay small fees. (ii.) *Govt. Secondary Schools*, also a 4-yrs. course, admit to intermediate Govt. posts, or the three Cairo Colleges of Law, Medicine, and Engineering. Staff usually English. (iii.) *Special Schools* are numerous, keeping pace with the rapid development of the country. Private enterprise and benevolence does much, and foreign schools abound.

France.—Educational system highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationalist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary*: *Secular, comp. and free*. Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed.

(ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

Germany.—Educational system is remarkable for the ease with which it meets the requirements of every social class. Its efficiency is best exemplified by the annual military recruiting statistics, which in 1910 disclosed a proportion of only 102 p.c. of illiterate recruits. It is, moreover, practically homogeneous in all branches throughout the empire. The Prussian administration may be cited as typical, comprising (i.) a general control by the Minister of Public Instruction over all educational establishments, public or private, save those special Schools dependent on other ministries, (ii.) a provincial organisation charged with management of public elementary schools, and (iii.) Special Provincial Boards charged with the management of Secondary and Normal Schools, their curricula, appointment of teachers, and leaving examinations. (i.) *Primary: Comp. and free*, age 6-14. Average attendance, 94 p.c. Maintained by local taxation, with State grants. (ii.) *Secondary*: Evening continuation schools for children of working classes; city intermediate schools in two grades; gymnasia (some State-maintained) preparing for university and learned professions with a 9-yrs. course. The standard to qualify for military service as a 1-yr. volunteer is that for advancement from the lower to the upper second class of a State gymnasium; progymnasia, similar, but lacking the highest class of the gymnasia; Real gymnasia confining classical instruction to Latin; real progymnasia similar, but lacking higher classes of the foregoing; Oberrealschulen and Realschulen making a special feature of modern languages; Lehrer-Seminarien and Fachschulen supplying specialised instruction. Private institutions are comparatively few. For girls, special Töchterschulen (high schools). Here private establishments predominate. (iii.) *Special Schools* are very numerous throughout the empire, special attention being devoted to agriculture, commerce, mining, forestry and music. *Polytechnica* grant degrees in engineering, &c. *Secondary Education* generally is neither free nor comp., but abatement or remission of charges is discretionary. (iv.) *Universities*, State-maintained and administered, are: Berlin, Bonn, Breslau, Erlangen, Freiburg, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Königsberg, Leipzig, Marburg, München, Münster, Rostock, Strassburg, Tübingen, and Würzburg.

Greece. (i.) *Primary: Free and nominally comp.*, age 5-12. Maintained by local taxation, with State grants. (ii.) *Secondary*: State-controlled, but backward, especially in country districts. (iii.) *Special*: Ill-attended. Private Trade and Industrial Academy at Athens instructs in local agricultural and commercial

pursuits. (iv.) *University*, Athens, largely attended by Turkish subjects.

Italy.—The law of July, 1904, imposing special disabilities on the illiterate, has afforded a needed stimulus. Prior to that date 49 per cent. of the population over age 20 were thus classed. (i.) *Primary: Secular, free and comp.* in the lower of two grades (age 6-9), where only lower grade schools exist, but comp. also in the higher grade (age 9-12) where schools have been provided. Evening continuation courses are compulsory for military recruits drafted to Territorial Army (see *Military Systems*), and illiterate recruits of the Active Army are instructed in their corps. Maintained by local taxation, with State grants. Private establishments must conform to State curriculum. (ii.) *Secondary*: Lyceums and gymnasia supply classical education and prepare for university, mainly State-maintained. (iii.) *Special Schools*, State-maintained or State-aided, are increasing in numbers and attendance. (iv.) *Universities, State*: Bologna, Cagliari, Catania, Genoa, Macerata, Messina, Modena, Naples, Padua, Palermo, Parma, Pavia, Pisa, Rome, Sassari, Siena, and Turin. Many of these are of very ancient foundation (e.g., Bologna, A.D. 1200). *Free*: Camerino, Ferrara, Perugia, Urbino.

Japan.—*Primary: Lower grade, comp., and free.* Age 6-10. Kindergarten and Schools numerous and well attended (82 p.c.). Some 55 p.c. complete the higher primary course, age 10-14, for which a small monthly fee of 30-60 sen (7d.-1s. 2d.) is required. (ii.) *Secondary*: State-aided public intermediate schools, 5-yrs. course. High schools prepare for the Universities with a 3-yrs. course, largely devoted to study of European languages. For girls, high schools, course 4-5 yrs., with extensions of 2-3 yrs. for special subjects. (iii.) *Special Schools* of industries, commerce, and technics are well attended. (iv.) *Universities: State*, Tokio, Kyoto, and Tohoku.

Mexico.—Large numbers of the partially civilised native Indian races and many half-castes are entirely illiterate, and these categories comprise some 80 p.c. of the total population. (i.) *Primary: Free and nominally comp.*: maintained by local taxation, with Federal grants. Many private schools, mostly under clerical control. (ii.) *Secondary Schools* are not numerous, and attendance is not high. (iii.) *Special Schools* are better attended. (iv.) No University.

Netherlands.—System peculiar, in that private State-aided primary instruction is encouraged rather than public, though latter is provided by local taxation where private institutions are lacking. (i.) *Primary: Age 7-13, comp., and free* in public schools, maintained jointly by State and communes. Average attendance, 95 per cent. Disciplinary schools for neglected children. (ii.) *Secondary: Not free*, numerous adult schools for working classes, others not numerous, but well-equipped and attended. (iii.) *Special Schools* make a feature of agriculture and horticulture. (iv.) *Universities*: Amsterdam, Groningen, Leiden, Utrecht, and a small private university.

Norway.—(i.) *Primary: Comp. and free*, age 6½ (town) or 7 (country) to 14. Schools maintained by local taxation, with State grants. (ii.) *Secondary* schools are State, local, or private; latter mainly for girls, many of the others are mixed. A complete and practical reformatory system, age 6-18 or 12-21, is State-aided. (iii.)

Special Schools.—Chiefly industrial and technical institutes. (iv.) *University*: Christiania.

Peru.—(i.) *Primary*: Only nominally comp., free in towns. Average attendance scarcely 20 per cent. (ii.) *Secondary*: Govt. high schools in provincial capitals, charging small fees. A few private schools controlled by foreigners. (iii.) *Special Schools*: Confined to Lima Schools of Art, Mines and Engineering. (iv.) *University*: St. Mark's (Lima).

Portugal.—(i.) *Primary*: Comp. and free, but over 70 per cent. of population over 6 yrs. of age remain illiterate. (ii.) *Secondary*: A State lyceum in each of the provinces, and a few municipal schools, also a good many private institutions. (iii.) *Special*: Fairly numerous, but attendance small. (iv.) *University*: Coimbra, Lisbon, Oporto.

Rumania.—(i.) *Primary*: Free and nominally comp., but number of schools is quite inadequate. Nearly 60 per cent. of population over 7 yrs. of age remain illiterate. (ii.) *Secondary*: Considerable number of high schools tolerably well attended. (iii.) *Special Schools*: Mainly of agriculture. (iv.) *Universities*: Bucharest, Jassy.

Russia.—(i.) *Primary*: Very backward, especially in country districts. Probably not more than 10 per cent. of total population have received instruction of any kind. Control and maintenance of primary schools divided between Ministry of Public Instruction and the Holy Synod (governing body of Orthodox Church). To the latter is allotted a large proportion of the sum annually voted for education by the Central Govt. In many of the remoter district schools are said to exist only on paper, and the qualifications of teachers are frequently *nil*. However, a distinct advance is perceptible. (ii.) *Secondary Institutions* comprise gymnasia and progymnasias and real schools (main features similar to Germany, *q.v.*), both for girls and boys, but numbers and attendance are alike small considering the enormous territorial area and population. The foundations of the Empress Marie (mother of the Tsar Nicholas I.) are administered by a private Imperial cabinet, providing gymnasia and institutes. The Holy Synod has numerous seminaries and intermediate schools for both sexes, and there are a few private schools. The Cossack *voiskos* (districts) maintain their own gymnasia and progymnasias. (iii.) *Special Schools* are increasing in numbers, especially in the principal cities of European Russia. (iv.) *Universities*: Kazan, Kiev, Kharkov, Moscow (2), Odessa, St. Petersburg, Saratov, Tomsk, Yuriev, and Warsaw.

Finland.—(i.) *Primary*: Comp.; age 7-15 yrs.; well-attended. (ii.) *Secondary*: Lyceums (nearly half being State-maintained); realschools and country high schools for both sexes, also well attended. (iii.) *Special Schools* make a feature of cattle-farming, dairy and agricultural instruction. (iv.) *University*: Helsingfors.

Servia.—(i.) *Primary*: Free and nominally comp., but attendance does not exceed 25 p.c. State-aided. (ii.) *Secondary*: Gymnasia and progymnasias, and girls' high schools, State-maintained. (iii.) *Special*: Schools are few. (iv.) *University*: Belgrade.

Spain.—(i.) *Primary*: Nominally comp. and mainly free, public schools maintained by local taxation. Many private schools are under clerical control, and recent legislation provides for closer supervision of their curricula, condition, and

staffs. (ii.) *Secondary*: A high school in each province, curriculum defective. (iii.) *Special*: Schools comparatively few. (iv.) *Universities*: Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Sweden.—(i.) *Primary*: Comp. and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary*: Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities*: Lund, Upsala, and a few private faculties.

Switzerland.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary*: Free and nominally comp., but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary*: Age 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities*: Bale, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

Turkey.—(i.) *Primary education* (nominally comp.) takes the form of instruction by Muhammadan priesthood attached to principal mosques, and is consequently deficient. (ii.) *Secondary*: Schools far from numerous; in a few, French or English is taught. (iii.) *Special Schools* scarcely exist. (iv.) The University of Constantinople, supposed to have been founded in 1900, has not yet materialised.

United States of America.—System of public instruction extends from the kindergarten to the university. Control is vested in the State and local authorities, the only Central Organisation being the Bureau of the Educational Commission, charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 p.c. of the coloured population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and fro at public expense. (i.) *Primary*: Age 8-14 yrs., free and comp. in majority of States, though in all the machinery is fully maintained. Eight grades of public primary schools, numerous kindergartens, and evening continuation classes in towns. Very many and well-equipped private institutions. Public schools are maintained by local taxation, Federal subsidies taking the form of income derived from grants of land. (ii.) *Secondary*: Numerous high schools, both public and private, including many so-called "colleges" and "universities," whose curriculum corresponds rather to that of a German gymnasium, or an English public school. A salient feature of the American system is co-education of the sexes throughout, there being comparatively few institutions where the tuition is not dual. The advantages of this have recently been strenuously disputed. Powerful aid is afforded by private and philanthropic initiative. (iii.) *Special Schools and Professional Establishments* are too numerous to mention, well-equipped and well-attended. (iv.) *Universities*: Those corresponding most closely to the British definition are California, the Catholic University of America, Chicago, Clark, Columbia, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princetown, Stanford, Wisconsin, and Yale.

P. R. COLES.

Secondary Education in the United Kingdom (1913). 787

General.—Several speeches of a general nature have, during the year, been delivered by Ministers to outline the policy of the Government. A memorial has been presented to the Prime Minister by a large number of well-known educationists, urging the Government to undertake at once a comprehensive reform of the national education. The memorial insists that adequate

the two grades proposed by the Consultative Committee to be adopted in England. The whole examination is conducted by the same set of papers, each subject having a lower and a higher grade. The following Table is interesting, as showing the increase in the numbers of university entrants taking the leaving certificate. Figures for the winter sessions :—

Year.	St. Andrews.			Glasgow.			Aberdeen.			Edinburgh.			Totals.		
	L. C.	Not L. C.	per cent	L. C.	Not L. C.	per cent	L. C.	Not L. C.	per cent	L. C.	Not L. C.	per cent	L. C.	Not L. C.	per cent
1911.....	59	11	84	234	100	70	127	29	81	204	46	81	624	186	77
1912.....	72	8	90	299	42	87	150	16	90	225	31	87	746	97	88

provision for education in all grades, from the primary school through the secondary and technical schools to the university, should be made in every defined area of the population, and that the artificial barriers between grade and grade should be, so far as possible, broken down. The memorial also refers to the need for smaller classes, a broader curriculum, and more teachers, better trained and better paid; and urges that the State should assume some firmer guardianship of youth, linking up the family with the school and instruction with wage-earning employment.

Education Estimates.—In his speech in explanation of the Estimates in the House of Commons on April 10, Mr. J. A. Pease showed how the expenditure had been exceeded by £200,000. He stated that the system of secondary education set up in urban districts met, to a large extent, the needs of the population, and that the free places in these schools were filled by poor children from the elementary schools, and that, so far, the educational ladder had been set up. In London and places near, the presence of these children in the secondary schools had led to results with which his inspectors were more than satisfied.

England.—Last year we gave a list showing the proportion of boys and girls per 1,000 of the population in attendance at recognised "efficient" secondary schools in England, which schools now number 986, of which 885 are in receipt of grant from the Board; the remaining 101 private and endowed schools, though not in receipt of grant, have voluntarily submitted themselves to inspection, and have been recognised as "efficient." It is probable that the Teachers' Register will also tend to increase greatly the number of private schools desiring inspection and recognition. The attendance per 1,000 for the whole of England is 5, as compared with 4.8 on January 31, 1911, which increase is due partly to the new schools established, and partly to the fact that the Education Committee have often been able to provide much of the secondary accommodation needed in their area by subsidising existing institutions without establishing schools of their own.

Scotland.—The report on Secondary Education (Scotland) is a record of progress and evidence of completeness of organisation and the high degree of efficiency. The report is divided into two parts—the first of a general character; the second dealing with the examination for school-leaving certificates, which subject takes up five-sixths of the report. The leaving certificate covers two stages, which correspond, roughly, to

Wales.—It is to be regretted that the hostility between the two central authorities of secondary education—the Welsh Department of the Board of Education and the Central Welsh Board—still continues. The contention of the Board is that the over-lapping which exists between the secondary schools and the university colleges should be minimised. It is gratifying, however, to find from the report that "there are many considerations to show that in Wales the future of secondary education is as promising as ever."

Ireland.—The Report of the Intermediate Education Board for the year 1912 shows that the number of students examined last year was 12,581 (8,276 boys and 4,305 girls), being an increase of 476 on the number in 1911. There has been an almost continuous increase during the last ten years, the total number of students in 1903 having been 7,909. 7,015 students (4,767 boys and 2,248 girls), or 55.7 per cent., passed the examination, the percentage of passes being (as might be expected) highest in the Senior and lowest in the Preparatory Grades. (The Preparatory Grade has this year been abolished.) The amount of the School Grant paid to the managers of schools on the results was £50,108. The number of schools participating in this grant was 343, including 45 mixed schools (27 of which were in Ulster, where the prejudice against the co-education of boys and girls is not so strong as in other parts of the country).

Annual Meetings.—The Annual Conference of Headmasters took place in London on December 20 and 21. The subjects discussed included the appointment of a Royal Commission to inquire into the universities and secondary schools, the training of student-teachers, the multiplicity of entrance examinations, proposals for the revision of Responsions and the provision of regular musical teaching for younger boys. The first joint Conference of Educational Associations was held at the University of London, and the Principal of the University spoke of the necessity for co-operation with parents; Mr. Sadler opened a discussion on the subject "Should Teachers be Civil Servants?" The Teacher's Guild discussed the educational issues raised by the evidence given before the Royal Commission on the Civil Service, and Dr. Rouse delivered the presidential address on "Education and Life," and also introduced a discussion on "The Teaching of English." The Incorporated Association of Headmasters passed the following resolutions: The establishment of a superannuation fund for teachers in secondary schools, and to form a new composite Examinations Council.

There was also discussed the question of the revision of Responses, the condition of service of assistant teachers, the establishment of adequate salaries, and whether or not secondary schoolmasters should become Government servants. The Association of Assistant Masters passed certain resolutions with regard to regulations for admission to the Teachers' Register and a system of pensions for secondary teachers, to which scheme the contributors should be the State and the teacher only.

Teachers' Registration Council.—The Council has appointed Mr. Roscoe as secretary, and has taken temporary premises in the house of the College of Preceptors, Bloomsbury Square. Each of the four divisions of the Council has been engaged in formulating its views on the terms of admission to the Register. So far as secondary schools are concerned, the rules for admission have been put forward (tentatively) by the secondary teachers' group and affect the attainments, experience and training of existing teachers and future teachers. The group recommends that the fee be one guinea, and the minimum age for registration be twenty-five. It is expected that the conditions of registration will be published before Christmas, and that teachers will receive the forms early in the new year.

Training of Teachers.—The Board of Education recently issued new regulations for teachers in secondary schools. The new rules modify the conditions of payments of grant to recognised training colleges, and will remove difficulties hitherto experienced. Grants will be calculated in future upon the number of individual recognised students who have completed an approved course of training. The regulations provide for an alternative method of training teachers in secondary schools approved for that purpose. In a prefatory note it is stated:—

"The Board believe that the grants now offered for this type of training may be a means of encouraging a larger number of intending teachers to undergo a course of training than hitherto, and that, in particular, graduates in high honours who have hitherto failed to make use of the existing training colleges may be attracted by the alternative method."

Position of Assistant Masters.—Statistics published by the Board of Education showed that there are about 9,000 secondary teachers in England and Wales and that of 4,000 assistant masters in secondary schools aided by grants from the Board the average salary is £168, and of them the greatest number at any one age are between 29 and 30, and their average salary is £158. The average salaries of full-time head teachers on the staff of secondary schools on the grant list in England was £441 for men and £316 for women; while the average of the assistants' salaries was, as stated above, £168 for men and £120 for women. As in the case of elementary teachers so with secondary teachers. The supply is falling off, the cause appearing to be the inadequacy of salaries. A comparison with foreign countries shows that in Prussia the rate is from £135 initial salary to £360 final salary for men; with a rent allowance from £28 to £65 a year; in Bremen the scale is £200 to £390; in Hamburg from £200 to £450. In France a well-qualified teacher may reach to £300 after twenty-five years' service; in addition, pensions are paid to secondary teachers and to their widows and orphans. In

Germany, as well as in Denmark and Holland, the pension amounts to two-thirds of the final salary, and no contribution towards the cost is required from the teachers. In England, only some twenty-five schools provide any pensions at all, and only one of the twenty-five does as well in this respect as the worst of the foreign systems does. Up to the present, there is no doubt that the secondary teachers, as a whole, are agreed on the following points:—

(1) That their pension from the Government should be more than the £1 per annum for each year of recorded service promised to elementary teachers. (2) That the maximum pension should be attainable at sixty instead of sixty-five. (3) That the teacher should not be compelled to purchase by his own payments an annuity of greater value than the Government pension. (4) That provision must be made for a liberal allowance in case of breakdown before the retiring age. (5) That a fair allowance must be made to existing teachers for service rendered before the scheme comes into force.

A meeting of the Organisations of Teachers, convened at the College of Preceptors on October 11, carried the following resolution unanimously: "That in the opinion of this Conference, it is advisable that a deputation representing National Organisations of Teachers should wait upon Ministers of the Crown to urge that substantial proportions of any further grants of money to Local Education Authorities, whether in connexion with the forthcoming Education Bill or otherwise, should be definitely assigned to the specific purposes of improving the staffing of schools, and increasing the stipends of teachers."

The Proposed Leaving Certificate.—The Bryce Commission reported in 1895:—"We think that an attempt should be made to guard against excessive multiplication and overlapping of examinations, whether of schools or of individual scholars, as tending to undue pressure and the disorganisation of the regular teaching work." The Consultative Committee of the Board of Education is now in process of drafting a scheme to substitute, for the sake of uniformity, one examination for such tests as the London Matriculation, the College of Preceptors' Examinations, the Oxford and Cambridge Locals, &c., which are, at present, the avenues for beginning a professional career.

Public and Preparatory Schools.—A closer co-operation has now taken place between these two types of schools in respect of some simplification of the curriculum, in view of the increase in the number of subjects studied, whereby some adjustment was inevitable. In the Curriculum Report sent by the Headmasters' Conference to the preparatory schools' headmasters, the point urged upon their attention was the importance of keeping Greek in the background until a thorough grounding had been obtained in Latin, English, French and mathematics. In several of the greater Public Schools these ideas have already been put into execution, and, in the lowest division, special attention is given to English, French, and drawing, and, at a later stage, to science. The task which lies before them is to broaden the basis of education in accordance with modern needs without falling away from the old ideals, and the unanimity of their views affords the best guarantee of their success.

W. A. EVANS.

Aerial Propulsion of Barges.—Mr. L. B. Desbieds in a paper read to the British Association advocated the propulsion of barges on canals by propellers working in air. He stated that the greatest speed yet reached on water, 55·8 miles per hour, had been got by making use of an air propeller worked by a motor of only 82 horse-power. A constant aerial thrust of 250 lb. could be given by a 16-h.p. engine, and would move barges loaded with 30 or 40 tons at four miles per hour. It would probably be possible for a barge so equipped to tow another behind it.

African Diseases Prevention.—A Committee was appointed in July to report upon the part played by wild animals and tsetse flies in Africa in the maintenance and spread of trypanosome infections, to consider the questions of game destruction in a localised area by way of experiment, and of the general or local extermination of wild animals, and whether other measures should be taken to control these diseases. The Committee, which met for the first time in October, is composed of the Earl of Desart (chairman), Mr. E. E. Austen, Dr. A. G. Bagshawe, Dr. Andrew Balfour, Sir John Rose Bradford, Mr. E. North Buxton, Dr. W. A. Chapple, Sir Mackenzie D. Chalmers, Lieut.-Col. Sir W. B. Leishman, Sir Edmund G. Loder, Dr. C. J. Martin, Mr. J. Duncan Miller, Dr. P. Chalmers Mitchell, Professor R. Newstead, Mr. H. J. Read, the Hon. L. Walter Rothschild, Sir Stewart Stockman, and Mr. A. C. C. Parkinson (secretary).

Anthrax Committee.—A Committee was appointed by the Home Secretary in November to inquire into the danger of anthrax infection in connection with various processes in the wool industry, and to consider possible amendments to the regulations made under Section 79 of the Factory and Workshop Act, 1901. The members of the Committee are: Sir Thomas P. Whittaker (chairman), Mr. W. Barber, Dr. F. W. Eurich, Alderman J. E. Fawcett, Colonel E. H. Foster, Mr. T. Grundy, Dr. T. M. Legge, Mr. Ernest Marsh and Mr. S. Parker. Secretary, Mr. G. E. Duckering.

Atmosphere Composition.—Professor F. C. Benedict, as a result of a long series of determinations of the proportions of oxygen to carbon dioxide in the atmosphere, claims to have established that, no matter what the weather, the state of the barometer, the conditions of rain, hail or snow, or the growth and change of vegetation in the year, the proportion of oxygen to carbon dioxide never varies, being 20·952 oxygen and 0·031 carbon dioxide. While fuel combustion and vital processes locally increase the carbon dioxide and decrease the oxygen, vegetable growth reverses the action so rapidly that even in street air there is no oxygen deficit.

Bombay Reclamation Scheme.—One thousand one hundred and forty-five acres are to be added to the area of Bombay, according to the latest reclamation scheme. The proposal involves the building of a big sea wall and the filling up of a large area at present covered by the sea. The estimated cost of the work is £2,170,000, and it is proposed that it shall be carried out at the cost and risk of Government.

Botanic Garden of St. Petersburg Bicentenary.—The Imperial Botanic Garden of Peter the Great celebrated its bicentenary on June 24. A new building for its herbarium and library has been completed, and another for the museum collections is to be commenced this year. The

herbarium receives the collections of the expeditions organised by the Colonisation Commission, with a view of a botanical survey of the Asiatic possessions of the Empire. A similar survey is being conducted for Russia proper, the collections of which will also be deposited in the garden.

Brain Research.—Dr. R. H. Clarke showed, at the Museum of the International Medical Congress in London, an improved form of the instrument he has devised for research on the brain. He has mapped the brain out into a number of flat slices for purposes of reference, and it is obvious that any point in the brain can be determined by reference to three dimensions. His instrument consists of a framework carrying a needle which is mounted similarly to the carriage of a gantry crane, and, in addition, can be inclined and raised or lowered. There are other devices for adapting the instrument automatically so that the same scales will fit a standard or an abnormal brain. Dr. Clarke is able to operate on any portion of the brain by trephining the skull and so directing his operating needle that it reaches the place desired without injury to any important structure.

British Association.—President's Address.—Sir Oliver Lodge delivered the Presidential address to the British Association at Birmingham on September 10, on the subject of "Continuity." He discussed the modern tendency in the various branches of science in favour of discontinuity, but argued in favour of the belief in a continuous ether. He emphasised the need of excluding certain considerations, such as life and mind, from Physiology, as lying outside the scope of individual sciences, but protested against excluding them from science. He put on record his belief that occurrences now regarded as occult could be examined scientifically, and his conviction that memory and affection are not limited to association with matter, and that personality persists beyond bodily death. He drew attention to the danger of denying the existence of anything which made no appeal to organs of sense, and from this standpoint attempted a reconciliation between religion and science.

Presidents' Addresses.—The Presidents' addresses were delivered in Section A by Dr. H. F. Baker on the Place of Pure Mathematics, in B by Professor W. P. Wynne on Valency, in C by Professor E. J. Garwood on the Function of Calcareous Algae as Rock-Builders, in D by Dr. H. F. Gadow on Old and New Aims and Methods of Morphology, in E by Professor H. N. Dixon on the Need for a Geographical Survey of the World, in F by the Rev. P. H. Wicksteed on the Marginal Theory of Distribution, in G by Professor G. Kapp on Electric Railways, in H by Sir Richard Temple on the Need for a Study of Anthropology by those engaged in Imperial Government, in I by Professor F. G. Hopkins on Biochemistry, in K by Miss Ethel Sargent on the Development of Botanical Embryology, in L by Principal E. H. Griffiths on the Education Act of 1902, and in M by Professor T. B. Wood on the Revival of Agricultural Science in the last twenty-five years.

The most notable event of the meeting was the discussion in Section A on Radiation; and the chief points of novelty, the meeting of a new sub-section, Psychology, the increase in

the number of "Citizens' Lectures" delivered, and the meeting of the Botanical section under the presidency of a woman. The Association meets this year in Australia.

British Science Guild.—The chief feature of the annual meeting of the British Science Guild in May was the report of the Education and Technical Education Committees on the Educational System of the Country, drawn up in view of the declared intention of the Government to bring in a comprehensive scheme of educational reform. Among other points, the joint Committee recommended that the local authorities should make such provisions as should promote healthy growth during infancy and throughout school life, that manual work should be taught throughout the training of children and teachers, that school attendance should be compulsory till fourteen, that attendance at continuation schools should be compulsory till seventeen, that secondary schools should be open to all those able to profit by them, that examinations should be secondary to school records, that technical institutions should be co-ordinated, that increased grants should be made to Universities and centres of higher education, so that fees can be reduced and post-graduate work promoted, that the conditions of the teaching profession should be greatly improved, and that the cost of education should be readjusted so as to make educational progress primarily a national responsibility. Other matters reported on were the synchronisation of clocks in view of the new Post Office service for synchronising, the available sources of nitrates, and the conservation of the natural resources of Canada.

Cancer and Parasites.—Professor Johannes Fibiger (Copenhagen) described in the *Berliner klinische Wochenschrift* (February 17) the production of cancer in rats by feeding them on cockroaches infected with a nematode worm. He showed that out of fifty-seven rats so fed the nematode was found in fifty-four. In thirty-six of these growths were found, four cases being definitely malignant new growths. The explanation is believed to be that the worms cause the cancer by acting as chronic irritants, and the chief features of the work are the isolation of what is apparently a specific irritant and the production of cancer experimentally through a parasite for the first time.

Chingford Reservoir.—The new reservoir at Chingford was opened last March by the King. It has an embankment $4\frac{1}{2}$ miles long containing over two million cubic yards of earthwork and 250,000 yards of puddle. Its capacity is 3,000,000 gallons, and a breakwater divides it to prevent the generation of destructive waves. The five Humphrey pumps, which can lift over two hundred million gallons a day, are the most remarkable feature of the work. Each one is really an explosion chamber, working on the internal combustion principle, and blowing, not pumping, the water into the tower. Till the reservoir was built the largest pumps of the kind were of 35 horse-power, but in this work Mr. Humphrey jumped from that to between 200 and 300 horse-power. The supply is derived from the river Lee and the Lee Navigation.

Civil Engineers' Institution New Buildings.—The new buildings of the Institution of Civil Engineers in Great George Street, Westminster, were formally opened in October, the annual dinner of the Institution being held for the first

time in the Institution's premises. The new house stands on an area of 21,000 square feet. The two reading rooms have an area of 3,230 square feet; the main library is 147 feet long by 28 feet 6 inches wide; and the great hall is 100 feet long, 45 feet wide, and 45 feet high.

Decimal System.—The General Medical Council has arranged that all weights and measures in the new British Pharmacopœia should be in the metric system, while for convenience of use by doctors the equivalents for dosage will also be given in the Imperial system. Progress has also been made towards getting the metric carat of 200 milligrams accepted as the international unit for the sale of diamonds and precious stones, the use of this new unit and its multiples and submultiples having been authorised in the United Kingdom by an Order in Council dated October 14.

Deep-Water Fish.—At the meeting of the Ninth International Congress of Zoology, at Monaco, Professor Roule (Paris) described a new species of fish captured by the Prince of Monaco at a depth of 6,035 metres—a depth greater than that at which any fish has previously been caught. The Congress, among other matters, considered the question of zoological nomenclature; and it was decided that the next Congress should be held at Budapest, under the presidency of Professor Hovarth.

Liphtheria Prophylactic.—At the Congress of Medicine at Wiesbaden Professor Behring stated that he had discovered a diphtheria prophylactic consisting of a mixture of diphtheria poison and antidote. The substance was perfectly innocuous and gave real protection. Several medical men testified to the value of the serum, both as a prophylactic and a means of treatment.

Electric Locomotives.—The New York Central and Hudson River Railroad Company have given orders for nine electric locomotives which must be reckoned among the most powerful in the world. Their weight is 100 tons, but all this is carried on the driving wheels, which will be able to pull a train weighing a thousand tons at sixty miles an hour. They are designed to develop normally 1,400 horse-power, or, for short periods, 5,000 horse-power.

Fertiliser Experiments.—As a result of a series of experiments undertaken by Mr. A. P. Hall, Mr. W. R. Brenchley and Mr. L. M. Underwood, Mr. Hall and his colleagues in a paper to the Royal Society in November claim to have shown that the composition of the natural soil solution as regards phosphoric acid and potash is not constant, but varies with the soil composition and the manurial history; that rate of growth varies with the concentration of the nutritive solution, irrespective of the total amount of food available; that, other conditions equal, the growth of the crop is determined by the concentration of the soil solution in phosphoric acid and potash, which is determined by their amount in the soil, their state of combination, and the fertiliser used; that even after sixty years or more of cultivation in the same ground crops like wheat or barley do not leave toxins in the soil. In some water culture experiments they found that an enormous gain resulted to the plants by continually bubbling air through the culture solution.

Firedamp Whistle.—Professor Haber demonstrated to the German Emperor in October an apparatus for use in mines, which he has christened the "Firedamp Whistle." If pure

air is blown through the whistle it gives an ordinary continuous tone, but with even one per cent. of explosive gas a broken note results. When the danger point of 5 per cent. is reached a succession of rapid throbbing notes are produced which warn the miner of his danger, the effect being caused by the increased frequency of the vibrations within the pipe.

Fish Migration.—The Board of Agriculture and Fisheries have marked numbers of salmon smelts and kelts in various rivers by means of a wire, or a wire and label, attached to the dorsal fin, and in a circular offer rewards for the return of the trace marks, accompanied by the particulars of the sex, length, weight, and condition of the fish to which it was attached, and by a few scales taken from the body of the fish behind the gill cover; the object of the removal of the scales being to determine microscopically the age of the fish and its history as regards sexual maturity and previous spawning acts. The general purpose of the experiment is to trace the migrations of the fish, and mainly the length of the period spent in the sea.

Floating Naval Factory.—Arrangements have been made by the Admiralty for the construction of a new type of vessel to be stationed at the new naval base at Cromarty. It is to be a self-contained factory, capable of carrying out almost any type of repair that does not require dry-docking. It is to be 450 ft. long and 90 ft. in breadth, square at either end. The hull, which will contain the engine, stores, &c., is to be divided into water-tight compartments, and above is to be the factory, enclosed in a superstructure and containing among other departments a foundry, a machine shop, an electrical shop, a boiler shop, a smithy, a joiner's shop, and a pattern shop. The vessel will not be fitted with propelling power. It is to provide living quarters for 136 officers and men.

Ganges Railway Bridge.—The largest bridge ever shipped from England, and the largest after the Forth Bridge built by British engineers, is in course of construction over the lower Ganges, 120 miles above Calcutta, at an estimated cost of £1,125,000. Apart from the approaches, which are 75 ft. long, there are fifteen main spans, of which the dimensions will be 345 ft. $1\frac{1}{2}$ in. long, 49 ft. high, and 1,400 tons in weight. In view of the scouring force of the water steel caissons are being sunk 150 ft. below the bed of the river. These will be topped by masonry piers and steel trestles, the base of the trestles being the highest flood level.

General Paralysis of the Insane.—At a special meeting of the Royal Society of Medicine in October, Dr. Noguchi, of the Rockefeller Institute, gave an account, with demonstrations, of his work on spirochetes, showing, among other points, the presence of the *Spirochæta pallida* in general paralysis of the insane, and thus giving the final link in the proof that the spirochæte is the cause of this form of general paralysis.

Gladstone Dock at Liverpool.—The new Gladstone dock at Liverpool was opened on July 11 by the King. It is 1,050 ft. long, or more than 100 ft. longer than the largest vessel at present afloat, and at its entrance is 120 ft. wide. At low water springs the entrance sill is 15 ft. below the level of the water, and at high water springs the depth is about 46 ft., falling at the lowest neap tides to 35 ft. The entrance of the dock is closed by a sliding caisson, and it has been so constructed as to serve either as a wet

dock or as a graving dock. The water is emptied by five sets of centrifugal pumps with discharge pipes of 54 in. diameter, each driven by a vertical four-cylinder two-cycle Diesel engine, and capable of developing 1,500 horse-power. They are able to empty the 44,000,000 gallons of water in the dock in 2½ hours.

Gothard Railway Electrification.—Professor Kapp, at the British Association, was able to announce some details as to the electrification of the Gothard line, the first section of which is to be opened in four years. The steepest grade is 27 per mille. There are to be two hydro-electric power stations, one at Amsteg with 60,000 horse-power, and one at Piotta with 50,000 horse-power. It is estimated that 420-ton express trains will be driven at 50 kilometres an hour on grades of 26 per mille, for which speed the engines will have to develop 3,000 horse-power. The current will be carried at 30,000 volts, and transferred to 7,500 volts at first, and 15,000 volts later if experience warrants the increase to double pressure. The first portion to be electrified is that between Erstfeld and Bellinzona, but it is proposed to continue the electrification at a later date to Lucerne on the north and Chiasso on the south.

Government Researches.—The special researches authorised in May by the Local Government Board out of the annual grant voted by Parliament in aid of scientific investigation concerning the causes and processes of disease are: (1) Causes of premature arterial degeneration (Dr. F. W. Andrewes); (2) insects in relation to disease (Professor Nuttall, Dr. Bernstein, and Mr. Hesse); (3) infantile diarrhoea (Mr. F. W. Twort and Dr. Edward Mellanby); (4) the virus of poliomyelitis (Mrs. Andrewes and M. H. Gordon); (5) the character and life-history of certain filter-passing micro-organisms (Mr. F. W. Twort); (6) respiratory exchange in man under varying conditions (Professor Leonard Hill); (7) the Biochemistry of syphilis (Mr. J. E. R. Macdonagh); (8) the possibilities of serological diagnosis of scarlet fever (Dr. L. Rajchman); (9) the relation between the clinical symptoms and the bacteriology of the acute respiratory affections (Dr. D. M. Alexander).

Hair and Racial Kinship.—Mr. Ainsworth Mitchell and Mr. R. M. Prideaux have been examining the hair of various mammals with a view of detecting generic resemblances and common origins. Till recently it was believed that the hair of man contained no central canal or medulla, though this is fairly common in the higher apes. Examination has shown that the hair growing under the arm-pits—believed to be a vestige of man's former ancestry—often contains traces of a narrow irregular medulla. Further, a study of negro hair has revealed the existence of a narrow medulla, in some instances continuous throughout the whole length of the hair. A comparison with the hair of the higher apes points to the conclusion that the hair of the negro bears a closer resemblance to that of those animals than it does to the hair of the average European.

Hourly Time Signal.—The General Post Office has established a new service for the synchronising of clocks, and for a small annual fee will send out every day an hourly time signal. The system involves the establishment of a number of master clocks in different distributing centres, to which the Greenwich time signal will

be sent once a day. From these master clocks the hourly signals will be given to the institutions taking the service.

Hydro-Electric Station at Fully.—What is believed to be the highest waterfall in the world is to be tapped for power in Switzerland, and the work of construction has already begun. The source of the supply is the Fully Lake, and the water will escape into the Rhône Valley, falling over a mile. The conduit will be nearly 3 miles long, and the pipes will have a diameter of between 16 and 19 feet, with walls varying from a quarter of an inch to one-and-three-quarter inches in thickness, the tubes having to support a maximum pressure of 165 atmospheres. The plant will include four turbines of the Pelton type, developing 3,000 horse-power at 500 r.p.m.

Internal Combustion Turbine.—Messrs. G. and L. Inrig have patented an internal combustion turbine engine that works to some extent on the Diesel engine principle. Air is admitted to the casing at a pressure of about 960 lb., and then oil, which fires owing to the high pressure. The heat generated is used to produce steam from water admitted into the drum as a spray, and this not only does useful work on the turbine, but also scavenges the casing.

International Association of Academies.—At the fifth meeting of the International Association of Academies at St. Petersburg, in May, committees were nominated to work up the proposal of the Berlin Academy for an international investigation of the problems connected with volcanoes, to discuss the question of a more scientific scale and definition of compound colours than exists at present, and to consider the possibility of the reform of the calendar. The support of the Association was given to the organisation instituted at Frankfurt by Professor Brendel for calculating the orbits of small planets, and to the enterprise of publishing annually a table of physico-chemical constants. The question of the appointment of a permanent secretary was discussed, and is to be decided at the next meeting, which will be held in Berlin in 1916.

International Medical Congress.—The Seventeenth International Medical Congress was opened on August 6 at the Albert Hall in London by Prince Arthur of Connaught on behalf of the King, Sir Thomas Barlow being President of the Congress. Five general addresses were delivered to the Congress—in Medicine, on Medical Prognosis, by Professor A. Chauffard; in Surgery, on the relation between Medicine and Surgery, by Professor Harvey Cushing; in Pathology, by Professor Paul Ehrlich, on Chemio-Therapy, with especial reference to salvarsan; in Heredity, by Professor W. Bateson, on Mendelism; and in Public Health, by Mr. John Burns. In a joint session between the sections of Dermatology and Forensic Medicine at the Albert Hall the following resolution was passed:—That, sensible of the ravages wrought by syphilis in the health of the community, and deploring the inadequacy of existing facilities for checking its dissemination, the International Medical Congress calls upon the Governments of all countries here represented (1) to institute a system of confidential notification of the disease to a sanitary authority, wherever such notification does not already obtain; (2) to make systematic provision for the diagnosis and treatment of all cases of syphilis not otherwise provided for. A special

feature of the Congress was the Museum organised under a Committee, of which Professor Arthur Keith was chairman, by Dr. H. W. Armit, who was assisted in the work of arrangement by Dr. F. W. Goodbody. The next meeting of the Congress will be held in Munich in 1917.

Iron Bacterium.—A new iron bacterium has been described by Mr. E. M. Mumford in the Transactions of the Chemical Society. The author suggests that it has a twofold action—an aerobic action whereby it precipitates ferric hydroxide from iron solutions, and an anaerobic one which changes the ferric hydroxide into bog iron ore, with a partial reduction of the iron to a ferrous state.

King's Dock at Singapore.—The King's Dock at Singapore, the largest dry dock in the Far East, was completed during the summer. It is 892½ ft. long and 100 ft. wide at the entrance, having a depth on the outer sill of 24 ft. at extreme low water. It can be divided by means of a caisson into an inner and outer dock, 502 ft. and 346 ft. long respectively. The pumps can empty the dock, which contains 22,000,000 gallons of water, in less than two hours.

Largest Electrical Derrick Crane.—Messrs. Butlers Brothers & Co. have manufactured for use in connexion with the new London County Council Hall at Westminster what is claimed to be the largest electrical derrick crane yet built. Its jib is 135 ft. long, and it can lift ten tons at a radius of 110 ft. or five tons at a radius of 125 ft. It is standing on a staging 76 ft. high, is of single motor design, and its material is steel lattice work.

London Underground Railway Jubilee.—The Metropolitan Railway between Bishopsgate and Farringdon Street was opened fifty years ago on January 9, 1863. At the time of the opening the directors recognised the need of having a locomotive that would bottle up its own smoke, but the ideal was not achieved until the electrification of the Underground a few years ago.

London University.—The Royal Commission on University Education in London reported during the spring and drew up a comprehensive sketch of what the University of London might be. The Commissioners dealt very fully with the many problems of medical and technical education, and a feature of their recommendations was the attempt made to prevent overlapping. With a view of giving effect to the recommendation of the Commission, the following departmental Committee was appointed in August: Sir George H. Murray (chairman), Sir L. A. Selby-Bigge, Sir John Rose Bradford, Sir William S. MacCormick, Mr. George Franklin, Professor Arthur Keith, Mr. John Kemp, Mrs. Henry Sidgwick, and Mr. H. F. Heath, C.B. (secretary).

Magnetism of the Sun.—Professor G. E. Hale, as a result of a long series of spectroscopic observations, has reached, among others, the general conclusion that the whole sun is a magnet with the same polarity as the earth. As the high temperature of the sun would not allow permanent magnetism to exist, the magnetism is ascribed to its axial rotation. Over twenty years ago, at the Royal Institution, Professor Schuster asked the question, "Is every rotating body a magnet?"

Mechanical Engineers' Institution.—The Institution of Mechanical Engineers completed their new buildings in October, and have thereby

increased their premises in Storey's Gate by about one-third. The size of the site at present occupied is 6,700 sq. ft. The council chamber is 38 ft. by 24 ft., a committee room 28 ft. by 17 ft., and a large smoking-room 38 ft. by 18 ft. 6 in.

Marine Engineers' Institute New Buildings.—The Lord Mayor of London laid the foundation-stone of the new Institute of Marine Engineers on Tower Hill on October 29. The principal room in the new buildings will have a superficial area of 1,280 sq. ft., and will give accommodation for 200 persons. The library will have an area of 726 sq. ft.

Medical Institute in South Africa.—A Medical Institute is being built in South Africa at Johannesburg. The site has been provided by Government, the cost of building and equipment is being met by the Witwatersrand Native Labour Association, and the cost of maintenance is to be shared by the Government and the Association. Dr. Watkins Pitchford has been appointed Director, and Dr. G. D. Maynard Statistician. The Institute is close to a large hospital, and is itself to be equipped with four wards and a large number of research laboratories. Its special function will be to study the industrial diseases of the Transvaal.

Medical Research Committee.—A Medical Research Committee was appointed in June to deal with the money available for research under the Insurance Act, being about £57,000 a year. It is composed of Lord Moulton (chairman), Dr. C. Addison, Mr. Waldorf Astor, Sir T. Clifford Allbutt, Mr. C. J. Bond, Dr. W. Bulloch, Professor M. Hay, Dr. F. Gowland Hopkins, and Sir W. B. Leishman.

Monster Coal Truck.—The Norfolk and Western Railway (U.S.A.) have tried experimentally on a portion of their system a monster coal truck. It is 46 ft. 10½ in. long, 10 ft. 4½ in. wide, 10 ft. 4½ in. high, diameter of wheels 33 in., total weight 29 tons 2 cwt. 16 lb., and cubic contents 2,829 cubic ft. On the trial trip it carried about ninety tons of coal.

Motor Fire Engine.—The Lapland Motors (Limited) have supplied in the course of the year to the Stafford Corporation a motor fire engine capable of developing 70 horse-power, and of travelling any speed up to fifty miles an hour. The pump delivers 400 gallons a minute, or in an emergency 600 gallons. It works six jets at 50 lb. pressure, weighs approximately four tons, and is equipped with 1,500 ft. of hose.

National Physical Laboratory Report.—In the Annual Report of the National Physical Laboratory the following points may be noted. The Lorenz apparatus, for determining the ohm in absolute measure, which gives a degree of precision of two parts in 100,000, has been completed and work has been continued on the subject. The British Radium Standard is now deposited at the Laboratory. Tests are being conducted on various heat insulators, and among the subjects on which researches have been or are being made are the visibility of ships' lights, glare, ship models and the speed at which they can be driven without excessive wave making, zinc and aluminium compounds, wind pressures and road surfaces. New buildings to accommodate the administration offices and the Optics division were opened by Mr. A. J. Balfour on June 26.

Neon and X₃.—Professor Sir J. J. Thomson, in delivering the Bakerian Lecture to the Royal Society on "Positive Rays of Electricity," stated

that, as a result of positive ray analysis, neon should be regarded not as a simple gas, but as a mixture of two gases having atomic weights of 19.9 and 22.1. He discussed various possible views as to the mysterious gas X₃, and later in the year at the British Association he inclined to the belief that it was a molecule consisting of three atoms of hydrogen.

Obituary.—Among the distinguished men of science who died in 1913 are the following:—Professor N. H. Alcock, physicist; Sir William Arroll, the builder of the Tay and Tower Bridges; Lord Avebury, banker, antiquary, politician, and man of science and letters; Colonel F. Bailey, forester; Colonel J. S. Billings, hygienist and librarian; Mr. E. B. Bright, telegraphic engineer; M. Louis Paul Cailletet, the father of modern cryogenics; Mr. A. C. Claudet, metallurgist; Mr. S. F. Cody, aviator; Sir Richard Cooper, stockbreeder and agriculturist; the Earl of Crawford, astronomer; Dr. Rudolf Diesel, engineer; Mr. R. B. Etherington-Smith, surgeon; Professor Edwin Goldman, biochemist and surgeon; Professor Paul Gordan, mathematician; Professor Francis Gotch, physiologist; Mr. Carl Hagenbeck, naturalist; Sir Walter Noel Hartley, spectroscopist and chemist; Mr. William Hunting, veterinary surgeon; Sir Jonathan Hutchinson, surgeon; Lord Ilkerton, heart specialist and politician; Dr. Julius Lewkowitsch, chemist; Dr. Just Lucas-Championnière, surgeon; Dr. Alexander Macfarlane, algebraist; Professor J. G. MacGregor, physicist; Professor Hugh Marshall, inorganic chemist; Mr. George Matthey, physicist; Professor John Milne, seismologist; Mr. Edward Nettleship, ophthalmic surgeon; Professor J. T. Nicholson, first professor of mechanical engineering at Manchester; Dr. Jules Ogier, toxicologist; Dr. H. F. Parsons, public health authority; Sir William Preece, telegraphist; Dr. P. L. Schlater, zoologist; Professor Adam Sidgwick, zoologist; Professor Adolf C. H. Staby, part inventor of the German system of wireless telegraphy; M. L. Teisseranc de Bort, pioneer in upper air investigations; Sir John Batty Tukey, alienist; Dr. Alfred Russel Wallace, biologist; Sir William White, naval constructor; Dr. Forbes Winslow, specialist in mental diseases; Professor A. Witkowski, physicist; and Professor Vambery, orientalist.

Oil-Electric Locomotive.—A locomotive engine in which oil is used in an internal combustion engine to generate electric power has been ordered by a firm in Chile in connexion with the nitrate industry. The internal combustion engine is a three-cylinder, two-cycle engine, capable of developing 75 h.p., the cylinders being 10 in. in diameter and having a 12-in. stroke. The generator when running at its normal speed of 340 r.p.m. is able to supply current at 125 volts. The engine is designed to work on a 30-in. track with sharp curves and grades.

Osmotic Pressure Exerted by Plants.—Mr. W. S. Clark, experimenting with ostrich ferns and the force they can exert in bursting their way through solid substances, states that, in one instance, the group considered must have developed a pressure equal to 189 lb. over a period of ten days. Reducing this to the individual cells, he calculates that the osmotic pressure must have been about 35 atmospheres, or about 325 lb. to the square inch. In some other experiments it became evident that the osmotic pressure might rise to 50 atmospheres.

Panama Canal Opening.—The last land barrier separating the Atlantic and Pacific Oceans at Panama was broken down on October 10 by the explosion of the dynamite stored in the Gamboa dyke. The charge was fired by the depression of a telegraph key in the White House at Washington by President Wilson. The amount used for the purpose was about 40 tons, and of this one-third was exploded, the remainder being discharged when the debris had been cleared away. The first survey undertaken with a view of cutting a canal was made on the order of Charles V. of Spain, in the sixteenth century, and the line then advised is almost exactly that followed by the American engineers. It is expected that the canal will be open for traffic on January 1, 1914. It will have cost about £70,000,000.

Peat as Manure.—Professor W. B. Bottomley described before the section of Agriculture at the British Association the use of peat moss litter treated with bacteria as a manure. By applying this to the land a high degree of nitrogen fixation was obtained. The treated peat also stimulated the growth of the root, probably owing to the ammonium humate formed as a result of the action of the bacteria. He quoted several field experiments, a typical one being with lettuce and turnips. Plots treated with prepared peat compared with plots treated with farmyard manure gave an increase of 27 per cent. with lettuce and 23 per cent. in the case of turnips.

Petrol Hydraulic Railway Car.—The Edmonton Inter-Urban Railway Company, Alberta, have had constructed the first car of its type to be driven on the petrol hydraulic principle. It weighs 18 tons, and runs on a 4 ft. 8½ in. gauge. It carries a six-cylinder petrol engine, on the shaft of which a Hele-Shaw pump is fixed that delivers oil through a 3-in. tube to two 40-h.p. Hele-Shaw rotating motors, which are connected by chain belts and gearing to the two rear axles, the oil being returned by another 3-in. pipe to the pump. The system helps to act as its own brake, as, if the engine is cut off, the wheels start driving the pump. It is also fitted with Westinghouse air brakes. It is found to be very elastic, to climb gradients with ease, to take curves well, and to attain without difficulty a speed of 38 miles an hour on the level.

Pitdown Skull.—The discovery by Mr. Charles Dawson of a pre-historic skull in a pocket of gravel at Pitdown, Sussex, and the announcement made by him and Dr. A. Smith Woodward to the Geological Society, have aroused continued controversy throughout the year. The specimen has been named *Eoanthropus dawsoni*. The actual period in geological time to which it must be referred is still under dispute, and the reconstruction of the skull and the place the specimen should occupy in relation to man, are still matters of controversy. The subject was fully discussed at the Royal Anthropological Society, at the meeting of the International Congress of Medicine, at the British Association, and elsewhere.

Poliomyelitis.—Dr. Flexner and Dr. Noguchi, of the Rockefeller Institute, have found the organism which produces epidemic infantile paralysis or poliomyelitis, have cultivated it, and have succeeded in producing the disease experimentally with cultures of the organism. The organisms consist of globe-like bodies,

measuring from one-third to one-seventh of a micron, and grow in pairs and chains and masses, and are apparently bacteria. They belong to the class of bodies known as filter-passers.

Public Health Museum.—The "Pathological Bacteriological and Pathological Museum," presented by Sir William Lever to the Royal Institute of Public Health, was opened on May 6. It has been equipped with specimens of drugs, chemicals, culture tubes, transparencies showing the forms of different bacteria, toxins and anti-toxins, diagrams illustrating various aspects of disease specially interesting to Medical Officers of Health, and other exhibits necessary for the proper teaching of public health.

Pumping Coal at Hammersmith.—In connection with the Municipal Electric Works at Hammersmith the Council have approved a scheme for running a pipe-line some 600 yards from the wharf to the storage tanks. The coal will be lifted from the barges, weighed, passed into a hopper and thence fed into a suction tank. A dredger pump will pass a mixture consisting of six and a half parts of water to one of coal into the pipe-line, and the whole will be carried at a rate of 7 ft. a second to the storage tanks. Of these there are to be five. The estimates give a reduction in the cost of delivering the coal from the present rate of 7½d. per ton to less than 1d. per ton.

Punjab Irrigation.—The southern link of the Triple Canal Project was opened at Ballokli, near Lahore, in April. The length of the Lower Bari Doab Canal is 134½ miles, and the length of distributaries about 1,080 miles. Its estimated cost was about a million and a half sterling. On the whole scheme the capital outlay is placed at £6,920,000, but as a result of it some four million acres will be protected, and 1,871,000 acres annually irrigated. The work is expected to bring in a net yearly revenue of £518,000, or 7½ per cent.

Radio-Activity and the Periodic Law.—In opening a discussion at the Chemistry Section of the British Association, Professor Frederick Soddy said that in that part of the Periodic Table in which the evolution of the elements was still proceeding, each place was seen to be occupied, not by one element, but on the average by no less than four, the atomic weight of which varied over as much as eight units. It was impossible to believe the same might not be true for the rest of the table. Each known element might be a group of non-separable elements occupying the same place. He announced that Madame Curie was now engaged in experiments with about a gramme of radium with a view of discovering whether some of the products of radium had the same spectrum.

Record Price for a Bull.—A record price for a bull was paid in Palermo, when, at the Palermo Show, £7,500 was paid for a shorthorn bull in October. The animal was of Scottish blood. Two other bulls at the same show fetched over £3,000 a-piece.

Resuscitation and the Prevention of Death.—Dr. A. L. Soresi, in a paper read to the Physiological Section of the International Congress of Medicine, described how life could be restored to animals nine minutes after heart-beating, respiration, and all signs of life had disappeared. In his experiments animals were bled to death by severing the femoral artery; artificial respiration was maintained by pumping air or different gas through the trachea; the thorax was opened

and the heart exposed; when all heart-beating had stopped artificial respiration was also stopped at times, and at other times kept on; direct transfusion of blood was resorted to through the external jugular vein. Heart-beating and life could be restored up to seven minutes after heart-beating had been completely stopped, but no result could be obtained if instead of blood other stimulating liquids were used. In other animals, bled in the same way but without exposing the thorax, heart-beating and life could be restored after nine minutes.

Rothamstead Laboratories.—Mr. Walter Runciman, President of the Board of Agriculture, opened a new wing of the Rothamstead Experimental Station on June 27. It includes a large soil laboratory and director's room on the ground floor, a botanical laboratory, library and chemical laboratory on the first floor, and a glass house for water cultures on the roof. Special rooms are provided in the basement for polarimeter work and soil incubations. The laboratory is equipped with electric current. The total cost of the buildings and fittings was about £3,400, and there has been a further expenditure of £3,200 on the new farm. The centenary of the station was celebrated during the year.

Royal Society Conversazione.—The Royal Society held its annual conversazione on May 7, the most striking feature of the exhibits being the number of instruments shown connected both with the Science and the Art of Aviation. Among the exhibits were the Pitdown Skull, a model by Sir John Thornycroft illustrating the effect of a compound cross-sea on vessels of varying rolling periods, and an apparatus by Professor L. B. Wilberforce for studying the formation of ripples. On the retirement of Sir Archibald Geikie, Sir William Crookes became President of the Society.

St. Paul's Fire Appliances.—The work of supplying St. Paul's Cathedral with a supply of water sufficient to extinguish fire has been carried out by Messrs. Merryweather and Sons. The essential feature of the scheme is a long main sixty feet above the floor-level of the Cathedral. In the event of fire, the fire brigade would couple its engines by short lines to this main and link on its hose to the outlets of the main nearest the fire. By means of different sized iron pipes the water can be carried up to the top of the dome.

Sheffield University.—The new Applied Science Department of Sheffield University, which was completed in October at a cost of £45,000, and opened by Lord Haldane on October 25, is one of the best equipped buildings of the sort in the world. The chief features of the new building are the non-ferrous laboratories, the electro-metallurgical laboratory, the mining section, and the applied chemistry department.

Sky-Scrapers in New York.—A report by the Superintendent of the Bureau of Buildings for the Borough of Manhattan shows that the buildings include one of 55 storeys, one of 45, one of 41, one of 38, three of 33, one of 32, one of 31, two of 27, four of 26, four of 24, three of 23, eleven of 22, fifteen of 21, twelve of 20, thirteen of 19, thirteen of 18, twenty-one of 17, twenty-eight of 16, twenty-seven of 15, forty-four of 14, three hundred and eighty-nine of 13, a hundred and ninety-one of 12, a hundred and eighty-one of 11, and a hundred and seventy-nine of 10 storeys, or a total of 1,756. The plans for the first "sky-scraper" were approved in 1888, and

it had nine storeys. Building has grown to such an extent in New York that it is no longer classed among the sky-scrappers.

Sleeping Sickness Carriers.—The Sleeping Sickness Commission, of which Sir David Bruce is the head, has decided that the so-called sleeping sickness in Nyasaland is not the same as that of Uganda or the West Coast, though belonging to the same category, and being more rapid and even more fatal. It has also been determined that the disease is carried by *Glossina morsitans*, a fly widely spread over the whole of Africa and not confined to special areas like *Glossina palpalis*, which has hitherto been regarded as the carrier of the disease.

Soil Sickness Experiments.—In describing in the *Journal of the Board of Agriculture* their work on the sterilisation of glass-house soil by heat and antiseptics, Dr. E. J. Russell and Mr. F. R. Petherbridge attribute the effects of the treatment to three changes: (1) Increased bacterial activity, with greater food production; (2) reduction in numbers or death of disease organisms; and (3) modification of processes going on in the soil, so that certain unusual substances are present which produce special effects on the plant.

Telegraphic Advance.—An invention of Mr. John Gott, of the Commercial Cable Company, was announced in February whereby it was claimed that the chief difficulty in the relay problem in telegraphy had been solved. The essential feature of the system is that current reversals, hitherto wasted, are used for transmission purposes. By means of the invention it is hoped that the break of transmission between long cables and land lines may be overcome.

Transmutation of Elements.—During the year several remarkable experiments have been published in connexion with the transmutation of elements. At the Chemical Society Professor Collie and Mr. Patterson described how on sparking hydrogen helium made its appearance, and how if oxygen were present neon made its appearance; the suggestion indicated being that the reactions could be expressed by the equations

$$\begin{array}{l} 4 \text{ Hydrogen} = \text{Helium, and } 4 \text{ Hydrogen} + \text{Oxygen} \\ \quad (4) \qquad \qquad (4) \qquad \qquad (16) \\ = \text{Neon.} \end{array}$$

In a paper before the Chemical Society of Rome in June Sir William Ramsay described experiments which suggested that the following other equations might be written:—Radium — (226)

Helium = Niton; Sulphur + 8 Hydrogen = Argon;

$$\begin{array}{l} (4) \qquad (222) \qquad (32) \qquad (2 \times 4) \qquad (40) \\ \text{and Selenium} + 4 \text{ Hydrogen} = \text{Krypton. He sug-} \\ \quad (79) \qquad \qquad (4) \qquad \qquad (83) \\ gested that researches should be undertaken to} \\ \text{determine whether the other equation might be} \\ \text{written: Tellurium} + 4 \text{ Hydrogen} = \text{Xenon.} \\ \quad (127.5) \qquad \qquad (4) \qquad \qquad (131.5) \end{array}$$

Tuberculosis Campaign.—By a general order of the Local Government Board all forms of human tuberculosis became compulsorily notifiable on and after Feb. 1. On and after May 1 an order of the Board of Agriculture and Fisheries made notification of tuberculosis of any bovine animal compulsory. Tuberculous animals are slaughtered and compensation given.

Tuberculosis and Tuberculin.—At the fifth annual Congress of the National Association for the Prevention of Tuberculosis, opened by the Prime Minister, there was a long debate on tuberculin treatment. The balance of opinion

was decidedly in favour of the view that extreme caution should be exercised in using tuberculin, whether as a therapeutic or as a diagnostic agent.

Veneral Diseases Commission.—The appointment of a Royal Commission was announced in October with the reference "To inquire into the prevalence of venereal diseases in the United Kingdom, their effects upon the health of the community, and the means by which those effects can be alleviated or prevented; it being understood that no return to the policy or provisions of the Contagious Diseases Acts of 1864, 1866, or 1869 is to be regarded as falling within the scope of the inquiry." The Commission is composed of the following members:—Lord Sydenham of Combe (chairman), Sir David Brynmor Jones, Sir Kenelm E. Digby, Sir Almeric FitzRoy, Sir Malcolm Morris, Sir John Collie, Dr. Arthur Newsholme, Canon J. W. Horsley, the Rev. J. Scott Lidgett, Dr. Frederick Walter Mott, Mr. James Ernest Lane, Mr. Philip Snowden, Mrs. Scharlieb, Mrs. Creighton, and Mrs. Burgwin. Mr. E. R. Forbes is secretary.

Veruga Peruana.—Professor Townsend, of Lima, claims to have discovered that the tropical disease known as *Veruga Peruana*, or Carrion's fever, and met with specially in Peru, is transmitted by one of the small blood-sucking midges of the genus *Phlebotomus*.

Visitation Advisory Committee.—The following were appointed by the Home Secretary as an Advisory Committee in the administration of the Cruelty to Animals Act:—Sir A. Bowlby, Sir J. Rose Bradford, Sir H. Bryan Donkin, Mr. G. H. Makins, Lord Moulton, Dr. S. J. Sharkey, and Dr. C. J. Symonds.

Water Divining.—A series of experiments has been carried out at Guildford on water divining, and a committee of investigation reported that, while there appeared to be some evidence that certain persons might be sensitive to underground water, their sensitiveness was not sufficiently definite and trustworthy to be of much practical value. They drew attention to the lack of agreement among investigators, and concluded the movements of the "dowser's" rod were due to subjective and not objective causes. The question has also been considered by various informal bodies during the year.

Water Power in Canada.—The St. Lawrence River is to be tapped for power about 30 miles above Montreal, and it is estimated that the work will be completed by October in this year. Twelve water-wheels are to be used, each of them capable of generating 10,300 h.p., operating at 56 r.p.m. with a fall of 30 feet, and the whole equipment when completed will yield 150,000 h.p. Two million cubic yards of material will have to be excavated and about a hundred thousand yards of concrete laid down.

Wireless Research.—A Committee was appointed in November by the Postmaster-General to consider how far and by what methods the State should make provision for research work in the science of wireless telegraphy, and

whether any organisations established should include problems connected with ordinary telegraphy and telephony. The names of those on the Committee are:—Mr. C. E. H. Hobhouse (chairman), Lord Parker of Waddington, Sir Joseph Larmor, Sir Henry Norman, Dr. R. T. Glazebrook, Mr. W. Duddell, Mr. R. Wilkins, Rear-Admiral E. F. B. Charlton, Sir Alexander King, Mr. W. Slingo, Commander F. Loring, Major the Hon. H. C. Guest and Commander J. K. im Thurn.

Wireless Telephony in Coal Mines.—The first installation of wireless telephony in a coal mine in Great Britain has been fitted up at Dinnington Main Colliery, S. Yorkshire, the system being the invention of Mr. J. H. Reinecke, of Bochum, Westphalia. The telephone is connected by two wires to a piece of metal buried in the ground or to tram lines, water-pipes, &c. Instruments have been placed at two points—one in the transformer house near the pit bottom, and the other 1,000 yards away. By means of portable instruments weighing about 20 lb. each communication can be established with any part of the mine, all that is necessary being that the operator shall attach the two wires to any metallic substance near by.

Wireless Time Signals.—As a result of the International Conference on Wireless Telegraphy, wireless time signals are now sent out (Greenwich notation of time) from Paris (midnight), San Fernando (2 h.), Arlington (3 h.), Manilla (4 h.), Mogadiscio (4 h.), Timbuctoo (6 h.), Paris (10 h.), Norddeich (mid-day), San Fernando (16 h.), Arlington (17 h.), Massowah (18 h.), San Francisco (20 h.) and Norddeich (22 h.). The wave length is 2,500 metres. The signals sent out are: 3 minutes before the hour warning x's till 57 mins. 50 secs., silence 5 secs., then 3-second dashes separated by 2-second intervals. During the second minute before the hour a dot preceded by a 1-second dash is sent out at 10, 20, 30, 40, 50 seconds. Then a 5-second interval, followed as before by 3 1-second dashes. In the last minute, at 10, 20, 30, 40, and 50 seconds a dot preceded by two 1-second dashes is sent out, then a 5-second interval, followed by three dashes as before, the last dash being exactly at the hour. Arrangements have also been made for telegraphing the weather report, the six figures sent giving the height of the barometer and the direction and force of the wind and the state of the sea.

Yellow Fever Commission.—The Secretary of State for the Colonies appointed a Commission in April to study the nature and relative frequency of the fevers occurring amongst the Europeans, natives, and others in West Africa, especially with regard to yellow fever and its minor manifestations. The members are: Sir James K. Fowler (chairman), Major Sir Ronald Ross, Colonel Sir William Leishman, Professor W. R. Simpson, Mr. A. Fiddian (secretary), and Mr. T. F. G. Mayer (assistant secretary).

G. D. KNOX.

Labour Unrest in the World.

PROLETARIAN discontent seems everywhere. In all civilised countries the working people are wanting better conditions of employment. And the increasing number of strikes shows that capital is slow in acceding to the demands of labour. The spirit of combination is firmly established; trade union membership is on the upward grade. The movement is by no means insular. During the year, international congresses have been held by the miners, Socialists, Syndicalists, and transport workers, while in Sept., 1913, delegates representing 7,000,000 world trade unionists met at Zurich. The idea of the sympathetic strike of the workers in one or more countries on account of a labour dispute in another may be too advanced for the adoption by the workers as a body—monetary support has often been rendered—but the preventive proposal of an immediate laying down of tools on the eve of a war between the Powers is gaining adherents. Failure marked the general strikes which were either proposed or attempted in France (Dec., 1912), Hungary (March, 1913), Belgium (April), Portugal (June), Italy (June), Milan (August), and Barcelona (August).

UNITED KINGDOM.

The strike epidemic which broke out with such violence in 1909 has continued virulent. During the first eight months of 1913 more trade disputes occurred than in the whole of any preceding year. There is no sign of industrial peace being declared.

Causes.—Chief amongst the reasons of the unrest were: (a) Wages; (b) Employment of non-unionists.

According to the *Board of Trade Inquiry* (1913), the remuneration in the three industries investigated has increased less than 5 per cent. since 1905, whereas the cost of living has risen 10 per cent. in the same time. The fact that quite 75 per cent. of the strikes were centred on a claim for higher wages can therefore be well understood. *Trade Boards* for all industries have been suggested for the settlement of wage questions, but the additional cost of production, and the creation of so much official machinery, serve as almost insuperable objections. Trade unions are recognised by the employers in practically all the big industries, the railway service being the chief exception. In their desire to drive all the employes into the societies connected with their particular industries, trade union leaders have not feared to declare strikes. Several disputes have been founded upon matters of discipline in the workshops. Occasionally men have "downed tools" on quite minor grievances.

Builders.—About 14 per cent. of the total disputes have taken place amongst the employes in the building trades. Generally, the men have been victorious. An all-round increase of wages has been obtained, and codes of working rules have been granted by the masters.

Metal Trades.—27 per cent. of the total strikes have occurred in the engineering, shipbuilding, and other metal industries. Protracted negotiations have taken place with reference to the demand for higher wages in the shipyards of the North East Coast, and on more than one occasion a big strike was only just averted. Joint action by unions allied by nature of their trades has been prevented by the *Boilermakers'*

Society refusing to be bound in a common agreement with others. The *Amalgamated Society of Engineers* has passed through a troublesome year so far as the internal management is concerned.

Mining.—Only 10 per cent., or just half of the percentage of 1912, of the strikes arose amongst the miners. The root difficulty was the employment of non-unionists. Month after month has witnessed disputes in which 7,000 to 10,000 men have refused to work in collieries where non-society men have been engaged. During the 24th *International Congress of Miners* at Carlsbad, Mr. A. Stanley, M.P., Secretary of the Midland Miners' Federation, prophesied that before the end of the year every British miner would belong to an organisation. Evidently the men are prepared to pay well for solidarity, as over £120,000 were lost in wages alone in the struggle which lasted during the first three weeks of May in the South Wales coalfields. A wages dispute is not likely to occur in the federated area before March, 1915, when the present *Conciliation Board* agreement expires. An agitation has been carried on for years in favour of the 5-day week. In the ballot taken at the beginning of the year a majority was in favour of joint action, but the special Conference of miners' delegates subsequently passed a motion against any precipitate action at present. At the annual Congress in October, the proposal for a 5-day week was defeated, the policy of the previous year being thus reversed. Little trouble is being experienced on the awards under the *Minimum Wage Act, 1912*. South Wales is the hot-bed of the unrest, possibly owing to the strength of the local *Syndicalists*.

Textiles.—18 per cent. of the total disputes were recorded here. Although the *Lancashire Operative Cotton Spinners' Amalgamation* withdrew from the *Brooklands Agreement* in January, conciliatory negotiation between the various sections of the operatives and the masters was responsible for the maintenance of comparative peace. The chief points of difference were (they have not yet been settled): (i.) Who is responsible for cleaning certain machinery? (ii.) Is the operative or the material to blame for excessive breakage of ends? These are no new questions, and such that can be settled only by mutual understanding. The non-unionist difficulty is not so acute just now. The action of an overseer in the Beehive Mill, Oldham, was the cause of a strike in August and September, and the refusal by the employes to return to work notwithstanding the appeals from their leaders during October created a very ugly situation.

Transport Workers.—In February the amalgamation of the unions, supported by all grades except the drivers and firemen, led to a new society representing 200,000 railwaymen being formed. By the end of the year the organisation will have quite 250,000 supporters. Better wages and shorter hours are the main planks of the programme. The action of the companies in the case of several local disputes led to dissatisfaction being felt by all grades, and the call for a general strike was heard from the important centres. The national leaders have consistently deprecated any resort to the strike weapon.

Dublin has been the scene of an extraordinary conflict between the dockers and other members of the *Irish Transport Workers' Federation* and

the employers. The conduct of the police during the riots in the city came in for censure from many parts of the United Kingdom. A special *Inquiry* was held under the authority of the *Board of Trade* in the first week in October as to the causes of the unrest, but the basis of settlement proposed by the Commissioners did not meet with approval of the masters. Much suffering was endured by the poorer classes in Dublin. The *railwaymen* in the *Midlands* went on strike in sympathy with the men in *Dublin*, and at one time nearly 10,000 workers were asking for national support in the form of a general strike.

The *London taxi-drivers* were successful after a three months' strike in keeping the price of petrol at a low figure.

Omnibus employés, after a partial strike, were able to obtain full recognition of their union. In fact, the *vehicle workers' societies* in the *Metropolis* are becoming exceedingly powerful—any sectional dispute being followed by a threat of united action. *Dockers* are compiling a list of grievances for submission to the *Port of London Authority*. The main idea is to get back, by a strike if need be, the position lost during the struggle of 1912.

Industrial Council.—With the exception of its inquiry, which lasted fourteen months, on the general unrest, little has been heard of this body. With so many experts on the Council, it would be only natural to expect some steps taken in the direction of obtaining industrial peace. In its *Report* after the *Inquiry*, pronouncement was made against the establishment of *compulsory arbitration*. *Monetary guarantees* were not regarded as a practical means for enforcing agreements. It proposed that no official intervention should be made in any dispute until the existing procedure had been exhausted, when it would be desirable for a further period of time to be allowed for the consideration of the matter by both parties, and the introduction of some authority on the part of the public into the discussion. The Chief Industrial Commissioner, Sir G. R. Askwith, K.C., and his assistants have been kept hard at work as arbitrators in a great many disputes. About seven cases per month are dealt with under the *Conciliation Act* of 1896.

Employers' Federation.—In most of the big industries the masters are federated to deal with employment, among other matters. A scheme was launched publicly in *September* for a federation of masters throughout the country, with a guaranteed capital fund of £50,000,000, to fight the unrest. Few of the important directors of industry gave the movement their support. Such a federation will further the "class war" between labour and capital.

Syndicalism.—The Syndicalist movement cannot claim to have many open supporters in the ranks of labour. It is certain that the majority of trade unionists do not understand its meaning, but the admission has to be made that the theory of harassing the masters in striking quickly and often is being practised. Trade union leaders are not so influential with their members as heretofore. They are nearly all on the side of peaceful arbitration, but their arguments in this direction are not blindly followed by the men to whom they are addressed. The independence of the individual member is likely to grow owing to the fact that the leaders in giant organisations are gradually getting out of touch

with local trade questions. The miners have decided to co-operate with other big organisations in their efforts for better conditions of employment.

Politics.—The Labour Party in the House of Commons seems to be quite divorced from the strike movement in the country. The *Boilermakers' Society* withdrew early in the year from that Party. On the other hand, all the principal trade societies are taking advantage of the reversal of the Osborne Judgment and forming political funds. A further attempt is being made to amalgamate the Socialist societies in Great Britain: a common ground upon which to work has nearly been reached.

Statistics :—

	1903.	1912.	1913. (Jan. to Oct.)
Strikes	387	857	1,276
Employés involved	116,901	1,463,281	607,805

BRITISH DOMINIONS.

(Abbreviation : S = Strike.)

Australia.—During first quarter of 1913, 39 s were reported, 25 being in *New South Wales*. In all, 13,234 persons were involved and 125,521 working days lost. Principal disputes were amongst the gas workers and ferry-boat employés at *Sydney*. There was much unrest in the coalfields. In second quarter, number of s was 49, of which 35 occurred in N.S.W.; 16,830 people were involved and 265,302 days lost. Proceedings were often taken against strikers and penalties inflicted under various Conciliation Acts. Ten per cent. of inhabitants are trade unionists.

Canada.—During period *January–August*, 1913, 76 s involving 23,000 people were declared. Highest month was April with 22 s. Building trades seem to show most unrest. Some of the *Vancouver Island* miners who went on s in *September*, 1912, were still out in *October*, 1913.

New Zealand.—The difference with various trade unions continues. Much unrest was experienced in *Waihi Mines* district; on one occasion a man was killed during *mélée* with police.

South Africa.—Simmering unrest came to a head in *May*, 1913, when *New Kleinfontein* miners went on s. Dispute continued until *July*, when whole of the *Rand* was in turmoil. In fights between police and strikers, several innocent people were killed and wounded in the streets of *Johannesburg*. A threatened s of railway employés did not take place. The present settlement is simply a compromise.

UNITED STATES OF AMERICA.

December (1912).—43 labour leaders were found guilty and sentenced to imprisonment in connection with *Los Angeles* incidents of 1905. (1913) *January 1–21* : s of 20,000 garment makers in *New York*. *February* : imminent s of 60,000 railway employés, saved by arbitration. *March–June* : s of *Jersey* silk mill hands. In *April*, troops fired upon strikers in *Chicago* tram dispute. *June–July* : 45,000 *Chicago* builders locked out. S have taken place all over the country. The *Industrial Workers of the World* trade union is endeavouring to secure an 8-hour day for all employés.

ABROAD.

Belgium.—During *April* promised *General S* occurred, when about 400,000 people refused to

work. After lasting ten days, *s* was declared at an end by a four-fifths majority of people's delegates.

France.—January–July, 664 *s* declared, when 79,344 workers were involved. Ten disputes are settled on average per month under *Arbitration Act of 1892*. In May Government introduced legislation to deal with revolutionary trade unions. Miners, builders and engineers showed most unrest. The *sympathetic s* is much in favour.

Germany.—January–June, 815 *s* declared, affecting 273,166 people. 133 *s* were successful, 362 partly so, and 320 were failures. Out of the 70 miners' *s* only one was a victory for men. 273 *s* occurred in building trades. Herr Bebel, great Socialist leader, died in August. Biggest *s* were: 57,000 miners in Upper Silesia during May and June, and 19,000 shipbuilders in Hamburg during July.

Russia.—Labour organisations are strongly repressed where possible by Government. Workers carried on propaganda by means of many one-day *s*. During July 60,000 textile workers were on *s* in the Lodz district; August, 10,000 on *s* in

Baku; October, 9,000 on *s* in St. Petersburg. Promise made by Government in August to recognise the "right to *s*" is not being strictly adhered to.

Spain.—Barcelona is seat of considerable unrest. In *s* of July–August of 60,000 textile and other workers of Barcelona, the Government's offer of legislation was not accepted by strikers. Royal Decree was issued on 24 August limiting number of hours to 60 per week. Miners' organisations at Asturias demanded a wages increase of 25 per cent. during August, and threatened a General *s*. Rio Tinto mines were centre of disputes in April and September.

MISCELLANEOUS.—Dockers' *s* at Buenos Aires, ARGENTINE, in April. AUSTRIA: average *s* per month 62. COSTA RICA: During *s* of May some imported Jamaican labourers were wounded. ITALY: Milan has been seat of large number of *s*. NORWAY: arbitration was unsuccessful in staying *s* of typographers during April. PERU: Presidential decree issued January, ordering ballot to be taken before declaration of any *s*. PORTUGAL: Government has attempted to suppress syndicalism. GEO. G. SHARP.

The National Insurance Amendment Act, 1913.

(1) *Preliminary.*—After very considerable discussion, the Legislature, at the close of the Session of 1913, evolved an Act to amend the Insurance Act, 1911. It was apparently thought necessary to pass such an Act, although under the Act of 1911 the Insurance Commissioners had power to make amendments. The new Act requires close and careful perusal in order to see how it dovetails in with the former measure.

(2) *New powers to raise money.*—Provision is made by *s. 1* for the contribution of additional sums by Parliament towards the purposes of Part I. of the Act of 1911. The new Act extends the time within which "employed contributors" may become such without a reduction of the rate of sickness benefit by reason merely of their being 17 or upwards. The time within which a person may enter into insurance as a voluntary contributor at the special rate of contribution, mentioned in *s. 5 (1)* of the principal Act, is also extended.

(3) *Benefits to persons over 50.*—By the Act of 1911, a person over 50 becoming an employed contributor within a year from the commencement of the Act, was only entitled to reduced sickness benefits if, at the date of any claim by him for such benefit, the number of contributions paid by or in respect of him was less than five hundred. This distinction is abolished by *s. 3 (1)* of the new Act.

(4) *Persons over 65.*—The Act of 1911 provided, generally, that persons over 65 not previously insured were neither required nor authorised to be insured except in a very limited sense, and in the case of employed contributors only. This age distinction has been removed with this proviso, that a person who is 65 or upwards, when entering insurance, is not entitled to medical benefit after 70 unless his weekly contributions exceed 26.

(5) *Voluntary contributors.*—Although under the Act of 1911 compulsory insurance did not apply to any person not "employed" within the meaning of that Act, it was provided that certain

persons not so employed might, if they saw fit, become insured as voluntary contributors. These were to be either (a) persons engaged in some regular occupation and wholly or mainly dependent for their livelihood on their earnings; or (b) persons who had been "insured persons" for a period of 5 years or more. But no person could be thus voluntarily insured if his total income from all sources exceeded £160, unless he had been insured under Part I. for 5 years or more. The privilege of becoming voluntary contributors is now extended (by *s. 4* of the amending Act) to persons of 60 or upwards who can show that they have ceased to be employed as employed contributors.

(6) *Who are employed persons.*—The classes of employment which constitute "employment" within the meaning of the principal Act were enumerated in Part I. of the first Schedule to the 1911 Act. These included employment under a contract of service or apprenticeship, written or oral, employment on a ship, &c. To these are now added employment under any local or other public authority unless excluded by a special order.

(7) *The casual worker out of employment.*—The Act of 1911 provides that an approved society might, if it saw fit, excuse any part of the arrears accrued in respect of an employed contributor during any period of unemployment, not exceeding such part as would have been payable by the employer had the member in question remained in his last employment. The new Act goes further, and enacts that when the employed contributor pays to his society arrears which have accrued during a period of unemployment, so much as would have been paid by the employer shall be excused. For the purpose of calculating the amount of arrears, the workman is to be deemed to be employed at a rate exceeding 2s. 6d. per diem unless he proves to the contrary. That means, of course, that the arrears are to be deemed to accrue at the full amount, i.e., 4d. per week. If the loss so occasioned to the society exceeds a certain

amount, a contribution to the loss is to be retained out of reserve values, and if the aggregate amount of this contribution (the amount of which is to be prescribed), exceeds £100,000 in any year, the excess to be paid by the State.

(8) *Arrears.*—The provisions of the old Act regulating reduction, postponement, and suspension of benefits on account of arrears are to cease to have effect, and it is now (by s. 8 of the new Act) left to the Commissioners to prescribe the time within and the conditions under which arrears may be paid up, subject to this, that reduction or postponement or suspension is to be equivalent to the approximate value of the loss occasioned by the failure to pay the contribution in arrear.

(9) *Employment of, and benefits for, exempted persons.*—Under the 1911 Act, if an employer employs an exempted person, he is liable to pay the like contribution as would have been payable as employer's contribution if such person was an employed contributor. Such contribution was to be carried to such account as might be prescribed by regulations, such regulations to provide for applying all, or part of, the sums standing to the credit of such account for the benefit of any persons in respect of whom they were so paid in the event of their subsequently becoming employed contributors. By the new Act (s. 9 (1)) such sums are to be applied in providing medical and sanatorium benefit for exempted persons on conditions prescribed by the Commissioners in regulations. The conditions, however, may not require payment of upwards of 26 contributions before benefit, and any person having over £150 a year must make his own arrangements for medical attendance and treatment.

(10) *Voluntary contributors and medical benefit.*—Voluntary contributors whose income exceeds £150 per annum are not to have medical benefit, but their contribution is therefore reduced by 1d. per week.

(11) *Alternatives to the panel system.*—In order to provide against any breakdown in the panel system, s. 11 of the amending Act provides that if a considerable proportion of insured persons in an area, or part of an area, are not receiving satisfactory medical treatment under the panel system, other arrangements may be authorised by the Commissioners to be made by the Insurance Committees, or may be made by the Commissioners themselves for such better service as is practicable. Such arrangements may take the form of allowing the insured themselves to make their own arrangements for receiving medical attendance and treatment, the cost being defrayed by the Commissioners or the committee, and the treatment being such as not to be inferior to that provided under the panel system.

(12) *Successive disablements.*—An important change is made (by s. 12 (1)) in the law as to continuation of disease. By the old Act, if a person has been in receipt of sickness benefit and recovers, subsequent disease or disablement or a recurrence of the same disease or disablement was, as a general rule, to be deemed to be a continuation of the previous disease unless 12 months had elapsed and 50 contributions had been paid. In future the payment of the 50 contributions is no longer to be necessary.

(13) *Commencement of benefit.*—Sickness benefit is to begin on the fourth day of incapacity, and

a man is incapacitated when he is incapable of doing any effective work on a particular day. Sunday is not to be reckoned as one of the four days unless he would, but for the incapacity, have worked on that day.

(14) *Maternity benefit.*—Some attempt is made to secure that the wife and child of an insured person shall have the full advantage of maternity benefit. The maternity benefit is in all cases to be the mother's benefit. Where it is paid in respect of the husband's insurance, the wife's receipt or the husband's receipt, if authorised by her on her behalf, shall be a sufficient discharge. Where it is paid to the husband he must pay it to the wife, and it is to be administered in the interests of the mother and the child by the approved society of the husband if he is a member of one.

S. 8 (5) of the Act of 1911 provided that when a woman was herself insured and was a married woman, or, if the child was posthumous, a widow, she should be entitled to sickness or disablement benefit in addition to any maternity benefit to which she or her husband might be entitled, but that, apart from this provision when it applied, a woman should not be entitled to sickness or disablement benefit for four weeks after confinement unless suffering from other disease or disablement. The new Act provides that any sickness or disablement benefit to which she might be entitled under the sub-section in question shall now be replaced by an additional maternity benefit, and the rules under which it is to be administered are to be so framed as to prevent her undertaking remunerative work for four weeks after her confinement. In the result a married woman being insured may get £3 maternity benefit.

(15) *Where the insured person is in hospital.*—The principal Act provided that where an insured person was in hospital, moneys due to him might be applied or paid for the maintenance or relief of dependents, and that any part of such sum not so applied might, if the society or committee thought fit, be applied in the provision of any surgical appliances.

In future any sum which would have been payable to any person in hospital on account of sickness may be applied in the provision of any surgical appliances required for that person, or, if not so expended, shall be paid him in cash after leaving the institution, either in a lump sum or by instalments.

(16) *Casual workers.*—The Commissioners may, by order, modify the principal Act in its application to persons in casual or intermittent employment, and to their employers. The order may apply either generally or to any one or more particular trades, or in any one or more localities. It may specify (a) the amount of the employed rate; (b) the contributions payable by employer and employed, and their collection; (c) the apportionment of contributions amongst employers; but the employer's contribution must never exceed 6d., nor the employed contributor's contribution 4d. (or, in the case of a woman, 3d.) in any week. If the employed contribution is payable day by day it must not be more than 1d. per day.

(17) *British women marrying aliens.*—An insured woman who, having been a British subject before marriage, has ceased to be a British subject by reason of marrying a foreigner, is not now to be treated as an alien for the purposes of the Act. S. 20 of the new Act provides that

if a woman who was before marriage a British subject is the wife of an insured person, the maternity benefit payable in respect of his insurance is, subject to regulations, to be made by the Commissioners, to be increased by 2-7ths, the increase being paid by the State.

(18) *Aliens*.—Although aliens are not generally entitled to the same benefits as British subjects, there was an exception in favour of those who were members of approved societies and had been in England five years. The same privilege is now granted to aliens belonging to a society amalgamating with an approved society.

(19) *The Mercantile Marine*.—Neither sickness nor disablement benefit were formerly payable to sailors so long as the owner was liable to pay for medical advice and attendance under the Merchant Shipping Act, 1894. In future, if a sailor has dependents and is serving on a home trade ship, the benefits are to be applied for the relief or maintenance of dependents as the committee think fit, after consulting, if possible, with the seaman (s. 23 (1)). The same section provides that seamen entitled to be voluntary contributors may become members of the Seamen's National Insurance Society.

(20) *Where wages fluctuate*.—The difficulties which have arisen in the case of persons whose wages or remuneration are subject to fluctuation are sought to be overcome by a further amendment. Thus, if the rates of remuneration of the persons employed by any employer or group of employers in any class or classes of work are liable to fluctuation, but are normally within certain specified limits, the Commissioners may, subject to any exceptions contained in the order, declare that they shall be treated as if they constantly received the normal rate.

(21) *The "employer" of an outworker*.—Who is the employer of an outworker? is a question which constantly arose under the old Act. The Commissioners may now, by order, declare that

as respects any outworkers specified in an order the person specified shall be deemed to be the employer for the purposes of Part I. of the principal Act.

(22) *Insurance Committees to be bodies corporate*.—The status of the Insurance Committee is clearly defined by s. 30 of the new Act, which declares that it shall be a body corporate, having a perpetual succession, and that it may sue and be sued.

(23) *Women on sub-committees*.—There must be at least one woman on every sub-committee formed by an Insurance Committee for dealing with the administration of any benefit.

(24) *Expenses of Insurance Committees*.—A notable change is also made in the direction of payment of members of Insurance Committees. They are already allowed travelling expenses (s. 61 of the old Act), but in future Insurance Committees may, subject to the approval of the Insurance Commissioners, pay subsistence allowance and compensation for loss of remunerative time out of moneys provided by Parliament, provided that not more than £30,000 a year in the aggregate, is spent in this way (s. 31). An Insurance Committee may also subscribe to an Association of Insurance Committees, just as local authorities may subscribe to the County Councils Association.

(25) *New Offences*.—Certain offences are punished by the new Act. Thus, an employer deducting the whole or part of his contribution from wages is guilty of an offence; while a person buying, or pawning, an insurance card is liable to a fine not exceeding £10 (s. 34). The time within which an employer may be prosecuted for failing to pay any contribution in respect of his servant is one year from the alleged offence. If, on such a charge, it is proved that he has failed to pay other contributions within the year, he may be ordered to pay them to the Commissioners (s. 34 (3)).

Trade Union Statistics of the World.

THE following table shows the membership of Trade Unions in the 12 principal trade union countries, according to returns received through various sources for the year ending Jan. 1, 1912 (about). The figures in parentheses indicate the relative order of the membership and percentage figures to the remaining figures under those headings in each column. The Finances of the Unions are not easily ascertained, but returns show that the 100 principal Trade Unions of the United Kingdom had £5,121,529 in hand at the end of 1910, while the whole of the German Unions had only £3,902,000 a year later. The second table on this page shows the growth of Trade Unions in the several countries since 1899. The figures for the United States include those for Canada, where trade unionists are estimated to number 150,000.

Regulations respecting Passports.

1. APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and inclosed in a cover addressed to "The Passport Department, Foreign Office, London, S.W." They must reach the Foreign Office before 5 p.m. on the day prior to that on which the Passport is to be issued.

2. The charge for a Passport, whatever number of persons may be named in it, is 2s. Passports are issued at the Foreign Office, between the hours of 11 and 4 on the day following that on which the application for the Passport has been received, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 2s. should in that case accompany the application. *Postage stamps will not be received in payment.*

3. Foreign Office Passports are granted (1) to natural-born British subjects, *viz.*, persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

4. Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him, or (x) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of these Regulations, verified by a Declaration made by any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary*, resident in the United Kingdom; the applicant's Certificate of Birth may also be required in certain cases; (2) in the case of children under the age of 14 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons

naturalised in any of the British Colonies, upon production of a letter of recommendation from the Colonial Office; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office.

5. If the applicant for a Passport be a Naturalised British Subject, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply *personally* for their Passports at the Foreign Office; if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, for delivery to the applicant. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

6. Foreign Office Passports are not available beyond five years from the date of issue. Fresh Passports must then be obtained.

7. A Passport cannot be issued by the Foreign Office, or by an Agent at an outpost, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate.

8. Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Rumania, Persia, Colombia, Venezuela, Hayti, or Eritrea, in the course of their travels, must not leave the United Kingdom without having had their Passports *visés* either at the Russian Consulate-General, 17 Great Winchester Street, E.C.; the Consulate-General of the Sublime Porte, 140 Leadenhall Street, E.C.; the Rumanian Consulate-General, 49 Parliament Street, S.W.; the Persian Consulate-General, 122 Victoria Street, S.W.; the Colombian Consulate-General, 6 Holborn Viaduct, E.C.; the Venezuelan Consulate, Finsbury Pavement House, Finsbury Pavement, E.C.; the Haytian Consulate, 32 Fenchurch Street, E.C.; or the Italian Consulate-General (for Eritrea), 44 Finsbury Square, E.C., respectively, or at one of the other Consulates of those States in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country.

N.B.—A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S.W."

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning

the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A domestic servant found to be *enceinte* may be preemptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

LACK of capital is as great a drawback to the agriculturist as to the person engaged in any other industry. There comes a time in the business career when the locking up of funds creates a need for temporary financial accommodation, and this is obtained usually from banks on reasonable terms. With the man on the land the position is quite different. Although he may have every possibility of success, and be not a whit behind his urban contemporary, he cannot get the same conditions. This fact seems more strange still when it is remembered that the yield of the soil must offer the very best of security, as life could not exist without such produce. The farmer or small holder who desires temporary monetary assistance has to resort to the moneylender and pay interest up to 60 per cent. per annum. This is the state of affairs in many parts of the United Kingdom to-day. It was the case throughout the country not very long ago. And the result of such borrowing has not been without its ill-effect upon the people engaged in agriculture.

Attempts at Reform.—The hard conditions which the farmers have had to face have been brought before the public in various ways. The *Agricultural Credit Banks Association*, founded 1893, did much good work in this respect. Money-lenders were proved to have crippled the small holders. A Committee of the House of Lords reported in favour of a system of Land Banks. In August, 1910, Earl Carrington (now Marquess of Lincolnshire), speaking as Minister of Agriculture, said: "I have been considering . . . the establishment on a sound basis of a satisfactory system of co-operative credit banks especially for the benefit of agriculture. . . . The Chancellor of the Exchequer has no objection to the proposal. . . . It has the warm approval of the Prime Minister."

In the early part of 1911 it was reported in the Press that the Board of Agriculture was engaged on a draft of a Bill to deal with the subject. But the Government was not destined to introduce the principles of Land Banks. Mr. Thomas Farrow, who had been engaged for many years in fighting usury, founded the bank which is associated with his name in 1904, somewhat on the lines of the Continental people's banks. The development of his institution permitted the experiment being made in February, 1911, of a land bank at Lewes under the title of the *Sussex Land Bank*. The innovation was received with praise throughout the country. Naturally, the work accomplished during its existence—it is simply one department of a young but enterprising bank—cannot be expected to revolutionise the whole of our agricultural finance. But the pioneer work has been of considerable importance, and undoubtedly influenced the policy of the Government.

Position To-day.—The idea of State Banks has been dropped by the Ministers. In its place the Board of Agriculture has had to obtain promises of assistance from the banks having country branches. In March, 1913, the new policy was announced. A list of banks whose branches would help in the rural districts was published. The lines on which they were to work were similar to those inaugurated some two years previously in Sussex. In brief, the managers were to (a) assist in the formation of co-operative credit societies in the neighbourhood of their respective offices; (b) instruct small holders how to keep their books and

accounts in a concise and simple manner; and (c) act as auditors and be unpaid treasurers of the local societies. All loans granted were to be at fixed rates of interest.

The President of the Board of Agriculture informed the House of Commons in June, 1913, that only six out of the forty-eight Agricultural Credit Societies registered in England had received advances from the banks. The Government had, he said, drawn up model rules for the new societies on the principle of limited liability of shares in connexion with the new societies which the banks had given promise of assistance in formation. In October the Board announced that eight of the fifty A.C.S. had received permission from the banks to draw upon them for advances aggregating £925. The progress, though necessarily slow, was considered satisfactory.

A Rural Credit Banks Bill was introduced in the House of Commons in April, 1913, having for its objects the increase in usefulness of the Small Holdings Act, 1908. A further Bill was introduced in July by Mr. Jardine, making provision for agricultural loan committees and granting loans to farmers. At the Southampton Church Congress, October, 1913, Mr. Bathurst, M.P., suggested that English clergymen should follow the lead of their Continental contemporaries, and assist in the formation of land banks.

Public opinion is being educated up to the needs of agricultural finance. The great difficulty has been the unwillingness of the giant institutions to sink money at low rates for lengthy periods in assistance to farmers and others on the land. In theory, banks' funds should be invested in quickly realisable securities, but practice shows that a goodly proportion of the huge sums entrusted to the care of the banks is unimpaired decade after decade. It remains for the people who support these institutions to see that wherever possible their moneys are employed in the development of agriculture.

ABROAD.

FRANCE.—Under Jules Meline's Act, 1894, provision is made for the formation of *local credit funds* by members of *agricultural syndicates*. Deposit accounts are opened by these funds. A renewal condition of the charter of the Bank of France is a loan to the Government of £1,600,000, free of interest and repayable in 1920; this is used to form a basis of agricultural credit. The State has advanced £2,500,000 without charge to the local credit funds.

GERMANY.—*Raiffeisen* established first *agricultural bank* on basis of collective liability in 1862; 5,000 institutions are affiliated to the *Raiffeisen Federation*, 70 per cent. being in villages of less than 2,000 inhabitants. *Raiffeisen* banks work in limited areas, and the personal knowledge of members permits easy acceptance of securities for loans. The *Schulze-Delitzsch* banks are patronised by small traders and artisans. Membership of the 15,000 local banks is 1,500,000, or one-sixth of German agricultural population. Loans of local banks amount to £100,000,000.

ITALY.—Bills of *local agricultural syndicates* are discounted at preferential rates. Money is advanced by savings banks to peasants and farmers at low terms.

SPAIN.—Co-operative *agricultural banks* flourish.
GEO. G. SHARP.

I.—CO-OPERATION.

History.—Although the theory of Co-operation claims to have had its apostles at all times right back to 3,000 years ago, it was not until just before the beginning of the nineteenth century that its doctrines were put into practice in Great Britain. Even then such desultory attempts that were made proved failures. *Robert Owen* (1771-1858) did much in an indirect way to foster the growth of the co-operative spirit. The extraordinary paternal treatment meted out by him to his employes in the New Lanark Mills in his endeavour to develop character, on which his ideas of commercialism were based, led others to copy portions of his scheme. The successful co-operative movement in England really dates from 1844, when twenty-eight local working-men, with a total capital of £28, established the *Rochdale Equitable Pioneers Society*. Sixty-nine years later (24 Aug., 1913) the ninth *International Congress* was opened in St. Mungo's Hall, Glasgow, when delegates from twenty-four nations, and representing the 20,000,000 members of 130,000 co-operative societies, attended.

Objects.—The idea of the co-operative movement is the foundation of a new social order in a universal brotherhood. In practice, each individual society aims at the division among its members of the profits derived from the employment of their own labour and capital. "Each for all, and all for each," is their motto. Through the encouragement of self-help and thrift, every person is to be assured of a competence. Members first, and the nation afterwards, are to be educated up to this standard. The wants of the producer and consumer are to be met more effectually and at less cost. By this means the purchaser is to obtain better value for his outlay, and the workman a higher remuneration for his labour. The middleman is to be regarded as a parasite on society. All goods supplied under this system are to be free from adulteration and of the best quality consistent with initial cost.

Methods.—Each society is independent, self-supporting, and democratically governed. The members take up shares and receive a fixed dividend, usually 5 per cent., on their investments. All additional profits are dealt with according to the vote of the annual or other meeting of subscribers. A small portion is allocated to education and charity, and the rest is divided between the employes and the members, proportionate to the amount of goods purchased by them. The public can and does buy from the societies. In doing so the usual price is paid and no share in profits received. Competition with ordinary traders by the cutting of prices is alien to the principles of co-operation. Members are encouraged to treat the profits received as money saved, and therefore to be invested. No credit is allowed; cash must be paid at time of sale. The various societies are affiliated to district and national associations.

Trading.—Societies are supposed to buy, as far as possible, their goods from other profit-sharing establishments. Co-operative Wholesale Societies are in existence, and supply nearly all the requirements of the local stores. The *English C.W.S.* has its own factories, fleet of steamers, and bank. The first year's sales (1864) totalled £51,857. Twenty-one years after-

wards the annual sales were £4,675,371. The *Scottish C.W.S.* followed in 1868. The wholesale concerns have representatives all over the globe. They are able to tap the sources of supply, and profit accordingly. Their possibilities were demonstrated in September and October, 1913, when, at very short notice, thousands of packages of cooked food were sent across to Dublin in part-relief of the suffering strikers. The amalgamation of smaller societies is proceeding apace. The ambition is to have one store with branch shops for each city.

Politics.—Many of the early societies were formed to help workmen unable to find employment. The working-classes are the main supporters of the stores. It is only natural that support should be given to the "advanced" political views. The Labour Party has lately begun to realise the strength of the linking-up of forces which the co-operative movement would give, and an agitation has been carried on with this end in view. At the *Annual Conference of the Co-operative Union of Great Britain*, in the Whit-week of 1913, the proposal to take steps to secure a closer connexion with the forces of organised labour led to an animated discussion, and an amendment to "strictly maintain the neutrality of the movement in respect to party politics" was carried by a large majority.

Features.—None of the British societies engage in the sale of alcoholic liquors. Trade union conditions of labour are recognised generally. In the trading establishments the workpeople are better treated usually than is the case in the ordinary shops. A newspaper and other periodicals are published. It is a matter of regret that the *English C.W.S.* does not apply the system of profit-sharing with its employes in accord with the spirit of true co-operation. The profits are taken by the several societies that have shares in the *C.W.S.* With the *Scottish C.W.S.* better counsels prevail. The employes have shared in the profits since 1870, and can also hold shares direct in the concern.

Statistics.—It is estimated that one-fifth of the ordinary domestic outlay of the working-classes is spent at the co-operative stores. The comparative sales of the *C.W.S.* are as follows:—

	1908.	1912.	1913.
(For March-June quarters only).			
English	£7,497,773	£8,700,537	£9,632,893
Scottish	2,544,439	2,759,953	2,991,773
Eng. and Scotch } Joint Committees)	14,021	78,730	98,458
Irish	25,198	58,791	73,387

The Co-operative Union of Great Britain and Ireland (1,520 societies making returns):—

	1912.	1913.
Aggregate membership	2,760,531	2,876,892
Total capital	£53,967,889	56,495,529
Total sales for year	£116,100,099	122,885,411
Profits for year	£12,965,519	13,289,306
Number of employes ...	128,193	135,190

Abroad.—On the Continent it is customary for the co-operative movement to be allied with trade union and Socialist organisations.

Germany is second to Great Britain in the number of co-operators, who total nearly 2,000,000.

Agricultural co-operation has reached a high stage in Denmark, the membership of the dairy farming association being 200,000.

France is distinguished for the small size of its societies, the average membership of 3,004 distributive concerns being 275 only.

II.—LABOUR CO-PARTNERSHIP AND PROFIT-SHARING.

Co-partnership is defined as the system in which the workman is part proprietor of, and part participator in, the profits of the industry wherein he is employed. True co-operation fulfils entirely these requirements. On the other hand, the term co-partnership is applied when, in addition to the usual wage paid, the employer shares part of the profits with the workpeople in his business. This distribution of surplus takes the form of immediate cash, deferred payment at some time, or allotment of shares. In this division is the recognition of the principle that the labourer is interested in his work beyond the amount stipulated as wage. The words "Co-partnership" and "*Profit-sharing*" are somewhat loosely applied. The distinction between them is one of degree. The former admits of partnership by the employes—*i.e.*, the partial control arising out of the holding of capital issued as part profits. The latter is simply the division of extra profits amongst workpeople in cash or kind. The *premium bonus system* cannot be considered as profit-sharing; it is simply a reward given for speed, and, therefore, akin to piece work. The holding of shares, &c., in a joint stock company by an employé is not necessarily co-partnership. The workman having acquired his holding by purchase is an investor—his profits are not the rewards given by the employer for satisfactory work.

Co-operative Societies.—About 14 per cent. of the distributive concerns share profits direct with employes. The latter have little difficulty in becoming shareholders. In the productive societies only 9 per cent. of the workpeople share in the profits. With productive associations of workmen, in which the employes hold direct 12 per cent. and co-operative societies 35 per cent. of the capital, a division of the profits is provided for the workers. 12 per cent. of the agricultural productive societies give bonuses to their employes. The wholesale institutions are dealt with under co-operation (*q.v.*). At the end of 1912 there were 110 co-partnership societies with a capital of £1,991,551. The profits amounted to £228,180, of which sum £29,847 was shared amongst the workpeople.

Conversion of Proprietorship into Co-operative Societies.—Co-partnership has been tried in three instances where the proprietors have turned their businesses into co-operative concerns. In one case—a woollen manufactory at Huddersfield—the result has been successful. Interest is paid on the capital at 5 per cent., the surplus being treated as is the practice of co-operative societies. The other attempts were failures. One dealing with pottery failed in 1897 after three years' trading, and the other, which was in the building trades, went into liquidation in 1910 after an existence of six years.

Generally.—History.—The first known instance of profit-sharing was on Lord Walliscount's farm in Galway during the reign of George IV. Little information is available of the cash bonus scheme, which lasted only a short time. Five experiments were tried in 1865 and failed in turn owing to lack of success. A sixth, which also began in 1865, is still flourishing, and the 180 employes participating have £10,000 invested in the firm. One of the five concerns, that inaugurated similar schemes in 1866, has lasted,

over one-seventh of the staff of 1,600 now sharing in the profits. Thenceforward, hardly a year has passed without witnessing the establishment of some form of co-partnership.

Administration.—In four firms the share is given as a strict legal right to the employes; in ten as a voluntary payment. There is no stipulation with regard to other bonuses. In the majority the amount for distribution is fixed proportionately to the profits; in others it depends upon the wages paid, length of service, &c. There is no hard and fast rule. The division takes place yearly, half-yearly, or quarterly, or even monthly. Some proprietors encourage the depositing of money by the workpeople, the interest depending on the general prosperity of the trade. In three cases the whole of the bonus due is credited to a provident fund; in others a part only is so allocated. In 60 per cent. of the schemes the bonus is paid in cash; in 20 per cent. part in cash and remainder to sick fund or share investment. Of the rest, the whole bonus is retained for shares or deposit, to be withdrawn only upon certain conditions.

Examples: Cash Bonus.—Blundell, Spence & Co. began their system in 1884. About 600 out of 800 employes participate to the extent of 3 per cent. (average) of their yearly wages. Ten per cent. have invested their profits in the company's shares. A stipulated dividend must be earned on capital before any division is made.

Part cash; part provident fund.—Clarke, Nickolls and Coombe, Ltd., 1890. About 2,000 out of 2,750 employes are concerned. Bonuses in 22 years have amounted to £172,025. Minimum dividend of 6 per cent. must be paid on capital before profit-sharing begins.

Gas Companies.—More than 25 per cent. of persons employed in profit-sharing establishments are in the service of gas companies. The chief exponent is the *South Metropolitan*, which commenced giving bonuses to foremen in 1886 and extended them to the rest of the staff in 1889. Practically the whole staff of 7,000 workpeople participate. One-half of the bonus is invested in the company's stock, and the rest is invested at interest. Employes have power to elect three of their fellows to seats on the directorate.

Parliamentary.—Bill was introduced into House of Commons, June, 1912, to give all companies registered under Consolidation Act, 1908, power without further authority to adopt co-partnership schemes. Model regulations were attached to the Bill.

Results.—Principals of firms that have continued profit-sharing systems seem to be very satisfied with results. There has been an almost total absence of strikes in such businesses. Nearly all Socialist and Labour leaders are opposed to profit-sharing systems.

Statistics.—It is known that 311 schemes of profit-sharing have been adopted since 1800. Of these, 166 have been abandoned and 141 (two firms amalgamated) are still in existence, and three cannot be traced. About 111,500 persons, including casuals, benefit under the present systems; the average ratio of the bonus to the wage for the past ten years is 5.5 per cent. In 1912, £123,205 were distributed by 31 gas companies as bonuses. The printing trades claim 19 and the chemical businesses 15 of the total of 141 firms. No schemes appear to be working in the mining and quarrying industries.

GEO. G. SHARP.

Public and Private Wealth and Charitable Bequests.

CAPITAL ASSESSED FOR DEATH DUTIES.

During the financial year 1912-13 the gross capital value of property passing at death, of which the Inland Revenue Commissioners took cognizance for Estate Duty purposes, amounted to £308,719,195 and the net capital value of this property was £279,252,932. The number of estates concerned was 88,633, and of these 17,845 were not liable to duty, leaving 70,788 as the net number of estates paying duty. Of the exempted estates 1,804, representing a gross capital value of £2,721,348, were insolvent by a net sum of £1,098,391 (as the debts in respect of these estates amounted to £3,819,739) and 15,041 estates of a total net capital value of £908,564 were exempt by reason of their being under £100 each in value.

The net receipt of estate duty from these 70,788 estates was £19,194,206.

CLASSIFICATION OF THE ESTATES PAYING DUTY.

The numbers, net capital values, and amounts of duty levied on these estates are made up as follows:—

	No. of Estates.	Net Capital Value.	Estate Duty.
Over £250,000 each.....	76	£51,481,097	£6,791,525
Between £100,000 and £250,000 each.....	217	32,961,264	3,153,973
Between £25,000 and £100,000 each.....	1,340	66,256,787	4,530,283
Between £1,000 and £25,000 each.....	20,976	108,647,617	4,449,061
Under £1,000 each.....	22,609	£259,346,765	£18,924,842
	48,179	19,906,167	269,364
Total.....	70,788	£279,252,932	£19,194,206

Over one-third of the duty was, therefore, contributed by less than one-fifth of the capital and by only 76 estates, whereas the estates under £1,000 each, which constituted more than two-thirds of the total number, provided about 1·4 per cent. of the duty paid. These proportions are approximately the same as for the last few years.

PERSONALTY SITUATED ABROAD.

The personalty situated abroad on which estate duty was levied during the year, amounted to £6,442,765 divided in almost equal proportions between "Personalty in British Dependencies" and "Personalty in Foreign Countries." Foreign and Colonial Government Securities are classified as "Property in the United Kingdom."

DETAILS OF THE INVESTMENT OF CAPITAL.

The principal items of interest in the detailed classification of the value of property in the United Kingdom passing at death in 1912-13 and 1911-12, are appended:—

	1912-13.	1911-12.
Funds of the United Kingdom	£5,808,134	£7,792,663
Foreign and Colonial Government Securities	10,581,435	13,183,573

	1912-13.	1911-12.
Company Shares and Debentures	£100,124,629	£110,323,711
Cash in the House	554,111	571,442
Cash at the Bank	17,872,677	19,269,545
Bonds, Bills, Notes, &c.	4,220,539	4,770,531
Money out on Mortgage	14,167,587	13,149,373
Life Insurance Policies	8,581,488	8,537,614
Household Goods (including Pictures).....	6,777,402	8,404,612
Share of Partnership Estates	6,462,619	8,410,469
Trade Assets (Book Debts, Stock, Goodwill, &c.)	14,505,579	16,376,778
Agricultural Land	18,156,619	16,747,384
House Property, Business Premises, &c....	46,247,076	42,997,591
Ground Rents and similar Charges	3,304,929	5,144,991

The holding of Funds of the United Kingdom is by far the lowest of any year for which details have been given. Until 1907 this figure varied between nine and ten millions and had for some years been fairly constant. The general decline of quotations on the Stock Exchange, due to some extent to labour troubles and the Balkan disturbances, probably accounts fully for the decline in the item "Company Shares and Debentures." The average number of years' purchase on agricultural land was 20·03, and ground rents 21·9, and on freehold house property 14·29.

THE PRICE OF CAPITAL.

The last few years have witnessed a steady and continuous rise in the price of labour and material without a corresponding increase in the price of capital. During the past year, however, the price of capital has risen considerably, and it has become quite impossible, even for stable Governments, to raise loans on anything like the terms of a few years ago. It was even considered advisable to underwrite a recent issue of a Colonial Government stock, and as much as 6 per cent. was offered for loans by a Canadian Province. Local Authorities in England who recently found it possible to raise money on the security of the rates at 3 per cent. or less, now find it impossible to raise money except at an increase of nearly 50 per cent. on that figure. The causes are numerous and widely spread, although the chief cause is probably the great and growing expenditure on works of a public character, not only in this country but in the "Development" of the Colonies and several "new countries," notably the Argentine Republic and other South American States.

LEGACY AND SUCCESSION DUTIES.

Legacy duty amounting to £4,506,923 levied on a capital sum of £126,918,160 was received during the year. Of these sums £1,479,795 was charged on capital amounting to £14,655,140 left to strangers in blood or for public uses.

Succession duty produced a net sum of £767,039.

DEATH DUTIES FOR TEN YEARS.

The number of estates, the net capital value of the property passing at death on which duties were paid, and the yield of the Death Duties for each of the past ten years are as follows :—

Year.	No. of Estates.	Capital Value.	Duties Paid.
1903-1904 ...	62,108	£264,118,000	£17,326,000
1904-1905 ...	63,918	265,103,000	17,258,000
1905-1906 ...	62,845	272,172,000	17,345,000
1906-1907 ...	66,082	298,460,000	18,959,000
1907-1908 ...	67,533	282,294,000	19,108,000
1908-1909 ...	67,524	270,903,000	18,310,000
1909-1910 ...	69,374	283,662,000	21,755,000
1910-1911 ...	67,795	272,725,000	25,709,000
1911-1912 ...	70,222	278,369,000	25,182,000
1912-1913 ...	70,788	279,253,000	25,406,000

Totals 668,189 £2,767,059,000 £206,358,000

Of the duty raised in 1912-13, England contributed £21,226,000, Scotland £3,192,000, and Ireland £988,000.

THE NATION'S CAPITAL STATIONARY.

There is to-day, probably, no fallacy more generally believed in than what is usually referred to as "The Rapid Growth of Wealth." Reference to the table just given will prove the extent of this fallacy.

For some years past the *capital* wealth of the country has shown no signs of increase, and if it were possible to show these figures with the allowance that, for the purposes of comparison, should be made for the more stringent enforcement of the Acts governing the collection of the Death Duties, and the far closer collection of the Tax, there is no doubt that the figures would show a sensible decrease. This decrease would be the more evident when the necessary allowances were made for the regular increase of the population. To a somewhat less extent, the same remarks apply to the Nation's Income as disclosed by the Income Tax returns. There, again, a considerable allowance must be made for the increase of the population and the far closer collection of the Tax.

The probable causes to which this state of things may be attributed will differ widely, but there is little doubt that one of the principal contributory causes will be found to be the Death Duties themselves. As has been pointed out on previous occasions, these Duties are a tax on *capital*, and are in practice met principally out of capital. The increased rates imposed by the 1909 Budget have now been in full working order for three years, and it will be seen that the average levy on capital during this period was 9 per cent. This capital is, in the nature of things, withdrawn from industrial or agricultural undertakings in which it is remunerative, and is applied to those purposes of Government in which it is entirely unremunerative, either from an income or a capital point of view.

The estimated receipt from the Death Duties for the year 1913-14 is twenty-six and three-quarter millions of pounds, and this is almost exactly the amount required for "National Debt Services" and "Other Consolidated Fund Services." In other words, the whole of the interest

on the National Debt, the cost of its administrative services, and the amount of the new Sinking Fund, are being met out of National Capital, and it is difficult to imagine finance of a more perilous order than that which provides out of capital for the payment of interest on loans.

There appears to be every likelihood that the receipt from the Death Duties during the Financial Year ending March, 1914, will considerably exceed the estimate, and it is not unlikely that that excess will provide the balance necessary to make up the deficit, which was shown in the Budget Proposals as submitted by the Chancellor of the Exchequer to the House of Commons, to make good which the Chancellor stated that he intended to rely on the expansion of trade. The trade boom appears to have reached its zenith, and so in all probability would not produce the amount upon which the Chancellor relied.

THE NATION'S INCOME AS DISCLOSED BY THE INCOME TAX RETURNS.

It has been said that Blue Books are designed to conceal what they purport to reveal. This is especially true of the Income Tax portion of the Inland Revenue Commissioners' Report as regards either the number of income tax payers as a whole, or in the several classes, or the average income per person. The details given are of the *number of assessments*, and in an explanatory example given by the Commissioners of a person with an income of £5,000 per annum, it is shown that their hypothetical case would appear as *ten assessments*, and in several classes of incomes ranging from under £160 per annum to over £50,000, whereas the actual income as a whole would not appear in the tables at all. Representations have been made on many occasions, notably before the Royal Commission on this subject, which sat some years ago, to have these figures presented in a form which would admit of more intelligible deductions, but without avail. In their present form, the tables lend themselves to the most erroneous conclusions by those not fully versed in their misleading intricacies. The great value of the tables, as at present presented, lies in the details given of the total income coming under the view of the Department and of the classification of that income.

The latest year for which details are available is 1911-12, the 1912-13 columns being marked "not available," although the report which was dated August, 1913, was not issued until October.

DERIVATION OF INCOME.

The gross amount of income brought under the review of the Department for Income Tax purposes in 1911-12 was £1,070,142,343, and was made up as follows :—

Schedule A :—	£	£
Ownership of Lands	52,219,676	
" " Houses ...	223,813,446	
" " other Property	1,297,210	
		277,330,332
Schedule B :—		
Occupation of Lands (mainly farmers' profits)	...	17,457,799
Carried forward.....	£294,788,131	

Brought forward.....£294,788,131

Schedule C:—

Consols, Land Stock, Local Loans, &c.	£ 14,458,374
Colonial Government Funds	15,326,413
India Government Stock and Loans	5,179,069
Indian Guaranteed Rail- ways	4,574,044
Foreign Government Funds	9,970,287

Schedule D:—

Businesses, Professions, &c. (including salaries of employees thereof)	421,755,759	49,508,187
Railways in the United Kingdom	46,099,539	
Railways out of the United Kingdom	28,016,128	
Mines	19,680,637	
Coupons (assessed through Bankers and Coupon Dealers)	17,059,648	
Indian, Colonial, and Foreign Securities (not being Govern- ment Securities)	23,769,078	
Gas Works and Water Works	15,403,351	
Canals, Docks, &c.	4,182,172	
Other items (including Loans secured on Pub- lic Rates not now shown separately)	16,654,104	
<i>Schedule E:—</i>		598,656,772
Government Officials ...	26,506,697	
Corporation and Public Company Officials ...	100,682,556	
		127,189,253
		£1,070,142,343

This income is proportioned in the several
schedules as follows:—

	Per cent.		Per cent.
Schedule D ...	56.0	Schedule C ...	4.6
„ A ...	25.9	„ B ...	1.6
„ E ...	11.9		

This gross income was reduced by exemptions
and allowances amounting to £203,688,540 to a
gross taxable income of £866,453,803, which was
still further reduced by abatements, allowances

for life insurance premiums and relief in respect
of children under the age of 16 years in the case
of incomes under £500 per annum to a net tax-
able income of £720,640,587. Relief in respect
of children was allowed on a total income of
£5,481,611 representing probably about 370,000
children.

Exemptions in respect of "Charities, Hospi-
tals, Friendly Societies, &c.," showed a consider-
able increase, due probably to the increased
income of various "approved societies" under
the National Insurance Act.

That the tax continues to be more and more
closely collected is shown by the increased
exemptions and abatements no less than by the
decrease in "other allowances," for although
the exemptions and abatements are greater by
incomes amounting in all to six millions of
pounds, the item "other allowances" is less by
incomes totalling seven millions of pounds per
annum.

The net taxable income was derived from the
various schedules in following proportions:—

	Per cent.
Profits from Businesses, Concerns, Pro- fessions, Employments, &c. (Schedule D)	62.2
Profits from Ownership of Lands, Houses, &c. (Schedule A)	23.5
Salaries of Government, Corporation and Public Company Officials (Schedule E) ...	7.3
Profits from British, Colonial and Foreign Government Securities (Schedule C)	6.5
Profits from Occupation of Lands (Schedule B)	0.5

INCOME FROM ABROAD.

100

The Inland Revenue Commissioners stated
that the gross amount of assessed income from
abroad, so far as it can be identified, for the
year 1911-12, is £103,894,667. In addition to
this amount a considerable sum arising from
concerns operating abroad, but under British
management and financed by British capital, is
included in the total for Schedule D, but is not
separately distinguished. The income from
abroad continues to show a marked increase.

THE PROFITS OF BUSINESS.

The following statement gives the details of
the Assessment to Income Tax for 1911-12 of the
profits of businesses and professions. It includes
certain income from abroad (alluded to above)
not identified as such from the particulars given
in the assessment:—

		PERSONS.*		FIRMS.	
Amount Exceeding	Amount not Exceeding	No. of Assessments.	Gross amount of Income Assessed.	No. of Assessments.	Gross amount of Income Assessed.
£	£		£		£
50,000	—	19	1,931,192	109	11,983,559
10,000	50,000	275	4,937,927	1,000	18,855,465
5,000	10,000	610	4,231,493	1,591	11,134,282
4,000	5,000	437	1,978,552	828	3,710,769
3,000	4,000	736	2,554,678	1,419	4,922,734
2,000	3,000	1,972	4,841,663	2,869	7,016,777
1,000	2,000	7,669	10,790,043	7,688	10,861,920
Assessments of Incomes under £1,000 per assess- ment in gross value		11,718	31,265,548	15,504	68,485,506
		440,778	79,649,679	39,228	15,420,114
Total		452,496	110,915,227	54,732	83,905,620

* Excluding employees.

EMPLOYEES.

The total number of assessments to Income Tax of employees under Schedules D and E in 1911-12 was 664,786, as compared with 634,193 in the preceding year. The total gross income covered by these assessments under these schedules amounted to £155,045,204, an increase over the preceding year of £8,419,083. The assessments on Government officials, which rose from 91,347 in 1909-10 to 96,428 in 1910-11, rose still further in 1911-12 to 99,639, and the amount covered by these assessments increased during the year by over £800,000, viz., from £25,692,330 to £26,506,607.

There is no indication in the tables to show under what heading the payments to Members of Parliament are included. It would appear that such payments are included under "Government Officials," as a footnote states that this heading "includes assessments made in respect of payments out of voted moneys or charged upon the Consolidated Fund." If this be so, every Member of Parliament is classed by the Inland Revenue Commissioners as a "Salaried Government Official."

THE SUPER-TAX.

The net receipt of the super-tax for the year 1912-13 (these returns are more complete than those relating to Income Tax generally) was nearly £3,600,000, but the estimated proportion properly allocated to the year was £2,850,000, the balance representing arrears for previous years. It is estimated in the report that the number of persons chargeable during the year will be about 11,800 as compared with an estimated number for the preceding year of 11,650, an increase approximating to the natural proportionate increase of the population. The total estimated income of these 11,800 persons is calculated to amount to £149,000,000 as compared with £146,000,000 in 1911-12, but it should be borne in mind that these are "estimates," and not definitely ascertained figures.

INCOME TAX FIGURES FOR TEN YEARS.

Year.	Net Income.	Net Produce of Assessment.	Produce for each Penny of Tax.
1902-03	£608,606,903	£38,037,931	£2,535,862
1903-04	615,012,373	38,188,067	2,562,551
1904-05	619,328,097	39,966,404	2,580,533
1905-06	638,024,746	31,601,237	2,633,436
1906-07	640,048,238	32,002,412	2,666,867
1907-08	671,313,000	32,380,000	2,698,000
1908-09	693,323,082	33,408,754	2,784,063
1909-10	686,812,104	31,679,902	2,691,422
1910-11	697,074,032	38,344,767	2,738,912
1911-12	720,640,587	39,631,630	2,830,830

DUTIES ON LAND VALUES.

The sharp fall in the yield of the Mineral Rights Duty is due to two principal causes, the Coal Strike of 1912, and a reduction of about 6 per cent. in consequence of the decision of the Court of Appeal in the case of *The Duke of Beaufort v. The Commissioners of Inland Revenue*, that this duty should be assessed on the net rents and royalties after deduction of Income Tax instead of on the gross rents, as had previously been the practice. This will still further reduce the yield for the next year, as considerable repayments of duty already collected will have to be made in consequence of this change.

The net receipt of the duties on Land Values (Increment Duty, Reversion Duty, Undeveloped Land Duty and Mineral Rights Duty) amounted to £436,722. Corrected figures for the preceding years are now available, and the receipts for the three years during which these duties have been in operation (the Act imposing the Duties received the Royal Assent 29th April, 1910) are as follows:—

Duty.	1910-11.	1911-12.	1912-13.
Increment Value Duty	£ 127	£ 6,127	£ 16,981
Reversion Duty	257	22,621	47,974
Undeveloped Land Duty	2,351	28,947	97,852
Mineral Rights Duty	2,735	57,695	162,107
	506,290	436,193	273,915
Total	509,025	493,888	436,022

The figures relating to Undeveloped Land Duty in Ireland make strange reading, and are as follows:—

Year.	Duty Assessed.	Duty Paid.
1909-10	£ 4,914	£ 410
1910-11	4,883	410
1911-12	4,864	411
1912-13	4,845	356

The receipts from the Mineral Rights Duty in Ireland in respect of the four years are:— 1909-10 £499, 1910-11 £479, 1911-12 £510, 1912-13 £432.

The issue and return of "Form 4—Land" are practically complete, but the original valuation of land "as at 30th April, 1909," is still far from complete, notwithstanding the considerable efforts made to cope with this work during the year under review, as only about 4½ millions of hereditaments out of a total of approximately 10 millions had been valued up to 31st March, 1913.

The total area of land in England, Scotland and Wales, valued for purposes of Undeveloped Land Duty up to March 31st, 1913, was only 635,603 acres. The acreage for Ireland is not given.

INHABITED HOUSE DUTY.

The returns of the Inhabited House Duty (which takes cognizance of all house property in Great Britain—but not in Ireland, which escapes the tax) are complete only to the year 1911-12. In this year the tendency noted for some years past is continued somewhat more markedly than heretofore. In all classes of private dwelling houses exceeding £41 in annual value there is a decline both in numbers and values, whereas in all classes under that value there is an increase in both numbers and values. The increase is most marked in houses of between £10 and £15 in annual value which increased during the year by almost 48,000 premises, and the total increase of annual value in this class was over £500,000. Residential shops resumed the decline in both total numbers and amounts, which had been interrupted for a year or two, although increases are shown in the classes of £700 and over of this type of property. This is what one might have expected from the growth of the large stores

(which house their employees) and the growing disinclination of the small proprietor to live on his business premises or "over the shop," as was the custom for many years, centuries in fact.

Hotel properties and licensed premises generally continue to decrease both in numbers and annual values, due to the combined operation of the 1909 Budget, and the steady extinguishing of licences more or less redundant, as well as to the growing disinclination of licensing justices to grant fresh licences, even in districts which have sprung up rapidly and have no facilities whatever for the obtaining locally supplies of excisable liquors. This class includes "Coffee Houses," which embraces also the ubiquitous tea shop, and the full extent of the decline in licensed premises is masked by the inclusion of these houses which have increased so rapidly during the last few years.

THE HOUSING OF THE POOR. IMPROVEMENT DURING THE DECADE.

The question of the housing of the poor is very much in the foreground at present, and it is therefore a matter for regret that the Commissioners have not included in their report a detailed statement of the numbers of premises in each county as well as the gross annual values. The numbers are given only for the Metropolis, the "Rest of England" and Scotland.

These numbers, however, show that during the decade there was an increase of 667,270 houses of under £20 in annual value, and of these roughly three-fourths were between £10 and £15 in annual value, or of an average value of £11·8 per annum.

The building trade would seem to be passing through a period of "hard times," judging from the relatively small increase during the last few years, both in numbers and values of all houses, whether charged to, or exempt from, duty. The causes are variously assigned to the Land Clauses of the 1909 Budget, the considerable rise in the cost of materials, and the rise in the price of labour, and losses due to a long series of labour disputes of a "sectional" character.

Farmhouses in the occupation of tenant farmers remain practically stationary in numbers, but show a slight increase in annual values during the decade. There are no such farmhouses in Scotland exceeding in value £80 per annum, and only two exceeding £60 per annum. In England there are 30,051 such farmhouses exceeding £20 in annual value, and of these 20,164 do not exceed £40. None exceed £150, 7 are between £100 and £150, 22 between £80 and £100, and 55 between £60 and £80.

RICH ESTATES OF THE YEAR.

On page 431 will be found a list of estates proved in 1913 exceeding £500,000 in amount each, reported during the year. The list contains many well-known names, and the majority of those appearing in that list left large sums for public uses. The Will of Sir John Murray Scott was the subject of proceedings in the Probate Court, and furnished the *cause célèbre* of the year. The estate of Sir William Dunn, the bulk of which was left for public uses, was also before the Court for some time. The figure for Mr. Pierpont Morgan's estate refers to property in the United Kingdom only.

In addition to these estates there are two others, those of Mr. Peter Coats, of the famous cotton firm, and Mr. William Weir, a Scottish ironmaster, whose estates have each been unofficially reported as exceeding a million pounds, but these estates have not been included, as they have not yet passed Probate.

On p. 765 will be found a list of the principal charitable bequests reported during the year. Bequests of £10,000 or over for public uses have been reported under 90 Wills, and the total value of their bequests is approximately £4,120,000. The bequests in this table include absolute reversions, but not contingent reversions, and in several instances the amount of the bequest is an approximate and not an exact figure, by reason, in most cases, of the amount being dependent upon the value of the residue after all claims have been satisfied. The inclusion of bequests under £10,000 each in value would, it is estimated, bring up the total value of the posthumous charitable gifts coming into operation during the year to about six millions of pounds, a sum in excess of the recorded average for some years past.

Hospitals, Religious Institutions and Societies, Orphanages and Institutions for the relief of the aged and poor are the principal beneficiaries. Sir William Dunn made bequests to a number of such institutions, and left the bulk of his property to his trustees for distribution in their discretion among the long list of Charities he had named. Mr. Thomas MacCarthy's large bequest was for charitable and educational purposes in New Zealand, as a board of trustees consisting of the Governor, the Premier of the Colony, the Roman Catholic Archbishop of Wellington and the Mayor of Wellington for the time being respectively, should decide. Mr. J. S. Fry, the head of the famous Bristol chocolate firm, left, amongst numerous other bequests, £25,000 to the Bristol General Hospital, and £20,000 to the Friends' Foreign Missionary Association. His bequests are chiefly for hospitals, homes, and missions. Over £50,000 was left by Mr. John Jones, at one time in business as a chemist, and afterwards as a brewer at Wrexham, to found and endow a hospital at Wrexham, and a convalescent home at Rhyl. Mr. John Seear, a well-known London chartered accountant, who was on the directorate of several "Kafir" companies, and a Warden of the Loriners Company, left the reversion of the bulk of his fortune for two "Seear Bequests," one to the Loriners Company for the benefit of aged and poor members of the company, and one to the Institute of Chartered Accountants, or the Benevolent Fund of the Institute, for members of that body or their dependents, who may have fallen upon bad times.

A "Thomas Bartlett Fund" of £40,000 was left to the Liverpool Merchants' Guild for annuities for old Liverpool residents, a similar fund of £20,000 to the Liverpool Seamen's Orphanage, another such fund of £20,000 to Liverpool University for Engineering Scholarships, and another such fund of £20,000 for the Home for Epileptics, Maghull, by Mr. Thomas Bartlett, a retired wine merchant of Liverpool, who also left between £50,000 and £60,000 for the building of the new Liverpool Cathedral, and to provide clocks and bells therefor. A large bequest for homes to be built near Scarborough, for members of the upper and middle

classes, was left by the late Dr. Smart, of Tunbridge Wells, who also made large benefactions to the Fitzwilliam Museum at Cambridge and Gonville and Caius College, Cambridge.

The Fitzwilliam Museum has been enriched by some notable collections and some very large bequests of recent years. Last year this Institution received £80,000 and a valuable art collection under the will of Mr. Charles Brinsley Marlay, a nephew of the Duke of Rutland. The University of Cambridge also received this year a bequest valued at about £90,000 under the will of the Rev. John Henry Ellis, who also left £10,000 each to the Bishop of London's Fund, the Bishop of St. Albans' Fund, and the East London Church Fund.

Dr. Smart imposed a religious qualification on the beneficiaries under his will, making those bequests of a charitable nature apply only to Protestants, and as regards these bequests, he directed that in the event of any beneficiary being or becoming a Roman Catholic, such legatee should forfeit four-fifths of the legacy, and the forfeited portion should pass to Protestant societies selected by his trustees "as most useful in opposing the spread of Romanism.

A "religious test" occurs not infrequently in the wills of strong Protestants, and comparatively frequently in the wills of orthodox Jews. In the latter cases there is frequently a clause disinheriting children or descendants who shall forsake the Jewish faith or marry other than within the faith. On the other hand, it is noteworthy that there is no case, so far as can be ascertained, in which a Roman Catholic testator disinherits a legatee becoming a Protestant or forsaking the Roman Catholic Faith.

Newcastle Institutions received large sums under the will of Mr. Fenwick, the Royal Infirmary alone receiving £51,000. Amongst provincial cities, Liverpool, Bristol and Newcastle appear to have been the "lucky" cities of the year.

The Earl of Leven and Melville gave effect in his will to a promise to contribute £25,000 towards the erection at Holyrood Palace of a Chapel for the Knights of the Thistle, and so carried on the work initiated by a bequest of £40,000 under the will of his father, whom he survived by only seven years.

Practically the whole of his estate, valued at over £14,000, was left by Mr. Edmund Wilson, of Torquay, and formerly of York, to the Corporation of York for the encouragement of swimming, diving and life-saving in the district under the Corporation's jurisdiction.

A bequest on quite original lines was left by Mr. Frederick G. Clark, for many years a well-known figure on the London Stock Exchange, who left the reversion of his residuary estate, estimated to amount to about £20,000, for a "Legal Aid Fund for Poor People," to enable poor English or Scottish people (and Irish people so long as Ireland remains in Union with Great Britain) to obtain competent legal advice and assistance and the aid of the Courts in the defence of their rights or property. He especially exempted from the scope of this Fund cases arising out of "trade disputes," or disputes among the poor themselves, and cases involving criminal prosecution or defence, leaving the Fund free for the assistance of the poor in civil actions against large corporations or wealthy persons. As instances of the type of cases he

had in his mind, he especially mentioned cases against rich or titled people, public companies—including insurance companies—and cases arising out of injury to poor people caused by motor or other street accidents.

The heavy increases of taxation in recent years, more especially the increased Death Duties and Income Tax, are cited in several instances by testators (notably by the late Lord Avebury) as the reason for reducing or revoking, by codicil, legacies for public uses which had been left by will. The amount so withdrawn from charitable objects during the last few years amounts in the aggregate to a considerable sum. The same cause has operated to the disadvantage of these institutions in the falling-off of subscriptions. It would seem to be reasonable that there should be an exemption from legacy duty (10 per cent.) for such institutions, many of which are already exempt from the inhabited house duty. Such a proposal would make but a small inroad on the taxation receipts and would confer a benefit on the institutions out of all proportion to the slight loss to the Exchequer. It may be urged that it would be difficult to draw the line between charitable institutions and quasi-charitable institutions, but there would be probably no objection raised if a start in this direction were made by the exemption of hospitals, dispensaries, orphanages and institutions of a similar character. Exemption from all forms of Death Duties was granted under the Finance Act of 1894 in respect of bequests of art treasures or collections of scientific or historic interest bequeathed to national and municipal institutions, and this exemption was extended under the Finance Act of 1909 to all such articles whether bequeathed to public institutions or not, so long as they were not sold, duty only becoming payable on the sale of such articles. The extension of this exemption has already tended in a marked degree to the maintenance intact of some notable collections. This may quite reasonably be regarded as a precedent for the exemption from taxation by death duty of benefits to the nation at large.

ART SALES.

RIISING PRICES OF OLD MASTERS.

The English art auction record for a single picture as well as for a single day's sale was broken on the 13th June, 1913, at the sale at Christie's of the Oppenheim Collection. Romney's portrait of Anne, Lady de la Pole (1786), realised £41,370 (39,400 guineas), and the total value of the day's sales amounted to £119,500. This was not the largest price of the year for a single picture as, only three days before, at the dispersal in Paris of the Steengracht Collection, £44,000 was paid for Rembrandt's "Bathsheba." The purchasers in each case were the Messrs. Duveen Brothers. Another Rembrandt, "Lucretia Stabbing Herself," was sold by auction in New York the preceding February for £26,000, and at the same sale Romney's "Children" realised £20,000. On 17th June, in Paris, at the sale of the De Nemes Collection, £20,640 was paid for Rembrandt's portrait of his father. Only eighteen months previously this portrait, then "attributed" to Rembrandt, was sold for 200 guineas, but investigations made subsequently satisfied the connoisseurs

that this work was undoubtedly by this master. The "Bathsheba" by the same artist (referred to above) was sold into the Steengracht Collection in 1841 for only £315, and will probably long remain as a record for appreciation in value whilst in the same possession. The English auction record for a landscape was also broken by the sale in April for £20,160 of Gainsborough's "Market Cart," which passed at that figure from the Lionel Phillips' Collection into the hands of Messrs. Wertheimer. This picture sold for 4,500 guineas in 1894. Turner's "Bearing to Windward" fetched £21,000 at the sale of the Borden Collection in New York in February.

A small panel portrait measuring 11 by 8 inches, by Franz Hals, realised £5,985, at the rate of nearly £9,800 per square foot, and another by the same artist measuring 29½ by 24¾ inches realised £9,000.

VALUES OF MODERN WORKS.

£19,140 was realised at the dispersal of the Henri Rouart Collection for the painting by Degas, "Les Danseuses à la barre," and is amongst the highest prices paid for the work of any artist during his lifetime. The record is believed to be held by the sum of £22,000 paid for Millet's "Angelus."

The McCulloch sale was especially notable for the good prices realised by some of the works of modern artists, although this season has shewn in this class some remarkable instances

of depreciation. At the sale Millais's "Sir Isumbras at the Ford" realised 7,800 guineas, Abbey's "Richard, Duke of Gloucester, and the Lady Anne" 5,400 guineas, the same artist's "King Lear" 4,800 guineas, and this last figure was also paid for "Love among the Ruins," by Sir E. Burne-Jones. Two pictures by Orchardson, "The Young Duke" and "Master Baby," each sold at this auction for 4,400 guineas.

The sale of the Holden collection was more particularly noteworthy for the considerable depreciation in prices of the works of several artists of the Victorian period. A Landseer, "The Otter Hunt," which at the sale of Baron Gratz's Collection in 1877 sold for 5,650 guineas, on this occasion changed hands at 1,200 guineas, and another well-known picture which passed through both of the sales, "St. Francis Preaching to the Birds," by Henry Stacy Marks, declined in auction value from 1,100 guineas to 100 guineas.

The works of Corot, of which many examples have changed hands during the year, continue to increase in value.

Two Mazarin blue vases with ormolu mounts of the Louis XV. period and covers realised £7,665 at the Oppenheim sale, and 330 shillings per oz. was realised at another sale for a silver Irish potato ring by Matthew West, of Dublin, dated 1775.

Although some good prices have been realised for engravings, there is nothing of a "sensational" character to record.

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10s. or less ½d.
On goods pledged for more than 10s. 1d.
For INTEREST on pledges not exceeding 40s., for every 2s. or part of 2s., per month ... ½d.
And after the first month any time not exceeding 14 days to be charged as half a month.
On pledges exceeding 40s., for every half-crown or part of half a crown, per month ½d.

FORFEITURE.—Pledges for 10s. and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10s., if not redeemed within twelve calendar months and seven days from the day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—i.e., the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a

magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5s. or under, the charge on form of declaration is one half-penny; when the loan is above 5s., one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40s. provided always that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as are set forth above in the case of ordinary pledges for more than 10s.

Charitable Bequests in 1913.

Name of Testator.	Gross Amount of Estate.	Approx. Amount of Charitable Bequests.	Name of Testator.	Gross Amount of Estate.	Approx. Amount of Charitable Bequests.
Sir William Dunn, 1st Bart., aged 78, of Lakenheath (provisional valuation)	750,000	750,000	John T. Venneck, aged 62, of New York (Estate in U.K.)	£ 6,424	£ 23,000
Thomas George Macarthy, of Wollington, N.Z., brewer	500,000	450,000	Mrs. Henrietta Todd, of Bognor	27,175	22,000
Joseph Storrs Fry, aged 86, of Bristol (provisional valuation)	700,000	200,000	Mrs. Mary Ann Williamson, of Queen's Gate, S.W.	35,392	20,000
John Jones, aged 87, of Wrexham, Denbigh, retired brewer	302,607	200,000	George Southern, of Bamber Bridge, Lancs.	35,519	20,000
John Seear, aged 63, of Cheam, Cheshire accountant	203,655	200,000	Miss Jeannie Pollok, of Pollok-shields (Estate in U.K.)	24,340	20,000
Thomas Bartlett, aged 73, of Liverpool, ret'd. wine merchant	285,536	175,000	Mrs. Alice Miller, of Virginia Water, Surrey	39,133	20,000
Dr. Francis Gray Smart, aged 68, of Tunbridge Wells (provisional valuation)	446,819	150,000	Mrs. Margaret Pollock Glen, of Barrhead (Estate in U.K.)	40,472	20,000
Christopher Langan, of Dublin, merchant (Estate in U.K.)	202,805	150,000	Miss Margaret Jane Ashley, aged 75, of Dorchester	30,895	20,000
John Pierpont Morgan, aged 75	1,179,831	140,000	Samuel Joshua Cooper, aged 82, of Barnsley	751,446	20,000
George John Fenwick, aged 92, banker and brewer	1,186,845	131,500	Anthony Nicholas Brady, of New York	1,315,528	20,000
Miss Maria Mercer, aged 93, of Clayton-le-Moor	146,744	130,000	Miss Mary Houldsworth, of Ayr, N.B. (Estate in U.K.)	27,966	20,000
Rev. John Henry Ellis, M.A., aged 72, of 29 Collingham Gardens, S.W.	184,706	120,000	Andrew Johnstone, aged 80, of Liverpool	106,202	19,000
Miss Elizabeth Julia Emery, of The West Central Hotel, W.C. (Estate in U.K.)	17,664	70,000	Edward Beck, of Isleworth	18,299	18,000
Richard Murray, aged 74, of Harrogate, brewer (provisional valuation)	558,263	60,000	John Newton Mappin, aged 77, of Mappin & Webb, Ltd.	162,252	18,000
Miss Anna Jane Arden, aged 83, of Staffs.	67,206	60,000	Miss Annie Goff, of Norwood	824,860	18,000
Miss Henrietta Hertz, of Regent's Park, N.W.	85,045	60,000	Augustus Nash, aged 80, of Holland Park Avenue, W.	22,830	18,000
Alfred King, aged 72, of Worthing	64,874	60,000	Capt. Alfred Cortis, aged 79, of Worthing	25,981	18,000
Alfred Hugh Harman, founder of the Iford Photo. Co.	333,739	50,000	Mrs. Eliza Raymond, of Hove	131,840	17,700
John Albert Nunneley, of Bath	55,556	45,000	Alfred Butterworth, aged 74, of Oldham, and Ander, aged 75, of Oldham	32,209	17,000
Mrs. Elizabeth Mary Laing, aged 81, of Barnes, S.W.	89,501	40,000	Mrs. Mary Ann Butcher, aged 80, of Bramham Gardens, S.W.	281,233	16,500
Mrs. Jane Ash, of Blackpool	109,163	40,000	Patrick Joseph Donnelly, aged 66, of Dublin (Estate in U.K.)	22,052	16,000
Dam. Georgiana Brownlow, of Bracknell	302,193	39,000	Right Hon. William McEwan, of Edinburgh, brewer (Estate in U.K.)	16,162	16,000
Mrs. Marion Pender Smart, of Tunbridge Wells	750,442	38,500	Herbert Sayer Tew, aged 77, of Bournemouth and Wakefield, banker	1,501,250	16,000
Miss Elizabeth Stringer, aged 72, of St. Leonard's-on-Sea	262,361	36,000	Miss Harriett Anne Sobieska Sneyd, of Rhyl	125,518	16,000
Mrs. Elizabeth Akrliff, aged 68, of Edgbaston	68,057	35,000	Mrs. Martha Bell, aged 92, of S. Kensington	70,651	15,000
Col. Sir Charles John Stoddart, v.d., of Rotherham, iron and coal master	57,698	30,000	Benjamin Worsley Chandler, aged 66, of Highgate, N.	34,167	15,000
Miss Mary Dains, of Trimley	79,417	30,000	Edmund Wilson, of Torquay	16,368	15,000
Barnett Cohen, retired metal merchant	34,614	30,000	Christopher Taylor, aged 89, of Brumpton	14,159	14,000
Right Hon. Christopher, 1st Baron Furness, aged 66 (provisional valuation)	1,000,000	30,000	Frederick Isaac Reckitt, aged 89, of Hull	110,664	14,000
Charles Thomas Harris, aged 82, of Denmark Hill, S.E.	143,588	30,000	Miss Abigail Hampton, of Dudley, licensed victualler	119,789	14,000
John William Atkinson Wood, of Manchester	38,557	30,000	Robert Furber, of Bristol	15,898	14,000
Miss Catherine Butler, aged 92, of Blackheath	32,407	30,000	Miss Mary Hannay Crawford, aged 88, of Leeds	37,286	14,000
Mrs. Agnes Davidson Black, of Coldstream & Lenton, Northumberland (Estate in U.K.)	87,019	25,000	William Leeming, aged 85, of Liverpool	18,487	13,000
Charles Walter, aged 83, of Surbiton Hill, ret'd. solicitor	43,572	25,000	William Britain Jones, aged 78, of St. Leonards	23,871	12,250
Ald. Franklin Talbot Thomas, aged 69, of Blackburn	34,105	25,000	Miss Julia Susanna Rogers, of Hampstead, N.W.	21,694	12,000
Col. John Hill, a.e., of Brighton	31,679	25,000	Dr. Richard Thomas Fraser, of Newport, Fiffe (Estate in U.K.)	47,608	12,000
Earl of Leven and Melville, aged 27	673,062	23,000	Mrs. Caroline Conradine Sophia Dickinson, of Bournemouth	20,195	12,000
Benjamin Guggenheim, of New York, banker, drowned in the "Titanic" (Estate in U.K.)	5,468	23,000	Ald. Thomas John Deeks Camphorn, of Chelmsford	15,499	12,000
Miss Agnes Tryphena O'Callaghan, of Cheltenham	36,786	23,000	Mrs. Emma James, of Eastbourne	49,983	12,000
			Col. Frank Shuttleworth, aged 77, of Biggleswade, engineer	43,439	11,500
			Rev. Walter James Tait, aged 73, of Wimbledon	911,980	11,500
			Sir R. Pullar, aged 84, Perth, dyer	34,209	10,000
				519,675	10,000
			Total	£ 18,882,125	£ 64,051,450

REMARKABLE progress was made in every branch of aviation during the past year and especially in the development of aeroplanes and hydro-aeroplanes, the latter, for convenience, being now commonly referred to as seaplanes. Amongst all the great Powers there has been great activity in organising the new arm for aggressive and defensive warfare, and as a result many improvements in construction have been made, whilst engines have also shown a marked advance. Whilst the rotary type is generally favoured, many engineers have been working upon the lines of fixed cylinders, and in England the Green has proved itself reliable and efficient though somewhat heavier in proportion to horse-power than engines of the Gnome type. Airships continue to be built, especially in Germany, despite the destruction of the two latest Zeppelins with an appalling loss of life; but the British Government, using a far smaller type, has handed over its little fleet for the use of the Navy, preferring to rely on aeroplanes for military purposes. Seaplanes are being developed and stations are in course of formation all round the coast of Great Britain. Mr. Churchill, at the Guildhall banquet, laid particular stress on the necessity of gaining aerial supremacy for the purpose of defending our shores.

Nothing has been more marked than the increase in the speed of the aeroplane, and consequently in the increased distances flown. In October, Victor Stöffer, a German airman, covered 1,250 miles in the 24 hours, whilst in the Gordon-Bennett race in September, Prévost, on a Déperdussin, with an engine of 160 h.p., flew at the rate of 124·6 miles an hour. There have been several flights over the Alps, and cross-Channel passages have been so numerous that it seems inconceivable that it is less than five years since Blériot first flew from France to England. The most noteworthy sea flight was made in September by Roland Garros, who flew from Tréjus across the Mediterranean, landing near Tunis.

The death-roll has been a heavy one, and England has had to mourn the tragic end of Mr. S. F. Cody, one of the earliest pioneers of aviation, and also of several Army fliers. The following is a digest of the chief happenings during the year to the end of October:—

JANUARY.—During the whole of the month there were rumours of mysterious airships having been seen over Dover, Cardiff, Aberystwyth. 24. Army airship *Gamma* flew from Aldershot over London and back. Gift of a Blériot monoplane to the nation by students of International Correspondence Schools. Oskar Bider, Swiss, flew from Pau to Madrid in 7¾ hrs. 25. Jean Bielovucic, a Peruvian, crossed the Alps from Brigue to Domo d'Ossola on Hanriot monoplane.

JANUARY FATALITIES.—Frank Boland, at Port of Spain; Señor Ensebione, at Buenos Ayres; L. F. Macdonald and mechanic drowned in Thames off Erith (trial of Vickers aeroplane); Charles Nieuport, at Merville; Lieut. Schlegel, at Magdeburg; M. Mallet, at Fécamp (seaplane).

FEBRUARY.—The mysterious appearances of airships continued to be reported from places as far apart as Glamorganshire, North-east Warwickshire, Gosport, Ipswich, Hornsea, Liverpool, Hull, Nottinghamshire, Sanday Isle; but the finding of a fire balloon on the 28th, near Selby, explained the matter and ended the

newspaper scare. 8. Pierre Gougenheim, with four passengers, reached a height of 2,351 ft. at Villacoublay. 14. Aerial Navigation Act received Royal Assent. Aero Exhibition at Olympia, Kensington: visit of King. 22. Favre flew, at rate of 107 miles an hour, from Mournelon to Juvisy. 23. F. K. Maclean, with Naval officer as passenger, flew Short biplane Eastchurch to Hendon. M. Moreau satisfied French military experts with his stabilizer. He flew for 30 mins. with folded arms in a strong wind. 25. Brindejone des Moulinais flew Paris to London in 4 hrs. 40 mins. 26. Army flying squadron from Farnborough arrived at their new ground at Montrose. 28. Frenzt reached altitude of 2,100 ft. with six passengers.

FEBRUARY FATALITIES.—G. Nosari, at Turin; Capt. Janetzky and mechanic, drowned near Zoppot; Bruno Herntgen, near Bonn.

MARCH.—10. Marty, flying from Paris, landed at Adisham, but was allowed to continue his journey, though questioned by the police under the new regulations. 19. *Ersatz I.* (Zeppelin airship) wrecked whilst landing at Karlsruhe. Col. Seely, speaking on the estimates in House of Commons, announced a £1,000 prize for a British engine, and stated that the country had 3 airships and 101 aeroplanes. These statements were subsequently severely criticised. 21. Pierre Verrier flew 34 miles in 19 mins., a rate of 107·36 miles an hour, or 12 less than Vedrines' the previous year. 27. Cross-Channel flight to Calais by Robert Slack. 28. Flight, Reims to Tournai and Brussels, by Cromberg. Lyons to Paris (470 kilos.), in 3 hrs. 10 mins., by Gilbert.

MARCH FATALITIES.—Lieut. Bresson, at Verdun; Gordon England, on Salisbury Plain; Lieuts. Kimura and Tokuda, near Tokyo; Mercier, at Amburen: Capt. Moreno, at Somma, Lombardy; Lieut. Portheau, at Avora.

APRIL.—3. Enforced descent of a German airship at Luneville in France caused some controversy. 11. Gustav Hamel, with passenger, flew Dover to Dunkirk and back on 80-h.p. Blériot monoplane; first double journey with passenger. 16. French military balloon exploded at Villiers-sur-Marne; four of five occupants killed. Daucourt, flight Paris to Berlin on a Borel in 13¾ hrs. 17. Gustav Hamel, Dover to Cologne in 4¾ hrs. 24. Gilbert made Paris to Madrid flight, 460 miles, in 8 hrs. 23 mins. 30. Time limit for Pommery Cup awarded to Guillaux for flight Biarritz to Kollem (in Holland); subsequently disputed by Brindejone des Moulinais. Later in the year the cup was awarded to des Moulinais.

APRIL FATALITIES.—M. Abramovitch, at Johannesburg; Señor Acevado, drowned in River Rio Bio; Lieut. Argyropoulos, at Langaza; Perez Arzeno, at Buenos Ayres; Paymaster Berne, at Eastchurch; Lieut. de Blamont, at Villacoublay; O. W. Brodie, at Chicago; M. Dunetz, at Johannisthal; M. Faure, at Buc aerodrome; Signor Gallo, at Turin; Lieut. von Gernersheim, near Munich; Herr Lichte at Rothhausen; M. Constantin Manos, at Langaza; M. Phanroux, at Amiens; Lieut. L. C. Rogers-Harrison, at Farnborough; Lieut. R. Chandler (seaplane), at San Diego; M. Gandart (seaplane), at Monaco.

MAY.—Paris to England flight by Lieut. de Laborde, who flew back to Versailles the next day. 9. The King witnessed demonstration by Army fliers at Aldershot. 9 to 12. Brindejone

des Moulinais flew from Bremen to Hendon; competed at Hendon on Morane-Saulnier with 80 h.p. Gnome engine, and won cross-country handicap in 37 mins. 4 secs. (Being under suspension he was subsequently disqualified, and the race was awarded to Mr. H. M. Brock, this causing the resignation of Messrs. Grahame-White and Gates from Royal Aero Club. In November, on appeal, it was found that the Aero Club Committee had made a technical mistake, and des Moulinais was awarded the prize, but his suspension was upheld.) Was prosecuted at Bow Street, convicted for flying over prohibited areas, and was bound over. Flew from Hendon to Calais, having previously at Hendon ascended with passenger to height of 10,200 feet, world's record being 10,500 feet. 12. Bomb-dropping tests at Hendon. 13. Oskar Bider, first flight over Bernese Alps between Wildhorn and the Wildstrubel, height 10,500 feet. 17. Army aeroplane wrecked at Sparkford, near Yeovil. 21. Perreyon, Turin to Rome with passenger. 22. Imperial Air Fleet Committee presented aeroplane to New Zealand. Mr. Corbett Wilson, flight from Paris to Lausanne with passenger. 26. Army airship *Beta*, flight from Aldershot to Portsmouth and back. Mr. C. Pizey and passenger at 1,200 feet over Salisbury Plain, when machine caught fire; escaped by steep volplane, machine wrecked. During month Aerial Defence Committee formed after a meeting at Mansion House to impress on Government needs of Aerial Defence. 28. Mr. Gordon Bell, cross-Channel flight.

MAY FATALITIES.—Capt. Andrie, at Capljuna; Lieut. D. L. Arthur (R.F.C.), at Montrose; Sergt. Bellini, at St. Cyr; Herr Horn, at Burgwedel; Capt. Jucker, at Johannisthal; Lieut. Kreder, at Avord; Lieut. von Nierbach, at Darmstadt; Mr. Takeishi, at Osaka.

JUNE 16.—Army airship *Beta* flew from Aldershot to London and back. 19. Astra-Torres airship purchased by Government, underwent trials at Farnborough. 22. Two balloonists, Dubonnet and Jourdan, engaged in the Grand Prix of Aero Club de France, fell into the English Channel, and were picked up by a fishing-boat. This competition was won by Leblanc, in the *Ile de France*, which reached Hull (440 miles). There were 20 competitors. 25. Flight by Robert Slack, Paris to Hendon. 26. Gilbert flew from Paris to London, and delivered newspapers to M. Poincaré, the French President, at St. James's Palace. Flew back on 29. 26. C. Grahame-White flew from Paris to Putney Bridge in a seaplane. Started 5.50 a.m., arrived 7 p.m.

JUNE FATALITIES.—Mme. Amical, at Buc; Lieut. Balabuchin, at Peterhof; M. Bernard, at Buc; M. Deberver, at Etampes; Herr Garbitz, at Johannisthal; Mr. J. R. B. Kennedy, at Brooklands; Herr Krastel, at Johannisthal; Mario, at Lisbon; Herr Michaelis, at Berlin; M. Periset, at Liège; Mr. R. N. Wight, at Brighton; Ensign W. Billingsley and Lieut. J. Towers (seaplane), at Chesapeake Bay.

JULY.—2. Brindejone des Moulinais completed tour, Paris to St. Petersburg and back, via Berlin to Warsaw (906 miles), Dvinsk (344 miles), St. Petersburg (281 miles), Reval (218 miles), Stockholm (250 miles), Copenhagen (344 miles), the Hague (450 miles), Villacoublay (281 miles), total, 3,125 miles. His monoplane was a Morane-Saulnier with 60-h.p. Gnome engine. The dis-

tance was covered in eight days' flying. M. Levasseur, on a Nieuport seaplane with a passenger, flew from Paris to Blackwall Pier in 8½ hours. He was prosecuted at Bow Street and bound over. Flew back *via* Rotterdam. 13. Audemars won £500 and the Batschari Cup by flight from Berlin to Paris. M. Letort made non-stop flight, Paris to Johannisthal, in 9 hours. Oskar Bider flew from Berne to Milan by way of Jungfrau. 15. Non-stop flight by Lieut. Varein, with a passenger, from Chateaudun to Paris, 335 miles, on a Farman biplane. 16. Mr. T. Sopwith won Singer prize for sea-plane flight. 17. German airship, *Schütte-Lanz I.*, wrecked and one soldier killed. 18. M. Blériot introduced a device for seaplanes to land on battleships. 22. France adopted armoured aeroplanes. 26. Oskar Bider flew from Milan to Basel over Lukmanier Pass; proceeded to Berne with a passenger. 31. M. Salmel flew from Buc to Hendon.

JULY FATALITIES.—M. Bertin and son, at Chateaufort; M. Chambenois, at Auterive (Haute Garonne); Major A. W. Hewetson, on Salisbury Plain; Capt. Rey, at Eprenay; Lieut. Stoll, at Jüterbogk.

AUGUST.—3. Guillaux flew from Paris to Almeida (Portugal), 683 miles. R. Slack won altitude contest at Hendon (8,000 feet). 4. Balloon flight over Alps, Kandersteg to southern slope Monte Rosa, by Capt. Splertini with three passengers. 7. Janoir, flight from Paris to Berlin. 11. Capt. J. Felix, flight from Eastchurch to Boulogne, thence (12th) to Versailles. 15. Seguin, flight Bremen to Antwerp. 17. Much publicity given to Lieut. Dunne's V-shaped biplane, which, it was claimed, was perfectly stable. Machine bought for France. Questions in Parliament. Start of *Daily Mail* seaplane circuit of Britain and portion of Ireland for £5,000 prize. Only one started, H. S. Hawker, on Sopwith, with Green engine. Hawker finally fell in the sea at Lough Shinny (Ireland). 19. Capt. Longworth, with passenger on seaplane, flew from Aldershot to Montrose with one stop, at a rate of 70 miles an hour (530 miles). British record. 20. Pégoud gave demonstration in France of descent from aeroplane by parachute.

AUGUST FATALITIES.—Mr. Brooks, at Johannisthal; Ruetgers, at Leipzig; Lieut. Schmidt, near Halberstadt; S. F. Cody (Aug. 7), on Cove Common, Farnborough, and his passenger, W. H. B. Evans; Baron Henri de Montalent and mechanic, at Rouen.

SEPTEMBER 1.—Capt. Davies (R.F.C.), flew from Stranraer to Limerick. M. Pégoud gave a number of exhibitions, up to Sept. 26, of his upside-down flying. 8. Pierre Verrier flew from Boulogne to Hendon. Herr Friedrich flew from Berlin to Paris, and on the 14th from Paris to Hendon. 16. Fourny completed flight of 9,795 miles, having started on Aug. 25, for Michelin Cup, without change of biplane or motor. 23. Roland Garros flew across the Mediterranean from Tréjus to Tunis. 25. Moreau was awarded the Brunel prize for his stabilizing device. 26. Flight from Warsaw to Berlin by Victor Stöffler. 30. Gordon-Bennett Cup at Reims, won by Prévost on a Déperdussin, with 160 h.p. Rhone engine; speed of 124.6 miles an hour. (Previous year's record by Védrières 105½ miles an hour). No representative of Great Britain or the United States in the race. At Reims, Gilbert reached an altitude of 17,868 feet (the record being 19,600 feet), oxygen being used above 12,300 feet.

Two serious disasters occurred in Germany on Sept. 11. The Zeppelin airship *LI* was wrecked in the North Sea off Heligoland, and thirteen of the crew were drowned. At Bichenbeurer, a military biplane dashed into a crowd and caused five deaths.

SEPTEMBER FATALITIES. — Aviators, at St. Petersburg: Lieut. Cazes, at Mogador; Lieut. von Eckenbrecher and Lieut. Prinz, at Brieg; Lieut. Fisher, at Sebastopol; Herr Lorenz, at Bork; Lieut. M. Love, at San Diego; Louis Olivier's passenger, at Melun; Herr Schulz, at Johannisthal; Lieut. Souleillault, at Ujda; Vlaiclu, near Simala.

OCTOBER 2.—Mr. Churchill and Col. Seely, Navy and Army Ministers, ascended in seaplanes at Cromarty. Later Mr. Churchill made ascents in aeroplanes and airships. 5. At Berlin Sabiating created two records—rising to 6,822 feet with four passengers, and to 9,283 feet with three passengers. 9. Astra-Torres Army airship made an evening flight. 10. Delta airship flight from Farnborough over

Redhill, Sheerness, Chatham, London and back. 14. Victor Stöffer flew 1,250 miles in 24 hours. Claimed the £5,000 prize offered by National Aviation Fund of Germany, but it was refused on ground that he did not fly in a straight line. Lieut. Ronin carried late mails from Paris to Pauillac, Gironde, for the Antilles. 16. Army airship *Eta* flew from Farnborough to Colchester; back the next day. 17. Zeppelin *L II* exploded at Johannisthal. Crew and experts, 28 in all, killed. 21. Daucourt started Paris to Cairo flight. At end of the month it was announced that the Army airships were to be handed over to the Navy on the reorganisation of the R.F.C., and that upwards of a million was to be spent at once, mostly for the Navy, on airships and aeroplanes.

OCTOBER FATALITIES.—Major G. C. Merrick, at Central Flying School, Upavon; 28 killed in explosion of *LII* at Johannisthal; Corporal d'Autroche drowned in the Moselle near Epinal; Lieut. Garnier and Sapper Jendraud, at Prez (France).

Motor Marks for the United Kingdom.

COUNTIES.—Anglesey, E.Y.; Bedford, B.M.; Berks, B.L.; Brecon, E.U.; Bucks, B.H.; Cambridge, C.E.; Cardigan, E.J.; Carmarthen, B.X.; Carnarvon, C.O.; Cheshire, M.; Cornwall, A.F.; Cumberland, A.O.; Denbigh, C.A.; Derby, R.; Devon, T.; Dorset, F.X.; Durham, J.; Ely, Isle of, E.B.; Essex, F.; Flint, D.M.; Glamorgan, L.; Gloucester, A.D.; Hereford, C.J.; Herts, A.E.; Hunts, E.W.; Kent, D., K.T.; Lancs, B.; Leicester, A.Y.; Lincs. (parts of Holland), D.O.; Lincs. (parts of Kesteven), C.T.; Lincs. (parts of Lindsey), B.E.; London, A., L.A., L.B., L.C., L.D., L.E., L.F., L.H., L.K., L.N.; Merioneth, F.F.; Middlesex, H., M.X.; Monmouth, A.X.; Montgomery, E.P.; Norfolk, A.H.; Northants, B.D.; Northumberland, X.; Notts, A.L.; Oxon, B.W.; Pembroke, D.E.; Peterborough, Soke of, F.L.; Radnor, F.O.; Rutland, F.P.; Salop, A.W.; Somerset, Y.; Southampton, A.A.; Staffs, E.; Suffolk, E., B.J.; Suffolk, W., C.F.; Surrey, P., P.A.; Sussex, E., A.P.; Sussex, W., B.P.; Warwick, A.C.; Westmoreland, E.C.; Wight, I. of, D.L.; Wilts, A.M.; Worcester, A.B.; Yorks (E. Riding), B.T.; Yorks (N. Riding), A.J.; Yorks (W. Riding), C.

COUNTY BOROUGHES.—Barnsley, H.E.; Barrow-in-Furness, E.O.; Bath, F.B.; Birkenhead, C.M.; Birmingham, O., O.A.; Blackburn, C.B.; Blackpool, F.R.; Bolton, B.N.; Bootle, E.M.; Bourne-mouth, E.L.; Bradford (Yorks), A.K.; Brighton, C.D.; Bristol, A.E.; Burnley, C.W.; Burton-on-T., F.A.; Bury, E.N.; Canterbury, F.N.; Cardiff, B.O.; Chester, F.M.; Coventry, D.U.; Croydon, B.Y.; Derby, C.H.; Devonport, D.R.; Dewsbury, H.D.; Dudley, F.D.; Eastbourne, H.C.; Exeter, F.J.; Gateshead, C.N.; Gloucester, F.H.; Gt. Yarmouth, E.X.; Grimsby, E.E.; Halifax, C.P.; Hanley, E.H.; Hastings, D.Y.; Huddersfield, C.X.; Hull, A.T.; Ipswich, D.X.; Leeds, U.; Leicester, B.C.; Lincoln, F.E.; Liverpool, K.; Manchester, N., N.A.; Merthyr Tydfil, H.B.; Middlesbrough, D.G.; Newcastle-on-T., B.B.; Newport (Mon.), D.W.; Northampton, N.H.; Norwich, O.L.; Nottingham, A.U.; Oldham, B.U.; Oxford, F.C.; Plymouth, C.O.;

Portsmouth, B.K.; Preston, C.K.; Reading, D.P.; Rochdale, D.K.; Rotherham, E.T.; St. Helens, D.J.; Salford, B.A.; Sheffield, W.; Smethwick, H.A.; Southampton, C.R.; Southport, F.Y.; South Shields, C.U.; Stockport, D.B.; Stoke-upon-Trent, E.H.; Sunderland, B.R.; Swansea, C.Y.; Tynemouth, F.T.; Wallasey, H.F.; Wall-sall D.H.; Warrington, E.D.; West Bromwich, E.A.; West Ham, A.N.; West Hartlepool, E.F.; Wigan, E.K.; Wolverhampton, D.A.; Worcester, F.K.; York, D.N.

SCOTLAND.

COUNTY COUNCILS.—Aberdeen, S.A.; Argyll, S.B.; Ayr, S.D.; Banff, S.E.; Berwick, S.H.; Bute, S.J.; Caithness, S.K.; Clackmannan, S.L.; Dumfries, S.M.; Dunbarton, S.N.; Elgin, S.O.; Fife, S.P.; Forfar, S.R.; Haddington, S.S.; Inverness, S.T.; Kincardine, S.U.; Kinross, S.V.; Kirkcudbright, S.W.; Lanark, V.; Linlithgow, S.X.; Midlothian, S.Y.; Nairn, A.S.; Orkney, B.S.; Peebles, D.S.; Perth, E.S.; Renfrew, H.S.; Ross and Cromarty, J.S.; Roxburgh, K.S.; Selkirk, L.S.; Stirling, M.S.; Sutherland, N.S.; Wigtown, O.S.; Zetland (Shetland), P.S.

TOWN COUNCILS.—Aberdeen, R.S.; Dundee, T.S.; Edinburgh, S.; Glasgow, G.; Govan, U.S.; Greenock, V.S.; Leith, W.S.; Paisley, X.S.; Partick, Y.S.

IRELAND.

COUNTY COUNCILS.—Antrim, I.A.; Armagh, I.B.; Carlow, I.C.; Cavan, I.D.; Clare, I.E.; Cork, I.F.; Donegal, I.H.; Down, I.J.; Dublin, I.K.; Fermanagh, I.L.; Galway, I.M.; Kerry, I.N.; Kildare, I.O.; Kilkenny, I.P.; King's County, I.R.; Leitrim, I.T.; Limerick, I.U.; Londonderry, I.W.; Longford, I.X.; Louth, I.Y.; Mayo, I.Z.; Meath, A.I.; Monaghan, B.I.; Queen's County, C.I.; Roscommon, D.I.; Sligo, E.I.; Tipperary (N. Riding), F.I.; Tipperary (S. Riding), H.I.; Tyrone, J.I.; Waterford, K.I.

COUNTY BOROUGHES.—Belfast, O.I.; Cork, P.I.; Dublin, R.I.; Limerick, T.I.; Londonderry, U.I.; Waterford, W.I.; West Meath, L.I.; Wexford, M.I.; Wicklow, N.I.

ATHLETICS.

THE athletic season of 1913 was in every way a good one, especially at the Universities and the public schools, whilst quite a crop of new records were made. A disagreeable echo of the Olympic Games at Stockholm was heard when James Thorpe, the American, who won both the Pentathlon and Decathlon, had to relinquish all his prizes and medals for offences against the laws of amateurism. In England, a fund for the purposes of discovering, training, and encouraging athletes, with a view to the Berlin Olympic Games of 1916, was initiated by the Duke of Westminster, Lord Roberts, Lord Harris, and others, who appealed for £100,000. The idea did not meet with universal approval, many sports bodies, such as the Amateur Rowing Association, being adverse.

The cross country associations were early at work, for on February 8 the South of the Thames and the North of the Thames Championships were decided. The former event, at West Wickham, Kent, was won by the Reading A.C. (111 points), with Surrey A.C. "A" Team (166 points) and Herne Hill Harriers "A" Team (166 points) dead-heat for second place. There were 189 runners, the first man home being U. E. Carpenter, Surrey A.C., whose time for the course—about 6½ miles—was 47 mins. 18½ secs. W. J. Tucker, Reading A.C., the previous year's winner, finished second. The North of the Thames event was at Loughton, over about 6½ miles. The total number of runners was 292, and an almost unknown man—N. Forster, Ipswich Burtons A.C.—finished first in 40 mins. 45 secs. Elstree A.C. won with 75 points, Hampstead Harriers (181 points) and Southend Harriers (220 points) being second and third. The Midlands C.C. Championship, on February 15, was over a 10 miles course at Derby. Birchfield Harriers, who prior to 1909 had held the title since 1891, won with 57 points. H. D. Baldwin, Derby and County Harriers, was first home in 59 mins. 40 secs.

The University sports at both Oxford and Cambridge were held at the end of February. At both Universities some excellent form was shown. On a heavy track at Oxford G. H. G. Shepherd (Abingdon and Pembroke) beat R. L. Lange (Oklahoma and St. John's) in the Hundred Yards by a yard and a half in 10½ secs.—his best performance up to that date. A. N. S. Jackson (Malvern and Brasenose) won the Half-Mile easily in the sound time of 1 min. 58½ secs.; whilst W. I. F. Macdonald's (Charterhouse and New) 17 secs. for the 120 Yards Hurdles was better than it looked, for the course was slightly on the incline. The Weight Putting was notable for a big performance on the part of W. A. Ziegler (Grinnell College, Iowa, and Wadham), whose winning put was 41 ft. 9 ins. Jackson, who qualified, did not compete in the final heat of the Quarter-Mile, which was won fairly easily by W. C. Robertson (Bermuda and Brasenose) in 52 secs. In the Three Miles the Berkhamsted and St. John's freshman, D. N. Gausson, accomplished a fine performance. He had to make all his own running, yet beat G. M. Sproule (Victoria University and Balliol) by 50 yards, W. C. Moore (Felsted and Exeter), the president, being third. The time was 14 mins. 59 secs., the third mile being run in 4 mins. 49 secs. Jackson won the Mile in 4 mins. 26½ secs., and Ziegler the Hammer at 140 ft. 8 ins.

At Cambridge, R. S. Woods (Dulwich and Downing), who had improved steadily ever since his return from the Olympic Games at Stockholm, beat the Varsity record in the Weight with a put of 40 ft. 7 ins. A. C. Straker, the previous year's first string, was unable to compete in the High Jump owing to a strained foot, and the event went to H. S. O. Ashington (Harrow and King's), one of the best all-round athletes of the day, at 5 ft. 6½ ins. In the Mile the president, R. S. Clarke (Malvern and St. John's), was hunted home by R. E. Atkinson (Sedbergh and Emmanuel), the Three Miles Blue, in the fine time of 4 min. 26½ secs. In the 120 Yards Hurdle Race and the Long Jump Ashington followed up the success already mentioned. In the former event he beat ex-champion P. R. O'R. Phillips by four yards in 16½ secs., and in the latter he cleared 19 ft. 4½ ins.—not his best form. D. Gordon Davies (Shrewsbury and Downing) emulated the performance of D. Macmillan the previous year by winning the Hundred Yards (10½ secs.) and the Quarter-Mile (49½ secs.). J. G. Scott (Glenalmond and Pembroke) won the Hammer Throwing at 108 ft. 10½ ins., and then, in an exhibition, threw 111 ft. 7 ins. C. N. Lowe (Dulwich and Pembroke) secured the Half-Mile in 2 mins. 0½ sec.; and R. E. Atkinson again won the Three Miles, the time, 15 mins. 12½ secs., being very moderate.

The Southern and Northern Counties Cross Country Championships were held on March 1. The former, at Camer, Kent, over a course rather exceeding 10 miles, attracted 28 teams and 265 runners. The Surrey A.C. won with a score of 77 points, Herne Hill Harriers (90 points) and Highgate Harriers, the holders (105 points), being second and third respectively. W. J. Tucker, Reading A.C., was first home in 61 mins. 52½ secs.; F. C. Neaves, Surrey A.C., first in 1912, finishing no nearer than seventh. The Northern event was over a 7 miles course at Stockton, Warrington Harriers (85 points) being first, and Hallamshire Harriers, who had "farmed" the race for some years previously, second (113 points). E. Glover, of the Hallamshire Harriers (53 mins. 42 secs.), finished first. On the same day Bellahouston Harriers won the Scottish Championship, their A. Craig being first to finish. Ten miles was said to be the distance of the National Cross Country Championship, decided at Dunstall Park (Wolverhampton) Race-course on March 3, but it was short of that by about a mile. There were 211 starters, and Birchfield Harriers—though their first man, S. L. Holmes, finished thirteenth—packed so well that they won with 120 points from Warrington A.C. (126 points), Hallamshire Harriers, the holders, being third (238 points). E. Glover, Hallamshire Harriers (51 mins. 14½ secs.), C. Vose, Warrington A.C. (51 mins. 5 secs.), and H. D. Baldwin, Derby and County Harriers (51 mins. 55 secs.), were the first three to finish. On the same day North Belfast Harriers won the Irish Championship, Sergeant O'Neill, Connaught Rangers, being first home in 63 mins. 28 secs.

The meeting held at Queen's Club, West Kensington, on March 13, marked the jubilee of the Oxford and Cambridge contests. The King, accompanied by the Prince of Wales, honoured the gathering with his presence, and a great success was scored. The result was a tie, each University winning five events. The outstanding feature was furnished by one of Great Britain's Olympic representatives at

Stockholm—H. S. O. Ashtington (Harrow and King's)—who, by winning three events for Cambridge, set up a new record for the meeting. He took the 120 Yards Hurdles in 16½ secs., the Half-Mile in 2 mins. 0½ sec., and the Long Jump (for the second year in succession) at 23 ft. 5½ ins. The last-named performance constituted a second record, beating as it did by three-quarters of an inch the leap of C. B. Fry in 1892. Climatic conditions were all against good performances, yet others were accomplished. For one, W. A. Ziegler (Iowa and Wadham, Oxford) got very near record in the Weight with a put of 43 ft. 3 ins., which was 2 ft. 5 ins. better than his successful put of the previous year; and in winning the Hammer, also for the second time, with a throw of 142 ft. 7 ins., he did 3 ft. 3 ins. better than in 1912. J. de B. Crossley (Eton and Balliol) credited Oxford with the High Jump at 5 ft. 8½ ins.; whilst the Olympic runner, A. N. S. Jackson (Malvern and Brasenose, Oxford), repeated his previous season's success in the Mile, which he won in 4 mins. 24½ secs. D. Gordon-Davies (Shrewsbury and Downing, Cambridge) carried off the Quarter in 51 secs.; and the Three Miles went to D. N. Gausson (Berkhamsted and St. John's, Oxford) in 14 mins. 47 secs.

On Easter Monday, in France, England scored her eleventh consecutive win in the International Cross Country contest; J. Bouin, France, being first man home for the third year in succession. On April 5, at Celtic Park, Glasgow, G. C. L. Wallach won the Scottish A.A.A. 10 Miles Championship. His times for 8, 9, and 10 miles (42 mins. 15½ secs., 47 mins. 39½ secs., 53 mins. 1 sec.) were Scottish records. The feature of the A.A.A. Distance Championships at Stamford Bridge Grounds, Fulham, on April 19, was the failure in the Ten Miles Run of F. J. O'Neill, G. W. Hutson, and G. C. L. Wallach. E. Glover, of the Hallamshire Harriers, won in 51 mins. 56½ secs. There was a dead heat in the Seven Miles Walk between R. Bridge, Salford Harriers, and H. E. L. Ross, Uxbridge and West Middlesex A.C., the time being 52 mins. 8 secs. Ross, however, was allowed to fairly "gallop" during the last furlong, and Bridge's last 100 yards was not above suspicion. The Public Schools Meeting was held at Stamford Bridge on April 23. The "Champion School" Cup for the school securing the greatest number of marks ended in a dead heat between Bury and Bradfield. As regards individual winners, J. Selincourt, Bradfield, won the Half-Mile in 2 mins. 7½ secs. and the Quarter in 55 secs.; W. Morris, Bury, the Long Jump at 20 ft. 7½ ins. and the Hundred Yards in 11½ secs.; P. S. Bourne, St. John's, Leatherhead, the Mile, 4 mins. 59½ secs.; H. A. L. Donkin, Abingdon, the Three-Quarter Mile Steeplechase, 4 mins. 32½ secs.

After standing as a record since April, 1885, the figures put up at Balham for Fifty Miles Running by J. E. Fowler Dixon were beaten on Whit Monday by 4 mins. 28½ secs. The venue was Stamford Bridge, and the successful runner E. W. Lloyd, Herne Hill Harriers, in a race promoted by the Finchley Harriers, for which there were ten starters. One was H. Green, Herne Hill Harriers, who only competed with the idea of beating the previous best time for the Marathon distance of 26 miles 38½ yds. In this he succeeded, covering the distance in 2 hrs. 38 mins. 16½ secs., as against 2 hrs. 47 mins. 10 secs. made by A. Simms on June 25, 1910; he then retired. Lloyd's full time was 6 hrs. 13 mins. 58 secs.

The last day of May saw J. P. Jones (Cornell University) set up a mile record in America, his time being 4 mins. 14½ secs.; whilst in England A. Ahlgren, Sweden, won the Marathon Race from Windsor to Stamford Bridge in 2 hrs. 36 mins. 6½ secs., which beat the record made by J. Corkery (Canada) the previous year by 49 secs. On the same afternoon, at Stamford Bridge, W. R. Applegarth, Polytechnic Harriers, ran 150 yards in 14½ secs., which equalled British record. On June 28 Applegarth won the Territorials Championship at One Hundred Yards at Cardiff in 9½ secs., equalling the record set up by G. H. Patching at Stamford Bridge the previous year. On the same afternoon he beat R. E. Walker's 150 yards record of 14½ secs., made at Durban in 1909, doing 14½ secs.

The A.A.A. Championship Meeting was at Stamford Bridge on July 5, when no fewer than eight champions failed to turn out, and of the remaining six four retained their titles. Applegarth took the Hundred Yards in 10 secs. and the 220 Yards in 21½ secs.—time which beat British record by ½ sec. G. W. Hutson, Surrey A.C. (holder), won the Four Miles after a great race with E. Glover, Hallamshire Harriers, in the fine time of 19 mins. 32 secs., doing 60 secs. for the last lap. The other winners were G. Nicol, Polytechnic, Quarter-Mile, 49½ secs.; E. Wilde, Sweden, Half-Mile, 2 mins. 0½ sec.; J. Zander, Sweden, One Mile, 4 mins. 25½ secs.; R. Bridge (holder), Two Miles Walk, 13 mins. 51½ secs.; C. H. Ruffell, Highgate Harriers, Two Miles Steeplechase, 11 mins. 3½ secs. G. H. Gray, Salford Harriers, 120 Yards Hurdles, 16 secs.; B. H. Baker, Liverpool Harriers (holder), High Jump, 6 ft.; S. S. Abrahams, Cambridge University A.C., Long Jump, 22 ft. 6 ins.; C. Gille, Sweden, Pole Jump, 12 ft. 1 in.; E. Nilsson, the Weight, 47 ft. 4½ ins.; and C. Lind, Sweden, the Hammer, 155 ft. 7½ ins.

The feature of the Army Championship Meeting at Aldershot at the end of July was the running of G. W. Hutson, who won the Mile in 4 mins. 30½ secs. and the Three Miles in 14 mins. 46½ secs.

At South Field, Columbia University, on Nov. 2, Hannes Kolehmainen was reported to have beaten all running records from 3½ miles to 10 miles (51 mins. 3½ secs.), but these records had yet to be passed.

The Secretary of the Amateur Athletic Association is Mr. P. L. Fisher, 10, John Street, Adelphi, London, W.C.

BILLIARDS.

MELBOURNE INMAN, in the billiards season which closed in May, retained the championship of the Billiard Association and of the Billiards Control Club. There was no challenger for the former, but Thomas Reece in the latter was only defeated after a strenuous match by 1,373 points in 18,000 up. The play was of the finest description, two breaks of over 500 being scored—one by each player. Reece's 535 is second only to Stevenson's 648 made in championship matches under the auspices of the Billiard Association and B.C.C. Inman had an average for the whole match of 26·85, and Reece an average of 24·84. Inman scored fifty-six breaks of over 100, and Reece fifty-seven.

Inman also won the annual Professional Tournament, winning from scratch five of six matches, and losing only one, to T. Reece. This tournament, which ran right through the

season, was noteworthy for the introduction of three young players in W. Smith, T. Newman, and A. F. Peall, son of the old champion. They all justified their promotion, for Smith won the second prize, and Newman made 127 breaks of 100 and over. Reece, though only third, was the most prolific scorer, claiming the best aggregate and average, and made breaks of 751, 589, and 527, with a total of 165 breaks of 100 and over. Inman, however, was a model of consistency; and at the other end E. Diggle failed to win a single game. Inman's best breaks were 894, 787, and 570. The following table shows the results of the competition:—

	Won.	Lost.	Aver.	Pts.
Inman (scratch) ...	5	1	35.38	65
Smith (2,250)	4	2	29.52	69
Reece (1,000)	4	2	39.47	66
Newman (2,250) ...	3	3	30.71	64
Alken (1,500)	3	3	36.79	55
Peall (3,000)	2	4	22.77	58
Diggle (1,000)	0	6	31.89	32

Mr. H. C. Virr, of Bradford, again won the Amateur Championship of England, his opponent in the final being Mr. S. H. Fry, who was beaten by 2,000 to 1,656. Mr. Fry had won the championship many years ago, but had not competed of recent years. The championships of the other countries were won by—Wales, Mr. W. E. Thomas; Ireland, Mr. J. Nugent; Scotland, Major H. L. Fleming. In the United Kingdom Championship Mr. H. C. Virr, the holder, defeated Mr. J. Nugent. The Amateur Championship of the Billiards Control Club was won by Mr. A. W. Sellar. During the season futile efforts were made to bring about a settlement between the B.A. and the B.C.C. Mr. G. B. Shailer, playing in the amateur championship of New South Wales, set up a new amateur break record of 268; the previous best was 255, credited to Mr. H. C. Virr.

BOXING, FENCING, AND GYMNASTICS.

THE year 1913, if it failed to produce anything remarkable, was very satisfactory in one respect. The quality of boxing at the Universities and public schools was decidedly better than in some previous years. The championships of the Scottish A.B.A., decided at Edinburgh on March 1, were intended to serve a treble purpose, as nominations for the championships and for a match *v.* Denmark a month later were to be made from the competitors. The entry was large and representative, and the competition keen, but the class was not very high. The winners were: 8 st. 4 lb., W. Buchan, Leith and Tolbooth; 9 st., D. Vallance, Melbourne; 10 st., J. Buchanan, Eastern; 11 st. 4 lb., W. Samuels, Edinburgh Gymnastic; Heavy Weight, J. Whiteford, Edinburgh Gymnastic.

Cambridge scored a great victory over Oxford in the Inter-Varsity competitions at the Corn Exchange, Cambridge, on March 3, winning four events to two, after some wonderfully exciting sport. For the first time the fencing events were not included in the programme, being arranged as an independent competition. In the boxing only two old hands competed, viz., F. C. Bourne, the Oxford captain, and P. D. H. Dressler, the Cambridge welter weight. The Bantam Weight was won by P. L. Roy, a coloured boxer, St. Paul's School and Emmanuel, Cambridge, who beat F. D. Levy, Clifton and St. John's, Oxford, inside two minutes. R.

Morton, Radley and Exeter, Oxford, owed his narrow success in the Feathers over A. G. D. Gavin, Haileybury and Peterhouse, Cambridge, mainly to superior defence. J. W. F. McNaught Davis, Worksop and St. Catherine's, Cambridge, boxed very well at long range to defeat L. A. W. Yough, Harrow and University, Oxford, in the Light Weights. C. S. Ward, Eton and Christ Church, Oxford, had P. D. H. Dressler, Feisted and Clare, Cambridge, beaten in the first round of the Welter Weights, but P. M. L. Edmunds, Eton and King's, Cambridge, only just won the Middles after a very hard bout with A. G. R. Anderson, Bedford and University, Oxford. The Heavies was fought by R. R. Rawson, Bedford and Trinity, Cambridge, and F. C. Bourne, Rugby and Christ Church, Oxford. The Oxonian appeared to be winning well at the end of two rounds, but then Rawson forced the pace to such effect that an extra round was ordered. In that Rawson fought his man all over the ring and finally knocked him out.

The usual gigantic entry was received for the Amateur Boxing Association's Thirty-third Championships, decided on March 12 at the Alexandra Palace, Wood Green, and although absentees and overweights reduced the number to the extent of 20 per cent., boxing was in progress for nearly eleven hours without an interval of any sort. In addition, a second ring had to be utilised during part of the afternoon. Whether the Association are wise in accepting all entries sent in is a matter of opinion, for several men who took the ring had never won an ordinary club competition, and some would have had great difficulty to win in a novice class. With the exception of E. V. Chandler, the middle weight, all the 1912 champions defended. W. W. Allen, Poly. B.C., the bantam champion, got as far as the final, but was then beaten by W. Wye, Columbia B.C., who had twice defeated him in open competitions previously. The final of the Light Weights found the Olympic champion, Fred Grace, and the holder, R. Marriott, Stansfeld B.C., in opposition, and fast and clever left-handed work earned Grace the victory. In the Feathers, G. R. Baker, Hendon B.C., the holder, beat J. O'Neill, Gloucester. W. Bradley, Bermondsey Catholic B.C., had little difficulty in accounting for J. B. Webb, Scottish B.C., in the final for the Middles; whilst in the final for the Heavies, R. Smith, Metropolitan Police, the holder, walked over, H. Johnson, Metropolitan Police, retiring.

The Public Schools competitions continue to grow in popularity. In 1913 the entries were so colossal that the early bouts had to be boxed on the evening of March 13, and a resumption made the following day at 10.30. The Gymnasium at Aldershot was again the venue, and the remarkable feature of the meeting was that Clifton College won four out of the six events. The form generally was very promising. Clifton winners were A. McColl (Bantams), C. A. B. Elliott (Lights), H. S. Kirkwood (Welter), and C. L. Mackay (Heavies). H. G. Sheldon, Haileybury, won the Feather Weights, and W. A. Crebbin, St. Paul's, the Middles. The Gymnastics and Fencing competitions were brought off at the same time and place. A. H. L. Egglestone, Rugby, won the Sabres, and R. G. Garvin, Westminster, the Foils, whilst the school gaining the highest aggregate marks for gymnastics was Cranleigh (represented by C. B. Short and J. A. Walker) with 134. A. E. R. Gilligan, 71½ marks,

of Dulwich School, won the cup for the best individual performance, C. B. Short being second.

Once more there was an enormous entry for the Army Championships, held at Aldershot on April 3 and 4. The quality of the boxing showed a distinct improvement over recent years, but the management of the meeting left a great deal to be desired. The Officers' competitions were won by Lieut. C. F. Crousaz, 1st South Staffordshire (Feathers); Lieut. A. M. Read, 1st Northamptonshire (Light Heavy Weights); S. I. Colquhoun, Bart., 1st Irish Gds. (Lights); and Lieut. G. Le Q. Martel, Royal Engineers (Welter). The Non-Com. Officers and Men's bouts were won by Pte. Willis, 1st Royal Welsh Fusiliers (Feathers); Lance-Corpl. Miller, 1st Loyal North Lancashire (Light Weights); Lance-Corpl. Redrup, East Surrey Regt. (Welter); Pte. Murray, 1st Scots Gds. (Middles); Pte. Robinson, and Coldstream (Heavy Weights). The Light Heavy Weight was declared "no competition" owing to the tactics of the men in the final.

The Irish Amateur Championships at Dublin on April 4 and 5 yielded only poor sport. The winners were E. Kelly, Dublin (Bantams); D. J. Tubridy, D.A.B.S. (Feathers); B. McGill, Dublin (Lights); P. Fox, Kells (Middles); and J. McDonald, Naas (Heavies). The National Sporting Club, London, was the scene of the Inter-Hospital contests on June 10, when the winners were N. E. Fasken, Guy's (Feathers); F. W. Stiven, Guy's (Lights); G. W. Coombes, London (Welter); — Hartgill (Middles); and F. C. Lapage, Middlesex (Heavies). In the fencing, London won the Epee and Sabres, and London had a walk-over in the gymnastics.

The Individual Gymnastic Championship of England was decided at Birmingham on Feb. 22, and attracted an entry of eighty competitors, but E. W. Potts, of the Polytechnic Club, who won in 1912, did not defend. The winner proved to be L. Hanson, of Bradford, who won in 1911. His score was 73½ points, his nearest rival being W. Cowing, South Wales, with 57½ points, whilst J. Whitaker, Birmingham, was third with 57 points. The Adams Shield, carrying with it the English Club Championship, had its final stage at the Northampton Institute on May 3, when the Northampton Polytechnic Institute defeated Birmingham and District (City team) by 521 points to 507.

For the first time the fencing contests between Oxford and Cambridge were dissociated with the boxing meeting of the Universities, and took place at the Sword Club, London, on May 7, when Oxford won the Foils by 5 to 4 and the Sabres by 3 to 1. G. R. Alexander, Tassart's School of Arms, won the Amateur Fencing Championship.

CRICKET.

For the fourth time in eight seasons Kent carried off the County Cricket Championship. Though perhaps not a convincing side, Kent thoroughly deserved their win. Their last two matches—against Northamptonshire, whom they defeated brilliantly by five wickets, and with Middlesex also beaten, though by only five runs—were especially noteworthy. There was, it is true, an absence of brilliancy from their batting, and their fielding was at times not up to their usual high standard, but these defects were amply atoned for by their steadiness. Their record of 20 wins out of a possible 28 was an

improvement upon that of the previous season, when they could only show 14 wins with 5 losses in 26 matches. Kent's sole defeats were at the hands of Gloucestershire, Notts, and Surrey, in each case away from home.

Yorkshire were a good second in the Championship after an excellent season, in which their defeats were from Gloucestershire, Lancashire, Northants, and Surrey. The county owe their position mainly to the old brigade as represented by Hirst, Rhodes, Denton, Haigh and Wilson, but these were ably assisted by Booth, Drake, Kilner, Dolphin, Birtles and Holmes, with Sir A. W. White as captain. Surrey, who claim third place, were at times irresistible, but on soft pitches they were unreliable. For them Hobbs, with an average of 52, made no fewer than eight centuries, highest innings being 184 against Worcestershire. Hitch's fast bowling (154 wickets for 20) had much to do with the improvement of Surrey's position. The following table gives the final positions in the Championship:—

County.	Played.	No Result.	Won.	Won on 1st Innings.	Lost on 1st Innings.	Lost.	No. of Points Obtained.	No. of Points Possible.	Percentage.
Kent (3).....	28	1	20	3	1	3	110	135	81·48
Yorkshire (1).....	28	1	16	4	3	4	95	135	70·37
Surrey (7).....	25	0	13	4	5	8	150	150	62·30
Northants (2).....	22	0	12	1	5	4	68	110	61·81
Notts (8).....	20	0	8	3	4	5	53	100	53·00
Middlesex (5).....	20	0	7	4	3	6	50	100	50·50
Sussex (10).....	28	1	10	4	3	10	65	135	48·14
Lancashire (4).....	26	1	7	7	0	11	56	125	44·80
Gloucester (11).....	22	0	8	1	2	11	45	110	40·90
Hants (6).....	26	0	7	4	4	11	51	130	39·23
Warwick (9).....	24	0	7	3	3	11	47	120	39·16
Worcester (16).....	20	1	6	1	3	9	36	95	37·89
Derby (12).....	18	0	4	2	2	10	28	90	31·11
Leicester (13).....	22	0	4	1	4	13	27	110	24·54
Essex (15).....	18	1	2	2	4	9	20	85	23·52
Somerset (14).....	16	0	2	2	1	11	17	80	21·25

The figures within parentheses indicate the positions in which the counties finished in 1912.

The points are awarded as follows: Five points for a win outright; in the case of a draw three points for a win on the first innings and one point to the side losing on the first innings. In a case of ties the points are equally divided. Matches not started or in which not even a result on the first innings is forthcoming are not taken in account, the maximum points being ascertained by deducting the number in the "no result" column from the total number played, and multiplying the balance by five.

Thanks to the fine weather during nearly the whole of the season, the majority of the matches yielded definite results. In all there were 182 matches, of which 81 were won by the home and 52 by the visiting sides. Of the 49 left drawn, all except three yielded a first innings result. The number of players taking part was 345, and there were 189 scores of a 100 or over, the highest innings being the 257 not out by Braund for Somerset against Worcestershire. The number of centuries was twice that of the previous year (95), when the season was abnormally wet. With good wickets many exceptionally high scores were recorded, notably when Notts at home v. Leicestershire declared at 507 for the loss of only three wickets. The lowest innings total was that of Warwickshire at Tonbridge in June, when Kent got them all out for 16. The following table will show at a glance the result of every game in the

County Championship series of 1913; the top line shows the outcome of the home fixture, the bottom line the result of the contests played away:—

County.	Derbyshire.	Essex.	Gloucester.	Hampshire.	Kent.	Lancashire.	Leicestershire.	Middlesex.	N'th'mp't'n.	Notts.	Somerset.	Sussex.	Warwick.	Worcester.	Yorkshire.

w Won. v Won on the first innings. x Lost on the first innings. L Lost. n No result arrived at.

Amateurs played but a poor part during this season. The absence of C. B. Fry and R. H. Spooner was partly accountable. P. F. Warner, despite a long illness, scored over 1,000 runs, and Gilbert Jessop played several of his brilliant innings, whilst E. L. Kidd and R. B. Lagden were conspicuously successful for Cambridge. The outstanding figure amongst the amateurs, however, was the Hon. L. H. Tennyson, a grandson of the poet, who made a startling debut for Hampshire and wound up fifth in the averages with 46.22. He was selected as one of the M.C.C. team which went out to South Africa last October, and he will again play for his county this year. Of the amateur bowlers nothing could be better than the form of H. L. Simms (24 wickets for 15.37 runs apiece), and his display for the Gentlemen at the Oval and Lord's will always be remembered.

There was a race amongst professional batsmen for top place in the averages, and it was not till the very last match of the season at the Oval that the first three positions were decided, C. P. Mead (Hampshire) finishing with 50.51 just ahead of Hobbs (Surrey) 50.9 and G. Gunn (Notts) 49.91. Though Mead beat Hobbs both in average and aggregate of runs, most people would give the palm to Hobbs as the batsman of the year. He was the man for the big occasion, and the quality of his batting was equal to any he had previously shown. Hobbs and Mead both scored 9 centuries. George Gunn played better than ever before, and Woolley (Kent), average 45.12, also did great things till stopped by an injury. Two other Kent batsmen,

Hardinge (41.57) and Seymour (38.66), though below Woolley, both scored 2,000 runs. Amongst those who may be classed together as the all-round players of the year, all having scored over 1,000 runs and taken 100 wickets, were J. W. Hearne (Middlesex), Tarrant (Middlesex), S. G. Smith (Northants), Albert Relf (Sussex), Drake (Yorkshire), Booth (Yorkshire), and Hirst (Yorkshire). J. W. Hearne, who is only 22, is one of the most remarkable figures in cricket at the present time, and no professional has ever done so much at his age.

The best bowler of the year was undoubtedly S. F. Barnes. He only played in four first-class matches, in which he took 35 wickets for 10.02. Amongst the bowlers who did the hardest work of the season were Drake (116 for 16.93), Booth (181 for 18.45), Hitch (174 for 18.55), Blythe (167 for 16.34), Tarrant (136 for 17), Thompson (148 for 17.36), and Albert Relf (141 for 18), of whom Booth, Drake and Hitch greatly increased their reputations. D. W. Carr, the "googly" bowler, took 60 wickets, but the cost (18.37 runs apiece) was much larger than the previous year.

There were 223 scores of 100 and over, of which 189 were made in connexion with the County Championship. This total was above that of the previous year (161), but less than in 1911 (257). The highest individual innings was 257 (not out) by Brand for Somerset v. Worcestershire. Five others, W. H. Denton, Woolley, J. T. Tyldesley, Bowley, and Lee, scored innings of 200. Six instances occurred of scores of a hundred being made in each innings, viz., by Mead, Quaife, G. Gunn, King, Charlesworth and Hardinge.

The Inter-University match, the 79th of the series, resulted in a four wickets victory for Cambridge, and the record now stands: Cambridge, 38; Oxford, 33; drawn, 8. Oxford, batting first, scored 141, and in reply to Cambridge's 187 were all out for 191 in their second innings. The Light Blues, with only 146 to get to win, took three hours to get the runs, of which R. B. Lagden contributed 45. The Eton and Harrow match was won by Eton by nine wickets. Harrow have not beaten Eton since 1908. The match was notable for an innings of 173 by the Harrovian G. Wilson, made in four hours. This is a record individual innings for Harrow, and only 10 short of D. C. Boles's 184, which is the Eton record. Harrow have now won 35, Eton 35, and 18 matches have been drawn.

Both the matches between the Gentlemen and Players produced exciting finishes. At the Oval the Gentlemen had the better of the game, scoring 139 for 9 (declared) and 416. The Players, having made 131 in their first innings, were left on the last day with 433 to get in 4½ hours. They managed to avoid defeat, though eight wickets were down with only 13 minutes' play to go. It was an exciting finish to a great match, in which Mr. G. L. Jessop contributed innings of 81 and 107. The match at Lord's was won by the Players by seven wickets, after a remarkable display of bowling by Barnes, who in the second innings of the Gentlemen—all out for 102—took seven wickets for 38. The Players wanted 123 to win, with an hour and three-quarters to get the runs in. They got them, with only six minutes to spare.

Cricketers had to mourn the loss of the Hon. Alfred Lyttelton, who died in the early part of July.

CROQUET.

THE revival of croquet which set in a few seasons previously, was fairly well maintained, if not extended, in 1913. The Tournament list followed much the same lines as in the previous season, though it must be confessed that one or two of the leading players did not show their best form on some important occasions. The Inter-County Championship at Hurlingham in June was well supported. Nearly three hundred games were played, and in the result Middlesex took first honours. The Championship meeting of the Croquet Association was held at Roehampton during the last week in June. A surprising feature was the defeat on the first day of P. D. Matthews by H. F. Crother Smith. In the final Cyril Corbally beat H. Wright 7 plus 26, this being his fifth success in the event. With Miss E. Read as partner, Herbert Corbally took the Mixed Doubles Championship, whilst in the Ladies' Championship final, Lady Julian Parr beat Miss H. Clunie Dale, 14 plus 27. The Champion Cups at Roehampton at the end of July were competed for by most of the leading players of the season. Cyril Corbally played in excellent form throughout, as did J. Tuckett, the result being that they tied (the competition is on the tournament principle) with twelve games each. In the play-off Corbally won; P. D. Mathews was third. There was also a tie for the Ladies' Cup, Mrs. W. P. Blood and Miss E. D. B. Simeon each winning seven games. In the decider, Mrs. Blood was successful. The Ranelagh Club Championship was won by Mrs. R. C. J. Beaton, whilst the Gold Medal at Eastbourne fell to H. Wright, Mrs. W. P. Blood securing the Ladies' Gold Medal.

CYCLING.

THE season of 1913, if somewhat quiet, was satisfactory, inasmuch as it gave British amateurs an opportunity of proving themselves still supreme in the sport of cycling. There was a rather marked absence of new blood so far as racing men are concerned; but the old stagers continued to show good form, although R. L. Player and C. B. Kingsbury were not quite so prominent as previously. The first series of the National Championships was decided on June 14, upon the Long Eaton track. The events were the Twenty-five Miles, for which R. L. Player, the holder, did not defend, and the One Mile Tandem. The first was won by H. E. Ryan, Polytechnic C.C., W. R. Smith, South Africa, being second, and R. H. Clarke, Polytechnic C.C., third; time, 1 hr. 4 mins. 17½ secs. Smith had only been in England a few days, and rode a strange machine. The tandem race was won by the brothers A. and C. White, of Scunthorpe, in 2 mins. 2½ secs. More important was the meeting held at Norwich on the 28th of the same month, for the programme included the Quarter-Mile, One Mile, and Five Miles Championships. The South African, Smith, was keen on winning the latter, but a collision with H. E. Ryan put both men out of court, and victory went to R. L. Player, Cambridge, who won by half a length from E. W. Stanford in 13 min. 0½ secs. V. L. Johnson, the holder of the Quarter-Mile, was defeated in the final of that event by a length by W. J. Bailey, Polytechnic C.C., whose time (30½ secs.) beat all records for the track. Bailey also retained possession of the Mile Championship, defeating V. L. Johnson and E. Payne in the final heat, which was ridden in 2 mins. 45½ secs.

On June 28 the Southern Counties Cyclists' Union decided their six hours' race at the Herne Hill track. There was only a small entry, and C. H. Bartlett, the holder, did not compete. W. G. Stewart took the lead at the end of an hour, and, keeping it to the close, won with 148 miles 1,020 yds., his nearest rival being M. G. Selbach, with 145 miles 550 yds. Distance racing is, however, no longer popular, as was proved in the N.C.U. One Hundred Miles Race at Herne Hill on August 2, which brought out only six riders; whilst the Anerley B.C. "Fry" trophy, competed for in conjunction with the N.C.U. event, attracted only two entries—H. M. Ellis and B. H. Hogan (on a tricycle). The South African, W. R. Smith, won the N.C.U. race easily in 3 hrs. 40 mins. 44½ secs., and going on he beat H. H. Lee's four hours' record of 106 miles 703 yds., made in 1911, by covering 108 miles 1,000 yds. Ellis retired after riding 72 miles, leaving Hogan to win the "Fry" trophy in 4 hrs. 33 mins. 50 secs.

The World's Championships were decided at Berlin at the end of August, when England played a great part, for W. J. Bailey won the 1,000 Metres for the fourth time, and Leon Meredith, Paddington C.C., took the 100 Kilometres for the seventh time. On the 9th of August twenty-two riders contended for the Fifty Miles Championship at Herne Hill, the holder, C. B. Kingsbury, not being of the number. A. Alden, Kentish Wheelers, won a great race by inches from S. F. Bailey, the time being 2 hrs. 53½ secs. The customary centre championships were decided during the year, and the "Meeting of Champions" (which produced nothing wonderful) occurred on September 6. Some fresh records were set up, which appear in the tables elsewhere.

The Secretary of the N.C.U. is Mr. S. R. Noble, Lonsdale Chambers, 27, Chancery Lane, London, W.C.

FOOTBALL.

THE ASSOCIATION GAME.

By a happy coincidence, the jubilee year of the Football Association, which was celebrated in November, was marked by the prospect of peace between that body and the Amateur Football Association. The split had lasted six years, and had proved detrimental to amateur clubs like the Varsities and the Corinthians, who were unable to play against first-class professional teams. That there was no decrease in the popularity of the game was proved by the crowd of 120,000 persons being attracted to the English Cup final tie at the Crystal Palace, one-half of whom probably were unable to see anything of the play. The inadequate accommodation was the subject of adverse comment, and the Football Association is confronted with the problem of finding a new venue or of improving and enlarging the accommodation at the Palace—a matter of some difficulty, as at present the future of the place is still somewhat nebulous. A sensational sequel to some unpleasantness during the play was the suspension of two of the players and the referee, Mr. Adams.

The International Championship resulted in a victory for England, despite a defeat by Ireland in the first of the three matches—the first victory of Ireland over England in the 32 matches played by the two countries. In the last match of the series, at Stamford Bridge, England had to win

to secure the championship, and did so by the margin of one goal to love. There were 52,000 spectators, which was the largest attendance ever seen at an international match in England. Prior to 1883-4 the championship was decided by matches between England and Scotland only. Including 6 ties as wins, the record now stands: Scotland, 24; England, 22; Wales, 1; Ireland, 1. The following table summarises the results of 1913:—

		Gls.		Gls.
Jan. 18	Belfast ... Wales.....	1	bt. Ireland ...	0
Feb. 15	Belfast ... Ireland.....	2	bt. England ...	1
Mar. 3	Wrexham Wales.....	0	dr. Scotland...	0
" 15	Dublin ... Scotland..	2	bt. Ireland ...	1
" 17	Bristol ... England..	4	bt. Wales	3
April 5	(Stamford Bridge) England...	1	bt. Scotland...	0

The positions, therefore, were:—England, 4 points; Scotland and Wales, 3 points; Ireland, 2 points.

The English Football Association succeeded in inducing France to enter into the International Federation, which now includes all the nations except Bohemia. Consequently, the series of Amateur International matches was enlarged by the inclusion of France, and it was notable for the first victory of Holland over England—a remarkable testimony to the development of the Association game on the Continent. The results of England's matches were:—England beat Belgium (4-0), beat France (4-1), beat Germany (3-0), lost to Holland (1-2), lost to Ireland (2-3), and beat Wales (3-1). Matches played, 6; won, 4; lost, 2. Goals for, 17; against, 7.

The Amateur Football Association's international programme was shorn by the defection of France, and, therefore, only two matches were played, both of which were won—viz., at Prague, v. Bohemia (4-0), and at Tufnell Park, v. Wales (6-0). A match was also played against the Public Schools, and was won by the A.F.A. eleven by 7-0. The final of the A.F.A. Cup was won by the Casuals, who beat New Crusaders 3-2. The "Arthur Dunn" Cup was carried off by Old Brightons, who beat Old Aldenhamians 2-1. The inter-Varsity match resulted in a drawn game, 2 goals each, and the record now stands:—Cambridge, 19 wins; Oxford, 18 wins; drawn games, 3.

The fact that the teams engaged in the final tie of the Football Association Challenge Cup—Aston Villa and Sunderland—were also fighting out the battle for First League honours attracted over 120,000 people to the Crystal Palace, the total receipts being £9,406. Aston Villa won by 1-0, but on the whole it was a disappointing game. Aston Villa have won the Cup five times, thus equalling the record of the Wanderers and Blackburn Rovers. In the course of the competition the Villa defeated Derby County (3-1), West Ham United (5-0), Crystal Palace (5-0), Bradford (5-0), and Oldham Athletic (1-0). Sunderland beat Clapton Orient (6-0), Manchester City (2-0), Swindon Town (4-2), Newcastle United (3-0), and Burnley (3-2). The unpleasant incident regarding two of the players has been alluded to. It should also be mentioned that the Association was adversely criticised by the Press for their lack of attention to the convenience and safety of the public.

The F.A. Amateur Cup was retained in the north, South Bank defeating Oxford City in the final (1-0), after a drawn game (1-1) at Reading.

The Scottish Cup was won by Falkirk, who beat Raith Rovers 2-0. Swansea Town beat Pontypridd 1-0 in the final of the Welsh Cup; and Linfield won the Irish Cup by defeating Glentoran 2-0. The Rangers again retained the championship of the Scottish League—their third win in succession. Glentoran retained the championship of the Irish League.

As some solatium for losing the English Cup, Sunderland carried off the League Championship with the record aggregate of 54 points, 5 more than those recorded by Blackburn Rovers the previous year. This is the fifth championship of the League won by Sunderland, who were first in 1891-2, 1892-3, 1895-6, and 1901-2. Notts County and Woolwich Arsenal were relegated to the Second Division, their places being taken by Preston North End and Burnley. Plymouth Argyle headed the Southern League. Brentford and Stoke were relegated to the Second Division, their places being taken by Southend United and Cardiff City.

The Secretary of the *Football Association* is Mr. F. J. Wall, 42 Russell Square, London, W.C. The Hon. Secretary of the *Amateur Football Association* is Mr. H. Hughes-Onslow, 79½ Gracechurch Street, London, E.C.

RUGBY UNION.

The most noteworthy features of the season were the recovery by England after 21 years of the triple crown as well as the International Championship, the successful tour of the South African team, the steady improvement of the play of English clubs, and the trouble caused by semi-professionalism in the West of England.

The South Africans were a fine team. Their pack were giants for height and strength, but their backs, though good, were not quite of the class of the previous combination. They had to fight hard for their victories, and though they were beaten by Newport, Swansea, and London, they established a record by winning all their National games. Of their 27 matches, they won 24, and lost 3. Their tour did much to increase the interest in Rugby in both England and Wales. As stated above, England won the International Championship, and by beating Scotland also holds the Calcutta Cup. The relative positions were:—

						Pts. for.	Pts. agst.
	P.	W.	D.	L.	G.	T. P.	G. T. P.
England.....	3	3	0	0	3†	6 30	1* 0 4
Wales.....	3	2	0	1	4†	2 24	5*†1 25
Scotland.....	3	1	0	2	4	3 29	4* 2 26
Ireland.....	3	0	0	3	7**	0 3	8††8 60

*Dropped goal.

†Penalty goal.

The following table shows the results of all the international matches:—

		G.T.		G.T.
Jan. 1-Paris....	Scotland(21)	3 2	bt. France (3)	0 0
Jan. 18-Cardiff...	England(22)	2 1	bt. Wales	0 0
Jan. 25-Twickenham	England(20)	5 1	bt. France.....	0 0
Feb. 1-Edinburgh...	Wales (8)	1 1	bt. Scotland.....	0 0
Feb. 8-Dublin....	England(23)	11 4	bt. Ireland (4)	* 10
Feb. 22-Edinburgh	Scotland(29)	4 3	bt. Ireland (14)	* 30
Feb. 27-Paris.....	Wales (11)	1 2	bt. France (8)	1 1
Mar. 8-Swansea...	Wales (16)	13 1	bt. Ireland (13)	3 0
Mar. 15-Twickenham	England (30)	1	bt. Scotland.....	0 0
Mar. 24-Cork.....	Ireland (24)	3 3	bt. France	0 0

* One dropped goal.

† One penalty goal.

England deserved her position at the head, for the English line was only crossed once, and then by the South Africans, who won by 2 penalty goals and a try to a try. The victory

over Wales at Cardiff was the first achieved for 18 years in the Principality. At Dublin the success was substantial, and the win over Scotland at Twickenham was hard-earned. The advance of England was due to their fine forwards (who were played throughout with only one exception), the return to older methods, straight running, and strong individual effort.

The annual inter-Varsity match at Queen's Club resulted in a victory for Cambridge, the first since 1905-6. The Light Blues won by 2 goals to a try (10 points to 3). The Cambridge pack was a remarkably good one, and the heaviest of recent years. The record now stands—Oxford 18 wins, Cambridge 13 wins, drawn 9. The Navy defeated the Army in the annual match at Queen's Club by 3 goals and 1 try to 1 goal and 1 try. Gloucestershire recovered the County Championship, which they held in 1909-10, it having fallen to Devon in the two succeeding years.

The Rugby Union offices are on the Union's ground at Twickenham (Sec. : C. J. B. Marriott).

GOLF.

THERE were no signs that the popularity of the Royal and Ancient Game had reached high-water mark in 1913. New courses continued to be laid out in various parts of the Kingdom, fresh clubs were founded and players increased in numbers. What may be termed the "first class" programme lasted from March to October and proved to the full as interesting as its predecessors.

Amongst important events of the early year was the London Amateur Foursomes Tournament, decided at Stoke Poges during the last week in March. For this forty-six clubs entered, and victory ultimately went to Messrs. H. E. Taylor and H. L. Doherty, of Coombe Hill, who in the final beat J. L. Heath and W. G. C. Munsie (Eltham) by 5 and 4. April would have been an uneventful month but for the University match, decided at Hoylake. It was not a great contest, and it ended in a tie, 4 matches each, which left the record for the series at 16 matches each, with 3 ties. The Army Cup Tournament concluded at Deal, when the Black Watch won for the third time in succession and the 9th time in all. The £350 Tournament promoted by "The Sphere and Tatler," also at Deal, was productive of some surprising results, and on the first morning the Open Champion, Edward Ray, and three ex-champions in Jas. Braid, Alexander Herd, and Jack White, together with their partners, were defeated. Harry Vardon and T. Williamson played fine golf throughout, and in the final won from Joshua Taylor and B. F. James by 7 and 5.

Although the entry for the Amateur Championship is now restricted to scratch and plus men, 198 players sent in their names for the event, or only two short of the record made in 1907. The contest commenced at St. Andrews on May 26. Owing to heavy rains a good deal of water remained at the bunkers. There was quite a lot of sensational play, one disqualification (for late arrival), and the Americans made a great effort to capture first honours. The Royal Liverpool Club house had sheltered the cup in 1910, 1911, and 1912, as the result of successes by Mr. John Ball (in the first and last-named years) and Mr. Harold Hilton. This time Mr. Hilton won again, beating Mr. R. Harris (Acton) by 6 up and 5 to play, the approximate scores being

72 and 56=128 (for 30 holes) by Mr. Hilton and 84 and 58=142 by Mr. Harris. A heavy thunderstorm prevailed part of the time, and the conditions were about as bad as they could be. It is worthy of note that Mr. Hilton won the Open Championship in 1892 and 1897, was Amateur Champion in 1900 and 1901, 1911 and 1913, and American Amateur Champion in 1911. The Ladies' Championship at St. Anne's-on-Sea, during the first week in June, resulted in Miss Muriel Dodd (Moreton) beating Miss Chubb (Fulwell) in the final by 8 and 6.

	1912. John Ball.
	1913. H. H. Hilton.

On June 9 and 10, there was an important professional home and home match, the competitors being Edward Ray and George Duncan, who contested 36 holes over each course, Walton Heath and Sunningdale, for £100 a-side. Apart from stroke competitions, Ray had never beaten Duncan, and this meeting between them proved remarkable. They started level on the last 36 holes, were still all evens at the end on the second morning's play, and in the afternoon Ray was several times down until the 15th hole, when he was "up." He lost his advantage at the 17th, and eventually the match was halved on the last green. Mr. Abe Mitchell won the "Golf Illustrated" Vase at Walton Heath on June 13, and on the 17th the England v. Scotland professionals' match was played at Hoylake, when England won for the fifth time out of six, taking 9 singles to 3, and 4 foursomes to 1. This match served as a prelude to the Open Championship over the same course, which started on June 19. There was sensation when Duncan failed to

survive the qualifying sections, and wonderful golf was associated with the close when J. H. Taylor (Mid-Surrey), won with an aggregate of 304 strokes, eight better than E. Ray, his nearest opponent. Harry Vardon was third, a stroke worse than Ray. It was Taylor's fifth win—a record also boasted by Jas. Braid and Harry Vardon.

Early in September Mr. Jerome Travers won the United States Amateur Championship for the fourth time, and in the middle of that month there was an extraordinary finish to the U.S. Open Championship, the British representatives, Harry Vardon and E. Ray, tying with Francis Ouimet, a 19-year old American excaddie, with 304 strokes. In the play-off, Ouimet won before 6,000 people, with a score of 72, Vardon taking 77 and Ray 78. "The News of the World" £400 Tournament, after various qualifying competitions in all parts of the country, was played at Walton Heath early in October, Geo. Duncan defeating Jas. Braid in the final by 3 up and 2 to play. During the second week of October, Geo. Duncan won the French Professional Championship, and Miss Gladys Ravenscroft, the British Lady Champion of 1912, won the Ladies' American Championship, at Wilmington.

HOCKEY.

THE game of hockey, most amateur of all sports, well maintained its prestige in 1913. That the standard of play improved may be doubted, for in big matches it was frequently noticeable that there was a tendency to cramp the game by keeping the ball in the middle of the field, passing out to the wings being too much neglected. The first of the Internationals was decided on Feb. 15, when Ireland and Wales met at Limerick, Ireland winning by three goals to nil, a score that would have been considerably increased but for the fine goal-keeping of F. R. Davies (Swansea). Wales next met Scotland, on Wrexham Racecourse, on Feb. 22, when, after an exciting game, Scotland won by three goals to one, the fault of the losers being the inability of their forwards to settle down, and a certain amount of selfishness. On the same afternoon, at Beckenham, the twenty-third match between the South and North was played, the South winning by 5—0, the North forwards giving quite a feeble display. This was the South's eighteenth success in twenty-three matches, the game in 1894 being drawn. When Oxford and Cambridge met at Beckenham on Feb. 26 a record score for that contest was put up, the Cantabs winning by 7 goals to 2. Twice previously nine goals had been recorded in the match, but the previous highest score to either side was the six goals obtained by Oxford four years previously. The result was largely due to the skill and judgment of S. H. Saville, the Light Blues' captain.

England opened her International programme at Cambridge on March 1, when France was outplayed at all points, and beaten by 14 goals to 0. On the 8th of the same month England, though playing anything but a representative team, and minus, amongst others, S. H. Saville, defeated Wales at Whitechurch by 3 goals to 0. The Welshmen had a good team, but the result was in accordance with form, for they have never yet beaten England. On the same afternoon the officers of the Army and Navy played a draw, 2—2, at Queen's Club. In the final of the Inter-

Hospital Tournament Guy's beat St. Bart's by 5—0.

Scotland and Ireland met at Glasgow on March 15, when Ireland scored her ninth victory (out of twelve matches) by 2 goals to 1, a score that certainly did not flatter the winners, for the superiority of the forwards in the outfield work was most marked. England and Scotland met at Beckenham on March 29. Twelve months previously Scotland defeated England for the first time, but the latter had full revenge on this occasion, scoring 5 goals to love. Despite this big score, D. Farquhar kept goal brilliantly for the losers. At Dublin on April 5 England beat Ireland by 1 goal to love, R. J. Pridmore scoring seven minutes from the close. The game was an excellent one, and a draw would have been a more fitting termination. Thus the result of the International Tourney was that England won all her matches, Ireland won two, Scotland one, and Wales lost all three.

As regards the Counties, Lancashire were the strongest, their victims including Middlesex, Surrey, Northumberland, Durham and Cheshire, whilst they drew with Yorkshire. Fast forwards, playing an open game, contributed mainly to their success, but the good work of L. S. Ashcroft at centre-half counted for much. Warwickshire was far and away the best of the Midland Counties (unfortunately they did not meet Lancashire), whilst Surrey and Middlesex about halved honours in the Southern group. In the Inter-Territory matches the East did best, and the South came next.

Southern club hockey was headed by Beckenham, who lost only two of a long list of matches, whilst Hampstead undoubtedly came next. West Bromwich, of the Midland clubs, had a wonderful season, and in the North Bowdon again did best, though for the first time in many years they had to admit defeat, at the hands of Oxtou. St. Anne's possess a splendid player in R. W. Crummack, who in twenty matches hit 59 goals.

LAWN TENNIS.

THERE is practically no season for lawn tennis now. It continues, under some sort of conditions, the year round, and in 1913 it attained a degree of popularity not previously reached, as was evidenced by the large crowds at the Davis Cup and Championship matches, an increased list of tournaments, and swollen entry lists.

At a meeting of delegates from thirteen nations held in Paris early in March, it was decided to form an International Lawn Tennis Association, and the voting power was determined as follows: British Isles, 6 votes; Australasia, France, Germany, and the United States, 5 votes each; Austria, 4 votes; Belgium, South Africa, Sweden, and Switzerland, 3 votes each; Canada, Denmark, Holland, and Russia, 2 votes each; Hungary, Italy, Norway, and Spain, 1 vote each. Three World's Championships were decided upon, viz.: World's Championships on Grass Courts, which were offered to, and accepted by, the L.T.A. delegates on behalf of the British Isles in perpetuity; World's Championships on Hard Courts, to be organised up to and including the year 1916 by the Tennis Committee of the U.S.F.S.A.; and World's Championships on Wood (under cover), to be held in 1913 by Sweden, and in 1914 by Denmark. Later in the year arrangements were concluded between the Lawn Tennis Association and the All England Lawn Tennis

Club whereby the Gentlemen's Singles, Gentlemen's Doubles, and Ladies' Singles will be continued by the A.E.L.T.C., and the World's Championships referred to merged, as far as possible, with the All England L.T.C. Championships.

Really it is difficult to say whether the Championships or the Davis Cup contest aroused the greater interest. In the autumn of 1912 Messrs. C. P. Dixon, J. C. Parke, F. G. Lowe, and A. E. Beamish had visited Australia and succeeded in winning from the Dominion the Davis Cup. The new holders were challenged by Australia, America, Germany, France, South Africa, Canada, and Belgium. Of the preliminary ties played outside the British Isles all that need be set down here is that Germany beat France at Wiesbaden, and that America defeated Australia in New York. For America M. E. McLoughlin won both his singles without the loss of a set. Canada and South Africa came together at Queen's Club, West Kensington, on June 19, 20, and 21. Canada, represented by R. B. Powell and B. P. Schwengers, defeated V. R. Gauntlett and R. F. Le Sueur by 3 matches to 1, one single not being played. Unfortunately, the matches in the semi-final rounds were fixed for the same dates—July 10, 11, 12. America and Germany came together at Nottingham, and Canada and Belgium (who had drawn a bye in the preliminary) at Folkestone. Greater interest attached to the first-mentioned match, which America won by 4 matches to love, one match not being played. An exactly similar state of affairs, in favour of Canada, resulted at Folkestone, though the Belgians did not make quite so good a fight as the Germans. The final was decided at Wimbledon on July 18 and 19, when America beat Canada by 3 matches to love, two matches not being played. In the Singles R. N. Williams defeated B. P. Schwengers 6-4, 6-2, 6-2, and M. E. McLoughlin disposed of R. B. Powell 10-8, 6-1, 6-4. In the Doubles, McLoughlin and H. H. Hackett conquered Schwengers and Powell by 6-3, 6-3, 12-10. Then came the challenge round, at Wimbledon, on July 25, 26, and 28. J. C. Parke (British Isles) caused quite a sensation by defeating M. E. McLoughlin (America) by 10-8, 5-7, 4-6, 6-1, 5-7; and Parke also beat R. N. Williams 2-6, 7-5, 7-5, 4-6, 2-6. C. P. Dixon, however, lost both his Singles matches; and with H. H. Hackett and McLoughlin defeating Dixon and H. Roper Barrett in the Doubles, America won by 3 matches to 2, and so regained the Cup. Instituted in 1900, the trophy was won that and the two following years by America. From 1903 to 1906 the British Isles had possession, then Australasia from 1907 till 1911. The British Isles, as already stated, won in 1912.

The third annual match between teams representing Paris and London was decided on the covered courts of the Tennis Club de Paris at Auteuil on March 16 and following days, the result being that Paris won by 14 matches to 13, taking the Singles 10-8 and losing the Doubles 5-4. The Covered Courts Championships at Queen's Club during the latter half of April were chiefly noticeable for the success in the Ladies' of Mrs. Lambert-Chambers. P. M. Davson won the Gentlemen's Singles, A. F. Wilding and S. N. Doubt retained the Doubles, and Doubt and Mrs. Lambert-Chambers won the Mixed Doubles. The University match was decided at Cambridge during the first week in June.

The Cantabs were stronger than for many years previously, and won the Singles by 7-1 and the Doubles by 8-1.

A deal of interest attached to the World's Hard Court Championships, decided at St. Cloud, near Paris, on June 7 and following days. A thoroughly representative entry was secured, and in the final of the Gentlemen's Singles A. F. Wilding beat A. H. Gobert by 3 sets to 1. The Ladies' Singles was won by Fri. Rieck, who defeated the holder, Mlle. Broquedis, in the final by 2 sets to 1. H. Kleinschroth and Von Bessey won the Doubles.

The London Championships, at Queen's Club, in the middle of June proved highly successful though A. F. Wilding elected not to defend in the Singles, which went to F. G. Lowe, who in the final beat W. F. Johnson by 3 sets to 2, 52 games being played; whilst Mrs. Larcombe again secured the Ladies' Singles. Her opponent in the final was Mrs. Edgington. F. W. Rahe and H. Kleinschroth took the Doubles, and C. P. Dixon and Mrs. Larcombe the Mixed Doubles.

The Championships at Wimbledon opened on June 23. The meeting proved extraordinarily successful, and to witness the final of the Singles there were about 10,000 spectators. The competitors were A. F. Wilding, the holder, and M. E. McLoughlin, the young American. They put up a great match, Wilding winning with scores of 8-6, 6-3, 10-8. He owed much to his fitness, whilst his game was built up on good ground strokes. The Ladies' Singles, unfortunately, ended in a walk-over for Mrs. Lambert-Chambers, as Mrs. D. R. Larcombe, after finding her way to the challenge round, was forced to retire owing to an accident to one of her eyes. It was received whilst, with J. C. Parke as partner, she was engaged in the final of the Mixed Doubles against H. Crisp and Mrs. Tuckey, and caused retirement in favour of the latter pair when the score was 1 set all. Mrs. McNair and Miss Boothby won the Ladies' Doubles, and H. Roper Barrett and C. P. Dixon retained the Gentlemen's Doubles, the All England Plate going to F. G. Lowe.

The International between Ireland and England, played at Dublin on July 14 and 15, resulted in a narrow victory for England by 8 matches to 7. At Queen's Club, in the middle of July, Capt. E. D. Young won the Singles at the Army Championship Meeting, and Capt. G. L. Whatford and G. F. Scroope were successful in the inter-Regimental Doubles. C. P. Dixon won the Singles at the Welsh Championship Meeting, Mrs. Hannam taking the Ladies' Singles; whilst the Gentlemen's Irish Singles Championship, at Dublin, towards the end of July, went to J. C. Parke, and the Ladies' to Mrs. Barry. M. Rice won the Scottish Championship, and Mrs. Welsh the Ladies' Scottish Championship.

To mention even a tithe of the tournaments would be impossible within the scope of a review of this nature. Of the principal players, C. P. Dixon won Open Singles at, amongst other places, Surbiton, Chiswick Park, and Folkestone; J. C. Parke's victories included Manchester, Newcastle, Buxton, and Scarborough; F. G. Lowe was to the fore at East Croydon, Reading, Worthing, and other places. Others who did well were E. Larsen, A. E. Beamish, G. A. Thomas, S. N. Doubt, E. R. Allen, W. F. Johnson, T. M. Mavrogordato, H. Roper Barrett, and C. O. Tuckey. Amongst ladies who won Open Singles at some of the biggest meetings were Mrs.

Larcombe, Mrs. Chambers, Mrs. Welsh, Miss Boothby, Miss Holman, Miss Morton, Mrs. Tuckey, Mrs. Hatzel, Mrs. Hannam, Miss Lane, Mrs. Satterthwaite, and Mrs. Lamplough.

A special line must be devoted to Eastbourne, held early in September. There were thirty more level matches and a hundred more handicap matches than during the previous year. J. C. Parke won the Singles, Mrs. Larcombe the Ladies' Singles, A. D. Prebble and S. N. Doust the Men's Doubles, and Mrs. Chambers and Miss Luard the Ladies' Doubles. A somewhat unsatisfactory feature of the reason was the rather moderate character of the Doubles play at many of the big tournaments. In this phase of the sport there is great room for improvement.

RACKETS AND TENNIS.

NOT for many seasons had such interest been taken in the celebrated ball games of rackets and tennis as was aroused during 1913. All round entries were above the average, and in many cases the form—especially amongst the schools—was first-class. A good start was made with the season on the last day of February and the first of March with a match between Manchester and the Prince's Club, London. The contest was decided in Manchester, the conditions being three matches at each game; and on the first day Prince's won one each at rackets and tennis, whilst E. M. Baerlein scored a fine victory for Manchester over B. S. Foster at rackets. On the second day the Londoners were again too strong for Manchester, and the final score was four games to two in their favour. At rackets, J. K. Dennison, Prince's, beat H. C. Kershaw, Manchester, by three games to one; and at tennis, Marshall, Prince's, defeated P. Ashwood, Manchester, by three games to one, and E. M. Baerlein vanquished the Hon. A. N. Lytton, Prince's, by three games to one.

A start was made with the Army Doubles Championship of rackets at Prince's Club, London, on March 3. The 2nd Battalion King's Own Yorkshire Light Infantry, represented by Capt. A. C. G. Luther and C. E. D. King, were challenged by eight pairs. The 18th Hussars scratched, which gave the 13th Sikhs a walk over in the first round. The latter were represented by A. H. Muir, the Army Singles Champion, and H. E. Growse. They proved the best of the challengers, beating Royal Engineers (Lieut.-Col. W. C. Hedley and Capt. R. Cakes) in the final by four games to love (53 aces to 29); and on March 8 they defeated the holders, for the championship, by four games to two (87 aces to 67). The quality of the rackets did not reach a very high standard, for though many brilliant things were done, too many mistakes crept into the rallies and service. There was not a big entry for the Army Singles Rackets Championship. The final of the All Comers Competition, at Prince's, on March 13, resulted in Capt. A. C. G. Luther, King's Own Yorkshire Light Infantry, beating Major E. P. Thompson, Royal Munster Fusiliers, by three games to love (45 aces to 17), the match lasting only a trifle over a quarter of an hour. Capt. Luther, who the previous year had lost the championship to A. H. Muir, of the 15th Sikhs, recovered the title in the challenge round on March 16 by winning the odd game in five, scoring 66 aces to 51.

Queen's Club, West Kensington, was the venue of the Rackets Amateur Singles Championship, during the last week in March and early in

April. In the All Comers semi-finals, E. M. Baerlein, Eton and Cambridge, beat H. A. Denison, Charterhouse, by three games to love (48 aces to 33); and H. W. Leatham, Charterhouse and Cambridge, defeated C. W. Browning, Harrow and Oxford, by three games to love (45 aces to 7). In the final Leatham beat Baerlein by three games to love (53 aces to 46). This brought B. S. Foster, Malvern College, the holder, and Leatham together in the challenge round, and the first named easily retained the title he secured for the first time a twelve-month previously, winning by three games to love (45 aces to 17). At Queen's Club, on April 6, Charles Williams, Harrow, the holder of the title, and J. Soutar, New York, commenced a match for the Professional Championship of the World and stakes amounting to £1,000. The conditions called for the best of seven games in two courts, Queen's Club and Philadelphia, with aces to govern the verdict in the event of games being equal. It may be interesting to note that Williams was to have played in America the previous year, and embarked upon the ill-fated s.s. *Titanic*. He was one of those rescued from that unfortunate vessel, and, naturally, his nerves were so shattered by his awful experience that he had to take a long rest. That he had quite recovered he proved on the occasion under notice, when he played grand rackets and won by four games to two (75 aces to 69), the match being played in the wonderfully quick time of 55 minutes. When the second half of the match was decided at Philadelphia, on May 3, however, Soutar carried everything before him. He won four straight games (60 aces to 17), and consequently secured the championship.

Fourteen entries were made for the Public Schools Rackets Championship, the event commencing on April 15, at Queen's Club, West Kensington. Some very good form was shown, and in the final Wellington College, represented by E. G. Bartlett and F. A. Carnegie (the former of whom had played the previous year), beat Haileybury, who had two old choices in H. D. Hake and L. F. Marson, by four games to love (60 aces to 32). It was Wellington's third success, their last win being in 1907. Oxford and Cambridge decided their Doubles match at Queen's Club on April 17, when Cambridge, represented by H. W. Leatham, Charterhouse and Trinity, and A. H. Lang, Harrow and Trinity, won from C. F. B. Simpson, Rugby and St. John's, and R. A. Boddington, Rugby and Trinity, by four games to two (85 aces to 75). This brought the record of matches played up to 30 against 27 in favour of Cambridge. The following day Leatham, for Cambridge, won the Singles from Simpson by three games to one (57 aces to 28) bringing the record to 28 matches all. Only two pairs challenged for the Rackets Amateur Doubles Championship, at Queen's Club. B. S. Foster, Malvern, and H. Brougham, Wellington and Oxford, defeated Hon. C. Bruce, Winchester and Oxford, and A. H. Lang, Harrow and Cambridge, by four games to one (68 aces to 44). The holders were H. W. Leatham, Charterhouse and Cambridge, and H. A. Denison, Charterhouse. The championship round was postponed owing to the illness of Leatham's father, and eventually fell through.

Entries for the Amateur Tennis Championship, which commenced on May 5, at Queen's Club, reached the exceptionally large number of thirteen. Many fine matches were played, and

in the challengers' final the Hon. N. S. Lytton beat Capt. R. K. Price by three sets to love (18 games to 7). Consequently the championship was fought out by the same players as in 1912. On this occasion, however, E. M. Baerlein, the holder, was beaten by Lytton by three sets to two (27 games to 23).

The Oxford and Cambridge tennis matches were decided on July 11 and 12. Leatham and M. Woosnam, Winchester and Trinity (Cambridge), beat Hon. J. N. Manners, Eton and Balliol, and G. Westmacott, Eton and Christchurch (Oxford), by three sets to two (18 games to 5) in the Doubles; and Leatham defeated Manners in the Singles by three sets to love (53 games to 46).

The Secretary of Queen's Club, West Kensington, is Mr. A. E. Stoddart.

ROWING.

ALTHOUGH it lacked the sensational features of its predecessor, the season of 1913 was remarkably interesting. The form generally was well up to the average, without being exceptionally good; but this does not apply to the sculling, which was below par. W. D. Kinnear, the erstwhile amateur champion, did not compete at Henley, and later, when attempting to defend his title, sustained defeat.

The form in the Torpid Eights, with which the season opened at Oxford, was certainly not up to the average. This was doubtless due to the period of practice necessitated by the early coming of Easter, and the consequent bad conditions were all against the coaches. Magdalen retained the headship of the river, St. John's finishing second. The latter were 3 lb. per man the heavier crew, but they were not really well together. These crews were in a class by themselves, the others being moderate indeed. Hertford topped the third division boats, and Corpus the second. During the six nights New College and Worcester made a "highest possible" of half a dozen bumps. At Cambridge University, during the last week in February, there were four entries for the Fairbairn-Forster Pairs, which were secured by the brothers G. L. and D. I. Day, of Repton, rowing in the colours of the Lady Margaret Boat Club. The final of the Clinker Fours at Cambridge was decided on March 8, when First Trinity repeated successes gained in 1910 and 1911 by defeating Pembroke. The Cambridge University Lady Margaret Pairs, decided on May 2 and 3, only attracted four entries. J. Ayliff and S. E. Swann (the President), of Trinity Hall, were looked upon as likely winners, but to the general surprise they were beaten in the first heat by the brothers Day, who in the final succumbed to the Etonians C. E. V. Buxton and R. Le Blanc Smith, of Third Trinity. The Lowe Double Sculls, decided at Cambridge on May 9 and 10, attracted only three entries, the winners proving to be the Jesus College pair, R. Gould, of New Zealand, and L. A. Pattinson, Rugby, who beat the brothers A. and S. E. Swann, of Trinity Hall, in the final.

The University Boat Race was decided on Thursday, March 13, the mid-week date being the only suitable one, bearing in mind the early advent of Easter and the times at which the tide served. The Oxford crew first appeared at Putney on February 21, and so smoothly did their practice proceed that the order of rowing on that day was the one that prevailed on the day

of the race. Cambridge, however, had many vicissitudes. Several changes, brought about by illness, had to be made in the constitution of the crew, two of them as late as on March 4, and this probably cost the Light Blues the race, for the two partially trained men undoubtedly "cracked" in the closing stages of the struggle. Oxford were strong favourites at the start, but the Cantabs, beautifully stroked and cleverly steered, led up to the Queen's Head at Mortlake. Oxford drew level at Mortlake Brewery, and won a great race by three-quarters of a length in 20 mins. 53 secs. The Prince of Wales witnessed the contest. The crews were:—

At Oxford there was a record entry for the Summer Eights, racing taking place during the third week in May. New College retained the headship, although they were in serious jeopardy from Magdalen more than once. That the latter were really the faster crew admitted of little doubt, but they found the starting distance of 130 feet rather more than they could concede. New College second crew headed the third division, and Corpus the second division. On June 4 C. E. Tinne, Eton and University, and R. B. Quiller Couch, Winchester and Trinity, who had beaten record for the course in their heat,

easily won the Oxford University Challenge Pairs. Cambridge University Summer Eights started the first week in June, Jesus College, a crew that was wonderfully well together, maintaining their position at the head of the river after a great tussle with Third Trinity, whilst Christ's College headed the second division. The Oxford University Sculls, on June 13, ended in the success of the Russian, H. M. Kusik, of St. Catharine's.

The premier regatta of the year, Royal Henley, opened on July 2, and lasted four days. There was once more a splendid entry, including a record number of eights for the Thames Cup. The rowing conditions were ideal throughout the four days, and the "luck of the station" was not nearly so much in evidence as during previous years. Seldom, if ever, has the meeting produced more thrilling finishes. "Won by a few feet," was a frequent declaration, though it is certain that the class of the competitors, generally, was not above high-water mark, and, so far as the scullers went, it was below that standard. Of the eight events four were won by Cambridge colleges, two by Oxford, one by the Leander B.C., and one by an Australian representative. The latter was C. McVilly, of the Derwent R.C., Tasmania, who in the final for the Diamond Sculls beat E. D. P. Pinks, of the London R.C., by a length in 8 mins. 49 secs. The winner, a very powerful youngster, should be heard of again. Leander won the Grand Challenge Cup from Jesus College, Cambridge, by a length, in 7 mins. 11 secs. They were a very fine crew—the best, perhaps, since 1908. Their order of rowing was:—

LEANDER CLUB.

	st.	lb
A. C. Gladstone (bow)	11	3
2. S. E. Swann	11	3
3. L. G. Wormald	12	5
4. E. D. Horsfall	12	5
5. C. S. Clark	12	9
6. A. S. Garton	13	8
7. F. F. V. Scrutton	12	0
G. E. Tower (stroke)	11	10
H. B. Wells (cox.)	8	12

It was Leander's first win in the Grand since 1905, whilst Jesus had figured in the final on four occasions in recent years, but have not won since 1885. The Ladies' Plate for eights went to First Trinity, Cambridge, who in the final beat Trinity, Oxford, by 3 lengths in 7 mins. 24 secs. New College, Oxford, won the Stewards' (fours), the Maintzer Ruder Verein being disqualified for fouling before Fawley Court was reached. The brothers A. and S. E. Swann, Trinity Hall, Cambridge, vanquished the Old Etonians S. D. Gladstone and C. E. Buxton by 1½ lengths in the final for the Goblets, in 8 mins. 39 secs. Lady Margaret B.C., Cambridge, defeated University College, Oxford, in the Wyfolds (fours), after a great race, in 8 mins. 1 sec. Oriel College, Oxford, beat Christ's College, Cambridge, in the Thames Cup by a quarter of a length in 7 mins. 30 secs.; and the Visitors' Cup went to Pembroke, Cambridge, who beat University, Oxford, in the final easily in 8 mins. 15 secs.

The Metropolitan Amateur Regatta, on July 8, was notable for the fact that the Thames and London Clubs between them secured all the trophies. The two principal races—the London Cup (for scullers) and the Champion Cup (for eights)—went to E. D. P. Pinks (London R.C.) and the Thames R.C. respectively. On this

form and on that which he had displayed at Henley, Pinks was rather fancied to win the preliminary heat of the Wingfield Sculls (emblematic of the Amateur Championship of the Thames); but on July 9 he was beaten by C. W. Wise, of the London Rowing Club, who two nights later caused some surprise by vanquishing the holder, W. D. Kinnear, Kensington R.C., by six lengths in 24 mins. 12 secs. In the last week of July, at Shepperton, J. A. C. Croft easily won the Amateur Punting Championship, F. C. Cowell, the holder, being amongst the defeated candidates.

As regards professional matters, Doggett's Coat and Badge, rowed for between London Bridge and Chelsea on August 1, was won by H. J. Gobbett, Greenwich, in 25 mins. 21 secs.; and on August 7, at Maidenhead, F. Nicholls, of Egham, won the Professional Punting Championship for the fifth time in succession. There was, once more, a race for the Sculling Championship. The titles of World's Champion and English Champion, together with money to the extent of £1,000, were at stake. The competitors were the holder, Ernest Barry, representing England, and Harry Pearce, a powerful but unfinished Australian sculler. By sheer strength and excessive arm work Pearce led to Hammersmith Bridge, but he was then done with. Barry, whose style and judgment were never better, went to the front at Biffen's. At one time he was seven or eight lengths in front, but, easing up from Barnes Bridge, he allowed Pearce to get within a length and three-quarters at the close. This was Barry's sixth victory over the course—indeed, he has never yet been beaten in a race between Putney and Mortlake.

The Hon. Sec. of the Amateur Rowing Association is Mr. G. L. Maclagan, 18, Berkeley Square, London.

SWIMMING.

SOME remarkable performances were accomplished by English swimmers during the past year, notably by the younger sections of both sexes. The Amateur Swimming Association, in view of the Olympic Games at Berlin in 1916, has been encouraging speed tests and instituting competitions of a nature calculated to improve style and speed, and with such success that many district records have been eclipsed and several fresh national ones created. The outstanding swimmer of the year was J. G. Hatfield, of Middlesbrough, the youth who proved himself to be the second fastest distance swimmer in the world at Stockholm in 1912, the only man to beat him—and that in record time—being Hodges, of Canada. Last year Hatfield won the 1½ Mile, Quarter-Mile Salt Water, 500 Yards, Half-Mile, Mile, and Long-Distance Championships of England, but failed by a touch to win the 100 Yards Championship, secured at Brighton by H. E. Annison, of Croydon, in 60 secs. A few days later Annison went down before L. J. Haskins, of the Otter, in the 100 Yards Championship of the South, but had his revenge in October, when he beat Haskins for the 150 Yards Championship of London, in record time for the race. In these swimmers we have the nucleus of a fine Olympic team, and there are several others in the various districts who are nearly, if not quite, up to their form. Most of them use what is known as the "crawl" stroke, and show improvement almost every time they swim. Had Hatfield succeeded in winning the 100 Yards he would have equalled

the record of J. H. Tyers, who in 1893, and again in 1894, won all the speed championships in one year. Even J. A. Jarvis, of Leicester, who had such a long run of success, was unable to do that, he, like Hatfield, always failing at the 100 Yards.

Remarkable improvement has also been shown by the lady swimmers, of whom Miss Curwen, of Liverpool, Miss Vera Neave, of Enfield, Miss Annie Spears, and Miss Belle White stand out pre-eminent, the latter more particularly as a graceful diver. Now that swimming is taught in almost every school, there is little possibility of lack of talent for the ladies' contests at Berlin.

Yet, while English swimmers have been developing speed, many foreigners have been doing the same, and there are authentic accounts of brilliant performances by Austrians and Germans, and in America Duke Pasa Kohanamoku is credited with lowering the 100 yards record. The times have, however, yet to be passed by the *Fédération Internationale de Natation Amateur*.

Though our divers are good, they were unable to beat Gaidzik, of America, who won the English Championship. Lack of facilities for practising high diving is perhaps the cause of our failure to be at the head of this branch of sport.

In water polo the Hyde Seal Club again stands first, this splendid combination undoubtedly being the best side in the British Isles, and one well worthy of special selection for the Olympic Games. Water polo has made such strides that matches are now played all over the country every night of the week, and bath superintendents are often at their wits' end to make proper arrangements for the fixtures.

There were several attempts in 1913 to swim the Channel, but none of the performances were of special note. Those of Jabez Wolffe and Miss Lily Smith were the principal, but the lady had to give up completely exhausted long before half of her task was finished. Wolffe did not do much better, and it would appear that he tries to make the journey too quickly; that is to say, he attempts to "race the Channel"—an apparently futile task. M. A. Holbein, who some years back almost reached England from the French coast, also tried again, but had to give up through adverse winds and a rough sea.

The work of the Royal Life-Saving Society has increased so much that the executive have sent Mr. William Henry, the chief secretary, on a prolonged lecturing and examination tour of the various branches in the dominions forming the Union of South Africa. Previous visits of a similar nature have been made to Australia, Tasmania, New Zealand, and Canada. The King's Cup competitions were, as usual, conducted at the Bath Club, Highgate Ponds, in June last, and the cup was awarded to Oscar Schiele, of the Magdeburg Club—a previous winner. D. W. Morris, of London Hospital, the holder, lodged a protest against the decision of the judges, but it was overruled. An appeal is pending, but will probably not be settled until the annual general meeting of the Society in February next.

The Hon. Secretary of the Amateur Swimming Association is T. M. Yeaden, East Clere, Whitburn, near Sunderland; and the Chief Secretary of the Royal Life-Saving Society is Mr. William Henry, 8, Bayley Street, Bedford Square, London.

THE TURF.

"SENSATIONAL" is the only word which expresses the features of racing on the Turf in 1913. There was an amazing Derby, in which a suf-

fragee threw herself in front of the horses, and in which the winner was disqualified in favour of a 100 to 1 chance. In the Ascot Cup a madman imitated the Epsom suffragee, and brought down one of the chief competitors. Continually through the season the favourites were defeated by horses whose chances had been ignored in the betting. Unpleasant incidents abounded, one of the earliest being the warning-off of a prominent trainer. Altogether the season will be remembered as the most unpleasant in the annals of the Turf. The King continued to take an interest in the sport, and was rewarded by winning a few races, though not of any importance. The demands on space render it imperative that this retrospect shall be confined mainly to the important weight-for-age contests, leaving some of the principal handicap records for insertion in the tables elsewhere, but it must be mentioned that 1913 saw a new departure, inasmuch as the Queen's Prize at Kempton (March 24) was decided before the Lincolnshire Handicap, which was run on April 1.

A poor lot of two-year-olds went to the post for the Brocklesby Stakes (£733) at Lincoln, on April 2, as was subsequently proved, for Decagone, the winner, did not earn brackets again, whilst the third, Tanaquil, who is by Cicero, went until September before securing a £200 handicap at Ayr. The second, Clapgate, did better, winning three races before the end of September, of which the Fitzwilliam Stakes (£173) at Doncaster was, perhaps, the most important. The champion two-year-old of the season was The Tetrarch, a grey colt, by Roi Herode—Vahren, belonging to Mr. D. McCalmont. By reason of his peculiar markings this animal was at various times described as "the circus horse," "the rocking horse," &c. His first coat was very dark, but, on shedding it, he blossomed forth as a grey, whilst later, huge white patches, as of whitewash, made their appearance. With wonderfully powerful hind action, The Tetrarch usually galloped clean away from his fields and had them strung out very early. The colt made his *début* in a maiden two-year-old plate (£196) at Newmarket Craven Meeting, when, starting third favourite in a field of 21, he won by four lengths. When next out, in the Woodcote Stakes (£930) at Epsom Summer Meeting, Mr. McCalmont's representative was only an even-money chance, although useful animals like Our Lassie colt and The Ambassador were included in his ten opponents. This time he won by three lengths, the third being another six lengths behind, and it was evident that he had speed out of the common. Victories in the Coventry Stakes at Ascot (£1,843)—when he beat Courageous ten lengths—the National Breeders' Produce Stakes at Sandown Park (£4,357), the Rous Memorial Stakes at Goodwood (£1,195), the Champion Breeders' Foal Stakes (£1,085) at Derby Summer Meeting, and the Champagne Stakes (£1,730) at Doncaster followed, and in all these races the colt was ridden by S. Donoghue. In the Sandown Park race Mr. Ernest C. Tanner's Calandria ran the grey to a neck, but Mr. McCalmont's colt was badly interfered with at the start. With The Tetrarch in a class by himself, it is exceedingly difficult to form an opinion as to which was the next best of his age. Stornoway, a bay colt by Desmond—Sisterlike, the property of Mr. E. Hulton, and Hapsburg, another Desmond colt—Altesse, both showed form. The first-named won seven out of nine

paces on the English turf up to the time of writing, but at Doncaster he was a good three lengths behind The Tetrarch, who won pulling up. There was nothing promising about the way in which he opened the campaign at Epsom Spring, for he was unplaced in the Hyde Park Plate (£417), won by Mr. R. C. Bower Ismay's Elgon. He was probably not ready then, for he was allowed to start at 5 to 1 against, whereas in the Norfolk Two-Year-Old Plate (£196) at Newmarket Second Spring, for which 25 horses went to the post, Stornoway's price was 6 to 4 against, and in the hands of F. Wootton he won by four lengths. He won the Great Surrey Foal Stakes (£934) at Epsom Summer Meeting, the 56th Biennial (£1,592) at Ascot, the Fulbourne Stakes (£787) at Newmarket First July, the Prince of Wales' Plate (£887) at York August, the Gimcrack Stakes (£950) at York, and the Clearwell Stakes (£917) at Newmarket in October. He failed, however, in the Middle Park Plate, Coreyra, a chestnut colt by Polymelus—Pearmain, the property of Lord Londonderry, beating him by a length and a half. Coreyra had previously won the Wynyard Plate at Stockton (£535) and the Redcar Produce Stakes (£615), and, naturally, curiosity was aroused as to how he would fare in the Dewhurst Plate at the end of October. In that race Sir John Thursby's Kennymore, by John o'Gaunt—Croceum, who at a difference of 4 lbs. had been beaten by three lengths by Coreyra, proved successful. In the Dewhurst Plate, however, Kennymore received 10 lb., and he had evidently benefited by his previous (and only) experience.

The successes of Hapsburg included the New Stakes at Ascot (£1,919 10s.), the British Dominion Two-Year-Old Plate (£914) at Sandown, and the Great Lancashire Breeders' Produce Stakes (£1,614) at Liverpool. He was nowhere in the Imperial Produce Stakes (£2,569) at Kempton, which was won by By George!, but the scale of weights for that event were so arranged as to almost resemble a handicap, and Hapsburg carried 9 st. 6 lb. to the winner's 8 st. 8 lb., whilst Sunny Land (and) had 8 st. 7 lb., and Longtown (3rd) 9 st. 3 lb. Another excellent two-year-old performer was Aldford, a brown colt by Mauvezin—Mangalmi, the property of the Duke of Westminster, who, when these lines were penned, had won six races off the reel, and boasted an unbeaten certificate. He led off by beating the enormous number of 32 opponents in the Beckhampton Two-Year-Old Stakes (£326) at Newbury Spring, and next took the Stamford Two-Year-Old Plate (£165) at Chester. Then followed the Salisbury Stakes (£332) at Salisbury, and as By George!, the second, was in receipt of 10 lb., and was beaten by four lengths, the form was pretty smart. The 61st Triennial at Ascot (£780) was his next success, followed by the Stud Produce Stakes (£524) at Newmarket First July, and the Newbury Autumn Foal Stakes (£838). On the whole, the two-year-old racing was noticeable for correctness of form. Unfortunately, Coreyra is not in the Derby of 1914, though he has an engagement in the Two Thousand and St. Leger.

What of the three-year-olds? There may have been a really good one amongst the classic performers, but in view of the amazing in-and-out running that is difficult to believe. Little store is set nowadays on the Newmarket Biennial (£803), which was won by the Duke of Portland's Nassau, or the Column Produce Stakes (£768),

won by Lord Derby's Light Brigade, at the Newmarket Craven Meeting. The same might almost be written of the Wood Ditton Stakes (£407), over the Ditch Mile at the same gathering, but in 1913 it served to start Mr. E. Hulton's Fairy King, a bay colt by Desmond—Queen Fairy, upon a very useful three-year-old career. Up to the middle of October, the colt won seven races. At his second essay, in the Two Thousand Guineas (£6,800), he was unplaced to Mr. W. Raphael's Louvois, by Isinglass—St. Louvaine, Mr. C. Bower Ismay's b. c. Craganour, by Desmond—Veneration II., being second, and Mr. H. P. Whitney's ch. c. Meeting House, by Voter—Noonday, bred in America, third. Odds of 3 to 1 were betted on Craganour for that event, but he was beaten by a head, and it is worth noting that the winner and Mr. Hulton's Shogun, by Santoi—Kendal Belle, started at 25 to 1. Mr. Hulton making a declaration to win with Fairy King. The next victory of the latter was in the Hurst Plate (1 mile) at Hurst Park (£779) in May, where amongst the unplaced lot was Mr. W. Hall Walker's Night Hawk. At Newmarket Second Spring Meeting Craganour turned the Two Thousand Guineas' form upside down, winning by a length and a half from Sun Yat, in the Newmarket Stakes (£2,290) of 1¼ miles, with Louvois another two lengths in the rear. Fairy King did not run in that race.

Then, on June 4, came the most amazing Derby on record. Fifteen horses went to the post, and just before Tattenham Corner was reached, a woman identified with the Suffragette cause threw herself in front of the King's colt Anmer, and received injuries from which she died a day or two later. The horse was unhurt, and Herbert Jones, the jockey, escaped with a severe shaking and a broken rib. The race was a great one between Craganour and a bay colt of Mr. A. P. Cunliffe's, Aboyeur, by Desmond—Pawky. Craganour did not finish too gamely, but got home first by a head from Aboyeur, with Louvois only a neck further behind, and Mr. W. H. Walker's Great Sport, a brown colt by Gallinule—Gondollette, fourth. Mr. Hulton elected to be represented by Shogun, who was beaten early. Craganour, ridden by J. Reiff, was favourite at 6 to 4, Shogun (F. Wootton) next favourite, at 6 to 1, Louvois (W. Saxby) 10 to 1, and Great Sport (G. Stern) 20 to 1, whilst Aboyeur (E. Piper) started at 100 to 1. The time of the race was 2 mins. 37½ secs. Immediately after the race, the Stewards, on their own initiative, issued the following notice:—"The Stewards objected to the winner on the ground that he jostled the second horse. After hearing the evidence of the judge and several of the jockeys riding in the race, they found that Craganour, the winner, did not keep a straight course; and interfered with Shogun, Day Comet, and Aboyeur, having bumped and bored the second horse they disqualified Craganour, and awarded the race to Aboyeur."

How, under the circumstances, the Stewards allowed Reiff to go without censure, was a matter of general comment. As a two-year-old Aboyeur ran six times, his only success being in the Champagne Stakes at the Bibury Meeting, whilst the Derby was his only three-year-old victory. Running Rein was the only other Derby winner that suffered disqualification, and in his case it was a matter of fraud. Craganour did not run again, being sold to go to the Argentine Republic.

In the races for three-year-old colts at Ascot; the cracks steered clear of each other. Louvois won the Prince of Wales' Stakes (£2,275) of 1 mile 5 furlongs, and Shogun the Gold Vase (£1,000) over 2 miles, whilst Sun Yat was unplaced to Mr. W. Astor's Pilliwinkie in the Ascot Derby (£1,775) of a mile and a half. In connexion with the three-year-old colts, Goodwood was chiefly noticeable for the defeat, in the Gordon Stakes (£929), of Aboyeur, by Major Eustace Loder's Augur; but the latter, a son of Spearmint, carried only 8 st. 4 lb. to the Derby winner's 10 st. over the mile and a half. The St. Leger (£6,450), on Sept. 10, served to still further complicate the form. In a field of twelve, Louvois started a hot favourite at 9 to 4 against, and finished nowhere. The winner was Capt. Hall Walker's Night Hawk, a bay colt by Gallinule—Jean's Folly, who had run four times previously without being placed, and who started at 50 to 1 against. Mr. J. B. Joel's White Magic, by Sundridge—La Vierge, a 33 to 1 chance, was second. It looked, at this stage of the season, at all events, as though Light Brigade, a brown colt by Picton—Bridge of Sighs, belonging to Lord Derby, was the best of his year, for up to the middle of October he had won eleven races, amongst his victims being Roseworthy, Sun Yat, and Prue. He failed towards the end of the season, but doubtless had had enough of racing. The most prominent of the three-year-old fillies were Jest, by Sundridge out of Absurdity, the property of Mr. J. B. Joel, and Prue, by Cicero—Prune, owned by Lord Rosebery. The former won the One Thousand Guineas (£6,400), the Oaks (£4,950), was beaten into third place in the Coronation Stakes at Ascot (£3,550) by Prue, and failed to give 12 lb. to Mr. J. P. Hornung's Arda in the Nassau Stakes at Goodwood (£920) by three quarters of a length, the distance being a mile and a quarter.

Of the older horses, Tracery, 4 years, by Rock Sand—Topiary; Prince Palatine, 5 years, by Persimmon—Lady Lightfoot; Long Set, 5 years, by Rabelais—Balle Perdue; and Hornet's Beauty, 5 years, by Tredennis—Hornet, were about the pick. Tracery ran in-and-out, but managed to win the Burwell Plate at Newmarket (£453) over a mile and a half, beating Stedfast at evens; the Eclipse Stakes at Sandown (£8,735), giving Louvois a stone all but 2 lb., over a mile and a quarter; and the Champion Stakes at Newmarket (£900) in October, beating Long Set at evens by six lengths. Prince Palatine's best performances were in the Coronation Cup at Epsom (£1,700), when he defeated Long Set at evens over the mile and a half by three lengths, and in the Gold Cup at Ascot, when Stedfast (a length and a half behind), Aleppo, and Tracery were in the beaten lot; but the latter was knocked over by a madman, and might possibly have won. Mr. Pilkington afterwards sold Prince Palatine to Mr. J. B. Joel for £40,000. The horse was badly beaten in the Goodwood Cup (£800), won by Mr. L. Brassey's Catmint. Long Set had not much to do in winning the March Stakes (£440) at Newmarket First Spring, and better performances were his victories in the Royal Hunt Cup at Ascot (£2,170), when, carrying 9 st. 1 lb., he defeated 28 opponents, and in the Liverpool Summer Cup (£1,325), wherein he carried 9 st. 4 lb. In the Doncaster Cup (£1,090) he had only Aleppo to beat, and as the latter had 9 lb. the worst of the weights over a 2 miles 1 furlong course, it was not surprising Long Set

won by six lengths. At Newmarket in the Champion Stakes he was well beaten by Tracery. Hornet's Beauty opened the season by running nowhere in the Bathany Plate at Lincoln Spring (£462) to Black Cap, but the latter was in receipt of a year and three stone, all but 3 lb. At Liverpool Spring, Hornet's Beauty gave lumps of weight away all round in winning the Hylton Handicap (£437), and he repeated the performance in the Stewards' Handicap at Kempton (£710). He had only Rillet (received 2 st.) to beat in the Abingdon Plate at Newmarket (£177), and did it by three lengths; whilst the two-year-old Golden Import, receiving 3 st. 7 lb., was his only rival for the All-Aged Stakes at Ascot (£430), when the juvenile was beaten by four lengths. In the King's Stand Stakes at Ascot (£810), Hornet's Beauty (10 st. 7 lb.) only won by half a length from Mr. J. D. Cohn's Jarnac II. (10 st. 2 lb.); but he made light work of Cigar, Spanish Prince, and Halberd in winning the King George Stakes at Goodwood (£1,235)—a success he followed up by beating a big field for the Portland Handicap (£925) at Doncaster, giving weight away all round. He had only Varavil to beat for the Snailwell Stakes (£175) at Newmarket in October. By this time he probably had had enough of racing, for in the Newmarket Challenge Stakes, carrying 10 st. 1 lb., he was beaten by Borrow (9 st. 2 lb.) and White Star (9 st. 13 lb.). Two of the most surprising results towards the end of the season were Cantilever's victory over Tracery, and subsequently in the Cambridgeshire.

Of other prominent performers mention must be made of the four-year-old Rivoli, by Robert le Diable—Marliacea, whose successes included the Queen's Prize at Kempton (£877); the Ascot Stakes (£1,890), in which, with 8 st. 1 lb., he defeated a field of 21, including Catmint (giving 7 lb.), Fiz-Yama, Grave Greek (first and second in the Cesarewitch), and several others of note; and the Alexandra Plate (£1,735) at Ascot. Lance Chest, 4 years, by Spearmint—Chestnut Sunday, was a bit of a disappointment, but he did a real good gallop to carry 9 st. 12 lb. to victory in the Princess of Wales' Stakes (£2,938) at Newmarket First July. The distance was a mile and a half, and Catmint, Aleppo, Pilliwinkie, and White Magic (who received 1 st. 11 lb.) were amongst the beaten lot. Absolute, 4 years, by Gallinule—Cherry Lass, credited Mr. W. Hall Walker with the Kempton Park Great Jubilee Handicap (£2,650). Drinmore, 5 years, by General Symons—Marcella II., secured the City and Suburban (£1,675), in which Lorenzo, giving 6 lb.—who afterwards won the Manchester Cup (£2,650), beating Fiz-Yama, amongst others—was third; the Durdans Plate (£935) at Epsom Summer; and an Apprentices' Plate at Kempton. Other races of note that have not received mention are included in the tabular matter on another page.

Of turf statistics the most interesting, perhaps, are those relating to winning jockeys. Up to the time of going to press, D. Maher headed the list with 112 wins out of 411 mounts, Frank Wootton came next with 89 wins out of 315 mounts, and then followed A. Whalley, 83 wins, 537 mounts; E. Wheatley, 71 wins, 421 mounts; S. Donoghue, 71 wins, 544 mounts; Walter Griggs, 60 wins, 404 mounts; T. J. Martin, 51 wins, 363 mounts; F. Rickaby, 48 wins, 310 mounts; Jas. Clark, 48 wins, 365 mounts, and H. Robbins, 48 wins, 490 mounts. At this period

Wootton's percentage was slightly better than Maher's, the respective figures being 28.25 and 27.25. Amongst winning sires the defunct Desmond, by St. Simon—L'Abbesse du Jouxarre, headed the list with twenty winners of 41 races, value £30,555 10s., an amount materially contributed to by Aboyeur's lucky success in the Derby. Sundridge, by Amphion—Sierra, was next with 17 winners of 28 races, value £23,601; Santol, by Queen's Birthday—Merry Wife, third, 24 winners, 44 races, value £13,626 5s.; Rock Sand, by Sainfoin—Roquebrune, fourth, 4 winners, 9 races, value £12,822; St. Frusquin, by St. Simon—Isabel, fifth, 14 winners, 29 races, value £12,357; Spearmint, by Carbine—Maid of the Mint, sixth, 13 winners, 23 races, value £12,019; William the Third, by St. Simon—Gravity, seventh, 15 winners, 24 races, value £11,990; Gallinule (dead), by Isonomy—Moorhen, eighth, 10 winners, 14 races, value £11,966 10s., and Roi Herode (sire of The Tetrarch), by Le Samaritain—Roxelane (by War Dance), ninth, with 2 winners, 8 races, value £11,436.

The King played only a small part amongst the winning owners, three of his horses securing 5 races of the value of £4,480. Mr. J. B. Joel came out first with 17 winners of 30 races, value £24,215; Mr. Edward Hulton was second with 18 winners of 42 races, value £23,895; Lord Derby third, 11 winners, 33 races, value £18,372 10s.; Capt. D. McCalmont fourth, 2 winners, 8 races, value £11,503; Mr. W. Hall Walker, fifth, 8 winners, 8 races, value £11,272; and Mr. Sol Joel sixth, 12 winners, 24 races, value £11,194.

Of the winning horses, Jest, 3 yrs., by Sundridge—Absurdity, secured 2 races, value £11,350; The Tetrarch, 2 yrs., by Roi Herode—Vahren, 7 races, value £11,336; Tracery, 4 yrs., by Rock Sand—Topiary, 3 races, value £10,070; Cantilever, 3 yrs., by Bridge of Canny—Lighthead, 4 races, value £9,626; Louvois, 3 yrs., by Isinglass—St. Louvain, 2 races, value £9,075; Light Brigade, 3 yrs., by Picton—Bridge of Sighs, 11 races, value £7,726; Aboyeur, 3 yrs., by Desmond—Pawky, 1 race, value £6,450; Night Hawk, 3 yrs., by Gallinule—Jean's Folly, 1 race, value £6,450; Stornoway, 2 yrs., by Desmond—Sisterlike, 7 races, value £6,263; Prince Palatine, 5 yrs., by Persimmon (dead)—Lady Lightfoot, 2 races, value £5,320; Fairy King, 3 yrs., by Desmond (dead)—Queen Fairy, 7 races, value £5,247; Long Set, 6 yrs., by Rabelais—Balle Perdue, 4 races, value £5,025; and Hornet's Beauty, 5 yrs., by Tredennis—Hornet, 8 races, value £4,899.

YACHTING.

THE season of 1913 was expected to prove of more than usual interest owing to the number of new yachts which had been built during the winter, and which would compensate for the loss of some of the vessels which were going out of commission. Although entries for some of the earlier fixtures were somewhat meagre, matters improved as the season progressed, and expectations were fully realised at the later regattas.

Taken as a whole, it was a light-weather year.

One of the most important of the new yachts was the schooner *Margherita*, designed by Nicholson for Mr. G. C. Whitaker. Her principal opponents were the big German schooners, over which she asserted a decided superiority.

Mr. M. B. Kennedy's *White Heather* was the only 23-metre yacht out, and the few races she

sailed were chiefly under handicap conditions. She won the King's Cup at Cowes.

The 19-metre class, which had numbered four vessels in 1912, was reduced to two—*Mariquita* and *Norada*—although *Wendula* (ex *Octavia*), now owned in Germany, took part in a few races. Two cutters of this rating had been built in Germany, but their racing was confined to German waters.

For the 15-metre class three new vessels had been built—*Maudrey*, Mr. W. B. Stamp; *Pamela*, Mr. S. G. L. Bradley; and *Paula III.*, Herr Ludwig Sanders. *Maudrey* was a Fife design, while the other two were designed by Nicholson. These, with *Istria*, Sir Charles Allom, and *The Lady Anne*, Mr. George Coats, made a class of five. At the International Regatta, held this year at Havre, *Hispania*, the King of Spain, and *Tuiga*, Duc de Medinacelli, joined the class, but neither of these took part in any British regattas.

The Nicholson boats showed to advantage in the light weather, the Fife vessels doing better when there was heart in the breeze. *Maudrey* had the misfortune to be totally dismasted in the Nore to Dover race. Competition in this class was very keen, and *Istria*, the 1912 champion, came out once more at the top of the records. Her season's prize list included two King's Cups, one won at the Royal Ulster Regatta, and the other at Torbay. The Royal London Commodore's Cup, sailed for at Cowes, was won by *Paula III.*, consequently the trophy goes to Germany for the year.

Great interest was manifested in the reappearance of the famous old cutter *Britannia*, which His Majesty had specially fitted out for racing, after a lapse of fourteen years. She commenced her engagements at Cowes, and then proceeded to the remaining regattas of importance on the south coast. She sailed in handicap races, and one of her competitors was Mr. R. H. Lee's yawl *Wendur*—a vessel older than the royal cutter, having been built in 1883, and which had not been in commission for many years. *Britannia* sailed in ten races, of which she won five.

The handicap fleet included several well-known yachts, and their racing was by no means the least interesting of the season. The Marquis of Ailsa's *Bloodhound* completed her fortieth season, and secured 19 prize flags; but Mr. A. L. Pearce's *Carina* topped the records among the handicap vessels with a total of 25 flags, while Col. Bagot's *Creole*, in her twenty-fourth year, secured 21 flags.

The 12-metre class, which was so successful for three seasons, became almost defunct. At a few regattas there were three competitors, but Messrs. J. R. Payne and H. Goldie's *Alachie* was the only boat of that rating present at many of the fixtures, and she had to sail on time allowance in different classes.

The International Regatta at Havre was a success, although the entries did not compare in number with those of the preceding year at Kiel.

Cowes Week was fully up to the average of former years, although racing suffered to some extent owing to fluky weather conditions.

A feature of the year was the Centenary Regatta at Torbay, the first celebration of the character held in connexion with yachting. Nearly all of the important racing craft were present, including *Britannia* and the German schooners, and the fixture was an unqualified success.

The principal trophies of the year were won as follows:—

King's Cup, Royal Yacht Squadron, *White Heather*; King's Cup, Royal Ulster Yacht Club, *Istria*; King's Cup, Royal Torbay Yacht Club, *Istria*; Emperor's Cup, Royal Yacht Squadron, *Margherita*; Satanita Cup, Royal Yacht Squadron, *Britannia*; Gold Challenge Cup, Royal Victoria Yacht Club, *Margherita*; King of Spain's Cup, International Regatta, *Wendur*; Coupe du Yacht Club de France, International Regatta, *Norada*; Royal London Commodore's Cup, *Paula III.*

The full records of the principal yachts were as follows:—

Schooners :—	Starts.	1st.	2nd.	Total.	
<i>Margherita</i>	15	11	3	14

<i>Bingo</i>	7	1	2	—	3
<i>Althea</i>	6	1	1	1	3
<i>Celia</i>	6	—	2	2	4

Early in the year Sir Thomas Lipton issued a challenge through the Royal Ulster Yacht Club for the America Cup, and, after some lengthy negotiations, the New York Yacht Club ultimately decided to accept the challenge. The design of the new challenger, *Shamrock IV.*, has been entrusted to Mr. C. E. Nicholson, of Gosport. She will be 75 feet water-line, and will be built in accordance with the existing American rule of measurement. In this she will differ from the three former *Shamrocks* which went across to America; they were 90-footers, and built under the old Deed of Gift rule. The vessel will be sailed by an amateur, Mr. W. P. Burton, one of our best-known yacht owners, whose last racing vessel was *Octavia*, in the 19-metre class. The contest will take place off Sandy Hook in September next.

POST OFFICE AND TRUSTEE SAVINGS BANKS.

THESE are established at all Money Order Offices, and are opened for the receipt of deposits during the hours appointed for the sale of stamps, commencing at 8 a.m. Every such office is also open for the payment of withdrawals on weekdays during certain hours, which are specified in a notice exhibited at the office. On presentation of book a depositor may withdraw on demand a sum not exceeding £1. Deposits can be made from 1s. to £50 in one year (ending 31st Dec.). When with interest (2½ per cent.) the total exceeds £200, interest is allowed on £200 only.

ANNUITIES AND LIFE ASSURANCE.—Immediate or deferred annuities from £1 to £100 may be purchased through the Post Office on the life of anyone over 5 years old. These are payable by equal half-yearly instalments (Jan. 5 and July 5, or April 5 and Oct. 10).

Life insurances, from £5 to £100, are granted to persons between 14 and 65 years of age. Children between 8 and 14 can be insured for £5. If the amount of the annuity or insurance purchased is less than £100, further amounts may be bought, until the total sum amounts to £100.

Zetland	56	Mr. H. Straker	Hollymoor, Aldbro', Darlington.
Scotland.			
Buccleuch's (Duke of)	57	Duke of Buccleuch, K.T.	St. Boswells, Roxburghshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton	Kilwinning Castle, Irvine, Ayr.
Ireland.			
Galway County	60	Mr. J. Pickersgill	Craughwell, county Galway.
Kildare	56	Capt. Talbot-Ponsonby	Jigginstown, Naas, county Kildare.
Kilkenny	62	Mr. I. Bell	Birchfield, Kilkenny.
Meath	78	Mr. J. Dunville	Nugentstown, Kells.
Muskerry	60	Capt. Bullough	Forest Coachford, county Cork.
Tipperary	60	Mr. R. Burke	Grove, Fethard, county Tipperary.

CLOSE SEASON FOR GAME, WILD BIRDS, &c.

THE following Table gives the "close" time during which it is illegal to pursue the different kinds of game mentioned, all dates inclusive :—

GAME.	ENGLAND.	SCOTLAND.	IRELAND.
Black Game or Heath Fowl.	11 Dec. to 19 Aug. (31 Aug. in Somerset, Devon, and New Forest).	11 Dec. to 19 Aug.	11 Dec. to 19 Aug.
Bustard ...	2 Mar. to 31 Aug.	None.	11 Jan. to 31 Aug.
Deer, Male.	None.	None.	1 Jan. to 9 June.
" Fallow Male	None.	None.	Michaels. to 9 June.
Grouse or Red Game	11 Dec. to 11 Aug.	11 Dec. to 11 Aug.	11 Dec. to 11 Aug.
Hare	None.	None.	20 Apr. to 12 Aug.
Heath or Moor Game	None.	As "Muir-fowl."	11 Dec. to 11 Aug.
Landrail ...	As "Wild Birds."	As "Wild Birds."	11 Jan. to 19 Sept.
Muirfowl, or Ptarmigan	None.	11 Dec. to 11 Aug.	11 Dec. to 19 Aug.
Partridge ...	2 Feb. to 31 Aug.	2 Feb. to 31 Aug.	2 Feb. to 31 Aug.
Pheasant ...	2 Feb. to 30 Sept.	2 Feb. to 30 Sept.	2 Feb. to 30 Sept.
Quail	As "Wild Birds."	As "Wild Birds."	11 Jan. to 19 Sept.

It is also unlawful to kill pheasants, partridges, grouse, moor game, or hares on a Sunday or Christmas Day.

In England hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In Scotland the same remarks apply to deer and hares, to the first four birds, and to wild duck; in Ireland to all these five birds, with the further addition of widgeon, teal, and plover. The close-time for all these birds (except quail and landrail in Ireland, for whose close-time see above) is, under the Wild Birds Protection Acts, 1880 to 1908, from 2 March to 31 July, both inclusive. Otherwise this close-time applies to all wild birds throughout the United Kingdom. The penalty for killing any wild bird in such close-time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and 5s. and costs for each bird for every subsequent offence, or, in the case of the undermentioned birds, £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or egg, where protected—see next column) in respect of which the offence was committed. In the Island of St. Kilda the fork-tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked * to be omitted.

American quail.	Kittiwake.	Scout.
Auk.	Lapwing.	Sealark.
Avocet.	Lark.	Seamew.
Bee-eater.	Loon.	Sea parrot.
Bittern.	Mallard.	Sea swallow.
Bonxie.	Marrot.	Shearwater.
Colin.	Merganser.	Sheldrake.
Cornish chough.	Murre.	Shoveller.
Coulterneb.	Night-hawk.	Skua.
Cuckoo.	Night-jar.	Smew.
Curlew.	Nightingale.	Snipe.
Diver.	Oriole.	Solan goose.
Dotterel.	Owl.	Spoonbill.
Dunbird.	Ox-bird.	Stint.
Dunlin.	Oyster-catcher.	Stone curlew.
Eider-duck.	Pewee.	Stonehatch.
Fern-owl.	Petrel.	Summer snipe.
* Fulmar.	Phalarope.	Tarrock.
* Gannet.	Plover.	Teal.
Goatsucker.	Ploverspage.	Tern.
Godwit.	Pochard.	Thicknee.
Goldfinch.	* Puffin.	Tystey.
Grebe.	Purre.	Whaup.
Greenshank.	* Razorbill.	Widgeon.
* Guillemot.	Redshank.	Wild duck.
Gull (except black-backed)	Reeve or Ruff.	Willcock.
Hoopoe.	Roller.	Wimbrel.
Kingfisher.	Sanderling.	Woodcock.
	Sandpiper.	Woodpecker.

Officers refusing their names and addresses are liable to a further penalty of 10s., but the Acts do not apply to any person shooting on his own land, or authorizing anyone so to shoot, any wild bird not included in the above list.

On the application of the local authorities, the Secretary of State in England and Wales, the Secretary for Scotland in Scotland, or the Lord Lieutenant in Ireland, has power to vary or abolish the close-time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales, or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here.

By the Wild Birds Protection Act, 1904, penalties are imposed on persons setting springs, gins, &c., on poles, trees, mounds, &c., so as to injure wild birds. Persons permitting such acts are equally liable. By an Act of 1908 the use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close-time for fox-hunting or rabbit-shooting, nor is there, except in Ireland, for deer or hares; but there is an "unwritten law" which the sportsman respects as much as he does the enactments of Parliament. 1 November is the recognised date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 10 Nov. to the end of March for hinds. By an Act passed in 1892 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound. This does not apply to

foreign hares. The statutory close season for hares in Ireland has been varied for some counties by order of the Lord Lieutenant, and it is now mostly from 1 April to 12 August.

CLOSE-TIME FOR SALMON.

I. ENGLAND AND WALES.

Under the Salmon Fishery Acts, salmon (including all migratory fish of the *genus* salmon) are protected, and a close-time is fixed for England and Wales, including the Esk in Dumfries, during which fishing for any of such fish is prohibited. The close-time for nets begins on 1 Sept., and for rods on 2 Nov.; for both nets and rods it ends on 1 Feb. By an Act of 1907 the Board of Agriculture and Fisheries may make provisional orders varying the law on these and other points. Nine of such orders have been made. The close-time may also be varied by a bye-law by local boards of conservators, provided it begins for nets not later than 1 Nov., with a minimum of 154 days, and for rods not later than 1 Dec., with a minimum of 92 days. For putts and putchers the annual close season is from 1 Sept. to 1 May, except where altered by bye-law. The statutory dates have been varied as follows:—

Close-time for	Nets.	Rods.
Adur	1 Sept. to 2 Feb.	1 Oct. to 2 Feb.
Hampshire†	31 July to 1 Feb.	2 Oct. to 1 Feb.
Severn§§§	16 Aug. to " "	" "

Powey	11 Nov. to "	" "

* Except above Woodbury Road Station, 1 Sept. to 15 April. † Above S. Biddick. ‡ Below Old Sandsfield for nets. For rods these dates do not apply in R. Eden above Irthing Foot, or in R. Eamont. § Below Lostwithiel only. || Except R. Erme, 30 Sept. (rods 30 Nov.) to 4 April. §§ 1 June to 1 Feb. above Tewkesbury Weir. ** 16 Aug. to 16 April for putts and putchers. §§ Above Lostwithiel, 1 Dec. to 1 April. †† East of Needles Light-house the dates are:—For nets, 1 Sept. to 14 Feb.; for rods, 16 Oct. (Beaulieu Manor, 31 Oct.) to 1 Feb.

No fresh salmon may be sold between 3 Sept. and 1 Feb., except such as come from parts beyond the seas, or as have been taken, if in the United Kingdom, by legal netting. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled, or cured abroad, or, if within the United Kingdom, between 1 Feb. and 3 Nov., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom, or, if within the kingdom, that they were caught during the legal netting season by legal means, or that, if pickled, they were pickled between 1 Feb. and 3 Nov., lies with the person selling or exposing for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 3 Sept. and 30 April, unless caught at a time at which its sale in the place where it was caught would be legal, if in the United Kingdom: the *onus probandi* lies on the person exporting. The capture and sale of "unclean" salmon, i.e., salmon recently spawned or full of spawn, are prohibited under heavy penalties. Roe may not be used as a bait in salmon angling.

A weekly close season, during which net-fishing for salmon is prohibited, is fixed in England from noon on Saturday to 6 a.m. on Monday. This has been varied by conservancy boards in most districts, and extended to 48 hours, with certain changes in the hour of commencement.

II. SCOTLAND.

In Scotland the annual close-time must not be less than 168 days. It is, for nets, from 27 Aug. to 10 Feb., and, for rods, from 1 Nov. to 10 Feb., except as follows:—

Close-time for	Nets.	Rods.
Tay	21 Aug. to 4 Feb.	16 Oct. to 14 Jan.
Forth	—	ditto.
Add, Aray, Eckkaig, N. & S. Esk, Fyne, Ruel, Shira	1 Sept. to 15 Feb.	1 Nov. to 15 Feb.
Beaully, Dunbeath, Lossie, Ness, Spey ..	—	16 Oct. to 10 Feb.
Halladale, Strathy, Naver, Borigie, Helmsdale	—	1 Oct. to 10 Jan.
Earn	—	1 Nov. to 31 Jan.
Bervie, Carradale, Fleet, Garnock, Girvan, Howmore, Inner, Iorsa, Ir- vine, Laggan, Luce, Sorn, Ythan, and rivers of Orkney, Harris, and Uist ..	10 Sept. to 24 Feb.	1 Nov. to 24 Feb.
Nith	ditto	5 Nov. to 24 Feb.
Annan, Stinchar, Ugie	ditto.	16 Nov. to 24 Feb.
Rivers of Shetland ..	ditto.	16 Nov. to 31 Jan.
Urr	ditto.	1 Dec. to 24 Feb.
Rivers of Bute	1 Sept. to 15 Feb.	16 Oct. to 15 Feb.
Thurso	—	15 Sept. to 10 Jan.
Hope, Polla	—	11 Sept. to 10 Jan.
Tweed	15 Sept. to 14 Feb.	1 Dec. to 31 Jan.

The weekly close-time for nets is between 6 p.m. Saturday and 6 a.m. Monday; and, for rods, on Sundays. The Esk, in Dumfries, is included under the English Salmon Acts.

In Scotland the law as to the sale of salmon differs somewhat from that in force in England.

III. IRELAND.

In Ireland the close-time applies to both capture and sale of salmon and trout. The netting close-time must never be less than 168 days, but many variations have been made, of which it is impossible to specify all the details here; the following list shows the general close-time in force in the various districts, in parts of some of which, however, it is different (all dates inclusive). The second column gives the point of delimitation on the coast between the districts, which include all rivers, &c., within their respective coast-limits.

District.	Coast Limits.	Cl.-T. Net.	Cl.-T. Rod.
Dublin.....	Skerries	16 Aug. to 1 Feb.	1 Nov. to 31 Jan.
Wexford ...	Wicklow	16 Sept. to 31 Mar.	1 Oct. to 14 Mar.
Waterford ..	Kiln Bay.....	16 Aug. to 31 Jan.	1 Oct. to 31 Jan.
Lismore ...	Helvick Head ..	31 July to 1 Feb.	30 Sept. to 1 Feb.
Cork	Ballycotton H. ..	16 Aug. to 29 Feb.	13 Oct. to 14 Feb.
Skibbereen ..	Galley Head ..	30 Sept. to 30 Apr.	1 Nov. to 1 Feb.
Bantry.....	Mizen Head ...	16 Sept. to 31 Mar.	1 Nov. to 16 Mar.
Kenmare...	Crow Head.....	16 Sept. to 31 Mar.	1 Nov. to 31 Mar.
Killarney ..	Lamb Head ...	1 Sept. to 30 Apr.	1 Nov. to 16 Mar.
Limerick ..	Dunmore Head ..	16 Aug. to 14 May	1 Nov. to 31 Jan.
Galway ..	Hags Head.....	1 Sept. to 15 Feb.	16 Oct. to 31 Jan.
Connemara ..	Cashla Coast- Guard Stn. ...	16 Aug. to 31 Jan.	1 Oct. to 31 Jan.
Ballinakill ..	Slyne Head ...	1 Sept. to 15 Feb.	1 Nov. to 31 Jan.
Bangor ...	Pigeon Point ...	Do.	1 Oct. to 30 Apr.
Ballina ...	Benwee Head ..	13 Aug. to 15 Mar.	1 Oct. to 31 Jan.
Sligo.....	Coonamore.....	16 July to 31 Dec.	1 Oct. to 31 Jan.
Ballyshannon	Mullaghmore ..	19 Aug. to 29 Feb.	10 Oct. to 29 Feb.
Letterkenny ..	Rossan Point... to	20 Aug. to 3 Feb.	2 Nov. to 31 Jan.
London-derry	Malin Head ... to	1 Sept. to 14 Apr.	21 Oct. to 31 Mar.
Coleraine ..	Downhill..... to	20 Aug. to 3 Feb.	1 Oct. to 29 Feb.
Ballycastle ..	Portrush..... to	20 Sept. to 16 Mar.	1 Nov. to 31 Jan.
Dundalk ...	Donaghadee ... to	13 Aug. to 11 Feb.	16 Oct. to 29 Feb.
Drogheda ..	Clogher Head .. to Skerries	Do.	16 Sept. to 11 Feb.

In Ireland the weekly close-time is fixed at 48 hours, commencing 6 a.m. Saturday.

CLOSE-TIME FOR TROUT AND CHAR.

The capture of trout and char in England and Wales is prohibited between 2 Oct. and 1 Feb.,

except (1) in parts of Norfolk and Suffolk where, under the Norfolk and Suffolk Fisheries Act, 1877, the close-time for trout, for nets only, is from 10 Sept. to 25 Jan.; (2) in the Thames and Lee, where the close season is from 11 Sept. to 31 March; and (3) in the cases noted below, where, under an Act of 1876, the close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked * the close-time, as altered, applies only to trout. The sale of trout and char is absolutely prohibited throughout England and Wales from 2 Oct. to 1 Feb.:—

*Eden	2 Sept. (rods 2 Oct.) to 28 Feb.
*Usk	2 Sept. to 14 Feb.†
Tyne	1 Oct. to 21 Mar.
*Wye.....	2 Oct. to 14 Feb.
*Taff & Ely.....	20 Sept. to 1 Feb.
*Cleddy	29 Sept. to 1 Mar.
*Ogmore	30 Sept. to 28 Feb.
*Teign	1 Oct. to 2 Mar.
*Exe	15 Sept. to 28 Feb.
*Seint†	{ 22 Sept. to 21 Feb. (except Anglesey, 13 Feb.) 15 Sept. to 10 Mar.

Derwent (Cumb.) } Except Char in Crummock and
Buttermere, 1 Nov. to 30 June.

2 Oct. to 1 Apr.**

*Suffolk & Essex ..

2 Oct. to 10 Apr.

*Dee

14 Oct. to 14 Feb. (rods only).

*Coquet

1 Nov. to 3 Mar. (ditto).

In Scotland there is a close-time for trout from 15 Oct. to 28 Feb. In Ireland the close-time for trout is the same as for salmon. For pollen the close-time is from 14 Nov. to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

CLOSE-TIME FOR FRESHWATER FISH.

By the Freshwater Fisheries Act, 1878, a close-time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish, other than pollen, trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15 June, both inclusive, for

† River Avon between Amesbury and Bickton only; above Amesbury 15 Oct. to 31 Mar.

‡ Char close-time throughout district 1 Nov. to 1 Mar.

§ 2 Oct. to 1 April for R. Duddon; and 16 Sept. to 15 Feb. for R. Bela.

|| April 30 between Lostwithiel and St. Winnow.

‡ 2 Oct. to 30 June from R. Gwili to G.W.R. Bridge.

¶ 2 Oct. to 14 Mar. in certain reservoirs.

Or Thursday preceding Good Friday, whichever date is the earlier.

England and Wales except parts of Norfolk and Suffolk, under a penalty of £2 for a first and £5 for a subsequent conviction. The close-season, however, does not apply to eels taken otherwise than by angling; or to freshwater fish other than grayling taken in certain private waters by leave of the owner; or to angling in public waters by leave of a board of conservators, or in private waters by leave of the owner; or to taking fish in certain cases for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Board of Agriculture and Fisheries. The Axe, Avon (Devon), Wye, Eden, and Towy districts have been so exempted; also the Kent and Bela, and Severn, as regards pike; the Usk as regards eels; and parts of the Severn as regards other fish than grayling. In the navigable rivers of Norfolk and Suffolk and the broads connected therewith, close-times have been fixed for various fish under the Norfolk and Suffolk Fisheries Act, 1877, from 1 March to 30 June. For eels a separate close-time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan. to 24 June; in Ireland, with one or two exceptions, from 11 Jan. to 30 June. In the Severn, elvers, or eel fry, are protected between 1 Jan. and the last day of Feb., and between 15 May and 30 June.

PROTECTION OF CRABS AND LOBSTERS.

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under $\frac{1}{4}$ inches, measured across the largest diameter of the back, or lobsters under 8 inches, measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye-laws of Sea Fisheries Committees (*vide infra*), the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in

some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE-TIME FOR OYSTERS.

There are also local regulations for the protection of oysters; and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a general close-time for the capture and sale of "Deep-Sea Oysters" is fixed from 15 June to 4 August; and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14 May to 4 August. This Act applies to England and Scotland, but not to Ireland. By the Sea Fisheries Act, 1868, fishing for oysters is prohibited from 16 June to 31 August inclusive, in that part of the English Channel comprised between a line drawn from the North Foreland Light to Dunkirk, and a line drawn from the Land's End to Ushant—the territorial seas of England and France alone being excepted. This close-time, however, cannot be enforced till the Convention between England and France, included in the Act, is ratified; and, until that is done, the Convention concluded in 1839, which prohibits oyster-fishing in those limits from 1 May to 31 August, is to remain in force so far as French fishermen are concerned. It is customary, however, for both Powers to agree to suspend the operation of this close season till 16 June in each year. In Ireland, taking oysters from licensed beds is larceny; and the Act 5 & 6 Vict. cap. 106, prescribes that no oysters may be taken between 1 May and 1 Sept., though this close-season has been varied in the following cases:—

Tralee Bay	11 Mar. to 31 Oct.
Galway Bay	1 Jan. to 30 Nov.
Strangford Lough	1 Mar. to 31 Aug.
Achill Sound, Clew Bay.....	2 April to 30 Sept.
Sligo, Ballisodare and	
Drumcliffe Bays	30 April to 1 June.

Licences for Shooting and Fishing.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; rabbit-warren proprietors, or others, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorize others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Soldiers, sailors, volunteers, or constables, on duty, or at practice, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorize any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are given at p. 412.

FISHING LICENCES.—In all fishery districts in England and Wales, and in Ireland, a licence

to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In the Lune, Derwent, Severn, and Wye licences for "freshwater fish" are in force. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued, except that in Ireland rod licences are available in all parts of that country. The rates on salmon nets and other like instruments range from £20 downwards in England and Wales, and from £30 downwards in Ireland. In the latter country the rate on draft nets, the kind most commonly used, is £3; in England and Wales it varies from £5 to £2. The licence duty on a salmon rod and line is £1 in Ireland. In England and Wales different rates are charged in different districts as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district):—

*Eden, *Derwent, *Exe, Hampshire, *Wye, *Usk, 30/-; Taw and Torridge, 24/-; *Lune, *Ribble, *Dee, Clwyd & Elwy, *Conway, *Dovey, *Teify, Avon (Devon), *Dart, *Teign, Frome, Stour (Kent), *Yorkshire, *Tees, *Tyne, 20/-; *Dwyfach, Towy, 21/-; *Seiont, Avon, Brue & Parret, *Camel, *Fowey, 15/-; Cleddy, Taff & Ely, Ogmore, W. Cumberland, 10/6; *Kent & Leven, Rhymney, *Ayrn, Severn, Axe, Trent, Tamar & Plym, 10/-; *Esk (Yorkshire), 7/6; Ouse (Sussex), Wear, Coquet, Cuckmere, Rother, Adur, 5/-.

Fishery Districts, Boards of Conservators, &c. 841

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and freshwater fish is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1907, and the Board of Agriculture and Fisheries Act, 1903, in the hands of local boards, with the Board of Agriculture and Fisheries as the central autho-

qualified by ownership of lands or fisheries of a certain value; and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing in public waters. In certain cases, under local Provisional Orders, there are also members representative of fresh-

+Tyne	Souter Point to Newbiggin Point.....	J. Gibson, Hexham.
+Coquet.....	Newbiggin Point to Hawick Burn.....	C. Percy, Alnwick.

riety. Districts may be formed and Boards of Conservators appointed, and the following districts have been formed, including generally all rivers running into the sea between the points named. In the cases marked + they also include the sea for three miles from the shore, or to the mid-channel in estuaries.

These Boards of Conservators consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow; *ex-officio* members,

water anglers. Districts where Provisional Orders are in force are marked thus *.

There are also certain bodies created by local statutes, having authority over the fisheries, *e.g.*, the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other

kinds of fishing which are prejudicial to such fisheries. They are also empowered to issue licences for fishing for salmon, trout, and in some cases freshwater fish generally.

SCOTLAND.—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND.—In Ireland there are 23 districts, embracing between them the whole country, each with a separate Board of Conservators (*see* p. 839).

SEA FISHERIES DISTRICTS.—Under the Sea Fisheries Regulation Acts, 1888 to 1894, the Board of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales, and to constitute local Fisheries Committees, either for a single county or borough, or for several jointly. They have power to make bye-laws, to be confirmed by the Board of Agriculture and Fisheries, regulating or prohibiting the use of instruments for the capture of sea fish (including

shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the coast and territorial seas adjoining between the points respectively mentioned:—
1. Northumberland (coterminous with that county). 2. North Eastern, from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, from Donna Nook to Great Yarmouth. 4. Kent and Essex, from Dovercourt to Dungeness, and including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern, from the western boundary of Dorset to Hayling Island. 7. Devon, and 8. Cornwall (each coterminous with the respective counties). 9. South Wales, from Eastern boundary of Cardiff to Cemnaes Head. 10. Lancashire and Western, from Cemnaes Head to Haverigg Point. 11. Cumberland, from Haverigg Point to Sark Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act, 1895.

Seasonable and Unseasonable Fish.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then

in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

PRINCE OF WALES'S.—(1912) Nov. 22. A triple bill consisting of *An Imaginary Conversation*, by Norreys Connell, *The Dumb and the Blind*, by Harold Chapin, *The Malingeringer*, a wordless play by Sidney Lewis Ransom, with music by Herman Finck, produced for a series of matinées

(Mr. Graham Browne and Miss Marie Tempest). *Dec. 26.* The triple bill put into the evening programme. (1913) *Jan. 21.* *Esther Castways*, a new play by Jerome K. Jerome (Messrs. Graham Browne, C. V. France and Arthur Wontner, Mesdames Sybil Carlisle and Marie Tempest). *March 10.* *The Handful*, a new comedy by William Gordon Edwards (Messrs. Graham Browne, C. V. France and Miss Marie Tempest). *May 10.* *The Taming of the Shrew* revived (Miss N. de Silva and Mr. Martin Harvey). *June 10.* *The Fawn*, a new comedy by Edward Knoblauch (Messrs. Basil Hallam, Fred Lewis and Martin Harvey, Mesdames Helen Rous, Muriel Martin Harvey and Madge Fabian). *June 30.* *The Only Way* revived. *Sept. 10.* *Girls*, a new comedy by Clyde Fitch (Messrs. Sam Sothorn, Mesdames Beatrice Ferrar, Daisy Thimm and Enid Bell). *Sept. 26.* *The Fugitive* transferred from the Court.

QUEEN'S.—(1912) *Nov. 16.* *Sylvia Greer*, a new comedy (Miss Ethel Warwick, Messrs. Guy Standing and C. M. Lowne). *Dec. 14.* *The Tide*, a new play by Basil Macdonald Hastings (Messrs. Shiel Barry and Norman Trevor, Mesdames Muriel Martin Harvey and Ethel Warwick). (1913) *Jan. 14.* *Get-Rich-Quick Wallingford*, a farce by George M. Cohan from the stories of George Randolph Chester (Messrs. Julian Royce and Hale Hamilton, Mesdames Mary Brough and Madge Fabian). *May 26.* *Typhoon* transferred from the Haymarket. *Sept. 27.* *This Way, Madam*, from the French, by Sydney Blow and Douglas Hoare (Mr. Maurice Farkoa and Miss Mabel Sealby).

ROYALTY.—(1913) *April 22.* *Thompson*, a new comedy by St. John Hankin and George Calderon (Mr. Dennis Eadie, Mesdames Athene Seyler and Lottie Venne), preceded by *The Harbour Watch*, a new one-act play by Rudyard Kipling (Messrs. A. B. Murray and G. F. Tully), for a series of matinées. *Sept. 15.* *Interlopers*, a new play by H. M. Harwood (Messrs. Norman Trevor and Dennis Eadie, Mesdames Evelyn Weeden and Miriam Lewes), preceded by a revival of *The Harbour Watch*, by Rudyard Kipling.

ST. JAMES'S.—(1913) *Jan. 18.* *Turandot*, by Karl Vollmoeller, English version by Jebbro Bithell (Messrs. Norman Forbes, J. H. Barnes, Edward Sass, Godfrey Tearle and Miss Evelyn D'Alroy). *Feb. 15.* *The Importance of Being Earnest* revived. *March 11.* *Open Windows*, by A. E. W. Mason (Messrs. Sydney Valentine and George Alexander, Mesdames Rosalie Toller and Irene Vanbrugh). *March 31.* A new curtain raiser by Arthur Wing Pinero, entitled *Playgoers*. *June 4.* *The Second Mrs. Tanqueray* revived (George Alexander and Mrs. Patrick Campbell). *Sept. 1.* *Androcles and the Lion*, a fable play by Bernard Shaw (Messrs. Ben Webster, Leon Quartermaine, Edward Sillward and O. P. Heggie, Miss Lillah McCarthy), preceded by *The Harlequinade*, by Dion Clayton Calthrop and Granville Barker (Messrs. Nigel Playfair, Arthur Whitby and Leon Quartermaine, Mesdames Sheila Hayes and Cathleen Nesbitt). *Oct. 29.* *The Witch*, by H. Wiens-Jenssen, adapted by John Macfield, revived (Messrs. Nigel Playfair, Dennis Neilson-Terry and J. D. Beveridge, Miss Lillah McCarthy).

SAVOY.—(1912) *Nov. 15.* *Twelfth Night* revived, produced by Granville Barker (Messrs. Arthur Wontner, Hayden Coffin and Henry Ainley, Mesdames Evelyn Millard and Lillah McCarthy).

April 8. *Brother Alfred*, by W. H. Westbrook and P. G. Wodehouse (Mr. Lawrence Grossmith). *May 14.* *The Seven Sisters*, by Ferike Boros, from the Hungarian of Ferencz Herczegh (Messrs. Edmund Maurice, Sam Sothorn and Norman Trevor, Mesdames Mary Rorke, Enid Bell and Laura Cowie). *June 14.* *A Cardinal's Romance*, by Edward G. Hemmerde (Messrs. Norman Trevor and Fred Kerr, Miss Enid Bell). *Oct. 4.* *The Grand Seigneur*, a new romantic play by Edward Ferris and B. P. Matthews (Messrs. Leonard Rayne and H. B. Irving, Mesdames Kate Cutler and Marie Löhr).

SHAFTESBURY.—(1913) *Feb. 18.* *Oh! Oh! Delphine*, a new musical comedy by C. M. S. McLellan, with music by Ivan Caryll (Messrs. Walter Passmore, Harry Welchman and Courtice Pounds, Mesdames Nan Stuart and Iris Hoey). *Sept. 25.* *The Pearl Girl*, a new musical comedy by Basil Hood, music by Hugo Felix and Howard Talbot (Messrs. Harry Welchman, Lauri de Freece and Alfred Lester, Mesdames Ada Blanche, Cicely Courtneidge and Iris Hoey).

STRAND.—(1913) *Feb. 1.* *The Son and Heir*, a new play by Gladys Unger (Messrs. Norman Trevor, Raymond Lauzerte and Edmund Maurice, Miss Ethel Irving). *March 24.* *The Woman in the Case* revived (Mr. Herbert Sleath, Mesdames Norah Lancaster and Violet Vanbrugh). *April 26.* *The Chaperon*, a new farce by Jocelyn Brandon and Frederic Arthur (Mr. Cyril Keightley, Mesdames Ethel Dane and Ada King). *June 16.* *Brewster's Millions* revived. *July 17.* *The Barrier*, a new play by Philip Hubbard, from Rex Beach's novel (Messrs. Malcolm Cherry, Charles Rock and Matheson Lang, Miss May Blayney).

VAUDEVILLE.—(1912) *Dec. 21.* *Shock-Headed Peter* revived for a series of matinées (Messrs. Edward Rigby and Edmund Gwen, Mesdames Nellie Bowman and Kate Bishop). (1913) *Feb. 25.* Pinero's farce *The Schoolmistress* revived (Messrs. Edmund Gwen and Dion Boucicault, Mesdames Hilda Trevelyan and Winifred Emery). *May 31.* *Yours*, a new comedy by Wilfred T. Coleby and Sydney Blow (Messrs. C. M. Hallard and Edmund Gwen, Mesdames Hilda Trevelyan and Lottie Venne). *Aug. 28.* *The Picture of Dorian Gray*, adapted from Oscar Wilde's story by G. Constant Lounsbury (M. Lou-Tellegen and Miss Julia James). *Oct. 1.* *Collision*, a new play by Bridget MacLagan (Messrs. Malcolm Cherry and Norman McKinnel, Mesdames Alice Crawford and Grace Lane). *Oct. 23.* *Between Sunset and Dawn*, by Hermon Ould, followed by *The Green Cockatoo*, by Arthur Schnitzler, translated by Penelope Wheeler (Mr. Norman McKinnel and Miss Sarah Brooke).

WYNDHAM'S.—(1913) *March 26.* *Diplomacy*, from the French of Victorien Sardou, revived (Messrs. Arthur Wontner, Owen Nares, Norman Forbes and Gerald du Maurier, Mesdames Ellis Jeffreys, Gladys Cooper and Lady Tree).

THE STAGE SOCIETY produced the following plays:—(1912) *Dec. 8.* *The Waldies*, by G. J. Hamlen, at the Haymarket. (1913) *Feb. 16.* *The Brothers Karamazov*, by Jacques Copeau and Jean Croué, translated by Christopher St. John, at the Aldwych. *March 9.* *Comtesse Mizzi*, by Arthur Schnitzler, translated by H. A. Herz, and *The Green Cockatoo*, by Arthur Schnitzler, translated by Penelope Wheeler, at the Aldwych. *June 22.* *Elizabeth Cooper*, by George Moore, at the Haymarket.

The Year's Music.

THE year's music in London has been chiefly remarkable for the extent and the variety of the operatic fare. In the spring Mr. Thomas Beecham gave a German season at Covent Garden, which, in addition to filling the great theatre night after night with enthusiasts of every musical creed, was notable for the excellent artists which it served to introduce, amongst them being Madame Perard-Petzl, a soprano of the first magnitude. That satisfying actor-singer Herr Knupfer made a welcome reappearance, while the minor members of the company were generally competent. Mr. Beecham's memorable venture included satisfying performances of "Die Meistersinger"; and Strauss's "Rosenkavalier" drew crowded houses—thanks in great measure to the thorough and discreet manner in which it was "boomed." Then came the eagerly anticipated production of the Strauss-Molière-von Hofmannsthal-Maugham "Ariadne auf Naxos" at His Majesty's Theatre, followed by the "grand" season given under the auspices of the Royal Opera Syndicate, with Signor Caruso as the "bright, particular star" of the occasion. Unfortunately, the *primo tenore assoluto* of a few years ago, though singing with increased refinement of style, was found to have developed a curiously "dark" baritone quality in his lower notes, while the upper part of the voice lacked the admired warmth and brilliance which had endeared him to the *habitués* in former seasons. It is necessary to emphasise the point, since many critics—both professional and amateur—failed to note a state of things which was apparent to capable experts. Madame Melba, fresh from successes in her native Australia and elsewhere, also took part in a number of performances, and, on the whole, with happy results. Twenty-five years having elapsed since the *diva* first captured all the town, it is not surprising that the higher notes should have lost something of their pristine freshness, but the middle and lower part of the voice are still in good condition. As to the actual singing, it is, on the whole, as satisfying as ever; an exponent of the genuine *bel canto*, there is no reason why she should not please those who are worth pleasing for some time to come. The only novelties offered by the directorate were Camussi's "La Du Barry," an ambitious attempt in a light setting, and von Waltershausen's "Oberst Chabert," a sombre work which has mightily pleased the Germans. It is doubtful if either will be heard again in this country.

In mid-summer Sir Joseph Beecham gave an extremely successful season of Russian opera and Russian ballet at Drury Lane, when the graphic art of M. Chaliapine and the remarkably fine voices of the baritone and basses—both amongst principals and chorus—made every representation of "Boris Godounow," "La Khovantchina," and "Ivan le Terrible" a thing of joy. November found Mr. Raymond Roze directing the destinies of a company at Covent Garden, each work being performed in English, with a number of foreign artists who struggled bravely, if not altogether successfully, against the untold difficulties of irregular pronunciation. Mr. Roze, greatly daring, opened with his own "Joan of Arc," an opera which proved too reminiscent to attract serious attention.

Concerts, as in former years, have varied con-

siderably. Those given under the Schulz-Curtius and Powell direction were, however, of the first importance, the firm's special Sunday afternoon concerts at the Albert Hall being of the highest artistic excellence—Madame Melba, M. de Pachmann, Herr Backhaus, Mlle. Suzanne Morvay, and equally famous performers having figured in the programmes. The Queen's Hall orchestra has also played a part in furthering the cause of music, its balance and tone having been the admiration of all who "assisted" at the Sunday and week-day concerts given under Sir Henry Wood's direction. A few really enjoyable recitals, as usual, took place, M. de Pachmann, Madame Carréno, M. Mischa Elman, Madame Donal, a Herr Kreisler, Madame Ellen Beck, Herr von Reuter, Herr Bauer, and others visiting London upon various occasions; while Miss Beatrice Harrison, a 'cellist whose unique and arresting art leaves her without a superior, made several memorable appearances. Welcome, too, was the engagement which brought Miss Alice Liebman to the Coliseum, violin-playing such as hers seldom having been heard in the "halls." The "turn," it may be noted, was extraordinarily successful, each piece being invariably encored.

The Promenade Concerts at the Queen's Hall were as popular as ever, evening after evening seeing nearly all the seats occupied and the floor space packed with a deeply interested throng of perambulating enthusiasts. As upon former occasions, the orchestra fulfilled every possible requirement, while the singers, alas! again left a very great deal to be desired. The solo instrumentalists, happily, were all that the average listener could wish, Miss Marie Novello, Mlle. Suzanne Morvay, Mr. Max Darewski, Mr. Alfred Kastner, and Mr. Albert Fransella especially distinguishing themselves. Although the list of composers was mainly drawn from foreign sources, both ancient and modern, several English names were to be found in it, Sir A. C. Mackenzie, Sir Edward Elgar, Mr. W. A. Aitkin, Dr. Walford Davies, Mr. Coleridge-Taylor, Mr. Walter Hedgecock, Mr. G. H. Clutsam, and Mr. Mozart-Pitt, for instance, being afforded a hearing. Sir A. C. Mackenzie was represented by his "Britannia" overture, Mr. Aitkin by two songs with orchestra, and Mr. Clutsam by the introduction and dance to his opera "King Harlequin," which recently faced German critics. In few cases did the compositions strike one as anything out of the ordinary; although pre-eminently the work of musicians, they are less musical than the older models—a distinction which is less subtle than it seems at first sight. As to the countless ballads and drawing-room ditties which have been published during the past twelve months, all one can say in their favour is that they are generally within the vocal means of those who care to sing such things.

The musical comedies and musical plays of the year have not shown any advance upon their countless predecessors. Amongst these are, "Oh! Oh! Delphine," "The Pearl Girl," "The Girl on the Film," "The Marriage Market," "Love and Laughter," and "The Laughing Husband," all of which strike the intelligent listener as being very much of a pattern. "The Laughing Husband," however, is—musically—an improvement on the others, Edmund Eysler, its

composer, having provided some pleasantly tuneful melodies, while the orchestration is appropriately simple and yet distinctive. But the piece is somewhat handicapped by a poor plot and witless dialogue of a type which is seemingly inseparable from this sort of entertainment. "Rag-time," it may be noted, had little part in the scores of these works, the American importation having been confined to the music-halls. This extraordinarily popular form of music has been exploited without cessation at the Empire, Alhambra, London Opera House, and Hippodrome during the year, and—judging from present indications—the demand will continue for some months.

Attention may be drawn to the vast improvement effected in theatre orchestras of late. For several decades economically minded managers have looked upon music as a necessary evil, grudging the expense entailed by it, and insisting upon the conductor making shift with a wretchedly small force of instrumentalists. Recently, however, a broader policy has prevailed, the past season having been notable for increased orchestras, instruments of good quality, players who know their business thoroughly, and conductors whose work is practically above criticism. The programmes, too, proved to be infinitely more interesting than they were formerly, the cheap musical comedy selections having given place to old-time overtures which are worth reviving and to selections from modern operas. As to the Palace and

Alhambra orchestras, they are a source of genuine pleasure to the exacting listener, and—in almost every respect—a model.

Oratorio and "works," as presented by the Royal Choral Society, have drawn large audiences to the Albert Hall on several occasions, while similar performances which took place at provincial musical centres were well attended. Very gratifying, too, was the success of the Wagner Festival which enlivened Torquay last spring, when Mr. Basil Hindenberg, a young conductor of wonderful promise and enthusiasm, gave particularly well-considered readings of the restful "Lohengrin" prelude, the gloriously atmospheric "Tannhäuser" overture, and other excerpts. Nor is this all, for the long-established Carl Rosa Opera Company (now in its forty-third year) toured the country, delighting critical audiences and gaining increased prestige in every town which it visited. The Denhof troupe also contributed to the supply of opera, performing at various musical centres, "Orpheus" and "Electra"—two extremes—being included in the *répertoire*. The season was remarkable for Miss Marie Brema's exceptionally fine and convincing singing and acting in the title-role of "Orpheus," and for the splendidly dramatic force of her Klytemnestra in Strauss's much-discussed work.

For the rest, the musical year has distinctly been an interesting one, while much enterprise was shown in every direction.

GEORGE CECIL

Cable and Wireless Telegraphy.

TELEGRAPHIC communication is peculiarly important for Great Britain on account of the widespread character of her Empire. Indeed, it should be recognised as an axiom that the greater the distance the more essential becomes the telegraph as an accompaniment to—aye, often instead of—the ship and train. Inter-Imperial telegraphy should not be regarded merely from the financial standpoint—*i.e.*, as to whether it will be directly profitable in each instance. The inland telegraph system of the United Kingdom (unlike the postal service) is conducted at a loss. That loss is solely warranted by the advantages accruing to the public. This applies, however, far more in the case of telegraphic communication between the different branches of the Empire.

It is generally recognised that cables afford a highly efficient method of telegraphy, and that the parties administering them provide, on the whole, an eminently satisfactory service. For a long time, however, it has been felt that the said service is of a very costly character; and there can be small doubt that the disparity between uncontrolled company tariffs and Government controlled tariffs is due entirely to the former being based on a fairly high rate of dividend together with large reserve funds. That companies should do the best they can for their shareholders is only natural; but it is obvious that the interests of shareholders run counter in such a matter to those of the general public. Neither can shareholders' interests, in such circumstances, make for trade development in a country, or the Empire as a whole. Increased overhead charges and the call for additional cables constitute a genuine financial

objection to tariff reductions; but this difficulty of late has, to a great extent, been overcome by the invention of the cable relay, which allows for a cheaper type of cable for a given volume of traffic; and, correspondingly, by its adoption at intervening points, the same type of cable has a greater earning capacity. It is now many years ago since an all-round inter-Imperial telegraph rate of 6d. to *rs.* per word was first urged by Mr. Charles Bright, F.R.S.E. More recently there have been a number of proposals—of a sort that moves public fancy and sensation—about rebatements to as low a figure as *rd.* a word on a universal footing throughout the entire world. A reduction of the latter character would involve numerous international difficulties; moreover, it behoves each nation to limit its energies to the reduction of rates within its own sphere of action.

Unlike certain other private enterprises, our submarine telegraph cables to the Colonies have been heavily subsidised in several instances, because it has been rightly recognised that communicating links with other parts of the Empire are of considerable value—aye, vital—to the nation. On the other hand, the State has exercised scarcely any control on behalf of the public. Indeed, what conditions have been imposed have been almost entirely in the interest of the Government itself. The above-named authority has constantly urged that even if only in exchange for the granting of landing rights the State should insist upon having adequate control, partly in regard to the tariff. The renewal of licences—which ought never to be of an indefinite character—should equally be made the occasion for bargain in public interests.

Hitherto this has been but little realised, or at any rate not acted upon; but our present Postmaster-General has shown himself disposed to recognise the importance of activity in the matter.

If telegraphic communication between a great Power and its distant dominions were only needed for private (individual) purposes, there would be no sufficient justification for a Government embarking on the expenditure of public money for State-owned cables; but such communication has important national aspects—(1) strategically, (2) politically, and (3) for developing inter-Imperial trade. Thus a strong feeling has existed for a long time in favour of an Imperial Atlantic Cable to connect up with the "All-British" Pacific Cable on a State basis. Again, at present telegraphic communication with the Cape is conducted by means of cables landing on foreign territory at more than one point, besides being subject to ready interruption at the hands of foreign fleets in the event of a European war. This serious strategic defect could be remedied by laying a further cable—on a different and unrecorded route—from our shores to Gibraltar, and thence on to Bathurst. Further, when we come to consider the importance of India as a factor in the British Empire and its food supply, it is perhaps remarkable in these days that there are not even more means of telegraphic communication—especially as what there are would be likely to be completely interrupted in the event of trouble with a Continental Power. The forthcoming Imperial "wireless" chain should, in due course, serve as an additional "emergency" string here.

A few years ago there would have been but little to record in regard to radio, or "wireless," telegraphy except in the matter of experimental work. But things have moved rapidly of late years following on steady progress in the practical realisation of this branch of applied science. It would be outside the province of this article to deal at all fully with the history of radio-telegraphy.* It suffices here to say that, like most other branches of applied science, radio-telegraphy, even in its present form, is the work of many hands of different nationalities.† It is fundamentally the result of early mathematical and experimental work of Clerk Maxwell (1864) and Hertz (1888). Benefiting by these researches, Branly, Righi, Lodge, Marconi, Braun, and Slaby each in turn contributed important work in the pioneering and gradual development of the art, whilst a number of others have since taken a leading part in the realisation of practical radio-telegraphy. The earliest organisation for its commercial development was established in 1897 under the title "Marconi's Wireless Telegraph Co.," with headquarters in London. This company was the first to pursue the subject on a large commercial basis, and to attempt long distance radio-telegraphy over gradually increasing ranges. They bought up the first patent granted to Mr. Marconi in 1896. It should be mentioned, however, that the earliest patent for "Syntonic Wireless Telegraphy"—a highly

important patent—was that accorded to Professor (now Sir Oliver) Lodge in 1897. Dr. Lodge, in combination with Dr. Alexander Muirhead, endeavoured for some years to work it for commercial purposes, but these efforts did not meet with the success that they deserved. A renewal of Lodge's patent was granted in April, 1901, whereupon it was bought up by the Marconi Company. The early patents of Dr. Adolph Slaby, Count von Arco, and Prof. Ferdinand Braun were combined in 1903 and absorbed by a great amalgamation, the Telefunken Company of Berlin. This company—of which Messrs. Siemens Brothers are sole agents in England—has hitherto been concerned with most of the radio-telegraphic work connected with Germany and other foreign countries and ships, whilst the Marconi Company have correspondingly been so far responsible for the bulk of British wireless telegraphy other than that of the Navy which has a highly efficient system of its own. The United States of America and American ships have been in the past, to a great extent, supplied with radio-telegraphic inventions and plant emanating from Prof. R. A. Fessenden, Dr. Lee de Forest, and Mr. Marconi. The companies concerned in working the patents of the two former are, however, now non-existent, the National Electric Signalling Company (owning the very numerous and ingenious devices of Prof. Fessenden) having passed into liquidation within the last few months, whilst the United Wireless Company concerned with the de Forest system has, as to its assets, lately been taken over by the Marconi Company. The principal French systems up to a recent date were those of Branly-Popp, Rochfort, and Ducretet. In Russia, Profs. Popoff and Eisenstein led the way in wireless telegraphy, while Italy was perhaps naturally one of the first countries to recognise the value of the Marconi system.

Whilst it is beyond the scope of this article to go closely into the technical aspects of radio-telegraphy, it may be convenient to mention that the different systems now available, in so far as they differ fundamentally, do so mainly in regard to the form of oscillations, or waves, emitted and the method of producing them. These may be classified under the following heads in the order in which they were brought to public notice: (a) the spark, or intermittent wave, of Marconi and others; (b) the quenched spark of Telefunken, Lepel, &c.; (c) the continuous (undamped) wave of Poulsen, Goldschmidt, and others. As has already been intimated, by far the most of the practical, commercial, and long-distance work has been effected, as yet, by the two former, though, on the other hand, in the opinion of some the last named possesses, technically speaking, several undoubted advantages. Further, several independent authorities consider that the spark system, the waves of which are unduly damped, will find no place in wireless telegraphy of a few years hence.* A modern offshoot, or modification, of the spark method, the Galletti system, possesses certain favourable characteristics. Those interested in this system state that an amount of energy can be transmitted with it

* A convenient epitome may be found in the Appendix of Mr. Charles Bright's evidence to the House of Commons Select Committee dealing with the International Radio-Telegraphic Convention of 1906. See Blue-Book 246 of 1907.

† This is altogether apart from the earlier experiments in Inductive Telegraphy of Morse (1842), Lindsay (1847), Trowbridge (1830), Willoughby Smith (1833), and Sir W. H. Preece (1833).

* It may be noted in passing that the organisation perhaps most widely known hitherto in connexion with spark methods, is now working (highly satisfactorily) with continuous waves, and, from a recent financial step, evidently recognises the importance of acquiring outside invention of this character.

sufficient to record a long-distance message on a mechanical inker—just as cable messages are recorded. A recent invention that is likely to prove of great value is the high-frequency alternator of Prof. Rudolph Goldschmidt. The strength and length of waves utilised in most "wireless" systems have been found to vary considerably, independent of the operator's control. By the Goldschmidt apparatus the operator generates and transmits his waves by mechanical means, which obviate the use of much costly and cumbersome apparatus, and are mechanically certain and constant in their effect. It is claimed for this system that the cost of sending messages will be reduced by as much as fifty per cent., and, further, that the length and strength of waves can be so regulated that it will be impossible to tap a message within a certain agreed on distance. Clearly the former claim has much to support it, but the latter is one that would require considerable verification before it can be accepted. For long-range shore to shore work, it would certainly seem that the typical "wireless" future lies before us primarily in the use of persistent oscillations, preferably generated by mechanical rather than physical means. Here we secure all the advantages associated with undamped waves, without certain objections which are liable to be an accompaniment of the arc.

A question that has lately been hotly debated—notably during the House of Commons' inquiry last spring—is as to whether the recent policy of His Majesty's Government in regard to wireless telegraphy is in the best public interests. In Germany the Government buy up, or subsidise in some way, inventions of national importance which meet official expert approval, before the price becomes too great, and whilst their exclusive use is still obtainable if desired. No such policy prevails in Great Britain. On the contrary, an invention requires to be strongly supported financially before it receives the encouragement and assistance associated with contracts or orders of any description. This policy does not always come out well from the public standpoint, for sometimes a really good invention—may be, the best of its sort—languishes for want of encouragement, or eventually falls into the hands of a monopolistic trust.

Radio-telegraphy has now sufficiently proved the utility of its application both as an auxiliary, or reserve, means of communication to the different parts of the Empire, and for establishing intercourse where, owing to prevailing conditions, communication by cable is impossible or difficult to maintain. It should further be established on all the trade shipping routes throughout the Empire. It is satisfactory to note that the cable companies now fully recognise the useful part to be played by wireless telegraphy as an auxiliary and "feeding" string to

their service, for, by means of "wireless," ships are enabled to keep in constant touch at considerable distances with the cable network of the world. In addition to non-urgent, purely personal, messages, "wireless" is especially useful for disseminating information or news to as wide an audience as possible. It may also be of considerable value for leading an enemy astray.

The main objections, strategically, at any rate, to wireless as distinct from cable telegraphy, is, at present, the lack of secrecy and the tendency towards confusion and interruption. Every endeavour is made to meet these difficulties by the adoption of different wave lengths. Thus the Post-Office Department in charge of the service has one wave length for domestic messages and another for the Continent. The Army and Navy stations each have a wave length of their own. There is also a wave length reserved for experimental stations, which must be rigidly kept to by them. Moreover, the experimenter is required to confine himself to a range where he will not interfere with the service on any similar wave length.* Yet another objection is its variable working depending upon prevailable atmospheric and climatic conditions. These defects are far more serious than the chance interruption to cables, whether by accident or design; indeed, the latter is more than balanced by the fact that "wireless" aeriels and towers are not only prone to being fired down, but also to complete wreckage by wind storms.†

Thus, it is a mistake to suppose that those who are best able to judge have, as yet, a preference for wireless over cable telegraphy—even strategically. Germany, France, and Italy, though with far fewer important distant possessions than Great Britain, are especially developing their methods of communication, and particularly by cable, notwithstanding that each have admirable "wireless" systems at hand. Our American cousins, too, can hardly be said to lack in enterprise or appreciation of what the latest inventions can do for them; and the Western Union Telegraph Company of New York would scarcely have indulged in a new Atlantic and practically bought out five British lines, if it had thought "wireless" would prove more efficient in the end. Cables are, in fact, being made and laid at as great a pace as ever—notwithstanding "wireless."

* The above adoption of different wave lengths, even if meeting all the aforesaid requirements, would seem to have certain limitations. If, in fact, wireless telegraphy is to be greatly extended, with stations at constant intervals round our coast, difficulties seem likely to arise—if not actual etheric chaos—due to any considerable increase in the number of high-power stations at close distances.

† Experiment has been lately directed towards obviating the use of high masts or towers, but these researches do not appear to have been turned to practical account so far.

WORLD'S LARGEST TELESCOPE.

THE largest telescope in the world is to be erected in the vicinity of the present observatory in Ottawa, at a cost of \$90,750. The optical portions will be furnished by the John A. Brasher Company, of Pittsburg, Pa., and the mechanical parts by Warner and Swasey, of Cleveland, Ohio. The main lens, 6 ft. in diameter, has to be manufactured in Paris.

ALCOHOL STATISTICS.

THE greatest beer drinkers are the Belgians, who consume 46 gallons per head each year, while Englishmen drink 26 gallons and Germans 22 gallons per head. Frenchmen drink 33 gallons of wine in one year, and Italians follow close with 26 gallons. Danes drink most spirits (2½ gallons a year), Germans and Hungarians coming next with 1¾ gallons per head.

THE year in which plate is marked at Goldsmiths' Hall, London (or at the Assay Offices at Birmingham, Chester, Sheffield, Edinburgh, Glasgow, or Dublin), is indicated by letters of the alphabet on shields of different design. The series of shields and the styles of lettering used at Goldsmiths' Hall, London, from 1438-1916 are shown below:—

	Lombardic, simple.....	1438-9 to 1457-8
	Lombardic, external cusps	1458-9 ,, 1477-8
	Lombardic, double cusps	1478-9 ,, 1497-8
	Black letter, small.....	1498-9 ,, 1517-8
	Lombardic	1518-9 ,, 1537-8
	Roman and other capitals.....	1538-9 ,, 1557-8
	Black letter, small ...	1558-9 ,, 1577-8
	Roman letter, capitals	1578-9 ,, 1597-8
	Lombardic, external cusps	1598-9 ,, 1617-8
	Italic letter, small ...	1618-9 ,, 1637-8
	Court hand	1638-9 ,, 1657-8

BRITANNIA METAL (1697-1720).

Sterling silver is one invariable standard, viz., 110z. 2 dwts. of fine silver to 18 dwts. of alloy. There is, however, a higher standard, viz., 11 oz. 10 dwts. of fine silver to 10 dwts. of alloy, and this was the only legal standard for the manufacture of plate from March, 1697, to June, 1720; after that date the old standard was again adopted, but the higher standard (commonly known as "Britannia" standard, from the figure of Britannia on all such plate) still remained in use, and is used, though to a very limited extent, at the present day. The Britannia standard is denoted by a lion's head erased, as well as by the figure of Britannia, the latter in place of the leopard's head and lion passant seen on silver of the sterling standard.

PROVINCIAL ASSAY OFFICES.

Assay Office.	Distinguishing Mark.
Birmingham	An Anchor.
Chester	The City Arms (3 garbs and a sword).
Sheffield	A Crown.
Edinburgh ...	A Castle.
Glasgow	Tree, Fish, and Bell.
Dublin	A Harp, crowned.

The date letters of these offices and the shape of the shields are quite distinct from those used at Goldsmiths' Hall.

Meteorological Summary (British Isles), 1912-1913.

The results in the table below are for London (Westminster and South Kensington)—barometer above Mean Sea Level, 70 feet.

Storms and Floods in 1912-1913.

(1912) November.—20th, heavy storms in Jamaica; at Montego Bay and Lucca every vessel wrecked or driven ashore. The wind pressure was over 50 lb. per square foot; 75 per cent. of buildings were destroyed and over 100 lives lost; great damage to property of all kinds. 21st, destructive storm in Bombay and Western India, with very heavy rainfall. Severe drought in South Africa. Typhoon in the Philippines; 15,000 persons said to have been killed or injured. 23rd, tidal wave at Messina, doing great damage to cemetery, from which over 100 bodies were washed away. 27th, gale in British Isles, causing loss of life; large tracts of country under water; much loss of stock, especially in North Wales, where heavy snow fell. December.—6th, good rains in South Africa, breaking the drought. 24th, gale in English Channel, causing P. & O. steamship *Narrung*, with 248 third class passengers on board, to put back damaged. 26th, gale and floods in Hampshire; electricity works in Southampton and at Cowes stopped; trains axle deep in water at Southampton, tramway service suspended. Floods also in Lincolnshire. 29th, floods in Thames Valley; river 5 ft. 6 in. above normal at Molesey. (1913) January.—8th, rough weather in the North Atlantic, s.s. *Carminia* three days late after "roughest passage she had ever known." 12th, gale with heavy snow in the midlands and north-west of England; Furness train snowed up all night; in Cairn Valley a train took 10 hours to travel 10 miles; in Sheffield drifts were 7 feet to 8 feet, and in Nottingham 12 feet deep; floods in Shannon Valley, farmers rowed to market over the fields. 14th, floods in the Ohio Valley, 3,000 persons homeless. s.s. *Snowdon Range* arrived at Queenstown 50 days out from Philadelphia, the longest time on record for a modern steamer from the United States. 24th, Seine rising in Paris; steamboat traffic stopped. Excessive rains in Ceylon during this month; at St. Martin's estate, Rangalla, 3,600 feet above sea, 24¾ inches of rain fell in one day (16th), and 109½ inches during the month, the average annual fall being about 70 inches. February.—1st, gale and snow in Germany, train overturned by the wind; 2,000 men employed in

Berlin in clearing the tram lines. 8th, land slide in Argyllshire, 30,000 tons dislodged; 2,000 tons on road, estimated to take 6 weeks to clear; River Shannon 11 feet above summer level. 11th-15th, thick fog prevailed, especially in the South of England; many railway accidents, and shipping much interfered with. 14th, heavy rain at Assouan (¾ in.), heaviest known there for 8 years. 20th, great fire in Tokyo; nearly 4,000 buildings destroyed, 15,000 persons homeless, £1,500,000 damage. March.—4th, sand-storm at Port Said, all vessels detained. 10th, hurricane in Italy; much damage to shipping, traffic on Genoa-Pisa railway stopped. 12th, avalanche in Norway, 15 persons killed. 14th, severe storms in the United States; much loss of life, railway train overturned; damage in Chicago estimated at £200,000. 15th, gale in Montreal. 16th-17th, heavy thunderstorms in South England. 21st, storms in the United States; Mississippi and Ohio valleys flooded; much loss of life, great damage to crops. 22nd-23rd, storms and floods in Kent and Sussex; Hythe parade damaged, Romney Marsh flooded, Worthing pier destroyed. 23rd, violent tornado in Omaha, U.S.; 200 persons reported killed. 26th, great gales and floods in Southern Ohio valley; 2,000 families homeless in Indianopolis; taxi-cab blown over a 6-ft. wall in Omaha; water 20 feet deep in the streets in Dayton; Mississippi risen 37 feet; 250,000 persons homeless, 4,000 persons estimated killed; legislature voted £50,000 for relief works. 30th, heavy floods in New Zealand, miles of railway track submerged; water 6 feet deep in Gore, where damage was estimated at £100,000. 31st, gale and heavy rain in France; country flooded in places; mail coach blown over twice during one journey. April.—1st, Ohio floods continuing. 3rd, tornado in Missouri, goods train lifted bodily from siding. 12th, snow storms in England. 14th, cold wave in Switzerland, doing much damage to vines. 15th, Burgundy vineyards damaged by frost; heavy snow in north and east of France. 16th, good rains in Jamaica ensuring good crops. 29th, heavy thunderstorm with heavy rain in London and South of England; much damage by flooding; landslips near Nun-

eaton doing damage. *May*.—9th–12th, floods in Scotland and in Ireland; water 6 feet to 8 feet deep in places; many sheep drowned. 20th, serious floods in New South Wales; communication between northern and southern parts of the Commonwealth stopped for nearly a week. 27th, heavy thunderstorms in London and Reading, causing several fires; hail-storms in Huntingdon and Essex, many birds and rabbits killed; heavy rain at Herne Bay, 0.79 inch in 15 minutes. 29th, s.s. *Haverford* went ashore at Cork in a fog; 1,200 passengers on board, but no lives lost. 30th, severe thunderstorm, causing five fires in London; two horses killed by lightning at Carshalton. *June*.—4th–5th, storms in Black Forest; goods train blown off the line; heavy hail did much damage and injured many people. 12th, disastrous floods in India; at Politana 16 inches of rain fell in six hours, causing inundation with loss of 250 lives and damage estimated at £60,000. *July*.—1st, bush fires in Canada; path 250 miles broad, causing very heavy loss. 6th, thunderstorm in New York; one man killed, many buildings damaged. 20th, floods in Germany; crops seriously damaged. 22nd, good rains in India. 25th, forest fires in France. 30th, great storm in Washington, most severe known for many years; the storm was followed by great heat. *August*.—9th, heat wave in the United States; hottest day in Chicago since 1872. 10th, serious floods in Bengal; many villages swept away in the Burdwan district; hundreds of square miles under water; enormous loss of cattle and crops, but loss of life small owing to warnings issued; elephants employed in rescuing people from trees and house-tops. 13th, heat wave in Missouri, Kansas and Oklahoma; worst for 25 years; crops badly damaged, trains employed to bring water

into parched districts. 18th, typhoon in Hong Kong, wind velocity 105 miles per hour; at Macao over 150 lives lost. 24th, hurricane in Missouri, with floods; much damage done. 29th, typhoon in Japan, 15,000 houses under water in Tokyo. *September*.—3rd, hurricane on coast of North Carolina, railway traffic stopped, great damage. 5th, good reports of Monsoon rains in India. 7th, great fire at Hot Springs, Arkansas; 2,000 people homeless, loss estimated at from £800,000 to £1,000,000. 25th, rough weather off the Irish Coast, s.s. *Olympic* unable to pick up passengers and mails at Queenstown. 30th, disastrous thunderstorm in South France; at Cerbère 11 persons were killed by lightning, or by fires caused by lightning; floods in Biziers and in Spain. 30th, floods in Constantinople, 70 lives lost. *October*.—2nd, floods in Texas; damage to rice crop estimated at from £200,000 to £300,000. 6th, terrific storm in Nome, Alaska; 500 houses demolished, fire followed wreckage, damage £300,000. 7th, very heavy rains in Ceylon; 20 inches of rain fell in Western Province in 24 hours; bridges, roads and railways destroyed. 13th, failure of monsoon in Upper and Central India; crops suffering severely; Government taking action to relieve distress. 27th, fierce north-westerly gale in North Atlantic. Small but very violent tornado in South Wales; man blown against wall and killed; roof of house carried 100 yards. The tornado passed from Merthyr Tydvil to Cheshire in about an hour, and did much damage at Peckforton Castle. 28th, small cyclone at Witcombe, Glos.; track about 1 mile long and 150 yards wide, damage £700. 29th, drought in United Provinces, India; worst in Agra and Muttra Divisions. 30th, terrific westerly gales in Morocco during last few days.

GOLD AND SILVER, 1903–1912.

YEAR.	BRITISH EMPIRE.		OTHER COUNTRIES.		TOTAL.

Totals ...	£495,487,000	£100,934,000	£358,589,000	£519,395,000	£854,075,000	£630,329,000*

* Value at present price, 28d. per oz. standard = £263,170,000.

The figures given in the above table are based on Returns prepared by the Director of the United States Mint and on those contained in "The Mineral Industry," published by the *Engineering and Mining Journal*.

Gold has been valued in the table at the legal rate of £3 17s. 10½d. per troy ounce standard, and silver at its *coining* value in the United Kingdom, namely, 5s. 6d. per troy ounce standard.

ON Aug. 9, 1912, a violent earthquake occurred in the Dardanelles, a considerable number of buildings, the British Consulate among them, being terribly damaged. Some buildings took fire at Gallipoli. Much injury was done on the coast of Marmora, and at the oil wells of Myriofta several people were injured. The results of the shock were also seriously felt at Adrianople and various other towns in Roumelia.

On the morning of Sept. 15 several slight shocks of earthquake were experienced at Constantinople. The first shock had a duration of 16 seconds, but it was only a feeble disturbance. It was immediately succeeded by a more intense vibration, of 4 seconds, and by others. The people were alarmed and, leaving their houses, spent some hours in the open air. From various districts in the Pyrenees earthquake shocks were also reported.

On Oct. 3 vibrations were noticed in Scotland; doors and windows shook, and crockeryware rattled sufficiently to occasion terror among the inhabitants. In Crieff, and in districts principally to the north-east, the shock was very evident, and startled many people.

On Feb. 22, 1913, a rather violent earthquake shock was felt at Wellington, New Zealand, soon after midnight, and many more feeble tremors were experienced during the following day. Considerable damage was done to buildings.

On June 14 a severe earthquake visited south-eastern Europe, travelling from north-west to south-east. It caused great alarm in many towns in Hungary, including Budapest, and also in Rumania and Bulgaria. At Laibach the shock was the severest felt for fifteen years. It began at 9.35 A.M., Greenwich time. The centre of the disturbance appears to have been at Tirnova, Bulgaria. The city is placed on a hill, and suffered severely; many of the buildings were reduced to ruins, and over 100 dead were extricated from the *débris*. A branch of the National Bank of Tirnova was shattered and fell, and coin, notes, and securities to the value of about £320,000 were lost amid the wreckage. The earthquake was also felt in southern Hungary, where its duration was 4 seconds; and in the northern part of Bulgaria, at Rustchuk, it lasted 25 seconds. It was felt at Philippopolis as well, and it travelled from west to east; at Bucharest the direction was from south-west to north-east; at Adrianople its motion appeared to be towards the south-east, or in the direction of Constantinople. At Tirnova, where the damage was greatest, many churches and houses were very badly damaged or thrown down. The damage was estimated at several million francs. Shocks continued to be experienced on succeeding days, and kept the inhabitants in alarm.

On June 23 Vesuvius was said to be again active; "subterranean rumblings were heard, and devastating outbursts of lava were expected at any moment," according to advices from Naples, but the disturbance seems to have quieted down.

On June 28 earthquake shocks were reported from various points in southern Italy, at 9.30 in the morning. In Cosenza Province much damage was done, but no loss of life resulted. In the communes of Paola, Rossano Marina, San Marco, San Martino, Rose, and Luzzi a number of persons were injured. By the collapse of a wall in a school at Rogiano Gravina

about 20 children met with injuries; two of them were seriously hurt.

On July 20 several rather severe shocks of earthquake were felt at Stuttgart, at about 9 A.M. The first shock was sufficiently marked to cause a perceptible swaying of buildings, and the inhabitants, fearful of more violent disturbances to follow, ran out into the streets for safety. There were some subsequent vibrations, but none of sufficient violence to cause serious damage to property. The visitation seems to have been evident over the southern region of Germany, its centre being in Württemberg, but it was also recorded in the Black Forest and the upper valley of the Rhine.

A few days later the Kingstown, Jamaica, correspondent of *The Times* telegraphed that the most severe earthquake since the disaster of Jan. 14, 1907, had just occurred, but though it occasioned much alarm there was no serious damage nor any loss of life.

The Seismological Observatory at Lima announced that on July 28 a violent earthquake occurred about 516 kilometres south of Callao, and that the movement was from east to west. On July 29, in the morning, severe shocks were experienced over a considerable part of West Jutland, Denmark.

Mr. John Milne, of Shide, in the Isle of Wight, and the leading authority on earthquakes, died on August 1. Mr. Milne was born in 1850, and when a young man went to Japan, and obtained a Government appointment there as a geologist and mining engineer. Japan, it is well known, is very liable to earthquakes, and the attention of Mr. Milne was naturally directed to these occurrences. He devoted himself very successfully to the subject, and invented or perfected the seismograph, which is a very delicate instrument capable of recording the time, place, direction, and degree of severity of any earthquake, no matter how distant its forces may be from the observer. Mr. Milne had travelled extensively, and applied himself to the systematic collection and summation of earthquake phenomena. He had mapped out the principal regions of the earth subject to earthquakes into eighteen districts. While in Japan he married a Japanese lady, who was a daughter of the Abbot of Ganjo-ji, and she survives him.

LANGUAGES OF THE WORLD.

OF the 1,623,000,000 inhabitants of the globe about 600,000,000 speak the principal European tongues, of which English has the largest number of adherents through the predominance of that tongue in the British Dominions and in the United States of America. The principal European tongues are divided approximately as follows:—

Language.	People.
English.....	160,000,000
German.....	130,000,000
Russian.....	100,000,000
French.....	70,000,000
Spanish.....	50,000,000
Italian.....	50,000,000
Portuguese.....	25,000,000
Total.....	585,000,000

In the first half of the seventeenth century (1633 has been cited as the best approach to a definite date) we meet with the earliest mention of the introduction of *rails* for the lessening of friction upon roads. Beams of wood, some six or seven inches in breadth, were about this time laid down to facilitate the draught of the waggons in the vicinity of some of the coal-mines at Newcastle; and as a matter of necessity the addition of "sleepers" had speedily to follow. In 1738, at Whitehaven, it is stated that iron was first substituted as the material of the rails; and in 1767 it appears established that this revolution was adopted at Coalbrookdale, being followed nine years later at the Sheffield Colliery. As yet, however, only thick plates of iron were fastened to the surface of the wooden rails, and it was not till 1789 that "edge rails" were introduced, the credit of their adoption being assigned to William Jessop, on the Loughborough and Nantpantan line. James Watt had conceived the idea of utilizing steam for locomotion, and there is a record of a model locomotive having been used in Cornwall in 1784. George Stephenson, however, in the year 1825, was the first to bring the project fairly into practical shape.

The first Act obtained for the construction of a railway was that of the Surrey Iron Railway Company in 1801, for a line $9\frac{1}{2}$ miles long from Wandsworth to Croydon. In 1804 an Act was passed "for making and maintaining a railway or tramroad from the town of Swansea into the parish of Oystermouth, in the County of Glamorgan, and for the hauling or drawing of waggons or other carriages passing upon the said railway or tramroad with men, horses, or otherwise." On the 21st of February, 1804, Trevithick's patent locomotive steam engine was tried at Penydarran, near Merthyr, and conveyed along a tramroad 10 tons of bar iron, and about 70 persons, a distance of 9 miles. The application passed the third reading as a railway or tramroad. The word "otherwise" was evidently intended to cover the use of Trevithick's engine, and this Act may therefore be considered the first in which steam was contemplated as the motive power. The line is now known as the Swansea and Mumbles Railway. Then followed the Kilmarnock and Troon, the Severn and Wye, the Gloucester and Cheltenham, Plymouth and Dartmoor, Stratford-on-Avon and Moreton, and other small undertakings, about twenty-five in number altogether, with an aggregate of 325 miles, and an authorized capital somewhat over a million. It is almost unnecessary to add that animal power only was contemplated in their working. The Stockton and Darlington Act was obtained in 1821, with a capital of £102,000; and it is remarkable that, while animal power was to be relied upon for working the line, the clause in the Act states "with men and horses or otherwise." George Stephenson came upon the scene immediately after this Act was obtained, and was appointed engineer of the line; and at his urgent request, Edward Pease, the promoter, applied for a new Act empowering the company to work the railway with locomotive engines. Great opposition was encountered, but the Bill finally passed in 1823, and the line, which was 25 miles in length, was opened on the 27th of September, 1825. The Monkland and Kirkintilloch Railway, a colliery line near Glasgow, opened in 1826, was really the first to follow the example of the Stockton and Darlington, and several other small lines—many

of them worked partly by fixed and partly by locomotive engines—quickly adopted the new traction power. The inauguration of the Liverpool and Manchester line in 1830, attended as it was with a tragic result, was the first to impress upon the people that a revolution in travelling had really taken place. Leicester to Swannington came next, but that from London to Birmingham was the largest that had yet been projected. A great struggle took place with landowners and other influential personages, opposed not only to this Bill in particular, but to the introduction of railways generally. Undaunted courage and perseverance on the part of the promoters prevailed, and the Bill, which was rejected in 1832, passed in 1833, but not until landowners and others had been conciliated by having the price originally estimated for their land, &c., doubled and even trebled. The expenses of carrying this Bill, which was probably the most momentous Parliamentary campaign in the history of railways, were over £70,000. The line was opened throughout in 1838, and the first train accomplished the distance at an average speed of over twenty miles an hour. The tide of public opinion was now fairly turned, and ran as strongly in favour of railways as it had before been against them. The Grand Junction, the London and Greenwich, London and Southampton, the Great Western, Birmingham and Derby, Bristol and Exeter, Eastern Counties, Manchester and Leeds, Midland Counties, North Midland, South Eastern, London and Croydon, Birmingham and Gloucester, together with a large number of small Bills, were all passed in four years from the passing of the London and Birmingham Bill, and before that line was opened.

Up to 1840, inclusive, 299 Acts, authorizing the construction of 3,000 miles of line, had been passed. The inevitable reaction set in, and in 1841-2-3 only a few small Bills were passed by the Legislature; but as the Liverpool and Manchester, the London and Birmingham, and other leading concerns were paying 10 per cent. dividends, and some of the smaller lines were yielding even larger returns, attention was naturally drawn to the remunerative character of this class of property, and the supply of railway shares became far below the demand. A flood of new projects appeared before the public, and the Legislature even, labouring apparently under the general excitement, encouraged promoters by relaxing or withdrawing the general opposition which had previously been offered. In 1844, 797 miles were authorized; in 1845, 2,883 miles; and in 1846, the prodigious total of 4,790 miles, under no less than 272 Acts, obtained Parliamentary sanction. The succeeding years saw some abatement, but still there were 1,663 miles passed in 1847, and 300 in 1848. These figures illustrate the rise and fall of the great fever known as the "railway mania."

The Railways Regulation Act of 1840, the first of the General Acts, provided for a month's notice being given to the Board of Trade before opening; for returns of traffic to be made by the companies, as also of accidents involving personal injury; for Government inspection of works, for the approval of bye-laws, &c. Afterwards were passed Acts for their better regulation, and for the conveyance of troops, 1842, the Railways Further Regulation Act of 1844, the Railways Clauses Consolidation Act, 1845, and the Canal and Railway Carriers Act of the same session.

TABLE SHOWING THE HIGHEST AND LOWEST PRICES OF THE ORDINARY STOCKS OF THE RAILWAY COMPANIES IN 1912 AND 1913 UP TO NOVEMBER 3RD, TOGETHER WITH THE PRESENT PRICE AND THE YIELD THEREUPON, CALCULATED UPON THE BASIS OF THE DIVIDEND PAID FOR THE LAST TWELVE MONTHS ENDING 30TH JUNE, 1913.

Then followed legislation on the leasing and sale of railways, on the gauge, on cheap trains, passenger duty, &c.

RAILWAYS IN 1912.

The number of persons employed in working the railways of the United Kingdom in 1912 was 608,750, and there were in use 22,998 locomotive engines, 52,888 carriages for the conveyance of passengers, 20,000 other vehicles attached to passenger trains, 757,884 waggons for the conveyance of live stock, minerals, and general merchandise, and 22,536 miscellaneous vehicles.

Capital embarked in Railways.—The total amount of capital authorized by Parliament to be raised for the construction of railways in the United Kingdom amounted on the 31st December, 1912, to £1,410,652,036. Of this sum, £1,334,963,518 (which includes £198,500,000 nominal capital caused by the consolidation or conversion of stocks) exists and forms the capital account of the various railway companies, and shows an increase over the year 1911 of £10,945,157, or 0·8 per cent. The £1,334,963,518 is composed of £125,299,997 guaranteed, £348,027,952 debenture, £356,117,005 preferential, and £493,175,985 ordinary stocks and shares, besides a sum of £12,342,579 raised by loans. The net receipts for the year amount to £47,329,974, equal to 3·55 per cent. on the total

capital sunk, as compared with £48,581,746 in 1911, with a corresponding capital of £1,324,018,361, which gave a net receipt of 3·67 per cent. It may be seen, therefore, from the foregoing figures that the total amount of capital raised at the close of the year was over £1,335,000,000, of which about £198,500,000, or approximately 15 per cent., was due to nominal additions. These nominal additions formed approximately 19 per cent. of the ordinary stock, 12¼ per cent. of the guaranteed and preference, and 12¼ per cent. of the loans and debenture stocks. The total amounts of capital at the end of 1912 compared with 1911 show a decrease of about £300,000 in the ordinary, an increase of £8,500,000 in the guaranteed and preference, and £3,000,000 in the loans and debenture stocks, making a total increase of £11,000,000. The decrease in ordinary capital was due to the vesting in the Midland Company of the undertaking of the London, Tilbury, and Southend Company, and the greater part of the increase in preferential capital took place in connection with the same transaction, £2,111,840 of L.T. & S. ordinary stock having been extinguished and replaced by £5,000,000 of Midland preference stock, while nearly £3,000,000 of the latter stock were substituted for about £1,750,000 of L.T. & S. preference stock. Of the total paid-up capital at the end of 1912,

° Engineers and Solicitors shown on page 816.

ordinary stock formed 36·9 per cent., preferential and guaranteed 36·1 per cent., and loans and debenture stock 27·0 per cent. The average rate of dividend on the ordinary capital was 3·45 per cent. in 1912, as compared with 3·62 per cent. in 1911. The average rate of dividend on the preferential capital fell from 3·56 per cent. in 1911 to 3·52 per cent. in 1912. These rates are naturally lower than they would have been had there been no nominal additions to the capital of the companies. The average rate of dividend or interest computed on the total capital, as it would have stood if no nominal additions had been made thereto, was 4·13 per cent., as compared with the rate of 3·52 per cent. paid on the total capital including nominal additions. Another cause of the low average rate of dividend on capital is the increased wages and curtailment of the hours of labour of railway servants, and the rapid growth of local taxation, which is increasing in an alarmingly disproportionate ratio to the net profit and to the benefits which the companies derive from the expenditure of the rates. That this burden of taxation shows a constant tendency to grow heavier year by year is illustrated by the fact that while for the year 1900 an amount of £3,757,153 was paid by the Railway Companies for rates and taxes, in 1912 the amount had increased to £5,136,203, giving an addition of £1,379,050 in thirteen years under this expenditure.

Gross Earnings of the Railways.—The earnings for the year 1912 amounted to £128,553,417, as compared with £127,199,570 for the year 1911, which gives an increase of £1,353,847, equal to 1·1 per cent.

The increase in the passenger receipts is £69,667, made up as follows:—

	1912. £	1911. £	Inc. or Dec. £
1st Class	3,631,676	3,520,447	+111,229
2nd „	1,179,076	2,013,559	-834,483
3rd „	34,339,593	33,705,335	+634,258
Season & Periodical Ticket Holders	5,084,205	4,922,542	+161,663
	44,233,550	44,161,883	+69,667

The receipts from third-class passengers, other than season ticket holders, in 1912 were greater than in any previous year, and the receipts from first-class passengers were greater than those of any other year since 1883. The increases under these two heads in 1912 do not counterbalance the great decrease in the receipts from second-class passengers due to the abolition of the intermediate class on certain lines, and to its partial abolition on other lines where it has been retained for local traffic only. A considerable part of the increases shown in the above statement is attributable to the higher charges made for “season,” “week-end,” “excursion,” and other tickets issued at cheap rates, as there is a large decrease in the number of passengers carried.

The numbers carried were:

	1912. No.	1911. No.	Inc. or Dec. No.
1st Class.....	30,010,381	30,162,733	-152,352
2nd „	14,952,352	25,564,232	-10,611,880
3rd „	1,249,374,313	1,270,590,025	-21,215,712
	1,294,337,046	1,326,316,990	-31,979,944

Equivalent number of Season and Periodical Ticket Holders	785,135	779,173	+5,962
---	---------	---------	--------

With regard to the decrease in numbers carried, it must be borne in mind that in 1912 the working of the railways of the United Kingdom was disorganised for some weeks by the great coal strike. During the year, too, the motor omnibus services were much improved and extended. These two causes have substituted an absolute decrease in place of the usual increase.

The receipts from season ticket holders show a further considerable increase, following on those of previous years, the increase in the receipts from third-class season tickets having been in 1904, £171,000; in 1905, £131,000; in 1906, £137,000; in 1907, £134,000; in 1908, £96,000; in 1909, £89,000; in 1910, £152,000; in 1911, £212,000, and in 1912 £271,000, or 11·0 per cent. over 1911. The earnings for the conveyance of parcels, mails, and such other traffic as is

generally carried by passenger trains, amounted in 1912 to £10,026,852, as compared with £9,793,124 in 1911, being an increase of £233,728, or 2·4 per cent. The total figures of traffic falling under the heading of "goods" are £64,048,814, as compared with £63,285,055 in 1911—an increase of £763,759, or 1·2 per cent. The aggregate is made up of £33,435,262 from merchandise; £29,175,180 from minerals; and £1,438,372 from live stock. The total quantity of goods carried in 1912 was 520,279,128 tons, as compared with 523,577,178 tons in 1911, showing a decrease of 3,298,050 tons, or 0·6 per cent.

Expenditure.—The total working expenses of the whole of the railways for the year 1912 amounted to £81,224,343, equal to 63 per cent. of the gross earnings, as compared with a total of £78,617,824 for the year 1911, equal to 62 per cent. The increase compared with 1911 amounts to £2,606,519, or 3·3 per cent. The total number of miles travelled by passenger and goods trains during the year 1912 was 412,520,175, or 16,112,887 less than in 1911. Analysing the expenditure, we find the item £21,804,616 for locomotive power; £7,145,668 for repairs and renewals of carriages, &c.; £11,707,708 for maintenance of permanent way, stations, &c.; and £23,475,426 for traffic expenses. The locomotive expenses in 1912 amounted to 12·71d. per train-mile.

Compensation.—The amount paid for compensation for personal injuries sustained during the year 1912 amounted to £136,334, as compared with £138,623 for the year 1911, resulting in a decrease of £2,289. In the movement of goods the companies have paid for damages and losses £573,524, as compared with £439,022 in 1911—an increase of £134,502. We subjoin a statement showing the amounts paid by the principal companies under both heads:—

1912	194,298	7,678	2,447,342	450,593	1,856	4,625,357	588,693	4,954	4,117,859	216,048	2,730,157

net receipts, therefore, amounted to £47,329,000, as against £48,582,000 in the previous year. The proportion of net earnings to capital was 3·55 per cent., as compared with 3·67 per cent. in 1911. The amount of paid-up capital increased during the year by about £11,000,000. The average rates of dividend paid on the ordinary and preferential capital respectively fell from 3·62 per cent. and 3·56 per cent. in 1911, to 3·45 per cent. and 3·52 per cent. in 1912, the rates on the other classes of capital remaining substantially unchanged.

The following statement compares the average proportion of net earnings to capital in each quinquennial period from 1871-75 to 1906-10:—

Years.	Proportion of Total Net Earnings to Capital. Per cent.
Average of 1871-75	4·56
" 1876-80	4·29
" 1881-85	4·22
" 1886-90	4·07
" 1891-95	3·80
" 1896-1900	3·64
" 1901-05	3·38
" 1906-10	3·45

The proportion, it will be observed, shows a general tendency to decline, though this tendency has been checked in recent years. The decline, however, arises in part from nominal additions to capital on the conversion of stocks, such nominal additions now representing, as already stated, 15 per cent. of the total capital of the companies, and is also greatly affected by the causes given on page 809.

RAILWAY ACCIDENTS.

In 1911 and 1912 the cost per passenger train-mile for personal injury was 0·12d. and 0·13d. respectively. In loss and damage of goods, the cost in 1911 was 0·67d., and in 1912 0·91d. per goods train-mile. The number of personal accidents on railways to passengers, railway servants, and others, reported to the Board of Trade during the year, show a total of 1,117 killed and 32,265 injured (as compared with 1,159 killed and 32,258 injured in 1911). We will now proceed to investigate under three distinct heads the various causes from which these accidents arose:—

1st. *Accidents to Passengers—* Killed. Injured.
 2. From accidents to trains, rolling stock, permanent way, &c. 19 683

2. From falling between trains and platforms when entering or alighting from trains	Killed. Injured.	
3. From falling off platforms and being struck or run over by trains	25	1,036
4. While crossing the lines at stations	10	9
5. By the closing of carriage doors	—	718
6. From falling out of carriages during the running of trains	31	46
7. Whilst ascending or descending steps at stations	6	213
8. By being struck by barrows or falling over packages, &c., on platforms	—	150
9. From falling off platforms on to the ballast	2	84
10. By other accidents caused by the movement of trains	16	333
11. By other accidents on railway premises not due to train accidents or to the movement of trains	2	250

2nd. *Accidents to Servants* in the employ of the railway companies or contractors.—The casualties under this head resulting from accidents to trains, or in which the movement of trains or vehicles used exclusively upon railways is concerned, show that 343 were killed and 5,562 injured during the year, the following being an analysis of such accidents:—

1. While coupling or uncoupling vehicles	Killed. Injured.	
2. By coming in contact, whilst riding on vehicles, with other vehicles, &c., standing on adjacent lines	12	678
3. While passing over, under, or standing on buffers	2	27
4. When getting on or off, or falling off, engines, waggons, &c.	1	4
5. While braking, spragging, or chocking wheels	8	287
6. While attending to ground-points	8	694
7. While moving vehicles by capstans, turn-tables, props, levers, &c.	—	133
8. By other accidents not included in the preceding	6	544
9. From falling off trains, engines, &c., in motion	22	693
10. When getting on or off engines, vans, &c., during the running of trains	5	52
	1	182

17. From falling or being caught between trains and platforms, walls, &c.	13	73
18. Miscellaneous	33	754

19. From accidents to trains, rolling stock, permanent way, &c.	Killed.	Injured.
	6	154
Total.....	343	5,562

In addition to these accidents, other casualties, in which the movement of vehicles used exclusively upon the railways are not concerned, have occurred, viz., 8 killed and 5,215 injured whilst loading, unloading, or sheeting waggons, 4 killed and 572 injured while working at cranes or capstans, 15 killed and 997 injured by falling off platforms, ladders, scaffolds, &c., in addition to a large number of accidents from various other causes, either the result of want of caution or misconduct.

3rd. *Accidents to Persons other than Passengers or Servants.*—Under this head is classed casualties whilst passing over railways at level crossings; this caused 69 deaths and 32 injuries in 1912 (as compared with 84 deaths and 38 injuries in 1911). There were 236 deaths and 108 injuries resulting

from persons trespassing on the railways, and 222 persons committed suicide upon the lines in 1912 (as compared with 215 in 1911).

The Cheap Trains Act, 1883, provides that fares not exceeding the rate of one penny per mile shall be exempt from duty, but fares for return or periodical tickets shall be exempt from duty only where the ordinary fare for the single journey does not exceed that rate. Duty shall be payable at a reduced rate of 2 per cent. on fares exceeding the rate of one penny a mile between stations within one urban district. Such district will contain not less than one hundred thousand inhabitants, and must be of a continuous urban as distinguished from a rural or suburban character.

Officers or men in the military or police forces, when travelling on public service, are charged three-fourths or one-half of ordinary passenger rates, according to number travelling. The Act does not extend to Ireland.

Hiring of Special Trains.—Although the majority of railway companies have no fixed

charges for hire of special trains, the general charges are five shillings per mile, plus the ordinary fare for each passenger according to class of vehicle hired. The railway companies, however, reserve to themselves the right to make whatever charges they may think fit in accordance with circumstances of hiring special trains.

The Workmen's Compensation Act, 1897.—This Act, which received the Royal assent on August 6, 1897, came into operation on July 1, 1898. The amount paid for compensation under this Act to railway employees during the year 1912 was £326,070, and for amounts paid during previous years see note on page 811.

THE RAILWAY CLEARING HOUSE.

THIS Institution was opened in Jan. 1842, and in addition to the work of clearing through bookings of passenger and luggage traffic, is the medium through which agreements relating to rates and fares, &c., are arrived at. *Chairman*, Charles Mortimer; *Secretary*, H. Cuff Smart; *Offices*, Seymour Street, N.W.

RAILWAY SPEED.

The Fastest Running, without Stoppage, is made by the Companies as under:—

Company.	Train.	From	To	Time.		Distance.	Average Speed.

Indian Railways.

THE construction of Railways in India commenced in 1853, and the total length open on 31st December, 1912, was 33,484 miles. They are controlled by a Board consisting of a Chairman and two members. The present Chairman is Sir T. E. Wynne, K.C.I.E.; and the two members are Mr. W. H. Wood and Mr. P. Finney, C.I.E. The capital outlay was £310,100,000. The gross receipts for 1912 amounted to £41,100,467; the working expenses to £10,106,134, or 48·92 per cent. of gross receipts. The net revenue amounted to £20,994,333,

which gave a return of 6·77 per cent. per annum upon the capital invested. The net gain to the Government for the year 1912 is £5,488,847. The number of passengers carried in the year was over 417½ millions. The Indian Railways have in their service 589,422 employees, of whom 7,850 are Europeans, 10,066 Anglo-Indians, and 571,506 Indians. The number of servants killed and injured during the year from all causes was 405 killed and 866 injured; passengers, 206 killed and 794 injured; other persons, 1,534 killed and 449 injured; total, 2,145 killed and 2,109 injured.

Indian Railways.

STATEMENT OF CAPITAL, REVENUE, DIVIDENDS, &c.

In the year 1894 an Act was passed making it legal for Indian Railway Companies to pay interest out of capital during construction, subject to the Secretary of State's specific sanction, and to certain other conditions.

30 Sept. 1913	487	1,982,273	15	4,725	...	...	...	...	4	150	2	106,491	1,982,423	17	4,831	...

* The figures for this date include vessels preparing, but not actually commenced.

These figures show that the average size of vessels building at the present time is over 5½ times that of vessels built thirty-eight years ago; then, steel was not used for shipbuilding purposes;

now, it has entirely supplanted iron. Then, the tonnage in hand was equally divided between steamers and sailing vessels; now, the proportion of sailing to steam tonnage is insignificant.

MERCHANT AND OTHER VESSELS (not Warships) LAUNCHED IN EACH OF THE PRINCIPAL SHIP-BUILDING DISTRICTS OF THE UNITED KINGDOM DURING 1912.

DISTRICT.	Steam.		Sail.

* Excluding river vessels.

In the early part of the 18th century numerous inventors propounded schemes for applying steam power to vessels to be run upon rivers and canals. For a chronological list of the first steamboats, pioneer sailings, and earliest steamship lines, see WHITAKER'S ALMANACK, 1913 edition, page 822.

1824 witnessed the birth in England of the railway system. With the introduction of the "iron horse" the General Steam Navigation Company arose to champion the adoption of steam. Ocean trade was then carried on with sailing ships, mostly under 500 tons each, and all the steamboats in the United Kingdom only numbered 109.

Since the beginning of the last reign, steam-propelled vessels have vanquished the time-honoured "clippers." Iron for building purposes, being stronger, supplanted wood, but had itself to yield to steel as soon as that lighter material could be produced cheaply.

The "auxiliary screw" only stayed long enough to enable the unobtrusive "propeller" to make sure of superseding, for ocean services, the unwieldy "paddle-wheels." "Compound engines," which largely reduced coal consumption, paved the way for "triple-expansion" ones. These were next duplicated to drive "twin screws," and again increased for three screws and four screws. Steam turbines were then adapted successfully to the largest vessels, and new development is in the direction of internal combustion engines.

The application of internal combustion engines to large steamers shows a marked advance in the development of marine engineering.

In 1911 the *Vulcanus*, 1,179 tons gross, was fitted with Diesel engines of the four-stroke cycle type, using heavy oil as fuel; she has proved satisfactory as regards economy in fuel consumption and reliability of engines. On June 30, 1913, there were in service 12 sea-going vessels classed with "Lloyd's Register" propelled by Diesel engines, and 25 others were being built under the inspection of Lloyd's surveyors. Among those completed were the *Wotan*, 5,703 tons, of the two-stroke cycle type; and the *Annam*, 5,296 tons, of the four-stroke cycle type. With the further experience of these engines increased economies and improvements are being effected.

Owing to recent inventions passengers enjoy greater immunity from accidents, 1,932 steamers being now fitted with installation of wireless telegraphy, and 806 with submarine signalling apparatus.

Space being so limited, the evolution of the steamship in the North Atlantic trade is presented in tabular form (page 868).

To Canada belongs the credit of having built and engined the first steamer to cross the Atlantic. This was the *Royal William*, launched at Cape Cove, Quebec, 1831. In 1833 she went from Pictou, N.S., to Gravesend, arriving Sept. 12th, after 25 days' passage.

The pioneer steamer from the Old World to the New was the Cork packet *Sirius*. Leaving Cork April 5th, 1838, she reached New York April 23rd, having been compelled to burn everything available. On the same day the *Great Western*, the first specially built for the Atlantic service, paddled in, having left Bristol April 8th—a wonderfully quick passage of 14½ days. A third company started with the *Royal William*; she

was the earliest steamer with watertight compartments, and the first to cross from Liverpool, July, 1838, taking 19 days.

The *Royal William* had been chartered from the City of Dublin Steam Packet Company, now the oldest steamship company in the world.

The Irish company was practically the godfather of the Peninsular and Oriental Company, so called when the mail services upon this side of Egypt were combined in 1839 under the time-honoured flag of the "P. & O.," which received its charter in 1840.

The failure of the earliest Atlantic companies did not deter the establishment and development of the Cunard Company. Samuel Cunard, to the discomfiture and astonishment of the Great Western Company, secured the subsidy of £80,000 a year for a monthly Atlantic service of 4 steamers. The gun-brigs were thereupon superseded as mail carriers, and a brighter era was auspiciously commenced by the despatch of the *Britannia*, 1,139 tons, on July 4th, 1840.

In 1839 the Royal Mail Steam Packet Company undertook the conveyance of mails to the West Indies at a time when a steam passage of even a fortnight's duration was to many a subject of wonder, and in 1840 the Pacific Steam Navigation Company was formed to run a service between Panama and Valparaiso.

The *Great Britain* was 322 × 40 × 31; tonnage 3,270; h.p. 1,500.

The *Great Eastern*, originally launched as the *Leviathan*, was 680 feet long, paddle engines 1,710 h.p. and screw engines 1,000 h.p.; tonnage, 18,918; 14 knots speed; daily coal consumption, 300 tons; longest day's run, 333 knots.

Some runs by clippers were of sufficient interest to be chronicled here. The *Dreadnought*, in 1862, reeled off between Sandy Hook and Queenstown the enduring record of 9 days 17 hours. The *Thermopylae's* maiden voyage, in 1868, of 60 days between London and Melbourne, remains the fastest ever known. In 1869 the *Patriarch*, 1,339 tons, made for the same owners (the Aberdeen Line) the record passage of 68 days between London and Sydney.

As the size of steamships increased, the heavy cost of construction necessitated the establishment of Corporations, with great strength of capital, which control the principal ocean routes.

The fleets of the 72 largest shipowners in the world, each one not under 100,000 tons (see page 872) aggregate 17,362,000 tons (British 8,820,000 tons). The 14 next in size (not less than 80,000 tons each—see page 873) aggregate 1,246,000 tons (British 622,000).

These 86 owners show a total of 18,608,000 tons (which exceeds one-third of the entire shipping of the world).

In 1814 the steamboats of all kinds registered in the United Kingdom amounted to less than 1,000 tons, increased to nearly 8,000 tons by 1820. There were 766 British steamers afloat in 1838, in all just short of 150,000 tons. The invaluable Register Book which is published by the Committee of Lloyd's Register of British and Foreign Shipping shows that on June 30th, 1913, the steamship empire-builders of Greater Britain owned 10,009 vessels, 19,849,167 gross tons, exclusive of 1,278 ships (582,376 tons) belonging to the dwindling disciples of time-honoured canvas. The total for the world was: Steam, 43,979,177 tons; and sail, 3,890,936 tons.

EVOLUTION OF THE STEAMSHIP ON THE NORTH ATLANTIC.

- (1) Wood Paddle-boats. (3) Iron Screw Steamers. (5) Steel Steamships with more
(2) Iron " (4) Steel " than one propeller.

Date.	Name of Steamer.	Owners.	Remarks.
1833	Royal William (1)	Quebec & Halifax S.N. Co. {	From Pictou (N.S.), 1st to cross the Atlantic.
1838	Sirius	British and Amer. S.N. Co.	From Cork, 1st departure from U.K.
"	Great Western	Great Western S.N. Co. ..	" Bristol, 1st built for Atlantic.
"	Royal William (2)	Transatlantic S.S. Co.	" Liverpool, 1st departure.
1840	Britannia	Cunard Line	" Liverpool, 1st carried British mails.
1849	Atlantic	Collins "	" New York, 1st carried U.S. mails.

LARGEST AND FASTEST OCEAN PASSENGER STEAMERS.

(Arranged in order of size and tonnage.)

IMPERATOR.—German; Hamburg-Amerika Linie; gross reg. tonn. 52,117; built 1913 at Vulcan Works, Stettin, by Vulcan Works; machy., steam turbines by Vulcan Works; shaft horse-power 61,000; 4 screws; speed 22 knots; length 880ft.; breadth 98ft.; depth 63ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead doors 23; bilge keels; passenger lifts 4; passenger accommodation 1st 714, 2nd 404, 3rd 944, 4th 1,716, crew 1,200.

OLYMPIC.—British; White Star Line; gross reg. tonn. 46,359; built in 1911 at Belfast by Harland & Wolff, Ltd.; machy., 2 sets of triple (8-cyl.) and 1 turbine; machy. by Harland & Wolff, Ltd.; I.H.P. 50,000; 3 screws; average speed at sea 22 knots; length 882½ft.; breadth 92½ft.; depth 64½ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; transverse watertight bulkheads 16; bilge keels; passenger lifts; passenger accommodation 1st 750, 2nd 510, 3rd 1,000, crew 891.

AQUITANIA.—British; Cunard Steamship Co.; gross reg. tonn. 47,000; built in 1914 at Clydebank by John Brown & Co., Ltd.; machy., turbines by John Brown & Co., Ltd.; I.H.P. 60,000; 4 screws; speed 23 knots; length 901ft.; breadth 97ft.; depth 92ft. 6in. to boat deck; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead doors; passenger lifts; passenger accommodation 3,250, crew nearly 1,000.

MAURETANIA.—British; Cunard Steamship Co., Ltd.; gross reg. tonn. 31,938; launched 1907 at Wallsend by Swan, Hunter & Wigham Richardson, Ltd.; machy., steam turbines by Wallsend Slipway & Engineering Co., Ltd.; I.H.P. 67,000; 4 screws; speed 26 knots; length 790ft.; breadth 88ft.; depth 60ft.; depth to boat deck 80ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead doors; bilge keels; passenger lifts; passenger accommodation 2,100, crew 830. Vide Lusitania, p. 880.

GEORGE WASHINGTON.—German; Norddeutscher Lloyd; gross reg. tonn. 25,570; built in 1909 at Stettin by Vulkan Works; machy., two sets quadruple expansion (8-cyl.) by builders; I.H.P. 21,000; two screws; speed 18 knots; length 722ft. 5½in.; breadth 78ft.; depth 50ft. 1½in.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 12 bulkhead doors; bilge keels; 2 passenger lifts; passenger accommodation 1st 531, 2nd 399, 3rd 472, steerage 1,230, crew 586.

KAISERIN AUGUSTE VICTORIA.—German; Hamburg-Amerika Linie; gross reg. tonn. 24,581; built in 1906 at Stettin by Vulcan Works; machy., two sets quadruple expansion (8-cyl.) by builders; I.H.P. 17,500; 2 screws; speed 18 knots; length 675ft. 10in.; breadth 77ft.; depth 53ft. 9in.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 8 bulkhead doors; bilge keels; passenger accommodation 1st 472, 2nd 174, 3rd 212, 4th 1,608, crew 600.

ADRIATIC.—British; White Star Line; gross reg. tonn. 24,541; built in 1907 at Belfast by Harland & Wolff, Ltd.; machy., quadruple expansion by builders; I.H.P. 17,000; 2 screws; average speed at sea 17½ knots; length 725½ft.; breadth 75½ft.; depth (moulded) 56½ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 11 transverse watertight bulkheads;

bilge keels; passenger lifts; passenger accommodation 1st 420, 2nd 500, 3rd 1,500, crew 428.

ROTTERDAM.—Netherlands; Holland-Amerika Lijn; gross reg. tonn. 24,149; built in 1908 at Belfast by Harland & Wolff, Ltd.; machy., 2 sets quadruple expansion (8-cyl.) by builders; I.H.P. 16,000; 2 screws; speed 17 knots; length 650½ft.; breadth 77½ft.; depth 43½ft.; electric light; submarine signlg.; wireless teleg.; bulkheads; bilge keels; 3 passenger lifts; passenger accommodation 1st 505, 2nd 580, 3rd 2,500, crew 550.

FRANCE.—French; Compagnie Générale Transatlantique; gross reg. tonn. 23,666; completed in 1912 at St. Nazaire-sur-Loire by Chantiers de l'Atlantique; machy., 4 steam turbines by builders; I.H.P. 45,000; 4 screws; speed 24 knots; length 720ft.; breadth 75ft.; depth from boat deck 60ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead doors; bilge keels; 2 passenger lifts; passenger accommodation 1st 534, 2nd 442, 3rd 950, crew 600.

AMERIKA.—German; Hamburg-Amerika Linie; gross reg. tonn. 22,622; built in 1905 at Belfast by Harland & Wolff; machy., 2 sets quadruple (8-cyl.) expansion by builders; I.H.P. 15,600; 2 screws; speed 17½ knots; length 667ft. 10in.; breadth 74ft.; depth 52ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 8 bulkhead doors; bilge keels; passenger accommodation 1st 386, 2nd 150, 3rd 222, 4th 1,750, crew 550.

CARMANIA.—British; Cunard Steamship Co., Ltd.; gross reg. tonn. 19,524; launched in 1905 at Clydebank by John Brown & Co., Ltd.; machy., turbines by builders; I.H.P. 21,000; 3 screws; speed 18 knots; length 675ft.; breadth 72½ft.; depth 44ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead doors; bilge keels; passenger accommodation 2,400, crew 480.

KRONPRINZESSIN CECILIE.—German; Norddeutscher Lloyd; gross reg. tonn. 19,503; built in 1907 at Stettin by Vulkan Works; machy., 4 sets quadruple (16-cyl.) expansion by builders; I.H.P. 45,000; 2 screws; speed 23½ knots; length 706ft. 6in.; breadth 72ft.; depth 40ft. 5½in.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 16 bulkhead doors; bilge keels; 2 passenger lifts; passenger accommodation 1st 614, 2nd 301, steerage 664, crew 686.

KAISER WILHELM II.—German; Norddeutscher-Lloyd; gross reg. tonn. 19,361; built in 1902 by Akt. Ges. "Vulcan" at Stettin; machy., 4 sets quadruple (16-cyl.) expansion by builders; 2 screws; speed 23½ knots; I.H.P. 42,000; length 684½ft.; breadth 72½ft.; depth 40½ft.; electric light; submarine signlg.; wireless teleg.; Stone Lloyd bulkhead and doors; bilge keels; 2 passenger lifts; passenger accommodation 1st 700, 2nd 320, 3rd 799, crew 665.

LAPLAND.—Belgian; Société Anonyme de Navigation Belge Americaine (Red Star Line); gross reg. tonn. 18,694; built in 1909 at Belfast by Harland & Wolff, Ltd.; machy., 2 sets quadruple (8-cyl.) by builders; I.H.P. 14,500; 2 screws; speed 17 knots; length 620ft.; breadth 70ft.; depth 37ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; bulkhead

doors; bilge keels; passenger lifts; passenger accommodation 1st 455, and 484, 3rd 1,308, crew 414.

CERAMIC.—British; White Star Line; gross reg. tonn. 18,481; built in 1913 at Belfast by Harland & Wolff, Ltd.; machy., 2 sets triple recip. (8-cyl.) and 1 turbine; machy. by builders; I.H.P. 8,370; 3 screws; speed 13½ knots; length 674'7½ft.; breadth 69'4ft.; depth (moulded) 47'8½ft.; electric light; refrig. machy.; submarine signlg.; wireless teleg.; 12 transverse watertight bulkheads; bilge keels; passenger

accommodation, one class only, 600, with further accommodation for an additional 220 if necessary; crew 241.

EMPRESS OF RUSSIA.—British; Canadian Pacific Railway Co.; gross reg. tonn. 16,810; built in 1913 at Glasgow by Fairfield Co., Ltd.; machy., 4 steam turbines by builders; I.H.P. 25,000; 4 screws; length 570'2ft.; breadth 68'2ft.; depth 42'0ft.; speed 21 knots; electric light; submarine signlg.; wireless teleg.; 14 bulkheads; bilge keels; passenger accommodation 1st 200, and 100, 3rd 800, crew 480.

NAUTICAL TERMS.

Gross Tonnage is the sum in cubic feet of all the various inclosed spaces of a vessel, divided by 100.

Net Tonnage is the gross tonnage, less certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead Weight Tonnage, or Carrying Capacity, is the number of tons (2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water-line (q.v.).

Displacement Tonnage is the number of tons of sea water displaced by the vessel when charged to the load water-line. The displacement tonnage is arrived at by ascertaining the product of (1) length in feet at load line by (2) moulded breadth in feet by (3) draught in feet by (4) coefficient of fineness, divided by 35 (35 cubic feet = 1 ton of sea water); thus:—

$$\frac{L \times B \times D \times \text{Coeff.}}{35} = \text{Displacement.}$$

Load Water-Line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Moulded Breadth is the greatest breadth through the greatest cross-section of a vessel.

Moulded Depth is the distance from the tonnage deck to the lowest part of the bottom of a vessel.

Draught is the distance in feet from the lowest portion of the bottom of a vessel to the actual water-line at which it is floating; thus, the load water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold, or passengers or their luggage aboard, is said to be "light ship," or "light," or "in ballast."

Coefficient of Fineness of Displacement is the decimal fraction found by dividing the actual displacement of a vessel when fully loaded, in cubic feet, by the number of cubic feet in a rectangular solid of the same length, breadth, and draught as the vessel; thus:—

$$\frac{\text{Tons displacement} \times 35}{L \times B \times D} = \text{Coefficient.}$$

This co efficient varies from 0.5 to 0.8.

Length between Perpendiculars is the length of a vessel from stem (or bow) to the stern post on the range of upper deck beams.

Length over All is the extreme length of a vessel from the fore part of bow (or stem) to the after part of stern (or counter).

Free Board is the distance from the main or upper deck to the load water-line of a vessel. As a general rule, the minimum free board

provides an amount of reserve buoyancy that will keep the vessel afloat with two compartments holed.

Compound Reciprocating Engine is any engine where the same steam does work in two or more cylinders. Generally speaking, a *Compound Engine* is one where the same steam does work in two cylinders, the steam passing from the "high-pressure" cylinder to the "low-pressure" cylinder and thence to the condenser, where it is condensed into water; this water is pumped into the boiler, generated into steam again, and repeats the cycle as long as required. The term *Reciprocating* means that certain steam causes the piston to move from one end of the cylinder to the other, and further steam causes it to return to the first end again; this reciprocatory motion is converted into "rotary motion" by means of rods and a crank. In a turbine the steam works on the blades of the "rotor," causing "rotary motion" direct. In the latter case a good analogy is wind acting on the sails or blades of a windmill.

Triple-Expansion Engines are those where the same steam does work in three cylinders—the high-pressure (H.P.), the intermediate pressure (I.P.), and the low-pressure (L.P.).

Quadruple-Expansion Engines are those where the same steam expands or does work in four cylinders.

One Horse-Power (H.P.) is equal to the work done in raising 33,000 lb. through a vertical height of 1 foot, in 1 minute.

Nominal Horse-Power (N.H.P.) is merely an indication of the size of the cylinders of an engine, not of its actual horse-power.

Indicated Horse-Power (I.H.P.) is the horse-power of an engine found by dividing 33,000 into the product of the "mean pressure" of steam acting on the piston as shown by an "indicator" (P) by the length of stroke in feet (L) by the area of piston in square inches (A) by the number of strokes per minute (N); thus:—

$$\frac{P \times L \times A \times N}{33,000} = \text{I.H.P.}$$

Brake Horse-Power (B.H.P.) is the actual power transmitted to the shaft of the engine. It is found by applying a known brake or load on the shaft of the engine.

Shaft Horse-Power (S.H.P.).—As no indicator can be attached to the rotary or turbine engine to find work done by the steam on the rotor, the twist or torsion set up in the shaft of the turbine is measured when the shaft is running under its load, and from the twist on the shaft and the revolutions of the shaft the shaft horse-power can be calculated.

FUNNELS AND HOUSE FLAGS.

Line.	Funnel.	Flag.
Aberdeen	Yellow	Red and blue horizontal stripes; white star in centre.
Allan	Red; with white band and black top	Red, white and blue horizontal stripes, with red pennant above.
American	Black; with white band.....	White, with blue eagle.
Anchor	Black.....	White burgee, with red anchor.
Atlantic Transport.....	Red; with black top	Red, white and blue horizontal stripes, with stars.
Austrian-Lloyd.....	Black.....	Blue square, anchor in centre.
Bibby	Pink; black top.....	Red.
Booth	Black.....	White; red diagonal cross, B in centre.
British & African	Black.....	Blue burgee; white cross.
British India	Black; with white and black stripes	White burgee; with red diagonal.
Bucknall.....	Black; three white diamonds	Blue; B S L in three white diamonds.
Canadian Pacific Ry.	Buff; black top	Three red and three white squares.
Chargeurs Réunis	Buff; white band with red stars	White flag with five red stars.
Cie. Gén. Trans'que ...	Red; with black top	White; red ball; name of Co. in red.
Cunard	Red; black top	Red; in centre lion holding globe.
City	Buff; black top	Red, initials S S and blue pennant, initials J R E.
Dominion	Red; white stripe, black top	Red pennant; white diamond, blue globe within, in centre.
Elder Dempster	Black.....	White burgee; red St. George's Cross, crown in centre.
Ellerman	Buff; black top, white band	Blue pennant; J R E in white.
Furness	Black.....	Blue; F in white.
Gen. Steam Nav. Co. ...	Black.....	White; 1824 under globe in centre, initials in corner.
Hamburg-Amerika	Buff	Square divided diagonally into blue and white quarters, shield covering anchor in centre.
Houlder	Black; white Maltese Cross on red band	Red; white Maltese Cross.
Imperial D. W. India... ..	Yellow	White burgee; red St. George's Cross, crown in centre.
Lamport & Holt	Blue; black top, white band	One white longitudinal stripe (L & H in black) between two red stripes.
Leyland	Pink; black tops	Red.
Messageries Maritimes ..	Black.....	White; red at corner; letters M M.
Nederland	Buff; black top.....	White; blue cross in centre, red diamond (white N).
Netherlands-American ..	Buff; white between two green bands	White longitudinal stripe (N A S M) between two green ones.
New Zealand S. Co. ...	Buff	White; red St. George's Cross, initials in squares; red, white and blue pennant above.
Nippon Yusen K.	Black.....	White; five-pointed red star in centre.
Norddeutscher Lloyd ..	Buff	White; crossed key and anchor under wreath in blue.
Orient S. N. Co.	Black.....	White; blue cross, crown in centre.
Pacific Steam Nav. Co. ..	Black.....	White; blue St. George's Cross, crown in centre.
Prince	Black; red band, white crown	Red burgee; white crown in centre.
Red Star.....	Black; white band	White burgee; one red star.
Rotterdam-Lloyd.....	Black.....	Wide white cross on red ground; blue square (R L white) in centre.
R. Mail S. P. Co.	Buff	White; red diagonal cross and gold.
Scandinavian-American ..	Centre red; top and bottom black	Blue; white Maltese Cross.
Shaw, Savile & Albion..	Buff; black top	Red cross on white square; one corner blue with white stars and red cross.
Union-Castle	Red; black top	Blue; red diagonal cross super-imposed white cross.
White Star.....	Buff; black top	Red burgee; five-pointed star.
Wilson.....	Red; black top	White burgee; red ball.

N.B.—The above list embraces all shipowners recorded on June 30, 1913, in *Lloyd's Register of Shipping*, with a total gross tonnage of not less than 20,000 tons each. Several of the British coasting services given have been included irrespective of their total tonnages.

It may be of interest to note that *Lloyd's Register*, which was established in 1834, now contains 33 original subscribers, distributed as follows:—London, 26; 1 each to Cardiff, Glasgow, Liverpool, Southampton, South Shields, Sunderland, and Waterford.

Our thanks are due to the owners, agents, and shipbuilders who have furnished us with information, and also to the Secretary of *Lloyd's Register of British and Foreign Shipping*.

MERCHANT VESSELS OF ALL NATIONS.

The following list has been compiled from *Lloyd's Register* (30th June, 1913), and includes (a) All large steamers of 9,000 tons upwards; (b) All steamers not under 20 knots; (c) All 19-knot steamers of 1,500 tons upwards; and (d) All steamers of 16 knots upwards not under 3,000 tons.

ABBREVIATIONS.

Arg. = Argentine; Aust.-H. = Austro-Hungarian; Bel. = Belgian; Br. = British; Brz. = Brazilian; Chl. = Chilean; Chn. = Chinese; Cub. = Cuban; Dan. = Danish; Fr. = French; Ger. = German; Grk. = Greek; Hol. = Netherlands; Itl. = Italian; Jap. = Japanese; Nor. = Norwegian; Por. = Portuguese; Rou. = Roumanian; Rus. = Russian; Sp. = Spanish; Swd. = Swedish; U.S. = United States; ‡ = Paddle steamer; † = Turbines; TR = Turbines and Reciprocating; ** = Twin screws; *** = Triple screws; **** = Quadruple screws; N.R. = No record yet; * = Under 12.

* Fitted for the carriage of petroleum in bulk.

† Under 12 knots.

N.B.—There were on June 30, 1913, 290 vessels fitted for liquid fuel, of which 71 were over 5,000 tons and 72 under 1,000 tons each. Those with a gross tonnage exceeding 7,000 tons each are given above. Great development is taking place in the use of oil fuel instead of coal.

Carriage of Petroleum in Bulk.—312 steamers and 58 sailing ships were engaged in carrying petroleum in bulk; the largest of these not fitted for liquid fuel were the Iroquois, 9,202 tons (Anglo-American Oil Co.); Triton, 7,582 tons (Dutch-American Petroleum Co.); New York, 6,859 tons (American Petroleum Co.); Buffalo, 6,631 tons (Dutch-American P. Co.); Cordelia, 6,533 tons (C. T. Bowring & Co.); Elsinore, 6,500 tons (C. T. Bowring & Co.); Prometheus, 6,448 tons (Dutch-American P. Co.). The Iroquois can carry 9,500 tons of petroleum, but the largest oil-tankers now under construction are designed to carry 15,000 tons of oil each. Lloyd's Register reported on June 30, 1913, that the demand for vessels of this description continues: 45 of these vessels, of 202,005 tons, received the Society's classification during the year, and 83 vessels, of 381,410 tons, were then in course of construction under the supervision of the Society's surveyors.

WILLIAM ARTHUR PHILPOTT.

Bankers.

LLOYDS BANK LIMITED, 72, LOMBARD STREET, E.C.

Offices.

1, FREDERICK'S PLACE, OLD JEWRY, E.C.

This Trust was established in 1893 to acquire Freehold and Long Leasehold Shop Properties solely for investment purposes. Properties of a speculative nature have always been studiously avoided.

The Capital is divided into "A" and "B" Shares.

The "A" Shares are fully subscribed and paid up.

The "B" Shares carry a cumulative dividend of 5 per cent. per annum, and are issued as required. Only fully-paid Shares are issued, so that they involve no liability.

Both classes rank equally for priority as to Capital and Dividends.

All Dividends have been regularly and fully paid since establishment.

The Founders' Shares (held by the Directors and Secretary) are of the nature of Management Shares and do not participate in profits until the respective dividends have been paid on the "A" and "B" Shares and one-fourth of the balance has been carried to the Reserve Fund.

The present Rental Income, arising from lettings on full repairing Leases, exceeds £24,000 per annum, more than half of which is derived from freeholds.

The growth of the Trust is shown by the following Statement:—

Year.	Investments at Cost.	Annual Rent Roll.	Reserve Fund.	Subscribed Capital.
	£	£	£	£
1893	3,074	220	27	1,050
1897	76,725	5,758	456	24,710
1902	200,964	13,375	1,976	69,610
1907	346,437	21,939	4,100	121,285
1913	387,086	24,197	7,652	136,140

The Reserve Fund is invested in Consols.

A copy of the 21st Annual Report and Balance Sheet, giving full details of all investments, can be obtained on application.

EDWARD WELSH. *Secretary.*

HATCH, MANSFIELD

& Co., Limited,

WINE MERCHANTS

TO H.M. THE KING,

and formerly to their late Majesties King Edward VII. and Queen Victoria.

Directors:

SIR ERNEST HATCH, Bart. (Chairman).

Hon. J. MANSFIELD.

R. ALLISON, Esq.

J. H. G. LANG, Esq.
(Bell, Rennie & Co.)

C. W. HUGHES, Esq.

C. G. RAYNE, Esq. (Newcastle-on-Tyne).

Advantages offered to the Wine-Buying Public.

1. The guiding principle is extent of business, not magnitude of profits.
2. The prices are the lowest all round obtainable.
3. The guarantees afforded, with the exclusion of all doubtful vintages, give absolute assurance of the highest value.
4. Under our system carriage is paid on "any quantity, however small," to any Railway Station in Great Britain, and to any Port in Ireland.
5. The trustworthiness of the above statements is proved by the list of Customers published in our Price List, containing many names of high distinction.

Cigar Department.

Particular attention is called to our separate List of Cigars, Cigarettes and Tobacco, all of which have been selected with the utmost care. Customers now enjoy the advantage of the use of our scientifically constructed Maturing Chamber, thus being assured of the perfect conditioning of their cigars.

WINE MERCHANTS.

AGENCIES ABROAD.

To meet the requirements of Englishmen resident abroad we have adopted the policy of establishing a series of agencies throughout the world, whereby customers may obtain in either the smallest or largest quantities the identical Wines and Spirits supplied to leading Families and Clubs in England, and at the same time have the benefit of all the guarantees for quality and authenticity which the system of the Company affords.

The following are the Company's Agencies Abroad:—

<u>INDIA.</u>	BOMBAY	Greaves, Cotton & Co.
	ADEN	Pallonjee, Dinshaw & Co.
<u>CHINA.</u>	SHANGHAI	Geddes & Co.
	FOOCHOW	M. W. Greig & Co.

<u>ZANZIBAR</u>		Smith, Mackenzie & Co.

FREE FREIGHT.

Freight is paid on quantities of not less than 8 dozen bottles, assorted if desired, to any PORT IN THE WORLD except those in Africa, N. America, S. America, and Canada, for which the minimum is 12 dozen.

LOSSES IN TRANSIT.

Responsibility accepted for all losses in transit—including both breakage and pilferage, provided that the cases are examined immediately on arrival, and notification at once given of any shortage. On all shipping orders, therefore, as above defined, customers incur neither charge for insurance nor risk of any loss.

THIRD EDITION, REVISED AND ENLARGED.

STANFORD'S

London Atlas of Universal Geography

The Man of Affairs

requires among his Reference Books a good, reliable Atlas—one that can be depended on at every turn. Such an Atlas is the **ROYAL ATLAS**. The Geographical Information contained in the 1914 Edition is Accurate and Reliable, and of the very latest, so that the Man of Affairs may consult it with perfect confidence and rely upon it absolutely.

The Royal Atlas

contains many unique features that are not to be found in other atlases. Its **60 full-page Maps** are magnificently printed on thick plate paper in colours and in a special manner that increases the beauty and clearness of the maps. A **special index** is given to each map, which by a unique arrangement enhances its usefulness and makes the location of any place easy and rapid.

A **general index** of the principal places is also given at the end of the volume.

Superbly bound in half morocco.

Price - - - £4 4s. net.

Every Man of Affairs should have this Atlas at his elbow for everyday consultation.

EDUCATION.**MESSRS. GABBITAS, THRING & CO.,**

36, Sackville Street, Piccadilly, W.,

have a Department specially organised for advising Parents and Guardians as to the best Educational Establishments for Boys and Girls in the United Kingdom or on the Continent. The Firm have had experience as Educational Agents for forty years, and can give information and advice as to: (1) Public and Endowed Schools; (2) Preparatory Schools; (3) Schools or Tutors' Establishments adapted specially for preparing Boys for Engineering, Agricultural, Scientific, or Commercial Careers; (4) Private Tutors preparing for Army, Civil Service, and University Examinations, or receiving backward or delicate Pupils requiring special attention; (5) Finishing Schools; (6) Schools for younger Girls; (7) Girls' Schools giving a thorough general education and preparing for Examinations; (8) Professors, Pasteurs, and Private Families receiving Pupils wishing to study abroad. To enable the Firm to advise efficiently it is necessary that full particulars should be given; especially as to the age of the Pupil, previous education, and present standard of attainments, special subjects of study, locality, whether a large or small establishment is preferred, and the fees it is intended to pay.

The Firm also can assist in procuring the services of Private Tutors and Governesses, Resident, Travelling, Non-Resident, or Visiting, of whom they always have a large number on their Lists.

Transfers of and Partnerships in Boys' and Girls' Schools are also negotiated.

Messrs. Gabbitas, Thring & Co. during their long career have been instrumental in sending Masters and Tutors to the leading Schools and Tutors' Establishments, and are in the closest touch with all Educational matters.

Masters, Tutors, and Governesses seeking Posts can have a Prospectus on application, free of charge.

BOGNOR.

The Medical Officer of Health writes:—"Aspect S. The air is remarkably pure, balmy, and bracing; having mildness of southern and dryness of eastern coast. Very beneficial to persons suffering from diseases of the chest. Exceptionally good water-supply; unrivalled sands and safe sea bathing, and an ideal winter health resort, protected from N. and N.E. winds by the South Downs. The atmosphere of Bognor is clear, dry and exhilarating. Fog, winter or summer, is almost an unknown quantity. In the summer few days occur on which there is not a slight breeze tempering the heat. In the winter the prevailing wind, being S.W., is warm. Snow is hardly ever seen here. At high-tide the sea reaches right up to the parade, the shore getting well washed twice daily." Sunshine (1912) 1,583 hrs. Pop. 8,142. L.B. & S.C. Rly.

BOYS.

Entire charge taken where Parents abroad.

BOURNEMOUTH.

The Medical Officer of Health writes :—"Bournemouth is built on a sandy subsoil, the dry and porous nature of which makes it an ideal site for a health resort. Whilst the thousands of pine trees constitute a physical feature of great beauty, their effect is hygienic as well as æsthetic, for the emanations from the myriad pine-needles have an undoubted purifying effect on the atmosphere." The town is one of the most beautiful seaside and health resorts in the kingdom. The public gardens are very extensive, and excellent facilities are provided for golf, bowls, croquet, and tennis. Sunshine, 1,494 hrs."

This fashionable South Coast health resort extends along a stretch of chine-broken cliff in the wide open bay which forms the western extremity of Hampshire, and in recent years it has grown to considerable proportion. It owes its prosperity to the natural beauty of its situation, its climatic advantages, and the purity of its air, laden with the aromatic health-giving exhalations of its innumerable pine trees. The cliffs, which in places attain the height of 150 feet, are composed almost entirely of fine red and yellow sand, and the chines give access to miles of sandy beach.

BOYS.

WYCHWOOD SCHOOL, MEYRICK PARK, BOURNEMOUTH.

For Boys 6-14 Preparatory for the Public Schools and Osborne.

School Buildings.—Modern. Sanitation perfect. Grounds, 5 acres.

Regular Physical Culture and Recreation. Swimming. Carpentry.

Fees.—24 to 27 guineas per term.

EDINBURGH.

The Medical Officer of Health writes:—"For nearly 200 years the metropolis of Scotland, apart from its historical associations, has been famous as an educational centre. The town is built on several hills, and the altitude of different portions varies considerably. Its University dates from 1582. In the matter of climate this beautiful city has been well endowed by Nature, influenced in the matter of its bracing properties by the city's proximity to the sea. Strong south-westerly winds blow during 119 days of the year, coming with unbroken ozone-bringing force from the Atlantic. Winter temperature same as London; summer temperature lower. Public parks, gardens, and meadows occupy 1,180 acres, 150 of which are suitable for games." Pop. 320,318. North British Rly. and Caledonian Rly. Edinburgh possesses a picturesque beauty quite unrivalled. Tourists from all parts of the world are attracted to the metropolis of Scotland by its historical associations with Queen Mary, John Knox, and Sir Walter Scott. Besides the castle, Holyrood Palace, Burns Monument, and John Knox's House, are many historical buildings, museums, libraries, and a celebrated University. In the historic Castle are St. Mary's Chapel, an interesting relic belonging to the reign of David I.; the remains of the Royal Palace; the Crown Room, in which are deposited the Scottish regalia; the Arsenal; the Parliament and banqueting hall, with a fine collection of Scottish armour, weapons, and regimental colours. Liberton, 3 m. S. of Edinburgh, a suburb connected by tram service, one of the most healthy and invigorating places in Scotland, occupying an elevated position overlooking the city and commanding magnificent views.

The Curriculum embraces the ordinary English subjects, Languages, Mathematics, Science, Art, and Music. The teaching is thorough and on modern methods. Preparation for Examinations.

Gymnastics and organised Games.

Premises healthily situated 310 feet above sea-level, specially designed to meet all latest requirements. Good Playing Field and Gardens.

Boards received by the Headmistress. Excellent accommodation.

Fees.—£45 to £60 per annum.

HOVE.

The Medical Officer of Health writes:—"The climate of Hove is singularly dry and fresh, being open to the bare Downs on the north and the sea on the south. There is nearly always a good breeze, which in fine weather blows off the sea by day and off the Downs at night, thus preventing any feeling of oppressive heat or intense cold. London's foggy days are generally fine and sunny at Hove. It is specially recommended for those suffering from overwork or too active life in a busy town, and as a bracing change from the damper climate of the south-west of England. The humidity of the air is as low as 50 to 60 per cent. in the summer; the ground dries rapidly after rain. Rheumatism is rare." Pop. 42,173.

GIRLS.

Entire charge where parents abroad.

Fees.—54 to 60 guineas.

HUNSTANTON-ON-SEA.

The Medical Officer of Health writes :—"Hunstanton shares with all the East Coast watering-places a great reputation for convalescents. Apart from this, Hunstanton seems specially adapted for children. The rapidly-drying soil, the absolutely safe bathing, the magnificent sands for exercise in wet or dry weather, perfect drainage, and splendid water, combine to make it an ideal place for them. The number of schools and the wonderful physical progress of weakly children bear testimony to these advantages."

This quiet East Coast health resort stands on the north-west coast of Norfolk, facing the Wash, between Cromer and King's Lynn. Pier, 800 feet in length. Golf Links, 18 holes. Pop. 2511. G. E. Rly.

Entire Charge taken of Pupils whose Parents are abroad.

Illustrated Prospectus, &c.

Principal—JOHN H. WATTERSON, F.R.G.S.

MALVERN.

The Medical Officer of Health writes :—" Malvern is picturesquely situated on the eastern and western slopes of the range of Malvern Hills, with extensive and magnificent views on both sides. The hills, which rise to an altitude of 1,400 feet, are easily accessible for delicate persons, either on foot or by carriage. The climate has a most beneficial effect on invalids. The houses are so placed as to receive more than the ordinary amount of sunshine. Weakly children, especially those suffering from tubercular glands or continually recurring catarrhs, in nearly all cases do remarkably well here. The rainfall is low, and the soil dries with remarkable rapidity. The water-supply is bountiful and of great purity, and the sanitary state of the district generally of a high standard. The average annual (corrected) death-rate for the past five years is 10.5 per 1,000 of the population. Outbreaks of infectious diseases are few and quickly suppressed, as the Urban Council are provided with every means for promptly dealing with any case that may arise." Pop. 8,106.

BOYS.

THE SCHOOL, MALVERN LINK.

W. DOUGLAS (Scholar, Keble College, Oxford),
Five years Assistant Master at Rossall.

Entire charge taken where parents are abroad.

Fees.—From 12 guineas per term.

**MARGATE AND
CLIFTONVILLE.**

The Medical Officer of Health writes:—"Nearly three thousand children are sent yearly to Margate for their education. The chief reasons for the world-wide reputation of Margate as a health resort appear to be: Its dry, bracing climate, the town is exposed to the sea breezes from all quarters except the west; it has the smallest rainfall in England; there is a notable absence of fog; the subsoil is chalk, and the roads rapidly dry even after the heaviest rain." Hours of sunshine (1912), 1,365. Pop. 27,085.

BOYS.**HERNE HOUSE SCHOOL,
CLIFTONVILLE (MARGATE).**

Principals—

Fees.—70 to 80 guineas per annum.

RUTHIN.

A pleasant market town in Denbighshire, in the Vale of Clwyd, $7\frac{1}{4}$ miles S.E. of Denbigh. The district is full of interest to mountaineers and antiquaries. There is plenty of sunshine, protection from cold winds, and small rainfall.

Climates and Baths of Great Britain, 1902:—"In the inland parts of North Wales, especially in the eastern portion of the Principality, there are many districts well suited for health resorts. On each side of the wide Valley of the Clwyd are to be found sunny and bracing sites which will no doubt at some time be taken advantage of."

BOYS. Founded 1595.**RUTHIN SCHOOL.**

Headmaster—E. W. LOVEGROVE, M.A. (Oxon.)
(Sometime Scholar of New College).

To prepare for Universities in accordance with Classical traditions of School, and equip for Commercial careers with Modern Education.

Most European Languages taught if required. Spanish can be substituted for Latin.

School Buildings magnificently situated in own grounds.

Ruthin is a well-known health resort; ideal place for boys from hot countries.

Entire charge taken.

Fees.—Under 15, Board and Tuition, £50 per year; over 15, £60.

BOYS. LLYS-FASI MANOR FARM SCHOOL.

Near RUTHIN.

VALE OF CLWYD, NORTH WALES.

600 acres. Premises specially built for teaching Pupils practical mixed Farming, Dairy and Poultry Work.

Competent instruction given for Home and Colonial Farming.

One year's Special Course of farm-life lays a foundation for invaluable health-giving assets, and would be a benefit to boys before entering professions or business.

Fees.—£100 for one year.

ST. ALBANS.

The Medical Officer of Health writes:—"Population, 25,752. Means of access: Midland Rly., G.N. Rly., L. & N.W. Rly. 20 miles from London. An ancient and historic city. Altitude, 400 ft. Bracing and healthy. Particularly suitable for children. Plentiful supply of pure water, and modern drainage."

BOYS. ST. ALBANS SCHOOL.

(Founded 948.) (Royal Charter 1553.)

Headmaster: E. MONTAGUE JONES, M.A. (Oxon.)
With 10 Resident Masters.

Aim.—Public School Education at moderate fees.

Curriculum. — Comprehensive and modern. Languages and Music a speciality. Preparation for Examinations.

Entire charge of Foreign and Colonial Pupils.

Delicate and backward girls receive special attention.

WEYMOUTH.

The Medical Officer of Health writes:—"Its rare geographical position, situated at the extremity of a promontory, sheltered from the North by the Dorset Hills, with the Crescent Bay extending from Portland's 'lonely isle' to St. Alban's Head, facing the East, and with the pure, fresh, and invigorating breezes of the English Channel fanning it from the West, with its wealth of bright sunshine, its small rainfall, its soft yet mildly invigorating atmosphere free from any oppressive humidity, its entire freedom from fog, render the climate one of the most equable in Great Britain. It is possible to sit outside in the sun at all seasons of the year: warm, sunny shelter being obtained at all times, from all winds. The 6 Parks or Gardens in various parts of the town have different aspects. The drainage has been entirely modernised in the last few years; the death-rate has steadily decreased; epidemic diseases are uncommon; the infantile death-rate about the lowest for towns of the same size. The water-supply is pure and abundant. There are many and excellent schools. Whilst the old town is a place of great antiquity and of interest to the antiquary, it is thoroughly up-to-date in all things essential for the comfort and entertainment of visitors." Bright sunshine (1912), 1,582 hrs. Pop. 11,372.

GIRLS.

ST. AUBYN'S.

HIGH-CLASS SCHOOL FOR DAUGHTERS OF GENTLEMEN.

THE LONDON AND PROVINCIAL BANK, LIMITED, opens—

DRAWING ACCOUNTS upon the plan usually adopted by other Bankers.

DEPOSIT ACCOUNTS.—Deposits are received from Customers and others, and Interest allowed thereon at such rates and for such periods as may be agreed upon, reference being had to the state of the Money Market. Deposit Books are issued when required; these are specially convenient for small Deposits.

Monies can be paid in at the Head Office, or any of the Branches of the Bank for Customers' credit at any other Office. For Customers having business connections in Towns where the Bank has not a branch, arrangements can be made with other Bankers to receive their credits.

The BANK effects purchases and sales of British and Foreign Funds, Stocks, Shares, and Securities, receives dividends, &c. Customers may have their Dividends made payable to the Bank for the credit of their accounts.

The BANK also transacts every other description of Banking business.

Every officer of the Bank is required to sign a Declaration of Secrecy as to the transactions of any of its Customers.

LONDON AND SOUTH WESTERN BANK, LIMITED.

DEBENTURE STOCK - - - - £331,130

Chairman: JOHN CROFT DEVERELL, Esq.

Deputy-Chairman: RICHARD STEPHENS TAYLOR, Esq.

PURCHASES.—The Society purchases Reversions and Remainders, whether absolute or contingent, Life Interests, whether in possession or deferred, and generally all Interests (in approved property) that depend upon the duration of human life.

LOANS.—The Society also grants Loans on the security of such Interests, either on Ordinary Mortgage or by way of Reversionary Charge. The latter mode meets the convenience of borrowers who do not wish to make any payment for either principal or interest until their Reversionary Property falls into possession. The amount to which the Society will then be entitled is fixed at the outset, and does not depend on the time clapsing between the grant of the Loan and its repayment.

Forms of Proposal and full information can be obtained at the Society's Offices.

SUPREMACY OF THE A.M.P.

(Australian Mutual Provident Society)

There are more than 80 Offices doing Life Assurance business in the United Kingdom. The benefits granted by such offices vary to an enormous extent.

Taking examples from Stone & Cox's Bonus Tables (1913 issue), we find that for each £10 of Annual Premium paid by a man effecting an ordinary Whole Life Policy, the BEST RESULTS shown are as follows:—

Age at Entry.	Original Assurance.	Policy with Bonus Accumulations.	
		Actual Results of past 25 years	Results in 25 years based on the last rate of bonus only.
20	£ 535	£ 893	£ 897
30	415	690	691
40	310	514	516

THE BEST RESULTS ARE THOSE OF THE Australian Mutual Provident Society (The A.M.P.) arising under a system of Annual Distribution of Bonus and a scale of Premiums unchanged since the foundation of the Society in 1849.

"A stronger Life Office does not exist, and the bonus record of the Society is truly remarkable."—*Saturday Review*.
"The conditions it now presents makes the maintenance or improvement of its returns to policy-holders practically certain."—*The Insurance Spectator*.

Favourably reviewed by over 100 Influential Newspapers.

"HOW TO SELECT A LIFE OFFICE."

By **G. M. DENT, F.S.S.**

Extracts from a few Press Opinions.

MORNING POST.—"Mr. G. M. Dent, who is a Fellow of the Royal Statistical Society, has written a valuable pamphlet on Life Assurance, in which all the more important questions connected with the subject are discussed by a firm of merchants and an insurance broker. . . . There are two carefully-prepared tables."

PALL MALL GAZETTE.—"Deals very clearly with the main points to be borne in mind in selecting an office, and the tabular matter is very useful. Armed with this pamphlet, and blessed with a little commonsense, the ordinary man cannot go very far wrong."

LAW JOURNAL.—"A cleverly-written dialogue. Both tables are explained with great lucidity."

STATIST.—"The form of question and answer relieves the work very much from the heavy character of a statistical inquiry." "To those who may contemplate insurance, the expenditure of 1s. on this pamphlet will be a judicious outlay."

FINANCIAL TIMES.—"Carefully and skilfully compiled."

POLICY-HOLDER.—"Life Assurance as an investment, and Endowment Assurance, are both explained in a very attractive way."

UNITED SERVICE GAZETTE.—"The fact that this pamphlet has now reached its third edition amply demonstrates the value of its contents. Illustrations, proving the great value of life assurance as an investment, accompany the pamphlet, which also shows how to determine the relative merit of Offices which are not altogether 'much of a muchness' as is generally believed."

BRADFORD OBSERVER.—"The remarks on Life Assurance as a paying investment, apart from its protection against the misfortune of premature death, deserve to be widely read."

CARDIFF TIMES.—"In terse and lucid fashion Mr. Dent not merely emphasises the utility of Life Assurance as an investment, but also explains how the assurer may obtain the maximum of security and the largest return for money."

GLASGOW HERALD.—"The pamphlet takes the form of a dialogue, which, together with a series of tables, shows the features to which an intending assurer should direct his attention before selecting a company."

LIVERPOOL COURIER.—"The dialogue is smartly written, and touches on many of the most important elements that have to be considered before a policy is taken in any office. Appended are illustrative tables showing how widely different offices vary in their mode of doing business."

a Policy is secured under which
in the event of Death

All Premiums Paid will be Returned
together with

A Guaranteed Addition of £1,000

and,
in the event of survivance until the premiums cease,
one of the following

Options

may be exercised, and the Assured may take

- (i) A Fully Paid Policy payable at Death for an amount equal to all the premiums paid plus £1,000.
- (ii) A Guaranteed Cash Payment.
- (iii) An Immediate Annuity payable for the rest of life.
- or (iv) The equivalent value of any or all of the above Options in combination.

Quotations for any age at entry and for any number of limited payments will be sent at once upon application to

THE GENERAL MANAGER,

CLERICAL, MEDICAL & GENERAL LIFE ASSURANCE SOCIETY,

15, St. James's Square, London, S.W.

Telephone: REGENT 1135 (3 lines).

THE COLONIAL MUTUAL LIFE OFFICE

is the most progressive Institution (transacting Life, Endowments, and Personal Accident and Sickness Insurances) in the British Empire.

It is a Company of the **VERY HIGHEST STANDING**, and intending Insurers should certainly study the attractive schemes, liberal policy contracts, and extremely low rates contained in the Society's prospectus (obtainable upon application to THE MANAGER, 33, POULTRY, LONDON, E.C.).

All the above Insurances can be effected in one combined contract at specially reduced rates.

**PERFECT SECURITY. PROMPT SETTLEMENTS.
EXCEPTIONAL BENEFITS.**

ACCUMULATED FUND	-	-	-	-	-	-	-	£3,400,000
ANNUAL INCOME	-	-	-	-	-	-	-	£300,000

This Institution is the Life Assurance Office established by the Society of Friends (Quakers), and is under the management of Members of that Society.

The Scale of Premiums charged is low; but, owing to the longevity of the class of persons assured and economical management, very satisfactory Bonuses have been realised.

The advantages of the Institution are open to those persons who are or have been Friends; and to others who are of Quaker descent, or are connected with Friends by ties of kindred, marriage, or education, or by partnership in business.

MUTUAL LIFE OFFICE

Because of its

AGE. It is a Centenarian in its own right, and, by its absorption of the Amicable Society, **THE OLDEST LIFE OFFICE IN THE WORLD.**

MAGNITUDE. Its annual volume of New Business is very much larger than that of any other British Life Office not transacting Industrial Business.

RESERVE STRENGTH. Its Valuations are made on a Reserve Basis of $2\frac{1}{2}\%$ —a rate attained, or even aimed at, by very few Offices.

PROFIT YIELD. Notwithstanding the severity of the Reserve Basis, the 1911 Valuation showed a Profit of £727,153, and the handsome scale of Bonuses of 1906 was maintained.

ALERTNESS. Its special Tables are designed to meet all the needs of the Twentieth Century, and have done much to popularise Insurance.

ECONOMY. The Business, large as it is, has been built up on strictly economical lines.

THE OUTSTANDING BRITISH LIFE OFFICE.

ROYAL BLIND PENSION SOCIETY

Patron—HIS MAJESTY THE KING.

President—THE DUKE OF GRAFTON, K.G.

Honorary Secretaries—MESSRS. GEORGE POCKOCK AND PERCY R. POCKOCK.

This Society grants Pensions to the Blind Poor at their own homes in sums ranging from 10s. to 25s. per month. There are upwards of 1,300 pensioners, residing in various parts of the Kingdom, among whom nearly £10,000 is annually distributed.

To be eligible, applicants must be totally blind, above 21 years of age, of good moral character, and in receipt of an income not exceeding £20, if single, and £30 if married. No distinction is made in regard to sex or creed; nor is the receipt of parish relief a disqualification.

Application must be made on the printed forms provided by the Society.

Subscribers of 10s. 6d. annually, or Donors of Five Guineas, are entitled to One Vote at every election, and multiples thereof in proportion.

Contributions will be gratefully received by the Treasurer, or by the BANK OF ENGLAND, or Messrs. Barclay and Co.

237, SOUTHWARK BRIDGE ROAD, LONDON.

1,000 are Crippled, Incurable, Blind, Deaf and Dumb, or physically afflicted.

5,000 are Boarded-out in Rural Districts in England and Canada.

900 Boys and Girls are under Industrial Training.

300 Boys are in training for the Navy and Mercantile Marine.

25,105 Young People have been emigrated to the Colonies.

Nearly **1,000** sent to Canada yearly. 95 per cent. of the Emigrants do well.

* * Cheques and Orders payable "Dr. Barnardo's Homes," and
Parcels of Clothing may be sent to the Honorary Director,

WILLIAM BAKER, Esq., M.A., LL.B.,
at Head Offices, 18 to 26, STEPNEY CAUSEWAY, LONDON, E.

[132

THE CANCER HOSPITAL—FREE

(FOUNDED 1851. INCORPORATED UNDER ROYAL CHARTER.)

BROMPTON, LONDON, S.W.

The only Special Hospital in London for the treatment of Cancer.

A special refuge for poor persons afflicted with this fearful disease, who are admitted free without letters of recommendation.

A number of beds are provided for the use of Patients who may remain for Life.

Out-patients are seen on their own application each week-day at 2 p.m. and in addition on Mondays at 5.30 p.m.

New Annual Subscriptions and Donations are urgently solicited for General Expenses and for the Research Department.

FRED. W. HOWELL, *Secretary.*

FORM OF BEQUEST.

"I give and bequeath unto the Treasurer for the time being of THE CANCER HOSPITAL (FREE) situate in the Fulham Road, Brompton; London, Middlesex, the sum of (free of Legacy Duty), to be applied towards carrying on the charitable design of the said Institution."

[138]

CHURCH MISSIONARY SOCIETY

SALISBURY SQUARE, LONDON, E.C.

Vice-Patron—THE LORD ARCHBISHOP OF CANTERBURY.

President—THE RIGHT HON. SIR JOHN H. KENNAWAY, BART., C.B.

Honorary Secretary—THE REV. CYRIL C. B. BARDSLEY, M.A.

WAY CLEAR FOR ADVANCE.—In response to suggestions made at the Swanwick Conference (held in May, 1913) sufficient money was received to clear off all existing deficits. A book entitled '*Plans for Advance*' has been published showing directions in which the Society's work might be strengthened and developed when additional income is reasonably secure, and the needed offers of service have been received. Many friends are aiming at permanently increasing their contributions by twenty-five per cent.

SPHERES OF LABOUR.—The Society's Missionaries are at work in Africa, India, Ceylon, China, Japan, Palestine, Persia, North-West Canada, and British Columbia.

STAFF AND RESULTS.—The Society has upon its staff 1,318 European Missionaries and 9,709 Native Christian workers. During the past year there were 14,342 adult baptisms; 221,169 scholars attended 3,147 Schools and Colleges; and the mission hospitals received 37,341 in-patients, and visits from 1,221,714 out-patients.

ALL CHURCHMEN are cordially invited to co-operate with the Society in furthering these efforts to extend the Church of Christ.

CONTRIBUTIONS should be sent to Dr. Herbert Lankester, the Lay Secretary, and cheques, &c., made payable to "The Church Missionary Society." Legacies should be made out "To the Treasurer for the time being of the Church Missionary Society for Africa and the East."

THE TEMPORARY Home for Lost and Starving Dogs,

Battersea Park Road, S. Lambeth, London, S.W.;

And HACKBRIDGE, SURREY.

An Institution for the Protection of Dogs and Cats.

Patron:

His Most Gracious Majesty the King.

President:

His Grace the DUKE OF PORTLAND, K.G.

OBJECTS:

1. To provide food and shelter for the lost, deserted, and starving dogs of London and the immediate neighbourhood.
2. To restore lost dogs to their rightful owners.
3. When good dogs are unclaimed, to find suitable homes for them at nominal charges.
4. To destroy, by a merciful and painless method, all valueless and diseased dogs.

Dogs can be received as Boarders at Hackbridge or for Quarantine under the Importation of Dogs Order, 1901.

Contributions towards the Maintenance of the **Extended Battersea Home** and the **Country Home at Hackbridge** will be thankfully received by [151]

GUY H. GUILLUM SCOTT, *Secretary.*

CITY OF LONDON TRUSS SOCIETY

For the Relief of the RUPTURED POOR throughout the Kingdom.

Instituted 1807.

35, Finsbury Square, LONDON, E.C.

Patron—HIS MAJESTY THE KING.

The average number of poor persons suffering from the dangerous and distressing malady of Hernia or Rupture annually relieved by this charity during the past ten years has been 8,400. The Patients are of both sexes and from all parts of the Kingdom. The youngest patient relieved was an infant of seven days' old; the oldest, a woman of 107 years. Every patient attending at the Institution is treated by the Surgeons of the Society, by whom the Truss is applied.

ADDITIONAL FUNDS ARE URGENTLY NEEDED to enable the Committee to carry on the beneficent work of the Charity, which necessitates an expenditure far in excess of its income. Annual subscribers of one guinea or more are entitled to recommend four patients within the year for every guinea so subscribed.

ONE LETTER OF RECOMMENDATION ONLY is required, however expensive the necessary instrument may be.

W. K. TAUNTON, *Secretary.* [19]

EVELINA HOSPITAL — FOR — CHILDREN, SOUTHWARK, LONDON, S.E.

Under the Patronage of THEIR MAJESTIES THE KING AND QUEEN.

Supported entirely by Voluntary Contributions.

Only large **CHILDREN'S HOSPITAL IN SOUTH LONDON.**
Situating in its poorest District.

FUNDS GREATLY NEEDED.

£8,000 wanted **ANNUALLY** for Ordinary Working Expenses.

Please help this Charity, "not only because it is a Hospital, but because it is a Hospital for Children."

President—VISCOUNT DUNCANNON, M.P.

Chairman—D. MALCOLM SCOTT, Esq.

Treasurer—GERALD D. SMITH, Esq.

Secretary—H. C. STANLAND SMITH.

[145]

GENERAL LYING-IN HOSPITAL,

York Road, Lambeth, S.E. ESTABLISHED 1765.

Patrons—H.M. The Queen and H.M. Queen Alexandra.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss ROSE E. WHYTE, the Secretary, at the Hospital. [146]

THE GIRLS' FRIENDLY SOCIETY.

Patrons—HER MAJESTY THE QUEEN; HER MAJESTY QUEEN ALEXANDRA.

The G.F.S. is an Imperial Society which links together in friendly bonds over 300,000 women of all ages and of all ranks of society in all parts of the world for mutual help. Its aim is to set before its members a high ideal of purity of thought, word, and deed; to help them to be true to that ideal; to be a standing witness to the possibility of purity of life and conduct for every woman and girl in the land; to guard the hundreds of thousands of girls who are growing up to womanhood from acknowledged dangers, and to extend to them the priceless boon of loving Christian fellowship.

The various Departments of G.F.S. work include help for Sick Members, After-care of Workhouse Children, Registry Work, an Invalids' Work Depot, protection in Emigration and in Travelling, the provision of Homes of Rest, Industrial Training, and the encouragement of Temperance and Thrift.

All information can be obtained from—

THE SECRETARY, G.F.S. Central Office, 39, Victoria St., Westminster, S.W.

Telegrams: "AUGUST VIC., LONDON."

Telephone: 2521 VICTORIA.

[147]

THE GORDON BOYS' HOME

(THE NATIONAL MEMORIAL TO GENERAL GORDON).

Patron—THE KING

Vice-Patrons—H.M. THE QUEEN and H.M. QUEEN ALEXANDRA.

THE HOME IS SITUATED AT WEST END, WOKING, NEAR BROOKWOOD.

OFFICES—5, YORK STREET, ST. JAMES'S, S.W.

The Home is constructed to accommodate 250 Boys, chosen from the homeless and destitute, between the ages of 14 and 16, and give them a training, up to the age of 18, which will fit them alike for civil life in this country or its Colonies, and for service in the Army, Navy or Mercantile Marine.

Conditions of Admission.—1. None are admitted below 13½ years of age or above 15½. 2. A boy must, in the opinion of the Committee, be really necessitous. 3. He must be free from such physical or mental infirmity as would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which would require active bodily exertion. 4. Boys of known bad character are ineligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the Home. A guaranteed payment of £22 annually during his stay at the Home will give a right of nomination for a lad fulfilling the conditions of admission. The Home holds 250 Boys. Subscriptions and Donations are urgently needed in order that this number may be maintained.

Subscriptions are received by THE LONDON COUNTY AND WESTMINSTER BANK, 1, St. James's Square, S.W.; by the Treasurer, General the Right Hon. Sir Dighton Probyn, V.C., G.C.B., Marlborough House, S.W.; and by the Secretary at the Office, 5, York Street, St. James's, S.W., from whom any further information can be obtained.

E. G. MARKHAM, Esq., Secretary. [148]

GUY'S HOSPITAL

LONDON BRIDGE, S.E.

BEDS, 617. IN-PATIENTS (1912), 9,753. OUT-PATIENTS, 124,183.

The Governors Earnestly Appeal for:—

1. NEW ANNUAL SUBSCRIPTIONS and DONATIONS to meet the large difference of about **£25,000** between assured income and ordinary outgoings, for which the Hospital is from year to year dependent on **VOLUNTARY SUPPORT**.

2. CONTRIBUTIONS towards the BUILDING and RENOVATION FUND (1910) to provide **£60,000** for:—

(a) Separate Children's Wards.

(b) Increase of Beds for Special Departments.

(c) Other necessary Works.

VISCOUNT GOSCHEN, Treasurer.

SEPTEMBER, 1913.

Bankers—THE BANK OF ENGLAND.

[149]

HOMES OF HOPE

4, 5 & 6, REGENT SQ., GRAY'S INN RD., LONDON, W.C.

ESTABLISHED 1860.

CASES are continually coming before the Public showing the horrors of the WHITE SLAVE TRAFFIC. One of the streams that have swollen the tide of this TERRIBLE TRADE is that of the FIRST fallen. Outcast, too often there is but ONE ROAD for such unfortunate young women to follow.

The Homes of Hope seek to prevent an extension of the tragedy. They are doing valuable maternity work for the restoration of the first fallen.

Special efforts are made on behalf of these poor betrayed young women, who have taken one false step. They are admitted into the Homes and receive medical maternity attendance and nursing. They are also trained in household and domestic duties, and after a nurse-mother has been found for the infant, the mother is put in the way of earning a respectable living for herself and the child. Every endeavour is used to trace the father and make him jointly responsible with the mother for the maintenance of the infant born to them.

Important Preventive Work is also done in rescuing young girls from the snares of sin and immorality.

Contributions may be sent to the Secretary at the above address, or to the Treasurer, ALFRED HOARE, ESQ., 37, Fleet Street, E.C.

[150]

INFANT ORPHAN ASYLUM, WANSTEAD.

Patron—HIS MAJESTY THE KING. *Bankers*—Messrs. WILLIAMS DEACON'S BANK, LTD.

This Institution maintains and educates the Orphans of persons once in prosperity, from all parts of the Empire, from their Earliest Infancy until Fifteen years of age.

It has received 4,984 Fatherless Children already. Forty-two were admitted last year.

About 430 are in the Asylum now. Elections will be held in May and November this year. Forms of nomination can be obtained at the Office.

Nearly the whole of the Yearly Income arises from Voluntary Contributions. Assistance is therefore urgently needed, and will be thankfully acknowledged.

Life Subscription for One Vote £5 5s. 0d.

Two Votes £10 10s. 0d.

Annual Subscription for One Vote £0 10s. 6d.

Two Votes £1 1s. 0d.

Treasurer—Ald. Sir GEORGE WYATT TRUSCOTT, Bart.

Offices—63, LUDGATE HILL, E.C. *Commr.* H. C. MARTIN, R.N., *Secy. and Supt.* [155]

THE HOSPITAL FOR DISEASES OF THE SKIN,

52, STAMFORD STREET, BLACKFRIARS, S.E.

Telephone: 5653 Central.

ESTABLISHED 1841.

Patroness—HER MOST GRACIOUS MAJESTY QUEEN ALEXANDRA.

Vice-Patron—THE RIGHT HON. LORD HAVERSHAM. *Treasurer*—ROBERT BARCLAY, Esq.

President—THE RIGHT HON. THE EARL OF KINNOUL.

Over 473,000 Patients have been cured or relieved at this Hospital, which was the first and for many years the only Institution in the United Kingdom for the Special Treatment of Cutaneous Diseases.

PATIENTS are admitted on small payment, entitling them to four weeks' treatment, or by Subscriber's letter of recommendation. Indigent persons are admitted entirely free.

OUT-PATIENTS are received daily at 1 p.m. Medical Men and Students are admitted free to the daily practice on presentation of their cards.

Light Treatment—X Ray, High Frequency, Radium and Carbon Dioxide Snow Treatment daily—towards the expense of erecting and maintaining which Donations and Subscriptions are earnestly solicited, and will be thankfully received and acknowledged by the Secretary, or the Bankers, Messrs. BARCLAY, Ltd., 54, Lombard Street, E.C.

300 to 400 OF THE SUFFERING POOR ARE WEEKLY RELIEVED BY THIS CHARITY, and every addition to the Fund would extend its advantages to a larger number.

FREDERICK HAYTER, *Secretary Superintendent.* [155]

LONDON HOSPITAL MEDICAL COLLEGE AND DENTAL SCHOOL.

THE MEDICAL COLLEGE AND THE DENTAL SCHOOL OF THE LONDON HOSPITAL contain large laboratories fully equipped with the latest and most approved appliances. Students are prepared for all the Examinations of the Medical and Dental Curriculum.

The various departments are under the direct control of University Lecturers, who devote their time entirely to work in their department. The Lecturers are assisted by a number of Demonstrators, so that each Student receives full and individual attention.

The Hospital contains 922 beds, and is the largest General Hospital in England.

Its position in the neighbourhood of the extensive docks, factories, and workshops of the East of London renders it one of the largest "Accident Hospitals" in the world. During 1912 no less than 130,885 cases received attention in the Receiving Room. In the Out-Patient Departments over 220,000 Patients are treated annually, and through the Wards nearly 17,000 Patients pass every year. The London Hospital presents, therefore, an unrivalled field for Clinical Instruction, and in its Wards and Out-Patient Department exceptional opportunities are offered for acquiring an extensive and practical experience of all phases of Disease.

Thirty-four Scholarships are awarded annually, and over 141 appointments are open to students after qualification.

Every provision is made for the suitable recreation and comfort of the Students.

Flourishing Clubs' Union, Athletic Ground, College Dining Hall, Students' Hostel.

For Prospectus and particulars apply to the Dean (Professor WILLIAM WRIGHT, M.B., D.Sc., F.R.C.S.), who will be glad to make arrangements for anyone wishing to see over the College or Dental School. [157]

LONDON FEVER HOSPITAL, ISLINGTON, N.

Patron: HIS MAJESTY THE KING.

President: The Rt. Hon. LORD BALFOUR OF BURLEIGH, K.T., G.C.M.G.

100,000 persons have been received and treated here since 1802. The Diseases admitted are Scarlet Fever, Diphtheria, Measles, and German Measles; and Typhoid when accommodation can be made available. The general ward fee is three guineas for the whole term of treatment. Private rooms, four guineas a week. Patients' payments amount to about a fifth of the annual outlay, the balance falling upon the funds of the Institution. This system encourages people who are willing to pay a part at least of the cost of their illness to do so rather than remain for treatment at home or cast themselves upon the rates. No help is received from the rates by this Hospital.

Annual subscribers of a guinea and upwards for more than one year are Governors, and donors of ten guineas and upwards in one sum are Life Governors. Domestic servants of Governors, and certain employés of subscribing business houses, clubs, and hotels, are promptly removed and treated free of charge. Application to the Secretary with a medical certificate will ensure prompt admission. The application can be made personally, or by letter, telegram, or telephone; 687 North. Bankers: UNION OF LONDON AND SMITHS, 50, Cornhill, E.C. W. CHRISTIE, Secretary (2)

IRISH DISTRESSED LADIES' FUND.

Instituted 1813.

WATFORD.

Incorporated 1845.

Treasurer—E. H. BOUSFIELD, Esq.

The Managers earnestly appeal for help towards the maintenance of the 500 Fatherless boys and girls now in the School from all parts of the **BRITISH EMPIRE**, representing all professions and callings.

7,200 such children have been maintained and educated, the majority having been provided with situations.

The Society is dependent upon **voluntary help** for **£15,000 annually**.

Annual Subscriptions from 10s. 6d., Life Subscriptions from £5 5s., and

DONATIONS will be gladly received.

Office: 3, CROSBY SQUARE, BISHOPSGATE, E.C.

ARTHUR P. BLATHWAYT, *Chairman*.
HENRY C. ARMIGER, *Secretary*. [159]

The METROPOLITAN VISITING and RELIEF ASSOCIATION,

Including the Metropolitan Portions of the Dioceses of London, Southwark, and St. Albans.

President—THE LORD BISHOP OF LONDON.

Treasurer—GENERAL CLIVE.

Secretary—GRANT MARSTON, Esq.

OFFICE: 46A, PALL MALL, S.W.

1. The aim of the Association is to Distribute such Funds as may be committed to it in grants to the Local Committees of poor parishes, proportionate to the needs of each.

2. The Clergy and District Visitors are the unpaid Agents of Relief, and possess the indispensable qualification of personal knowledge of the poor.

3. The overburdened Clergy are hereby greatly assisted in dealing with the distressing cases constantly before them. The religious persuasion of the poor is no obstacle to their relief.

4. Every penny contributed is devoted to the relief of destitution, all the working expenses being otherwise provided for.

Annual report will be forwarded on application to the Secretary.

Subscriptions and Donations to enable the Committee to carry on the work efficiently are greatly needed.

Cheques, payable to GRANT MARSTON, should be sent to the Office, 46A, Pall Mall, S.W., or to LLOYDS BANKING Co., LTD., 16, St. James's Street, S.W. [163]

METROPOLITAN HOSPITAL,

KINGSLAND ROAD, N.E.

Unendowed and Entirely Free to the Sick Poor.

Patron: HIS MAJESTY THE KING.

President: THE RIGHT HON. THE LORD MAYOR.

Chairman: THE RIGHT HON. LORD HOWARD DE WALDEN.

Treasurers: { LEOPOLD DE ROTHSCHILD, Esq., C.V.O.

{ THE HON. CHARLES T. MILLS, M.P.

Chairman of Committees: C. J. THOMAS, Esq., C.C., F.R.G.S.

SPECIAL APPEAL.

The Metropolitan Hospital is in the Kingsland Road, far removed from the rich, and ministers to a population of nearly half-a-million of the poorest inhabitants of London.

Approximately 1,800 In and 43,000 Out-Patients are treated annually, the attendances of the latter amounting to upwards of 163,000.

At the present time there are 123 beds available for In-Patients, including a Ward for Children, and two Wards, with special kitchens, &c., for Jewish patients.

Every care is taken to avoid abuse of the charity; and a trained Almoner is employed for this purpose and to form the necessary link between the Hospital and outside charities for providing patients with any extra help that they may require to secure the full and permanent benefit from their treatment.

The necessary annual expenditure is approximately £15,000 a year, but the income from invested property is under £600. Over £14,400 has every year to be collected from the charitable public.

Appeal is also made for Funds to build the NURSES' HOME on the Hospital's land behind the Ward blocks.

Bankers: { GLYN, MILLS & CO.

{ LLOYDS BANK LIMITED.

J. C. BUCHANAN,

Secretary and House Governor.

HELP—by donations, subscriptions and legacies—is urgently needed, and very earnestly solicited.

**ROYAL SOCIETY FOR THE PREVENTION
OF CRUELTY TO ANIMALS.**

Record of Work, 1912.

- 6,906** offenders prosecuted and convicted for cruelty to animals.
- 13** persons acquitted, but the Society's costs were remitted, which justified the Society's action.
- 25,784** persons guilty of minor acts of cruelty were cautioned by Inspectors or admonished in writing.
- 4,105** Sermons were preached on the subject of Mercy to Animals by Clergy and Ministers.
- 294,083** Essays were written by school children on the subject of Kindness to Animals, while many similar competitions were held in the country.
- 168** Practical humane slaughtering demonstrations were given in public and private slaughter-houses, resulting in
- 564** Humane killing appliances being purchased by local butchers.

The increased operations of the Society have drawn from the funds an amount vastly exceeding the yearly subscriptions. The Council need much greater assistance, and unless such additional support be extended to them, this most righteous cause of humanity must suffer.

President: Sir ARCHIBALD WILLIAMSON, BART., M.P.

Hon. Treasurer: E. C. THIN, Esq., 24, Chapel Street, Liverpool.

Secretary and Superintendent: MRS. LOUISA BIRT, Myrtle Street, Liverpool. [187]

Society for the Abolition of Vivisection

22, NORTHUMBERLAND AVENUE, LONDON.

According to the latest Parliamentary Return, the number of experiments made in 1912 was 83,599. A large number of these were inoculation experiments, and, as the report says, "are attended by no considerable, if appreciable, pain."

The pain does not lie in the operation itself, but in the after effects.

The animal so innocently operated on may have to live days, weeks or months with no anæsthetics to assuage its sufferings, and nothing but death to relieve.

The following is an example of what may ensue in the dog after the "little needle prick":—

"A dog was inoculated on January 23rd. In a few days it began to show signs of wasting, then the head became swelled and dropsical, and also the fore-legs and paws; later on this swelling disappeared, but the dog seemed very ill and weak, and there was a thickening of the membrane of both eyes. Two days before its death it refused food and seemed very thirsty. On February 20th it died."—Abridged from the *Journal of Pathology and Bacteriology*, March, 1906.

The Society offers to send a Lecturer, free of charge, to Literary Societies, League Meetings, &c. [193]

CONTRIBUTIONS TO THE SOCIETY GRATEFULLY ACKNOWLEDGED

Society for the Propagation of the Gospel in Foreign Parts

(Founded
1701).

15, TUFTON STREET, WESTMINSTER, S.W.

President—HIS GRACE THE ARCHBISHOP OF CANTERBURY.

Secretary—THE RIGHT REV. BISHOP MONTGOMERY.

The Society was brought into existence by the Action of Convocation and as a result of a petition to the King (William III.).

Its two-fold object is to minister to English settlers beyond the seas, and to propagate the gospel among the heathen with whom the settlers come into contact.

Its official President is always the **Archbishop of Canterbury**, and **every English Diocesan Bishop** is ex-officio a Member of its **Standing Committee**.

The Standing Committee makes **no attempt** to direct details of work from England, the money is transmitted to the Bishops abroad.

Funds are urgently needed to maintain the world-wide work of the Church. For further information apply to the Secretary, S.P.G., 15, Tufton Street.

The Society publishes the following:—

"**THE MISSION FIELD**," the official organ of the Society, an illustrated Magazine of 32 pages, published monthly, price 1d.

"**THE KING'S MESSENGERS**" (for children), $\frac{1}{2}$ d. per month.

"**THE CHURCH ABROAD**," for insertion in parish magazines and for free distribution, 1s. per 100.

"**THE HOME WORKERS' GAZETTE**," 32 pages, 1d. monthly, edited by Bishop Montgomery.

"**THE EAST AND THE WEST**," 1s. net, a quarterly review for the study of missionary problems.

Further information can be obtained from the Right Rev. the Secretary, S.P.G. Office, 15, Tufton Street, Westminster, S.W. Remittances should be made payable to the Treasurers of S.P.G. Cheques, Postal Orders, &c., to be crossed "Messrs. Drummond."

THE SEASIDE CONVALESCENT HOSPITAL, SEAFORD, SUSSEX.

Founded 1860. Patron: HIS MAJESTY THE KING. 120 Beds.

Unendowed and undenominational. Maintenance entirely dependent on public contributions. Convalescents of either sex over 10 years of age received throughout the year. Over 35,000 patients admitted. Annual expenditure, £3,500. Funds urgently needed.

Chairman: Sir WILLIAM BULL, M.P.

Treasurer: G. J. MARJORIBANKS, Esq.

Secretary: WILLOUGHBY BULLOCK, Esq.

Office: 12, CLIFFORD'S INN, E.C.

Bankers: Messrs. COUTTS, 440, Strand, W.C.

[154]

SONS OF THE CLERGY CORPORATION.

Founded A.D. 1655. Incorporated 1878.

For the Relief of Necessitous Clergymen, their Widows, Aged Single Daughters and Children, of every Diocese of England and Wales.

President—THE ARCHBISHOP OF CANTERBURY.

BY FAR THE OLDEST, LARGEST, AND MOST COMPREHENSIVE OF THE CLERGY CHARITIES.

Donors of 30 Guineas are elected Governors of the Corporation.

MORE ANNUAL SUBSCRIPTIONS AND DONATIONS ARE URGENTLY NEEDED.

Legacies also form a most important feature in the annual receipts of this ancient Society.

SIR PAGET BOWMAN, Bt., Regr., Corporation House, Bloomsbury Place, London, W.C. [188]

WEST LONDON HOSPITAL, HAMMERSMITH ROAD, W.

(Incorporated by Royal Charter, Nov. 1st, 1894.) Supported by Voluntary Contributions.

Patron—HIS MAJESTY THE KING.

President—His Royal Highness PRINCE ARTHUR OF CONNAUGHT, K.G., G.C.V.O., P.C.

Treasurer—Rt. Hon. LORD ROTHSCHILD, G.C.V.O., P.C.

Chairman—GEORGE F. MARSHALL, Esq.

It needs:—£63,000 to carry out the scheme of extension for which plans have been accepted, and by which provision is made for about 250 beds (including £10,000 urgently required to build a new Nurses' Home); and £15,000 annually to maintain the present work of relieving about 2,700 In-Patients and 47,000 Out-Patients. Its endowments yield an annual income of nearly £600. Wherefore it relies upon voluntary contributions for £15,400 wherewith to meet its annual expenditure of £16,000. For many years past the debt has averaged £10,000.

It is the nearest General Hospital for Hammersmith, Fulham, Acton, Chiswick, Brentford, and for large portions of Kensington and Barnes. The population it serves numbers more than 500,000 persons. It is entitled to receive and hold devises of freehold land or any other property.

A. BETTERIDGE, Secretary.
